Dear PA PUC Secretary Chiavetta:

Since you reached out to me via a phone call July 18th, which I appreciated, I thought I'd take this opportunity to share with you information of utmost relevance regarding EMF/RF exposures from microwave technologies, especially AMI Smart Meters—especially in Pennsylvania.

Medical, Disabilities And Discrimination Claims Can Be Filed Against States PUCs and Utilities as per the article published at *Activist Post*, July 20, 2017.

American with Disabilities Act, Section 504 of the Rehabilitation Act of 1973 (as amended), and even charges of discrimination can be filed with the U.S. Department of Justice and/or the U.S. Department of Energy, which the PA PUC obviously is not aware of, otherwise Pennsylvanians would not be subjected to the AMI Smart Meter roll out harassments we have experienced from electric utilities under the auspices of the PA PUC.

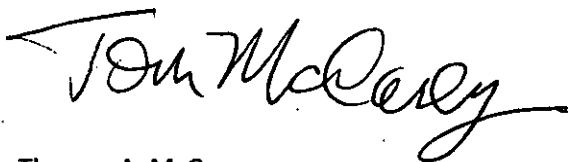

The article and its revealing information can be accessed at the following website <http://www.activistpost.com/2017/07/medical-disabilities-discrimination-claims-filed-states-pucs-utilities.html> . Please take note of PASMA's Press Release dated July 20, 2017 embedded in that article.

I thought I would bring this to your attention, if you aren't aware, as it portends much legal trouble for all U.S. states, their public utility commissions and utilities, but especially in Pennsylvania where there have been terrible harassments of the sick, elderly and electromagnetically sensitive *customers who rightfully and legally can refuse* the retrofit of an AMI Smart Meter, as the above laws provide.

I, for one, have experienced two TIAs and know that EMFs/RFs interfere with me. I bring this information to your attention so that you can pass along this pertinent legal evidence to others on the PA PUC to be factored into existing and previously-adjudicated cases with the PA PUC Administrative Law Court, including making necessary revisions in PUC implementation rules, regulations and orders.

Thank you for the courtesy of reading and evaluating this information. I look forward to hearing from you.

Most sincerely,

Thomas A. McCarey

SMART METER MEDICAL OPT-OUTS AVAILABLE FROM INDIVIDUAL PENNA. UTILITY COMPANIES

Phone call after phone call, recently, from various Pennsylvania electric company customers tell Pasma that there's a "medical opt-out" available within a special division of each electric company, which processes paperwork to preclude an AMI Smart Meter being attached to a customer's home provided the customer took/takes the following actions:

1. Has a medical condition, which their medical doctor would validate by sending a written statement on the MD's professional letterhead stating the patient's particular reason and/or need not to have an AMI Smart Meter on their home.
2. The customer's doctor would have to FAX that letter directly to the proper person who handles medical opt-outs within each customer's respective utility company. Pasma does not have those contact names and numbers yet, but suggests customers contact their utility company, or the PA PUC, to get the proper contact person and fax number handling medical opt-outs within each respective utility company.
3. Follow-up with the utility company person to make certain he/she received your doctor's faxed letter. Also, remember to get confirmation of his/her receiving the fax for your records.

Incidentally, Pasma has heard that one utility company had said something to the effect that if a customer has a medical condition that utility didn't want to do anything that would make it worse. That sounds just about right, and what customers should expect to hear from the PA PUC!

To elaborate further about a medical opt-out, Pasma has heard from several people, who were given that type of opt-out. It seems customers' complaints made to the Pennsylvania Office Of Consumer Advocate, 55 Walnut St., 5th Floor Forum Place, Harrisburg, PA 17101-1923, Phone 800-684-6560; FAX 717-783-7152; email consumer@paoca.org gets attention and action. Utility names heard mentioned were Penelec, First Energy and Met Ed.

Pasma received further indication the folks at the Consumer Protection Attorney General Office in Harrisburg were helpful, and also confirmed "*very many people*" have filed complaints about the utility companies and AMI Smart Meters.

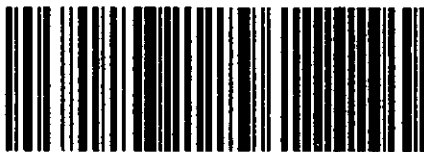

The only way Pennsylvanians will get the relief we need regarding AMI Smart Meters is to be the squeaky wheels demanding the rightful oil we need to quiet us down. We no longer can suffer the outrageousness of bureaucratic oppression.

###

If you would like more information about this topic, or to schedule an interview with a member of Pasma, please call Tom McCarey at 610-687-7607.
