Addendum to Question 4 (B) .. State the facts of your complaint.

FACTS:

This is a 3 bedroom 2 and ½ bath ranch type home consisting of approximately 2500 square feet of living space.

This property has been vacant since July 2005. The only utilities connected at this time is the electric range (has not been used since 7/05), the refrigerator, timed outside pole lights, and night lights.

The heat is natural gas. We have not used any heat since July except for December of 2005. The thermostat is set at 58 degrees. The hot water is provided through the gas heater via a summer winter hookup.

I have received PECO bills totaling \$1529.72 during the period of 7/05 through 12/05. (see attached quicken report)

I feel this amount is excessive compared to my principal residence located one mile away. My principal residence is a 5 bedroom, 4 bathroom home with a pool, (filtered daily during the summer), central air conditioning, two refrigerators, timed spot lights, electric water heat etc. and 5 adult occupants. The bill for the same period is only, \$2,245.04 a difference of \$715.32 for a fully occupied active household.

By way of comparison, we also own a similar home to the house on Skippack Pike (approximate same size but 2 story) in Rock Hall MD. We do use that home a lot during the spring, summer, and fall, central air, refrigerator, electric hot water etc. The bill for the same period on the home in Rock Hall (through Delmarva Power) is only, \$294.96 (copy of quicken report attached)

As a consumer I feel there must be something wrong with the bill for the Skippack Pike property compared to the bills for our principal residence and our vacation home.

I've called PECO several times but their answer is always the same, essentially they say there is nothing they can do since the bills seem correct to them.

I respectfully request the PUC to require PECO to ascertain that their meters are calibrated correctly to insure I am not being charged more than what is required to maintain a minimally used vacant home.
