**Re: Letter of Notification Filing of West Penn Power Company for the Yukon-Smithton-Shepler Hill Junction 138 kV Transmission Line Structure Installation Project in South Huntingdon Township, Westmoreland County, Pennsylvania;
Docket No. _____**

Dear Secretary Chiavetta:

Enclosed for filing is a Letter of Notification requesting approval for the installation of a new structure on the Yukon-Smithton-Shepler Hill Junction 138 kV Transmission Line. This Letter of Notification is filed pursuant to the Commission's regulations at 52 Pa. Code §57.72(d)(1)(v). Copies of this Letter of Notification or a Notice of Filing have been served upon the parties as required by 52 Pa. Code § 57.74 and noted on the attached Certificate of Service.

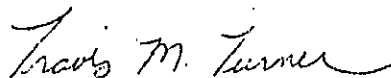

West Penn Power Company requests that the Commission approve the Company's LON by the April 23, 2015 public meeting. The Company experienced a delay in obtaining the sole necessary right of way agreement. West Penn Power Company has work scheduled for May 2015 for the transmission project, which is relatively minor in terms of work scope but important for transmission purposes.

Please date stamp the additional copy, identify the assigned docket number, and return it to me in the enclosed, postage-prepaid envelope. If you have questions pertaining to this matter do not hesitate to contact me.

Rosemary Chiavetta, Secretary

Docket No. _____

**LETTER OF NOTIFICATION FILING FOR THE
YUKON-SMITHTON-SHEPLER HILL JUNCTION
138 KV TRANSMISSION LINE STRUCTURE
INSTALLATION PROJECT**

To The Pennsylvania Public Utility Commission:

West Penn Power Company ("West Penn"), a FirstEnergy company, submits a Letter of Notification for the installation of a new structure within an existing transmission line right-of-way. In support thereof West Penn submits as follows:

1. Pursuant to 52 Pa. Code §57.72(d) West Penn submits this Letter of Notification ("LON") requesting that the Pennsylvania Public Utility Commission ("Commission") approve the Yukon-Smithton-Shepler Hill Junction 138 kV Transmission Line Structure Installation Project ("Project") as described herein. The Project falls within Commission regulations at 52 Pa. Code §57.72(d)(1)(v), pertaining to a line that is to be reconstructed so as not to substantially alter the right of way, thus allowing the utility to file a LON in lieu of a full siting application.

2. West Penn is a public utility subject to the jurisdiction of the Commission over the siting and construction of transmission lines pursuant to Chapter 57, Subchapter G, of the Commission's regulations. 52 Pa. Code §57.71 et seq.

The address of West Penn's principal business office is:

West Penn Power Company
800 Cabin Hill Drive
Greensburg, PA 15601

3. This Letter of Notification filing consists of the following:

- Letter of Notification
- **Exhibit No. 1** – General Location of Project
- **Exhibit No. 2** – General Layout of the Project
- **Exhibit No. 3** – Structure
- Certificate of Service

4. The attorney representing West Penn in this matter authorized to receive notices and communications on its behalf is:

John L. Munsch
FirstEnergy Service Company
800 Cabin Hill Drive
Greensburg, PA 15601
(724) 838-6210
Pa. Attorney ID #31489

5. West Penn also requests that a copy of all notices and communications regarding this matter be sent to:

Travis M. Turner, Engineer
Energy Delivery, Transmission and Substation Engineering
FirstEnergy Service Company
5001 NASA Blvd.
Fairmont, WV 26554
(304) 534-7456

6. The proposed Project is located in South Huntingdon Township, Westmoreland County, approximately 0.17 miles southwest of the intersection of Fitz Henry Road and Wilkinson Road.

General Description of the Proposed Project:

7. West Penn proposes to install one (1) wood H-frame dead-end tangent structure with an approximate pole height of 70 feet, as shown in **Exhibit 3**, within the existing right-of-way of the Yukon-Smithton-Shepler Hill Junction 138 kV Transmission Line between two existing structures. The existing conductor and shield wire will remain. A topographic map of the area showing the location of the Project is attached hereto and incorporated herein as **Exhibit 1**. The general layout of the Project is provided in **Exhibit 2**.

8. The Project will be constructed on an existing West Penn right-of-way with a minor alteration of an individual right of way agreement. All necessary rights of way have been obtained by West Penn.

9. Attached hereto as **Exhibits 1** through **3**, and made part hereof, are:

- **Exhibit 1** shows the general location of the Project on a map which is a partial copy of the United States Geologic Survey, Westmoreland and Fayette County, Quadrangle; 40079-B6.
- **Exhibit 2** shows the general layout of the Project.
- **Exhibit 3** shows the configuration for the 138 kV wood H-frame dead-end tangent structure.

Statement of Need:

10. This Project is needed to increase the rating of the Yukon-Smithton-Shepler Hill Junction 138 kV Transmission Line. Installing the new structure increases clearance at the location to allow the transmission line to operate up to temperature of 212°F. Presently, the conductor is limited to 167°F due to clearance. Increasing the conductor operating temperature from 167°F to 212°F increases the conductor rating from 234/297 MVA (summer normal/summer emergency) to 308/376 MVA (summer normal/summer emergency). The line rating increase is necessary to mitigate Planning Criteria violations identified by FirstEnergy and PJM.

The Project is needed to ensure the West Penn transmission system can be operated reliably under NERC Category C5 multiple circuit tower line (i.e. “common structure”) outage conditions. Specifically, loss of the Yukon-Charleroi #1 and Yukon-Charleroi #2 138 kV lines results in an overload (approximately 108%) of the Smithton-Shepler Hill Junction section of the Yukon-Smithton-Shepler Hill Junction 138 kV line. The Project mitigates the potential Planning Criteria violation and ensures compliance with FirstEnergy and PJM Transmission Planning Criteria.

PJM is the Regional Transmission Operator responsible for the reliable operation of the interconnected transmission system for the bulk electric system portion of the West Penn system. PJM is also the registered Transmission Planner for the West Penn system, and is responsible for demonstrating compliance with the NERC standards. Generator deliverability, load deliverability, and common mode tests have been developed by PJM to successfully demonstrate compliance with NERC standards.

Results of the PJM analysis have been shared with PJM stakeholders and the general public. The Project, assigned PJM baseline RTEP ID b2170, was presented to the PJM Transmission Expansion Advisory Committee (“TEAC”) on November 5, 2012, and can be found on the PJM website.¹ The TEAC Recommendations to the PJM Board, PJM Staff Whitepaper, dated December 13, 2012, can be found on the PJM website² which contains additional information regarding the need for this project.

Safety Considerations:

14. Design, construction and operation of the Project will meet or exceed the requirements specified in the latest revision of the National Electric Safety Code (“NESC”) and all applicable safety standards established by the Occupational Safety and Health Administration (“OSHA”). All work shall be done in accordance with NESC, OSHA, and any applicable local, state or federal requirements.

Construction Schedule and Cost:

15. Construction of the Project is expected to commence on or about May 1, 2015, and the proposed in-service date for the Project is June 1, 2015.

16. The cost of the Project is expected to be approximately \$ 132,000 to be assumed by West Penn.

Filing Date:

17. This Letter of Notification Filing is being sent to the Commission on March 2, 2015 via overnight delivery. The filing date shall be deemed to be March 2, 2015. As required by 52 Pa. Code §§ 57.72(d)(4), West Penn states:

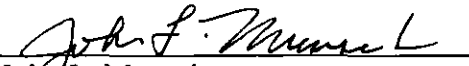

The Commission will review and, by order, approve or disapprove a letter of notification. If the Commission approves a letter of notification, the HV line shall be located and constructed without the application process set forth in this subletter. If the Commission does not approve the letter of notification, its order shall direct the applicant to comply with the application process set forth in this subchapter.

Certificate of Service:

18. A copy of this Letter of Notification filing will be served by certified mail upon those who are entitled to receive a copy of an application or notice of filing an application as set forth in 52 Pa. Code §§ 57.74, in accordance with the provisions of 52 Pa. Code §§ 57.72(d)(3), and as shown on the attached Certificate of Service.

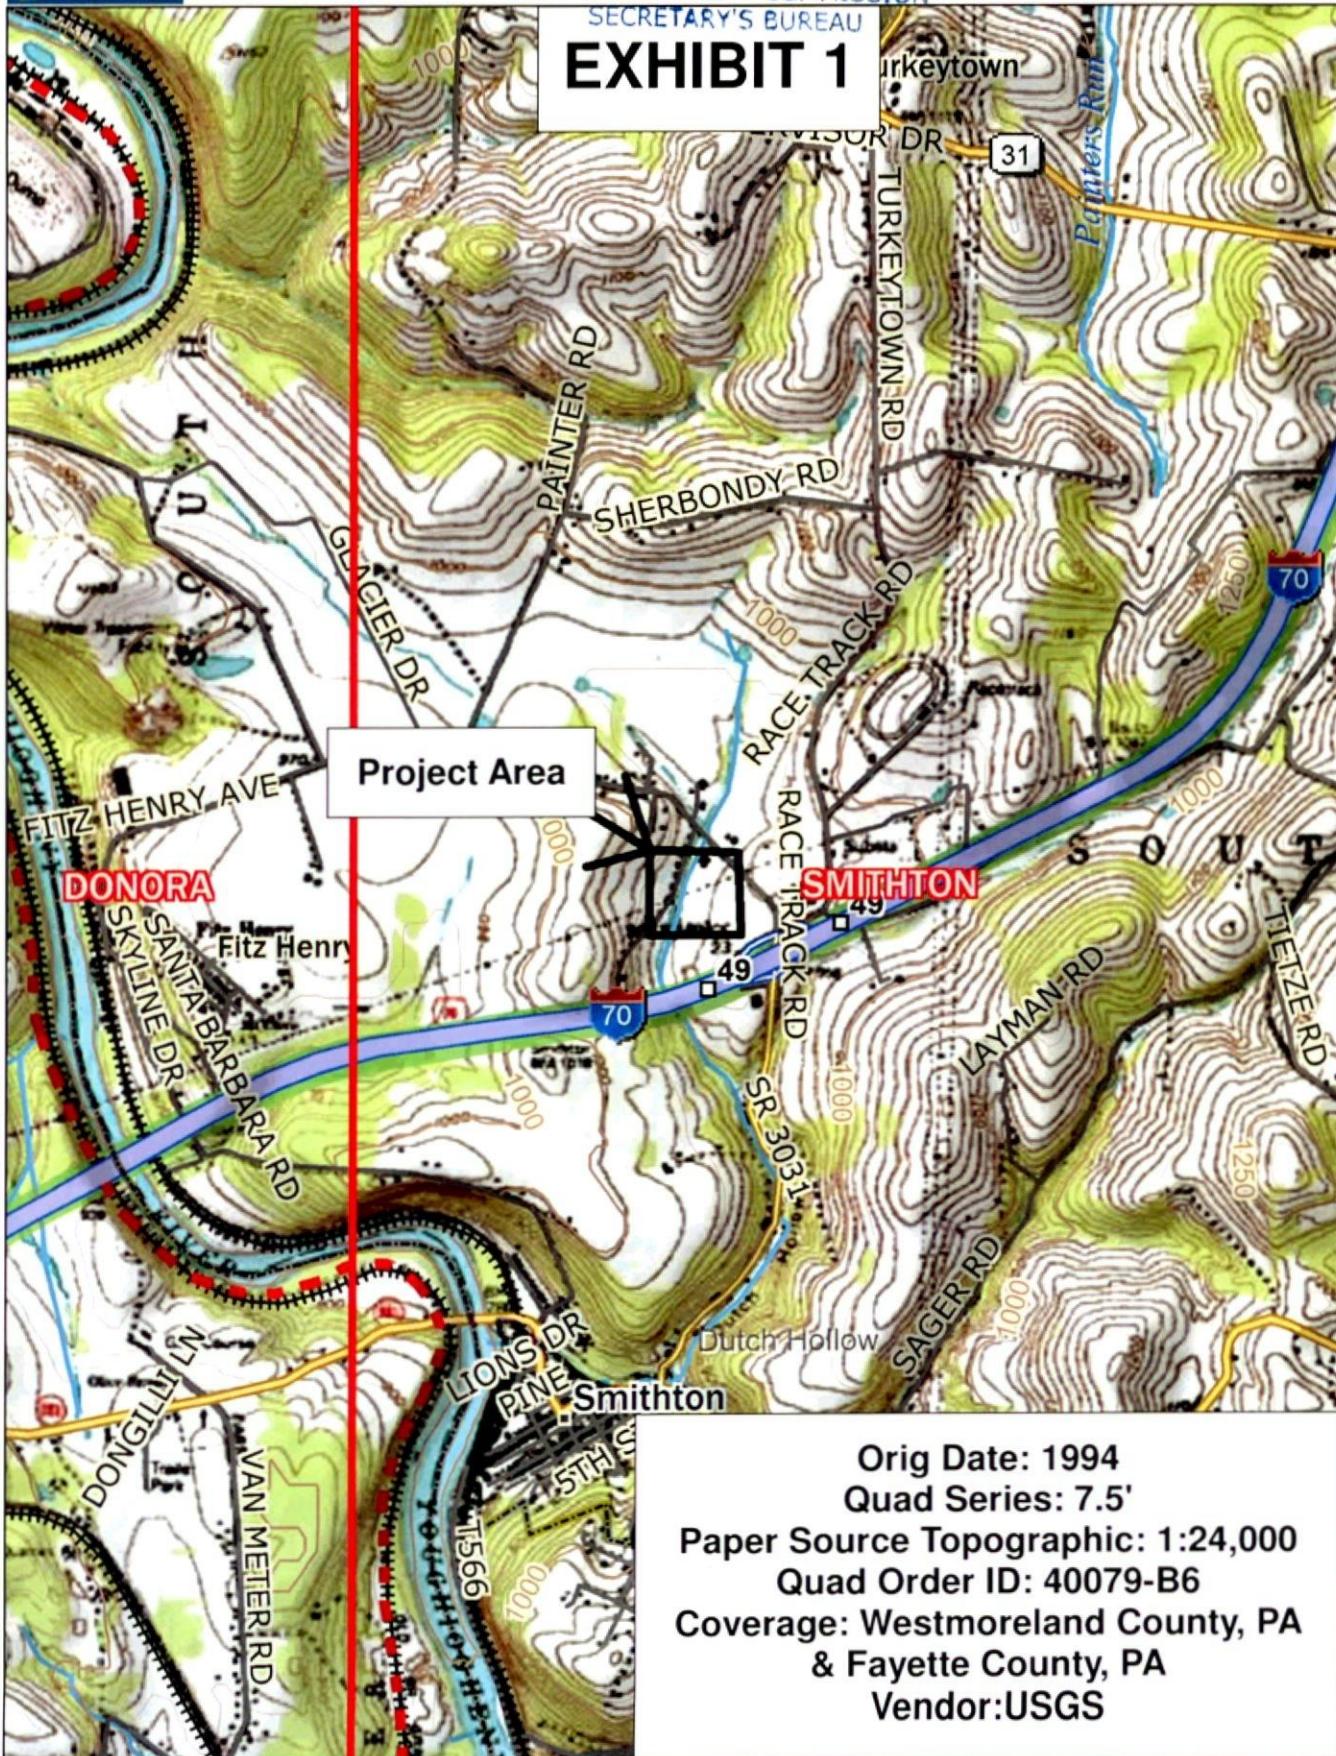

WHEREFORE, West Penn Power Company respectfully requests that the Commission review and approve this Letter of Notification.

TRANSMISSION LINE STRUCTURE INSTALLATION PROJECT**

Dear Sir or Madam,

Enclosed for your information, is a copy of West Penn Power Company's ("West Penn"), a FirstEnergy Corp. company, Letter of Notification for the Yukon-Smithton-Shepler Hill Junction 138 kV Transmission Line Structure Installation Project ("Project"). West Penn is a public utility providing electric distribution and transmission service subject to the jurisdiction of the Commission over the siting and construction of transmission lines pursuant to Chapter 57, Subchapter G, of the Commission's regulations. 52 Pa. Code §57.71 *et seq.*, and as such, this Project is subject to Pennsylvania Public Utility Commission jurisdiction. The Letter of Notification has been developed in the format described in Commission regulations at 52 Pa. Code §57.72(d).

As explained in the Letter of Notification, West Penn is proposing to install a new transmission line structure within the existing Yukon-Smithton-Shepler Hill Junction 138 kV Transmission Line. The proposed project is located in South Huntingdon Township, Westmoreland County Pennsylvania. The new transmission line structure will be located on existing right-of-way on your property. Exhibit 1 of the Letter of Notification is a map depicting the general location of the project.

I'll be glad to answer any questions concerning this matter. You can contact me at 304-534-7456.

Sincerely,

Travis M. Turner, Engineer III

**LETTER OF NOTIFICATION FILING FOR THE
YUKON-SMITHTON-SHEPLER HILL JUNCTION 138 KV
TRANSMISSION LINE STRUCTURE INSTALLATION PROJECT**

Dear Mr. Rigone,

Enclosed for your information, is a copy of West Penn Power Company's ("West Penn"), a FirstEnergy Corp. company, Letter of Notification for the Yukon-Smithton-Shepler Hill Junction 138 kV Transmission Line Structure Installation Project ("Project"). West Penn is a public utility providing electric distribution and transmission service subject to the jurisdiction of the Commission over the siting and construction of transmission lines pursuant to Chapter 57, Subchapter G, of the Commission's regulations. 52 Pa. Code §57.71 *et seq.*, and as such, this Project is subject to Pennsylvania Public Utility Commission jurisdiction. The Letter of Notification has been developed in the format described in Commission regulations at 52 Pa. Code §57.72(d):

As explained in the Letter of Notification, West Penn is proposing to install a new transmission line structure within the existing Yukon-Smithton-Shepler Hill Junction 138 kV Transmission Line. The proposed project is located in South Huntingdon Township, Westmoreland County Pennsylvania. The new transmission line structure will be located on existing right-of-way. Exhibit 1 of the Letter of Notification is a map depicting the general location of the project.

I'll be glad to answer any questions concerning this matter. You can contact me at (304) 534-7456.

Sincerely,

Travis M. Turner, Engineer III
