To all Parties:

I am writing this in response to decision that I received in reference to case docket number C-2015-2481758. I do realize that you may receive these types of issues all the time and I am asking for a little help because of my health issues. I fell behind on bill due to issues I was having and was unable to work. I am a 42 year old mother of 3 kids and have been diagnosed with early stages of dementia along with other things. Due to the dementia I depended on someone else to assist me with things only to find out they were not paying the things that should have been paid. I am reaching out to just be granted a chance to try to get back on a reasonable payment agreement. I have read that when arrears are due to a previous arrangement that sometimes it is not possible for a new one to be granted. I am just asking for the PUC to please make an exception to allow me to try to get back on track with my bill.

Thanks in advance for your understanding and any help you can give me this matter I would greatly appreciate it.

Sincerely

Stephanie Mobley (Peco Account holder)
