Re: Implementation of Act 40 of 2017

I hereby provide comment against the tentative implementation order, published by PUC for public comment in December of 2017. Grandfathering all out-of-state solar facilities, as this implementation order suggests, does not, in my view, meet the intent of Act 40, and most likely would not provide any substantive relief in support of local Pennsylvania generated solar energy and the price of SRECs. As a homeowner with solar installation of 9.6 kW, and solar energy advocate, I urge the Commission to only permit out-of-state facilities already certified as AEPS Tier I Solar PV that have entered into a contract with a Pennsylvania electric distribution company, electric generation supplier serving PA customers, load serving entity, electric or municipal cooperative, for the sale of SRECs, until the expiration of such contracts.

Respectfully,

Lucyna de Barbaro
