RE: ACT 40-2017 In State Solar Generation

This letter is to inform the Pennsylvania State Public Utility Commission, that I, Corey Poncavage as a citizen of this great state who is very much in favor of clean renewable energy, am concerned about the present course of implementation for ACT 40-2017. Clearly the law was intended to close the solar border loophole, which allow solar generators in other states to profit from PA without adding any value to the state. Generation in state creates jobs in state, which adds to PA revenue. By misinterpreting the law to allow legacy generators to continue to leech off the state, the PUC is enabling inefficiency and loopholes that obstruct the clear intent of the law.

Please consider the following:

- fossil fuels pollute our air, sicken our children, and cause many health problems over a lifetime of exposure.
- renewable energy solves this problem and saves lives.
- ACT-40 decided the matter regarding fair compensation for in state solar generation
- The PUC must in-partially implement the law.

Please consider the human side of the equation when you decide on this matter. I and every fellow citizen I have talked to on the matter is fully aligned with the memo provided by PASEIA and SUNWPA.

Regards,

A handwritten signature in black ink that reads "Corey Poncavage". The signature is written in a cursive, flowing style.
