SECTION 3 - ACCESS SERVICES

3.2 Transport Service (cont'd)

Transport Service portion of central office switching and central office circuit equipment. The Transport Mileage rate applies to transmission facilities provided by the Company between the Company's end office and a remote switching facility.

For purposes of determining Transport Mileage measurement, distance will be measured from the wire center that normally serves the customer designated premises to the terminating end office, which may be a Remote Switching Module(s).

Where transmission facilities permit, the individual transmission path between the Customer's designated premises and the first point of switching may at the option of the Customer be provided with the following optional features at no charge:

Supervisory Signaling
Customer Specified Entry Switch Receive Level
Customer Specification of Local Transport Termination.

The Common End Office Trunk Port minute-of-use rate provides for the use of the shared end office trunk ports for the termination of common transport trunks.

3.3 End User Access

End User Access provides Customers with the access from end office switches to end users, for use in furnishing their communications services.

Customers may be accessed via lines, trunks, pay telephone lines, or other facilities, terminated on a central office switch, which are provided under the local exchange services tariffs of the Company.
