## Verizon Bona Fide Retail Request Program Report

In compliance with Section 3014(c)(9) of Act 183, Verizon hereby provides this *semiannual report of the number of requests received in the Bona Fide Retail Request (BFRR) Program for the period from August 18, 2006 through February 17, 2007, inclusive.*

During this six month period, Verizon received a total of 2,095 BFRR requests from customers in 756 communities in 256 different wire centers. Attachment A hereto provides detail on the number of BFRR requests received by Verizon exchange during this period and in total.

The community of Deer Lake in the Orwigsburg wire center in Schuylkill County met the deployment threshold on April 3, 2006. Broadband deployment has been completed and DSL service was available as of December 22, 2006.

The community of East Berlin in the East Berlin wire center in Adams County reached the deployment threshold on April 20, 2006. Broadband deployment has been completed and DSL service was available as of December 4, 2006.

The community of New Park near Stewartstown in the Stewartstown wire center in York County reached the deployment threshold on April 25, 2006. Broadband deployment has been completed and DSL service was available as of January 8, 2007.

Two communities in Haycock Township in the Quakertown wire center in Bucks County reached the deployment threshold on May 25, 2006. Broadband deployment has been completed and DSL service was available as of February 2, 2007.

17 communities reached their BFRR deployment threshold during this six month period. The current disposition of these communities, along with the 13 other communities already in various stages of deployment, is as follows:

\*The count of working lines in Verizon North CSAs is a manually intensive process. In most Verizon North cases, the manual counting of lines halted at 200 lines. CSAs with 200 or more lines have a deployment threshold of 50, the maximum number of BFRRs that trigger DSL deployment.

Some entries in the "total working lines" column have two numbers, one of them in parentheses. Currently, some lines have DSL access from an adjoining CSA. These lines have been removed from the working line count, yielding the parenthetical number. The BFRR threshold is calculated on this lower number of working lines that do not have access to DSL.
