To The Pa Public Utility Commission Secretary
C-2016-2552834

I am writing this as a Brief for a Petition interlocutory review request I filed on 31 August 2016.

Ms. Krupka summited exhibits 1,2,3 to the hearing on 31 August 2016 regarding the docket number in question. The evidence was summited over my objections. I objected because it has nothing to do with my complaint of the power going out on my 30th Wedding anniversary 16 June 2016. That is what my complaint is about, not billing. Nor does PPI keep all records of conversations they receive from customers. I did not call on my Wedding anniversary because I had other things on my mind than the power going on and off for the last 12 years. The evidence they summited addresses the relief part of my complaint not the reason of the complaint. Therefore I ask that it be striked from the record as it will prejudice my case with the PUC against me.

Also a witness testified over my objections that wood or trees conduct electricity. If this is true the why does PPL use trees/Wood for their telephone poles that hole their wires. This again is a feeble attempt by PPL to get away from the real compliant. They keep trying to come up with excuses for my power going on and off. Yet they cannot defiantly explain why it happens.
