I was wondering if the Pennsylvania Public Utility Commission could be abolished like the Public Service Commission. Pa's Public utility commission mission statement is a joke. They claim that they're here to balance the needs of the utilities and consumers. To protect public interest and to educate the consumer. If you didn't have a fixed rate it went from 7 cents a kilowatt hour to 40 cents a kilowatt hour. The PUC did NOT protect the consumer. I filed my informal complaints against Met Ed and Columbia Gas on July 15, 2016. I filed formal complaint in October of 2016. They have yet to be heard. Must be a lot of people complaining about their service to have such a back log of hearings. Now Met Ed wants to cut our power to hook wires up. Something that should have be done two weeks ago. Something that should never be done in the winter. The reason the PUC needs to be abolished is because the side with the utilites all the time.
