Subject: Ref: Exception Submitted to Initial Decision
Granting Preliminary Objection F-2016-2542081
PECO AMI/Smart Meter Complaint

Dear Rosemary Chiavetta:

Please find my correspondence to you concerning the above subject to be considered a direct plea for help involving the above subject. I take exception to the Initial Decision as contained in your August 5, 2016 correspondence to me. The decision by the law judges has placed a great burden on myself and my family. I have not slept for the last six nights my blood pressure is way above normal and I have a scheduled an appointment with my physician in other words I am terrified by this decision. I cannot get out of my mind the thought of us going to sleep some evening and being awoken in a fiery and smoke filled home caused by the installation of a smart meter malfunction. We are concerned with the loss of our privacy, the termination of our electric service through no fault of our own. Must I capitulate under a process of duress for which there is no common sense solution to a forced regulatory government law which I perceive to be misguided. I am not a lawyer familiar with all the legal terminology contained in the decision. We are senior citizens trying to maintain a certain quality of life and the smart meter interruption into our life has made a terrible impact on that quality. Again I ask for consideration of delay until a process can be developed which will provide relief from an issue which affects the safety, health, Privacy, and our quality of life.

Sincerely,

Alfred F Ottaviano
