**SITING APPLICATION FILING
BEDFORD NORTH – CENTRAL CITY WEST 115 kV TRANSMISSION LINE
PROJECT**

Dear Cheryl Morgan:

Enclosed please find one copy of Pennsylvania Electric Company (“Penelec”), a FirstEnergy company (“FirstEnergy”) Siting Application (“Application”) for the proposed Bedford North – Central City West Transmission Line Project (“Project”). FirstEnergy is a transmission-owning entity that provides electric service to retail customers and, as such, this Project is subject to Pennsylvania Public Utility Commission (“PUC”) jurisdiction. We are providing a copy of the Application for placement in your library in compliance with PUC statute, which requires FirstEnergy to provide copies of this document for public examination. Please make the Application available for public reference in your library. The Application has been developed in the format described in Commission regulations at 52 Pa. Code §57.72.

As presented in the Application, FirstEnergy has identified the need to construct a new double-circuit 115 kV transmission line connecting the existing Central City West and Bedford North Substations. The proposed transmission line is needed to mitigate both thermal and voltage reliability criteria violations, and to ensure reliable long-term services to customers in the surrounding territory. The entire length of the proposed route is 17.6 miles. Approximately 10.1-miles will require new 100’ right-of-way (“ROW”), and 0.3-miles will require new 130’ ROW. The remaining 7.2-miles involves rebuilding a section of the existing Bedford North-New Baltimore 115 kV transmission line in its existing ROW. The route traverses through Central City Borough and Shade Township in Somerset County, and Napier, East St. Cloud, and Bedford Townships in Bedford County, Pennsylvania. Exhibits 2 and 3 of the Application identify the general location of the Project.

I’ll be glad to answer any questions concerning this matter. You can contact me at (304) 901-7829.

Sincerely,

David W. Parks
Engineer IV
FirstEnergy Service Company

SITING APPLICATION FILING
BEDFORD NORTH – CENTRAL CITY WEST 115kV TRANSMISSION LINE PROJECT

Dear Sir or Madam:

Enclosed for your information is a map of Pennsylvania Electric Company (“Penelec”), a FirstEnergy company (“FirstEnergy”), proposed Bedford North – Central City West Transmission Line Project (“Project”). FirstEnergy is a transmission-owning entity that provides electric service to retail customers and, as such, this Project is subject to Pennsylvania Public Utility Commission (“PUC”) jurisdiction.

The Project’s Siting Application (“Application”) has been developed in the format described in Commission regulations at 52 Pa. Code §57.72. Copies of the Application are available online through the PUC’s website (<http://www.puc.pa.gov/>) as well as at the following locations:

Somerset County Library
6022 Glades Pike, Ste. 120
Somerset, PA 15501

Bedford County Library
240 S. Wood Street
Bedford, PA 15522

As presented in the Application, FirstEnergy has identified the need to construct a new double-circuit 115 kV transmission line connecting the existing Central City West and Bedford North Substations. The proposed transmission line is needed to mitigate both thermal and voltage reliability criteria violations, and to ensure reliable long-term services to customers in the surrounding territory. The entire length of the proposed route is 17.6 miles. Approximately 10.1-miles will require new 100’ right-of-way (“ROW”), and 0.3-miles will require new 130’ ROW. The remaining 7.2-miles involves rebuilding a section of the existing Bedford North-New Baltimore 115 kV transmission line in its existing ROW. The route traverses through Central City Borough and Shade Township in Somerset County, and Napier, East St. Cloud, and Bedford Townships in Bedford County, Pennsylvania. Exhibits 2 and 3 of the Application identify the general location of the Project.

I’ll be glad to answer any questions concerning this matter. You can contact me at (304) 901-7829.

Sincerely,

David W. Parks
Engineer IV
FirstEnergy Service Company

SITING APPLICATION FILING
BEDFORD NORTH – CENTRAL CITY WEST 115kV TRANSMISSION LINE PROJECT

Dear Sir or Madam:

Enclosed for your information is a map of Pennsylvania Electric Company (“Penelec”), a FirstEnergy company (“FirstEnergy”), proposed Bedford North – Central City West Transmission Line Project (“Project”). FirstEnergy is a transmission-owning entity that provides electric service to retail customers and, as such, this Project is subject to Pennsylvania Public Utility Commission (“PUC”) jurisdiction.

The Project’s Siting Application (“Application”) has been developed in the format described in Commission regulations at 52 Pa. Code §57.72. Copies of the Application are available online through the PUC’s website (<http://www.puc.pa.gov/>) as well as at the following locations:

Somerset County Library
6022 Glades Pike, Ste. 120
Somerset, PA 15501

Bedford County Library
240 S. Wood Street
Bedford, PA 15522

As presented in the Application, FirstEnergy has identified the need to construct a new double-circuit 115 kV transmission line connecting the existing Central City West and Bedford North Substations. The proposed transmission line is needed to mitigate both thermal and voltage reliability criteria violations, and to ensure reliable long-term services to customers in the surrounding territory. The entire length of the proposed route is 17.6 miles. Approximately 10.1-miles will require new 100’ right-of-way (“ROW”), and 0.3-miles will require new 130’ ROW. The remaining 7.2-miles involves rebuilding a section of the existing Bedford North-New Baltimore 115 kV transmission line in its existing ROW. The route traverses through Central City Borough and Shade Township in Somerset County, and Napier, East St. Cloud, and Bedford Townships in Bedford County, Pennsylvania. Exhibits 2 and 3 of the Application identify the general location of the Project.

I’ll be glad to answer any questions concerning this matter. You can contact me at (304) 901-7829.

Sincerely,

David W. Parks

Bedford, PA 15522

As presented in the Application, FirstEnergy has identified the need to construct a new double-circuit 115 kV transmission line connecting the existing Central City West and Bedford North Substations. The proposed transmission line is needed to mitigate both thermal and voltage reliability criteria violations, and to ensure reliable long-term services to customers in the surrounding territory. The entire length of the proposed route is 17.6 miles. Approximately 10.1-miles will require new 100’ right-of-way (“ROW”), and 0.3-miles will require new 130’ ROW. The remaining 7.2-miles involves rebuilding a section of the existing Bedford North-New Baltimore 115 kV transmission line in its existing ROW. The route traverses through Central City Borough and Shade Township in Somerset County, and Napier, East St. Cloud, and Bedford Townships in Bedford County, Pennsylvania. Exhibits 2 and 3 of the Application identify the general location of the Project.

I’ll be glad to answer any questions concerning this matter. You can contact me at (304) 901-7829.

Sincerely,

David W. Parks
Engineer IV
FirstEnergy Service Company

**SITING APPLICATION FILING
BEDFORD NORTH – CENTRAL CITY WEST 115kV TRANSMISSION LINE PROJECT**

Dear Sir or Madam:

Enclosed for your information is a map of Pennsylvania Electric Company (“Penelec”), a FirstEnergy company (“FirstEnergy”), proposed Bedford North – Central City West Transmission Line Project (“Project”). FirstEnergy is a transmission-owning entity that provides electric service to retail customers and, as such, this Project is subject to Pennsylvania Public Utility Commission (“PUC”) jurisdiction.

The Project’s Siting Application (“Application”) has been developed in the format described in Commission regulations at 52 Pa. Code §57.72. Copies of the Application are available online through the PUC’s website (<http://www.puc.pa.gov/>) as well as at the following locations:

Somerset County Library
6022 Glades Pike, Ste. 120
Somerset, PA 15501

Bedford County Library
240 S. Wood Street
Bedford, PA 15522

As presented in the Application, FirstEnergy has identified the need to construct a new double-circuit 115 kV transmission line connecting the existing Central City West and Bedford North Substations. The proposed transmission line is needed to mitigate both thermal and voltage reliability criteria violations, and to ensure reliable long-term services to customers in the surrounding territory. The entire length of the proposed route is 17.6 miles. Approximately 10.1-miles will require new 100’ right-of-way (“ROW”), and 0.3-miles will require new 130’ ROW. Enclosed for your information is a map of Pennsylvania Electric Company (“Penelec”), a FirstEnergy company (“FirstEnergy”), proposed Bedford North – Central City West Transmission Line Project (“Project”). FirstEnergy is a transmission-owning entity that provides electric service to retail customers and, as such, this Project is subject to Pennsylvania Public Utility Commission (“PUC”) jurisdiction.

The Project’s Siting Application (“Application”) has been developed in the format described in Commission regulations at 52 Pa. Code §57.72. Copies of the Application are available online through the PUC’s website (<http://www.puc.pa.gov/>) as well as at the following locations:

Somerset County Library
6022 Glades Pike, Ste. 120
Somerset, PA 15501

Bedford County Library
240 S. Wood Street
Bedford, PA 15522

As presented in the Application, FirstEnergy has identified the need to construct a new double-circuit 115 kV transmission line connecting the existing Central City West and Bedford North Substations. The proposed transmission line is needed to mitigate both thermal and voltage reliability criteria violations, and to ensure reliable long-term services to customers in the surrounding territory. The entire length of the proposed route is 17.6 miles. Approximately 10.1-miles will require new 100’ right-of-way (“ROW”), and 0.3-miles will require new 130’ ROW. The remaining 7.2-miles involves rebuilding a section of the existing Bedford North-New Baltimore 115 kV transmission line in its existing ROW. The route traverses through Central City Borough and Shade Township in Somerset County, and Napier, East St. Cloud, and Bedford Townships in Bedford County, Pennsylvania. Exhibits 2 and 3 of the Application identify the general location of the Project.

I’ll be glad to answer any questions concerning this matter. You can contact me at (304) 901-7829.

Sincerely,

David W. Parks
Engineer IV
FirstEnergy Service Company

BEDFORD NORTH – CENTRAL CITY WEST 115kV TRANSMISSION LINE PROJECT**

Dear Sir or Madam:

Enclosed for your information is a map of Pennsylvania Electric Company (“Penelec”), a FirstEnergy company (“FirstEnergy”), proposed Bedford North – Central City West Transmission Line Project (“Project”). FirstEnergy is a transmission-owning entity that provides electric service to retail customers and, as such, this Project is subject to Pennsylvania Public Utility Commission (“PUC”) jurisdiction.

The Project’s Siting Application (“Application”) has been developed in the format described in Commission regulations at 52 Pa. Code §57.72. Copies of the Application are available online through the PUC’s website (<http://www.puc.pa.gov/>) as well as at the following locations:

Somerset County Library
6022 Glades Pike, Ste. 120
Somerset, PA 15501

Bedford County Library
240 S. Wood Street
Bedford, PA 15522

As presented in the Application, FirstEnergy has identified the need to construct a new double-circuit 115 kV transmission line connecting the existing Central City West and Bedford North Substations. The proposed transmission line is needed to mitigate both thermal and voltage reliability criteria violations, and to ensure reliable long-term services to customers in the surrounding territory. The entire length of the proposed route is 17.6 miles. Approximately 10.1-miles will require new 100’ right-of-way (“ROW”), and 0.3-miles will require new 130’ ROW. The remaining 7.2-miles involves rebuilding a section of the existing Bedford North-New Baltimore 115 kV transmission line in its existing ROW. The route traverses through Central City Borough and Shade Township in Somerset County, and Napier, East St. Cloud, and Bedford Townships in Bedford County, Pennsylvania. Exhibits 2 and 3 of the Application identify the general location of the Project.

I’ll be glad to answer any questions concerning this matter. You can contact me at (304) 901-7829.

Sincerely,

David W. Parks
Engineer IV
FirstEnergy Service Company

Enclosed for your information is a copy of Pennsylvania Electric Company (“Penelec”), a FirstEnergy company (“FirstEnergy”) Siting Application (“Application”) for the proposed Bedford North–Central City West Transmission Line Construction Project (“Project”). FirstEnergy is a transmission-owning entity that provides electric service to retail customers and, as such, this Project is subject to Pennsylvania Public Utility Commission jurisdiction. The Application has been developed in the format described in Commission regulations at 52 Pa. Code §57.72.

As presented in the Application, FirstEnergy has identified the need to construct a new double-circuit 115 kV transmission line connecting the existing Central City West and Bedford North Substations. The proposed transmission line is needed to mitigate both thermal and voltage reliability criteria violations, and to ensure reliable long-term services to customers in the surrounding territory. The entire length of the proposed route is 17.6 miles. Approximately 10.1-miles will require new 100’ right-of-way (“ROW”), and 0.3-miles will require new 130’ ROW. The remaining 7.2-miles involves rebuilding a section of the existing Bedford North–New Baltimore 115 kV transmission line in its existing ROW. The route traverses through Central City Borough and Shade Township in Somerset County, and Napier, East St. Cloud, and Bedford Townships in Bedford County, Pennsylvania. Exhibits 2 and 3 of the Application identify the general location of the Project.

I’ll be glad to answer any questions concerning this matter. You can contact me at (304) 901-7829.

Sincerely,

David W. Parks
Engineer IV
FirstEnergy Service Company

As presented in the Application, FirstEnergy has identified the need to construct a new double-circuit 115 kV transmission line connecting the existing Central City West and Bedford North Substations. The proposed transmission line is needed to mitigate both thermal and voltage reliability criteria violations, and to ensure reliable long-term services to customers in the surrounding territory. The entire length of the proposed route is 17.6 miles. Approximately 10.1-miles will require new 100’ right-of-way (“ROW”), and 0.3-miles will require new 130’ ROW. The remaining 7.2-miles involves rebuilding a section of the existing Bedford North–New Baltimore 115 kV transmission line in its existing ROW. The route traverses through Central City Borough and Shade Township in Somerset County, and Napier, East St. Cloud, and Bedford Townships in Bedford County, Pennsylvania. Exhibits 2 and 3 of the Application identify the general location of the Project.

I’ll be glad to answer any questions concerning this matter. You can contact me at (304) 901-7829.

Sincerely,

David W. Parks
Engineer IV
FirstEnergy Service Company

**SITING APPLICATION FILING
BEDFORD NORTH – CENTRAL CITY WEST 115 kV TRANSMISSION LINE
CONSTRUCTION PROJECT**

Dear John Vatauvuk, Secretary:

Enclosed for your information is a copy of Pennsylvania Electric Company (“Penelec”), a FirstEnergy company (“FirstEnergy”) Siting Application (“Application”) for the proposed Bedford North–Central City West Transmission Line Construction Project (“Project”). FirstEnergy is a transmission-owning entity that provides electric service to retail customers and, as such, this Project is subject to Pennsylvania Public Utility Commission jurisdiction. The Application has been developed in the format described in Commission regulations at 52 Pa. Code §57.72.

As presented in the Application, FirstEnergy has identified the need to construct a new double-circuit 115 kV transmission line connecting the existing Central City West and Bedford North Substations. The proposed transmission line is needed to mitigate both thermal and voltage reliability criteria violations, and to ensure reliable long-term services to customers in the surrounding territory. The entire length of the proposed route is 17.6 miles. Approximately 10.1-miles will require new 100’ right-of-way (“ROW”), and 0.3-miles will require new 130’ ROW. The remaining 7.2-miles involves rebuilding a section of the existing Bedford North–New Baltimore 115 kV transmission line in its existing ROW. The route traverses through Central City Borough and Shade Township in Somerset County, and Napier, East St. Cloud, and Bedford Townships in Bedford County, Pennsylvania. Exhibits 2 and 3 of the Application identify the general location of the Project.

I’ll be glad to answer any questions concerning this matter. You can contact me at (304) 901-7829.

Sincerely,

David W. Parks
Engineer IV

The proposed transmission line is needed to mitigate both thermal and voltage reliability criteria violations, and to ensure reliable long-term services to customers in the surrounding territory. The entire length of the proposed route is 17.6 miles. Approximately 10.1-miles will require new 100’ right-of-way (“ROW”), and 0.3-miles will require new 130’ ROW. The remaining 7.2-miles involves rebuilding a section of the existing Bedford North–New Baltimore 115 kV transmission line in its existing ROW. The route traverses through Central City Borough and Shade Township in Somerset County, and Napier, East St. Cloud, and Bedford Townships in Bedford County, Pennsylvania. Exhibits 2 and 3 of the Application identify the general location of the Project.

I’ll be glad to answer any questions concerning this matter. You can contact me at (304) 901-7829.

Sincerely,

David W. Parks
Engineer IV

**SITING APPLICATION FILING
BEDFORD NORTH – CENTRAL CITY WEST 115 kV TRANSMISSION LINE
CONSTRUCTION PROJECT**

Dear Bette Slayton:

Enclosed for your information is a copy of Pennsylvania Electric Company (“Penelec”), a FirstEnergy company (“FirstEnergy”) Siting Application (“Application”) for the proposed Bedford North–Central City West Transmission Line Construction Project (“Project”). FirstEnergy is a transmission-owning entity that provides electric service to retail customers and, as such, this Project is subject to Pennsylvania Public Utility Commission jurisdiction. The Application has been developed in the format described in Commission regulations at 52 Pa. Code §57.72.

As presented in the Application, FirstEnergy has identified the need to construct a new double-circuit 115 kV transmission line connecting the existing Central City West and Bedford North Substations. The proposed transmission line is needed to mitigate both thermal and voltage reliability criteria violations, and to ensure reliable long-term services to customers in the surrounding territory. The entire length of the proposed route is 17.6 miles. Approximately 10.1-miles will require new 100’ right-of-way (“ROW”), and 0.3-miles will require new 130’ ROW. The remaining 7.2-miles involves rebuilding a section of the existing Bedford North–New Baltimore 115 kV transmission line in its existing ROW. The route traverses through Central City Borough and Shade Township in Somerset County, and Napier, East St. Cloud, and Bedford Townships in Bedford County, Pennsylvania. Exhibits 2 and 3 of the Application identify the general location of the Project.

I’ll be glad to answer any questions concerning this matter. You can contact me at (304) 901-7829.

Sincerely,

David W. Parks
Engineer IV
FirstEnergy Service Company

The entire length of the proposed route is 17.6 miles. Approximately 10.1-miles will require new 100’ right-of-way (“ROW”), and 0.3-miles will require new 130’ ROW. The remaining 7.2-miles involves rebuilding a section of the existing Bedford North-New Baltimore 115 kV transmission line in its existing ROW. The route traverses through Central City Borough and Shade Township in Somerset County, and Napier, East St. Cloud, and Bedford Townships in Bedford County, Pennsylvania. Exhibits 2 and 3 of the Application identify the general location of the Project.

I’ll be glad to answer any questions concerning this matter. You can contact me at (304) 901-7829.

Sincerely,

David W. Parks

**SITING APPLICATION FILING
BEDFORD NORTH – CENTRAL CITY WEST 115 kV TRANSMISSION LINE
CONSTRUCTION PROJECT**

To whom it may concern:

Enclosed for your information is a copy of Pennsylvania Electric Company (“Penelec”), a FirstEnergy company (“FirstEnergy”) Siting Application (“Application”) for the proposed Bedford North–Central City West Transmission Line Construction Project (“Project”). FirstEnergy is a transmission-owning entity that provides electric service to retail customers and, as such, this Project is subject to Pennsylvania Public Utility Commission jurisdiction. The Application has been developed in the format described in Commission regulations at 52 Pa. Code §57.72.

As presented in the Application, FirstEnergy has identified the need to construct a new double-circuit 115 kV transmission line connecting the existing Central City West and Bedford North Substations. The proposed transmission line is needed to mitigate both thermal and voltage reliability criteria violations, and to ensure reliable long-term services to customers in the surrounding territory. The entire length of the proposed route is 17.6 miles. Approximately 10.1-miles will require new 100’ right-of-way (“ROW”), and 0.3-miles will require new 130’ ROW. The remaining 7.2-miles involves rebuilding a section of the existing Bedford North–New Baltimore 115 kV transmission line in its existing ROW. The route traverses through Central City Borough and Shade Township in Somerset County, and Napier, East St. Cloud, and Bedford Townships in Bedford County, Pennsylvania. Exhibits 2 and 3 of the Application identify the general location of the Project.

I’ll be glad to answer any questions concerning this matter. You can contact me at (304) 901-7829.

Sincerely,

David W. Parks
