Re: John Bradley Whitlock v. PPL Electric Utilities Corporation
Docket No. C-2016-2526939

The purpose of this letter is to provide a status update on the potential 69 kV transmission line project that is the subject of the above-referenced complaint.

On January 27, 2016, John Bradley Whitlock (“Complainant”) filed a complaint with the Pennsylvania Public Utility Commission (“Commission”) challenging one of the potential routes for the proposed 69 kV transmission line between the planned new Williams-Grove 230-69 kV Substation in Upper Allen Township and the existing Carlisle Barracks 69 kV Tap in Silver Spring Township.

On February 22, 2016, PPL Electric Utilities Corporation (“PPL Electric”) filed an Answer and Preliminary Objections to the complaint requesting that the complaint be dismissed in its entirety for lack of Commission jurisdiction and legal insufficiency. In its Preliminary Objections, PPL Electric further explained that the complaint is not ripe because no route has been selected for the proposed transmission line project and that the complaint may become moot if PPL Electric ultimately does not move forward with the proposed project.

On March 21, 2016, PPL Electric issued a public notice announcing cancellation of the proposed Williams-Grove Carlisle 69 kV transmission line. Specifically, the notice indicated:

As a result of continued evaluation of current and future electric grid needs in the Cumberland County region, PPL Electric Utilities has decided to cancel

construction of the proposed Williams Grove-Carlisle transmission line at this time.

A copy of the public notice was sent to the Complainant and is being provided with this letter. Please contact me at 717-612-6021 should you have any questions regarding this matter.

Copies of this letter are being served as indicated on the attached certificate of service.

Respectfully submitted,

Lindsay A. Berkstresser

Dear resident,

As the result of continued evaluation of current and future electric grid needs in the Cumberland County region, PPL Electric Utilities has decided to cancel construction of the proposed Williams Grove-Carlisle transmission line at this time.

Because of the rapid growth in electricity demand in the region, we believe a more comprehensive solution may be necessary to improve the reliability of service for homes and businesses.

Cumberland County is one of the fastest growing counties in the state. The resulting increased power demand could drive the need for investments in additional power lines or substations in the region in the future.

We still are moving ahead with PPL's other planned projects in eastern Cumberland County – including the Williams Grove substation, new power lines running north from the substation, and the rebuilding of aging power lines mostly in Upper Allen Township. These projects need to be completed within the next several years to help prevent power outages for homes and businesses.

As we identify future projects required in the area, we will communicate them. Our focus remains on working to reduce the number and duration of outages and continuing to provide you with safe, reliable electric service.

Thank you again for your interest and input. Should you have additional questions, you still can call the toll-free project number at 1-855-310-3446.

Sincerely,

A handwritten signature in black ink, appearing to read "J M Long", written in a cursive style.
