

To the Secretary of the Commission, I Charles Brown do not agree with the decision made. And I'm not understanding the reason made by the Judge. Things still aren't explain to me about how they came to these decision made base on the bill number and how they came up with their information. Also the fact I was taken off the CRP program without my consent or never explain to why more so why it was done. What burden proof did they establish by what evidenc of proof they never even enter the property or never met the Land Lord at 1025 w Dakota Street. Plus what does the Parts and Labor Plan have to do with my dispute. I ran electric Appliances for close to two year at the property and there was not no working heater on the property it was broke. The Land Lord was in the process of getting a new one but never got it hook up was I was there. He got another stove at one time the gas came through at one time because the Land Lord had got rid of the old stove it had leaks. And the only reason why the Fire-department came to 1025 w Dakota Street because the property next door was on Fire. And they came over to check the walls.

From Charles Brown
