Re: *Francis vs PECO*, Complaint C-2017-2615635

I am withdrawing my formal complaint against PECO Energy Company in response to a ten day shut off notice for refusing a smart meter. My complaint detailed a number of sound and well documented reasons for my refusal to permit the installation of their dangerous meter on my house. Peco's response did not refute my assertions with genuine unbiased evidence or safety studies regarding non-thermal radiation waves 24/7/365, which the PA PUC should have required before granting all utilities permission to retrofit AMI Smart Meters operated by microwave technology and similar to cell phones, which is classified as a class 2B carcinogen by the IARC of the World Health Organization.

However, PECO placed a subsequent 73 hour shut-off notice on the door of my house only 48 hours before the shut-off date on the notice, for which the PA PUC should sanction PECO. That notice coerced the installation of a PECO AMI smart meter on my house in early August against my will and consent:

PECO already has installed an AMI Smart Meter on the 4th of August 2017, so I had my legal right usurped by PECO and anything propelling this complaint would be a lost cause and a practice in futility.

Respectfully submitted by,

Louise Francis
