

To whom this may concern:

I am filing an Exception in reference to Docket number C-2014-2428050. I disagree with the decision made and the statements that were presented. I did not purposely, back out of the agreement, but instead I fell on to difficult financial hardships. I am aware of the payment agreement of \$1507.00, but around the time the payment was due, my car was stolen and totaled, which put me into a financial bind. Even though, I have worked the same job for 15 years, I am not wealthy, I work 4 hours daily and I am laid off during the summer, therefore, it was quite difficult for me when my car was totaled. I was still required to make payments on the car, as well as trying to find another vehicle as quickly as possible, so I could be able to make the commute back and forth to work. Meanwhile, I had to pay for transportation, until I could afford a new car. Along with rent, other utility bills, providing food and taking care of a family of four and grandchildren, I was unable to meet the payment agreement, but I tried my absolute hardest and best to make a payment. I made a partial payment of \$400.00 towards the payment arrangement of \$1507.00, although it was not half, I knew it was the best I could do for the moment. I even tried to request an extension again, but that was rejected, which put even more of a financial strain on my wife and me. Again, I am aware of my failure to meet the payment agreement, but if I could get another extension, I am most certain I could stick to you the arrangement. I understand in the past, I may have had a difficult time, but in the present time, I am more financially stable. If at all possible, please grant me the additional extension. Thank you for your time and consideration.

Sincerely,

*Curtis B. Morgan*
