RE: US LEC of Pennsylvania, LLC
Revision for Pa. P.U.C. No. 2 (Access)
Docket No. M-2012-2291824, Order Entered May 4, 2017

Dear Ms. Chiavetta:

Enclosed for filing please find the above referenced tariff filing submitted on behalf of US LEC of Pennsylvania, LLC (“Company”). This filing, made in compliance with the Federal Communications Commission Report and Order in WC Docket 10-90, *et. al.*, FCC No. 11-161, and with the Order entered May 4, 2017 in the Commission’s Docket M-2012-2291824, revises the terminating local switching terminating per minute rates in the Frontier Communications Commonwealth, Frontier Communications of Pennsylvania, Windstream D&E, Verizon and Embarq territories. This filing mirrors the rates filed by the underlying ILECs and implements the sixth phase of intercarrier compensation transition. The Company respectfully requests an effective date of July 1, 2017.

The following tariff pages are included with this filing:

SECTION 3 - ACCESS SERVICES3.2 Transport Service (cont'd)

Customers who choose Indirect Access connect with the Company's office(s) through a tandem switch provided by another LEC that is responsible for its own Tandem Switching charge. Transport Service rates are made up of a Transport Interconnection Charge, a Transport Termination rate which is assessed on a per transmission path per access minute basis, and a Transport Mileage rate assessed on a per mile per access minute basis. The Transport Termination rate provides for the communication frequency transmission path at the Company switching central office and includes the Transport Service portion of central office switching and central office circuit equipment. The Transport Mileage rate applies to transmission facilities provided by the Company between the Company's end office and a remote switching facility.

(C)
(C)

For purposes of determining Transport Mileage measurement, distance will be measured from the wire center that normally serves the customer designated premises to the terminating end office, which may be a Remote Switching Module(s).

Where transmission facilities permit, the individual transmission path between the Customer's designated premises and the first point of switching may at the option of the Customer be provided with the following optional features at no charge:

Supervisory Signaling
Customer Specified Entry Switch Receive Level
Customer Specification of Local Transport Termination.

The Common End Office Trunk Port minute-of-use rate provides for the use of the shared end office trunk ports for the termination of common transport trunks.

3.3 End User Access

End User Access provides Customers with the access from end office switches to end users, for use in furnishing their communications services.

Customers may be accessed via lines, trunks, pay telephone lines, or other facilities, terminated on a central office switch, which are provided under the local exchange services tariffs of the Company.
