Dear Judge Joel,

Thank Jesus for you, I am sure you are a very honorable God fearing man. Surely, Jesus has placed you in this position for good reason. You must be very fair with great wisdom. Thanks be to God, Alleluia. God set up judges, this we know, there is no question about it....but we also know that the devil copied God, setting up his own corrupt judges as we found out in the sodomite ruling when the legislative branch of government went into anarchy against God. Nevertheless, I trust Jesus is your God because He is the only true God, the living God, the lamb. He is not a trinity.

Long story short sir, I am here before you today in a fight for womens rights. You might even support womens rights yourself. If so, thats great. But make no mistake, I do not support the right for women to murder their babies, which the government will fund (help) women who want to do that...but they do not help all women who want to nurse/raise their babies. What I am saying to you is this, Mr. Judge, super richs moms (born rich or married rich) can nurse/raise their babies without threats & utility service disruption....likewise, the super poor (with cash assistance or in public housing) also have money to ward off the ganster utility people who love money more than people. But I represent a whole different class of women, the middle class full time moms. Now I am not speaking about part time moms, because part time moms also have money for necessities in life. I am a full time mom, who didnt marry rich and is evidently not considered poor enough to get cash assistance because Dad is USMC medically seperated vet who gets very little himself (536 month). Why I am entitled to \$nothing\$ and syrian refugees can get something \$\$ it nearly a cause for revolt. I too was in the USMC, and I am not a deadbeat as I worked for 20 years before I became a mom, making over 40K a few times. Its not like I haven't contributed, the social security statement proves I did, it promises me some \$1500 a month when I can't work..yet they be ganster too, dragging their feet long time, grossly negligent, even refusing to help moms.

Seems other women can get a buck to watch my kid, but I can't get buck to watch my own kid. Its sounds kids for cashy to me. I will not let pagans raise my child and catholicism is a cult.

What I am trying to say to you, honorable judge is that I AM ISRAEL. I am one of Gods people and ruling in my favor can surely bless you. Surely, I think everybody agrees that babies cannot watch themselves. Yet this government I funded for sooo many years, seems to think momming is not important job. When in truth I tell you, momming job is no less important than burger flipper job. One could agrue its even more important. Yet somehow or another...I have been left with no money, other than what people give me out of the kindness of their heart. When I was working for the devil, I had money to buy soap, to drive financially responsible, and to pay bills. But now, that I have decided to obey God & have a baby...which is required for my salvation as women will be saved in childbearing, I have been left destitute by a government more than willing to people. Jesus provides, theres no doubt about that, but he has not provided me enough money to pay all these people that think I owe them.

At one time, Negro people used to complain they had to sit in the back of the bus....to this I say....pffffffftt....full time moms (& other poor people w/o money) are not even allowed on the bus.

Repent the Kingdom is coming here!! Jesus the merciful is coming. Do not rely on money, as money cannot buy your way in. So, all I am asking for you today, is to please grant middle class moms the same opporunity to be a mom as richs moms & poor moms. Now that will require, I would imagine, money for all moms to pay the utility people..or just tell them not to turn off the utilities. Cutting off peoples supply lines, be it water or heat is something one does to the enemy, its a war manuever, a tactic done in war. Its certainly not something civilized people do to one another. Did you know there was a war on the poor? Did you know there is a war on American citizens? It's called the war on drugs.. Did you know that Cannibas is paper, fuel, clothing, food, medicine, and building material? Did you know that the people opposed to cannibas are likened to environmental terrorists as we cannot continue to chop down the forest to make wrapping paper to throw it away and expect to continue breathing. Please end the war on americans that was launched by the BAR associates. (LAW MAKERS)

Thank you AMY Kush 258 Frederick Street, Kingston, PA 18704
