

COLUMBIA GAS OF PENNSYLVANIA INC.

R-2015-2468056

Data Requests

PSU - Set 1

Question No. PSU 1-001:

List and identify all delivery points of the Columbia distribution system with each interstate pipeline. For each delivery point:

- a. Identify the year the point of delivery was placed into service.
- b. Identify the original cost, depreciable lives of the interconnection facilities, and present net rate base (original cost minus depreciation) of each such facility, and the amount, if any, of customer contributions to construction of those interconnections.
- c. Identify the geographic area served by Columbia from that connection
- d. Identify how many customers take service from that connection that are served under the Main Line tariffs of the Company (MLSS, MLDS, Class 1 or Class 2) and which rate schedule they are served under.
- e. Identify the percentage of annual throughput that is system supply gas and the percentage that is gas for transportation customers (including Choice).
- f. For each delivery point, identify whether it is in service and if not explain why not.
- g. For each delivery point, identify all distribution or transmission lines on the LDC side of the delivery point that Columbia has (i) taken out of service (ii) plans to take out of service and (iii) explain all reasons for doing so including providing all documents considered by Columbia in making such decision, (iv) identify the time such decision was made, and (v) produce all associated studies or analysis.

Response:

- a. Please see PSU 1-001 (a) Attachment A.
- b. Please see PSU 1-001(b) Attachment A.
- c. Will supplement.
- d. Will supplement.
- e. Columbia does not identify which delivery point serves individual Choice customers. Therefore, volumes delivered for Choice customers are included in the volumes listed as Sales. Please see PSU 1-001(a) Attachment A.
- f. Please see PSU 1-001 (a) Attachment A.
- g. No specific documentation on segment of pipe removed is maintained on a project by project basis unless approvals in accordance with engineering policy are needed. Columbia regularly removes pipe from service as part of its normal pipeline replacement program. Prior to taking the section of pipeline out of service, the engineering department determines how to best maintain the system after the section of pipeline has been retired.

Data Requests

PSU - Set 1

Question No. PSU 1-001-SUPPLEMENTAL:

List and identify all delivery points of the Columbia distribution system with each interstate pipeline. For each delivery point:

- a. Identify the year the point of delivery was placed into service.
- b. Identify the original cost, depreciable lives of the interconnection facilities, and present net rate base (original cost minus depreciation) of each such facility, and the amount, if any, of customer contributions to construction of those interconnections.
- c. Identify the geographic area served by Columbia from that connection
- d. Identify how many customers take service from that connection that are served under the Main Line tariffs of the Company (MLSS, MLDS, Class 1 or Class 2) and which rate schedule they are served under.
- e. Identify the percentage of annual throughput that is system supply gas and the percentage that is gas for transportation customers (including Choice).
- f. For each delivery point, identify whether it is in service and if not explain why not.
- g. For each delivery point, identify all distribution or transmission lines on the LDC side of the delivery point that Columbia has (i) taken out of service (ii) plans to take out of service and (iii) explain all reasons for doing so including providing all documents considered by Columbia in making such decision, (iv) identify the time such decision was made, and (v) produce all associated studies or analysis.

Response:

- a. Please see PSU 1-001 (a) Attachment A.
- b. Please see PSU 1-001(b) Attachment A.
- c. Please see PSU 1-001 (c) Attachment A.
- d. Please see PSU 1-001 (c) Attachment A.
- e. Columbia does not identify which delivery point serves individual Choice customers. Therefore, volumes delivered for Choice customers are included in the volumes listed as Sales. Please see PSU 1-001(a) Attachment A.
- f. Please see PSU 1-001 (a) Attachment A.
- g. No specific documentation on segment of pipe removed is maintained on a project by project basis unless approvals in accordance with engineering policy are needed. Columbia regularly removes pipe from service as part of its normal pipeline replacement program. Prior to taking the section of pipeline out of service, the engineering department determines how to best maintain the system after the section of pipeline has been retired.

COLUMBIA GAS OF PENNSYLVANIA INC.

R-2015-2468056

Data Requests

PSU - Set 1

Question No. PSU 1-001-SUPPLEMENTAL:

List and identify all delivery points of the Columbia distribution system with each interstate pipeline. For each delivery point:

- a. Identify the year the point of delivery was placed into service.
- b. Identify the original cost, depreciable lives of the interconnection facilities, and present net rate base (original cost minus depreciation) of each such facility, and the amount, if any, of customer contributions to construction of those interconnections.
- c. Identify the geographic area served by Columbia from that connection
- d. Identify how many customers take service from that connection that are served under the Main Line tariffs of the Company (MLSS, MLDS, Class 1 or Class 2) and which rate schedule they are served under.
- e. Identify the percentage of annual throughput that is system supply gas and the percentage that is gas for transportation customers (including Choice).
- f. For each delivery point, identify whether it is in service and if not explain why not.
- g. For each delivery point, identify all distribution or transmission lines on the LDC side of the delivery point that Columbia has (i) taken out of service (ii) plans to take out of service and (iii) explain all reasons for doing so including providing all documents considered by Columbia in making such decision, (iv) identify the time such decision was made, and (v) produce all associated studies or analysis.

Response:

- a. Please see PSU 1-001 (a) Attachment A.
- b. Please see PSU 1-001(b) Attachment A.
- c. Please see PSU 1-001 (c) Attachment A.
- d. Please see PSU 1-001 (c) Attachment A.
- e. Columbia does not identify which delivery point serves individual Choice customers. Therefore, volumes delivered for Choice customers are included in the volumes listed as Sales. Please see PSU 1-001(a) Attachment A.
- f. Please see PSU 1-001 (a) Attachment A.
- g. No specific documentation on segment of pipe removed is maintained on a project by project basis unless approvals in accordance with engineering policy are needed. Columbia regularly removes pipe from service as part of its normal pipeline replacement program. Prior to taking the section of pipeline out of service, the engineering department determines how to best maintain the system after the section of pipeline has been retired.
