OPINION AND ORDER

On August 8, 1998, regulations at 52 Pa. Code 54.31 - 54.43 became effective. These regulations govern electricity generation supplier licensing. Entities who applied to become electric generation suppliers prior to August 8, 1998 were issued interim licenses.

52 Pa. Code 54.32(g) states that:

An electric generation supplier who has been granted an interim license shall apply for a license under this subchapter by updating its prior license application to include additional and updated information required by § 54.33 (relating to application form). An updated application shall be submitted by December 7, 1998.

This Order is in response to the above-mentioned requirement. Attachment A contains a list of the currently licensed electric generation suppliers who have filed the necessary additional and updated information.

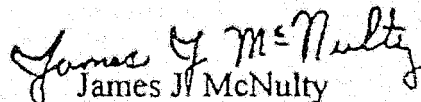

Upon full consideration of all matters of record, we find that the granting of these licenses is necessary and proper for the service, accommodation and convenience of the public; **THEREFORE,**

IT IS ORDERED:

1. That a license be issued authorizing each company listed on Attachment A of this Order, the right to continue to offer, render, furnish or supply electric generation supplier services to the public within the Commonwealth of Pennsylvania.

2. That the effective date of each license will be January 1, 1999.

PUBLIC MEETING -
JANUARY 14, 1999
JAN-1999-FUS-1003*
DOCKET NO: A-110105 ET. AL.

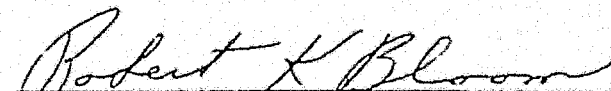

STATEMENT OF VICE CHAIRMAN ROBERT K. BLOOM

Before the Commission for consideration are the applications filed by certain electric generation suppliers for approval of permanent licenses to offer, render, furnish or supply electric generation supplier services in Pennsylvania. These electric generation suppliers are currently operating under interim licenses previously approved by the Commission. The Bureau of Fixed Utility Services recommends that the Commission grant permanent licenses to each of the electric generation suppliers included within Attachment A of the Order. I disagree.

Section 2809(c)(1)(i) of the Public Utility Code, 66 Pa. C.S. §2809(c)(1)(i), requires an electric generation supplier to furnish a bond or other security approved by the Commission before the Commission can issue the supplier a license to provide electricity generation service within Pennsylvania. In several of the applications for interim licensure, the electric generation supplier sought to substitute a \$250,000 letter of credit in lieu of a \$250,000 security bond, or sought to utilize a bond in an amount less than \$250,000. I have consistently dissented in all such instances as I believe that each electric generation supplier should be held to the same standard, a \$250,000 security bond. Therefore, I wish to be recorded as dissenting on each of the permanent license application requests filed by the electric generation suppliers listed in Attachment A on which I dissented on their interim license due to the electric generation suppliers failure to supply a \$250,000 security bond. The majority of the electric generation supplier applicants have supplied \$250,000 security bonds and it is not fair to apply different standards for other applicants.
