Electronic Data Interchange and Internet Requirements

Prior to doing business in an EDC service territory, all EGS suppliers, and any broker/marketers that wish to use the Electronic Data Interchange (EDI), must meet the EDI certification requirements of the EDC. Certification is a testing process using the Commission approved Internet protocol. To initiate this process, the EGS is encouraged to contact the EDC as early as possible after filing an application for a license with the Commission, since certification may require as many as four months to complete and customer service contract dates may not commence prior to certification. EDC requirements of new suppliers may be found on the respective EDC home web page. Pennsylvania's industry stakeholder group the Electronic Data Exchange Working Group (EDEWG) develops and maintains the EDI transactions and related business practices, which are found on the Pa. PUC website at http://www.puc.pa.gov/filing_resources/issues_laws_regulations/electronic_data_exchange.aspx. The EDEWG meets telephonically the first Thursday of each month at 2:00pm ET to discuss EDI change control requests and other issues.

To keep current with Pennsylvania EDI practices and policies, a newly licensed EGS is strongly encouraged to participate in the EDEWG by contacting the following:

BSP Technical Fitness

Experience, Plan, Structure

Previous Experience:

Blue Sky Power develops, finances, designs, operates and manages clean energy capital projects for military, governmental, institutional, commercial and industrial facilities. Blue Sky Power provides a broad spectrum of energy consulting support services to its clients, including energy operations & management, energy Master Planning, training, Demand Response and Energy Procurement, engineering, and project development. BSP has participated in the development and execution of multiple energy generation projects for a variety of institutional and government sector clients.

Type of Customers:

Institutional, Health Care Providers, Department of Defense, School Districts, Higher Education, commercial and industrial clients, and Port Facilities.

Employee Training Commitment:

BSP has implemented a training program for its employees, subconsultants and affiliates. Trainees are advised to fully disclose and explain the proposed services being offered by BSP, the fees for those services, and how those services are paid (either a direct pay from the client or from millage rates from the Provider). In addition, trainees are trained to clearly state BSP's role in the transaction and confirm BSP is not an electric generation supplier or an electric marketer which takes title to the energy produced and delivered to customers. Marketing materials are specifically tailored to each target client and generally include a statement of qualifications, identification of services, client list, brief biographies of key personnel, and representative projects.

Business Plans for operations in the Commonwealth:

BSP intends to market its energy consulting and project development services to institutional, governmental, and commercial clients, including energy management and procurement/brokering services. Using its existing network of clients and BSP's internal workforce and business development team, BSP will perform direct marketing to potential target CEO, COOs, and CFOs. Once engaged, the parties jointly develop a support program which specifically suits each client's needs and budget. The scope of the marketing effort will be major organizations/institutions throughout the Commonwealth.

Structure

BSP is managed by Benjamin Parvey, Managing Member and Chief Executive Officer. Mr. Parvey manages and controls the business development and finance teams of the organization and is primarily responsible for the operation of the company and its performance.

Reporting to Mr. Parvey are Michal Fuhrman, Principal and business development leader; Stephen Weber, Vice President of Engineering, and Samuel Cubberley, Project/Construction Manager. Mr. Fuhrman leads the marketing and business development team, Mr. Weber manages the engineering and project development team, and Mr. Cubberley leads the teams overseeing project construction and execution.
