re: C 2016-2533227 Amy Kush Vs. PA American Water — TREASON
Date July 6th, 2016

Dear Judge,

Thank you for trying to resolve the issue of righteousness with regards to debt collection, and whether civil war like collection methods are appropriate. Surely I agree there are some costs involved, and I am not opposed to paying some cost. Howeverful I find it distasteful that businesses who use more of our resources do so at a cheaper rate than residential customers who often use less than business. Its almost as if we are penalized for using less. But I am ok with paying some. Even if you ruled that it was treacherously wrong to terminate peoples supply line (of water), I still think MOST people would have no problem paying their fair share...when they can. Sometimes people can't and for many reasons and I understand that, I support some charity water in those cases.

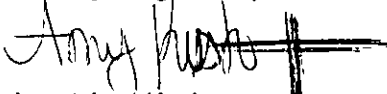

I too had been left out of the money deal for some time. Did you know that Moms...full time moms (not part time moms) but full time moms are indigent? That as long as I was not a mom and was working for money, I was equal to man, I was not dependant on man. I could buy my own soap. But BAM the minute I decide to live a life as God intended and become a mom...BAM Indigent, no longer equal, no longer able to buy my own soap, use the post office or even drive legally. I, a middle class mom...no less a citizen than the super poor moms who have cash assistance or the super rich who have money given to them...yet I am not even allowed on the bus. At one time, some people used to complain they had to sit on the back of the bus, to this I say pffffffftth the middle class full time moms are not even allowed on the bus, (unless we beg money off others first)

And surely, for the past 2.5 years, I have been solely dependant on extremely poor dad (500/month) AND my family and his for the basic necessities. Do you have any idea how bad that feels? To once have been able to buy my own maxi pads..but now can't. I am 41 years old I bought two brand new cars and two homes and now that I chose LIFE (to be a mom) I can't even mail a letter. **If corporations are people, then they are not exempt from Gods law of Charity.**

Again, I am not asking for it to be free, but I totally sensed your concern that everybody would stop paying if they found out that its illegally treasonous to turn off water. I sensed your concern about protecting their profits, hopefully you sensed my concern about protecting the welfare of the people. The public safety should supercede the profits and retirement packages of a small private corporation.

Again Your Honor, I am hoping that rule in my favor, and help advance the Kingdom of Heaven, as surely, those horrible greedy actions dont occur there, where everyone Fears JESUS, our God. But the bible also tells, that sometimes The Lord blinds the eyes of judges, (cause the people are just such wicked sinners they deserve to have war launched upon them), But I have asked you to end the war on ME, since you wouldnt let me speak for the people. Now speaking of the people, someone really needs to explain to me, why someone can file harrasment charges on someone else, and the docket be listed as The Commonwealth of Pennsylvania vs. S0-n-s0. Its almost as if, One person speaks for the commonwealth, yet you wouldnt let me represent the commonwealth and I have authority IN the commonwealth, I am Agent Amy Kush 499415. I am a breast feeding mother no less worthy of water than all the other occupations out there...which have water.. a discounted rated.. I am not a business, I am a ministry. People come here, they use my toilet, they shower. I have succeeded in getting some money from the Lord, and have paid my bill in full, but it is still too high for me...as its not all mine usage, it is a public service I provide..it is a public service that Pa American Water provides, yet they war against me.

Thank you again for your time,

Agent Amy Kush
Commonwealth of Pennsylvania, #499415
