To Whom this may Concern

Objection to brief by November 30, 2016

By Suez Attorney.

C-2016-2558244, C-2016-2559741, C-2016-2563040
C-2016- 2551544

A. First since I never got the Transcript that the judge ordered me to write a brief on by November 30 2016 . I could not do it. Since the Judge ordered it I should have been given it.

1. Object to this line since I have been putting on my complaints that I have lived here since July 1999.
2. They have only been providing me water service since they bought out United Water. And my water has gotten worst ever since.

3. I have provided pictures with my complaints showing dirty water. But the judge has refused to allow them in the hearings as evidence. I have to justify every complaint I e file to the Commission or the secretary will reject it.
4. I do not use the bottom bathroom since I have trouble on steps do to my disability. But my son does. I also complained about the dirt or sediment as Suez likes to say in the Tank of my toilet in the bathroom upstairs. But since the Judge did not summit these pictures even though they part of my complaint.
5. I still have the Valve that was replaced if someone wants to inspect it. But again what would the use be to summit it to as evidence since the Judge would reject it.
6. I really would like to know how 41 years of water construction to do with my complaints of dirty water. Which I have proven time after time with pictures.
7. The pipe they installed was bigger than 1 inch.
8. According to what I was told by LP Township Suez was ordered to replace the Line do to complaints.
9. I still consider the blow out to be upstream from my house since it is at the end of the pipe uphill from my house.
10. Yes they installed a new pit. On my property not theirs.
11. No it did not
12. I have flushed my system a lot since I have moved in. Since they have a lot of boil water advisories over the last 17 years. Also I have replaced water lines inside my house over the years and this means I have to drain the lines. But what do I get back dirty water.
13. Yet they keep blaming me for this pipes yet there is no evidence that this pipe has gone bad in any way.

14. They have never check my water supply for dirt other than when I showed the reps the dirt in my tanks they always told me that it is Torpidity and this is normal. Dirt of the level I have is not normal.

16-17. This testimony I objected to because it showed dirty water coming out when first opened and did not clear for 10 minutes not 20 seconds. The water came out brown not clear for quite a while. It should not be normal for water to come out of a pipe discolored because the system should be a closed system and dirt should not be entering it. Where does the dirt go when the blow out is closed. I use more water than my neighbor they are never home they do not cook or do anything at their house other than watch tv and sleep. They never come outside to do anything than get in their cars and leave. The situation at my neighbor's house is another issue I I should not bring that in to my complaints with the Commission.

18. Since this is supposed to be a closed system any discoloration should not happen and be investigated by Suez for a leak in the system.

19.20.21. Ms. Penny Bambarger did not check any water sampling site that was near my house. Since my water comes from a water tank on Colorado Avenue at least this is what Suez has told me for years. So as I pointed out where she tested is not even close to the closed system that delivers water to my house. Everywhere she check was not on the same system that delivers water to my house That is why I tried to object to this during the hearing But the Judge would not hear it.

22. Again not in my area where my water comes from.

23. 24. 25. Again not where near my water system. As should be no dirty water at these sites where found it is to be expected since none of these sites are remotely close to where my water comes from. Yet when they test the water just outside my house up the road they get discolored water out.

26 If this is a closed system where is the sediment (dirt) coming from in my toilets and water filters. Besides whenever you are told That the world is going to end they tell you to use the water in the toilet tank first since it is supposed to be clean potable water not the toilet bowl which would be disgusting.

27 They have never come into my house to test the water for anything, even when I was complaining about it. They just looked in the toilet tank and said it was normal. Again a closed system should not have any torpidity, Discoloration, or dirt in it period. Yet it keeps showing up in my house. And you should see the picture I got of the faucet screen with the dirt on it.

28 They do not keep good records.

30. 31. I have been complaining But most of them were with united water. Evidently they did not keep those records for this hearing.

32. We do not use the water coming out of our faucets for anything other than baths showers and flushing our toilets use to do gardening but have not for about 10 years. So this statement should be thrown out since they have no collaborating evidence to prove this either way.

33. They have been using a remote reader that was attached to my meter inside since September 1999 and changed it once since then. The law states whenever a remote reading is used for billing the original meter should be checked every five years for accuracy. This is cut and dry they have not checked nor enquired of me about the meter that was installed in this house in 1956 when it was built.

34 My main complaint is about water quality not how much water I use. Or how many people I have in my house. Also I did not count the grand children that usually stay at my house over the week end. Who I have in my house at what time does not come into my complaints. As far as the, meter is concerned I am questioning that fact that they have not check my meter inside my house since September 1999 and they never asked me to check it, since I would have to give them permission to enter my house to check it. By the way that is 60 years since the meter was installed.

37. 38.39.40.41.42.43.44.45.46.47.48.49.67.68.69

I tried to submit evidence video that Monica was lying about where her car was parked but it was rejected by the Judge I also submitted a brief regarding this issue but heard nothing about it.

Monica Lied, her car was parked right beside the meter and according to my video camera system no cars or trucks passed my house during the entire time she was parked there. I tried to send this video to the Judge but he refused to accept. It.

Naturally they would say that they have no problems with my meter since to admit that would really open them up for more

complaints. She came out to discuss my complaints not just the meter. She did show me how the meter is supposed to operate yet I testified that is not how it operated for me. Yes I admitted she was here I even tried to send a cd with a video of that visit to Judge Watson but he refused to except it.

50.51.52.53.54.55

They do not use actual meter reading for my bills. They are using remote reading including the new meter they have not done a real reading of my meter since September 1999 they use remote readers. This is not the same as looking at the meter to read the water usage. Nor have they checked the accuracy of the meter in my house installed (1956) with the remote that is outside my house.

I have never questioned my billing I have questioned why I am being billed for water of a quality that is unusable as is. Discolored torpidity, Dirt. I am being billed for High quality water and not getting it. I am questioning the accuracy of my meter since they have ignored the laws regarding it since September 1999. And January 1956 when the current inside meter was installed.

56. 57. 58.59.60.61.62.63.64.65.66.

With my electricity going out all the time how am I supposed to view mass media? When is goes out I have no Phone TV Radio and the paper on is delivered three times a week. My phone only operates on its battery for 4 hours. Again I should have been contacted about this as per the law. Again I ask what a water main break in Linglestown has to do with the Water in the tank on Colorado Avenue where my water comes from. And did they flush that tank after the boil water advisory was issued and cleared? I

do not think so! How many People were exposed to bad water (why else for a boil water Advisory) because Suez di not flush the Tank on Colorado Avenue (I tried to summit pictures of this too but got them rejected by the Judge)

70.71.72.73.74.75.76.

I objected to this testimony on everything except that she came out to my house to discuss the complaints I filed with the Commission. She explained to me how the meter was supposed to work. According to my Video cameras no vehicles passed while we were talking other than cars.

Conclusion and Relief

I have tried to meet the Proof level as requested but the judge would not summit as evidence any of my evidence. As far as proof Suez has admitted that there is dirt in my water and my pipe is not broken. They have summited no proof to the contrary. Yet Their Attorney is asking for a denial of my complaints and the closing of the Following Docket Numbers C-2016-2551544, C-2016-2558244. C-2016-2559741 I request the Opposite be done with these docket numbers.

Document Statements as per law. Since the document I received from Suez's Attorney (Brief) is too big to efile I did not include this

Ross. E. Schell
