7.2 Dynamic T

The Dynamic T service provides customers with 1.5 Mbps of highly flexible, high capacity bandwidth that can be dynamically changed from up to 24 channels of voice capacity to 1.5 Mbps of Internet bandwidth or any combination of either at any given moment. The Customer has the flexibility of bundling local exchange service and data services including Internet access*. These voice and/or data services are provisioned on a T-1 utilizing US LEC Gateways and the required US LEC provided and Managed Integrated Access Devices (IAD) that allow intermingling of the voice and Internet on the T-1 which can total up to, but not exceed, 1.544 Mbps. The service can be converted to lines, PRI or T-1 to interface with the customer's existing equipment. Exchange Access Optional services and Miscellaneous Service rates contained in Sections 6 and 8 of this tariff are not included in Dynamic T monthly recurring rates. All Dynamic T configurations are subject to a minimum 1-year term commitment. An analog gateway is required for analog line terminations. Optional bundles of regulated and non-regulated services described in 7.2.1 are available in addition to the basic Dynamic T configuration.

Dynamic T Customer Voice traffic has priority over Internet traffic.
