RE: Formal complaint filed against Metropolitan Edison Company

This letter serves as our Reply to Objection. We are replying to the Preliminary Objections of Metropolitan Edison Company that have been submitted by the Metropolitan Edison Company through it's counsel in response to the formal complaint that we filed with the Pennsylvania Public Utility Commission regarding threat of electric shut-off due to lack of consent to the installation of a radiation emitting "Smart Meter" by Metropolitan Edison Company on our property located at 50 Frystown Road, Myerstown, Pennsylvania.

We find the Preliminary Objections that have been set forth by Metropolitan Edison Company to be completely lacking of any substance which addresses our basic right to health and should thereby be dismissed. There is no objection to, or denial of the fact that an installation of a "Smart Meter" will project dangerous radiation into our home and onto our property. There has been no long term health study that has been done to ascertain the effects of "Smart Meters" on human health. Our concerns have been listed as "generic" and they seek to have our formal complaint dismissed on the grounds that our health has not yet been damaged due to the fact that we have not allowed a "Smart Meter" to be installed on our property. The Metropolitan Edison Company has no authority to install something on our home which has the capacity to do us harm.

Respectfully,

Wesley and Tabitha Good
