Electronic Data Interchange and Internet Requirements

Any NGS suppliers and/or broker/marketers that wish to use the Electronic Data Interchange (EDI), in the NGDCs where its available, must meet the EDI certification requirements of the NGDC. Certification is a testing process using the Commission approved Internet protocol. To initiate this process, the NGS is encouraged to contact the NGDC as early as possible after filing an application for a license with the Commission, since certification may require as many as four months to complete and customer service contract dates may not commence prior to certification. NGDC requirements of new suppliers may be found on the respective NGDC home web page. Pennsylvania's industry stakeholder group the Electronic Data Exchange Working Group (EDEWG) develops and maintains the EDI transactions and related business practices, which are found on the Pa. PUC website at http://www.puc.pa.gov/filing_resources/issues_laws_regulations/electronic_data_exchange.aspx. The EDEWG meets telephonically the first Thursday of each month at 2:00pm ET to discuss EDI change control requests and other issues.

To keep current with Pennsylvania EDI practices and policies, a newly licensed NGS may choose to participate in the EDEWG by contacting the following:

Compensation Structure

Navigate Power, LLC ("Navigate Power") is a electricity and natural gas brokerage. Navigate receives compensation from retail energy suppliers ("RES") who are licensed in the State of Pennsylvania. The relationship between Navigate Power and the RES's is technically referred to as a "referral" partnership, and the compensation received is referred to as a referral fee.

Within the terms and conditions of the referral agreement between Navigate Power and each RES, Navigate Power is allowed to market and sell electricity and natural gas customers, however it chooses.

Navigate Power has a multi-faceted strategy to acquire customers on behalf of its RES partners:

1. Direct Sales: Navigate power will contract independent agents to broker deals. The 1099 agents will go through an electricity and natural gas training program, covering market analysis, contract proficiency, and ethics. This program has been successful in other states and has produced no registered complaints.
2. Online Marketing: Through online marketing, Navigate Power has developed an indirect sales platform that allows customers to better understand their options, review terms and prices, and contract with a supplier.

Navigate Power's RES partners are responsible for billing and providing statements.

Regarding customer inquiries and complaints, Navigate Power's first phase of response is its independent agents—the individuals the customer trusts. Independent agents are trained to not only acquire clients, but to also manage relationships. The goal is to retain clients through renewals. This only happens when clients are satisfied and trust their agent.

Navigate Power's management and operations team will help agents better manage and respond to the needs of their clients.

Objective

To demonstrate leadership, managerial and technical experience in energy and natural gas procurement, and sustainable energy product and service offerings

Professional Summary

I am an experienced executive with over 10 years in the energy industry. Starting off obtaining my series 7, 24, 55, 63, 66 FINRA licenses I was put in charge of large energy trading desks at the Chicago Board of Trade and Chicago Mercantile Exchange.
