Re: Docket # C-2018-3000257
Kim Betchy vs. West Penn Power

Administrative Law Judge - Jeffrey A. Watson:

I believe some important evidence wasn't provided to your office in regards to INTERIM ORDER. I am enclosing copies of what I have in my file. When I requested that the property at 150 Inwood Ave., Carmichaels, PA 15320 to be part of this case, it is because I am the owner of that property also that is 20' - 25' that is located from my main residence. That information wasn't disclosed by the PUC. That was part of my case and that's why I'm sending you this information again. I am enclosing a copy that was sent as part of the RESPONDENT'S PRELIMINARY RESPONSE. I would like an amendment in regards to this matter.

Please review my responses/letters: Exhibit A - letter dated 2-15-2018 pages 1-4 ; Exhibit B - letter dated 4-2-2018 (my response to West Penn Power to their Preliminary Objections, page 1); Exhibit C - my response to your Preliminary Objection letter dated 4-4-2018; and Exhibit D dated 8/31/17 with the doctor's script asking for the removal of the smart meter.

Thank you for your time.

Sincerely,

Kim Betchy

February 14, 2018.

I would like my complaint to be resolved by having the smart meter removed and replaced with the analog meter, due to all of the health issues that this meter is causing with in my household and for the home next door, since it very close aprox. 20-25 ft. for the power company not to remove the analog When this smart meter was first installed over a year ago, it took some time to figure out what's going on here? I was having all these crazy symptoms and thought about what is different that would cause me and my little 8 # dog health problems. Then something clicked and I said the only change with in my household was that smart meter, so I started to look into the smart meters and I was blown away with what I had found, all kinds of health issues and then it all came together, cause I was having them too.

I sent 2 letters certified in regards to remove the smart meter and reinstall the analog, since I got no response, I then had it replaced with a analog one. The 2 months that I had the analog, all of my issues went away except my vision, the damage is already done there. Once they forced the smart meter back on my property everything came back. Here is a list of what I go thru on a daily basis.

Headaches, Joint pain and stiffness, Sleep issues, Several Dreams each night, Nightmares, Chest pains, Sharp head, Stomach, Pelvic pains, Severe neck pain, and severe blurred vision that I am unable to drive anymore. No driving for over a year now.

My small dog developed several tumors, eye issues, nightmares, breathing attacks where she is gasping for air, and choking issues, some after she eats and some when she is sleeping. Between 3-4 am, a bad dream will wake her up and she will be all over the bed like a bunny rabbit, I have to calm her down. She will jump at me, in which she has never done that before. She will wake up and act crazy, then she will go back to sleep. We both have way too many issues that we never had before the smart meter was installed. There has not been any other changes to this household, only the smart meter. Note; My dog is well cared for and only eats organic meals. She has always been in good health until that smart meter was installed.

I have also addressed the home next to me that is approx. 20-25 feet away. Please find enclosed letter that was sent also by certified mail to West Penn Power without a response. Letter dated July 20, 2017 sent by owners Joanin Martin/ Kimberly Betchy located @ 150 Inwood ave, Carmichaels, Pa 15320. WPPC tried to take the analog and install a smart meter, but I confronted them and said I do not want that smart meter installed, the worker said ok, I'll put in on record that owner refused it. The worker had come out to turn power on and he did and left. He never forced it, nor did he refuse power service, but it was forced onto my property. WPPC workers came out several times, within the 2 months of having the analog reinstalled. They were back and forth between both homes. A few days later they shut my power off and when I called in to see why I had no power, I was told that I needed to have my meter/ box inspected and it needed to pass in order to restore power, well I find it odd that it failed due to 2 missing screws at the pole. I wonder what those workers were doing so many times walking all over the property?? I'll have to check the surveillance back-up tapes of activity. The workers did not like it when I had pad locks on both boxes to prevent them from removing the analog meters without our consent. They kicked the no trespassing sign to the ground and they also ripped down our notices of no-trespassing and no smart meter. The notices were on the owners pole and panel box that we own and paid for. They claim that the

meter is there property, well that's fine! The padlocks and notices were on our property, not their meter! Why are we paying for the smart meter every month if they own it?? It doesn't make sense to me! I was told that if I provided a medical note in regards to the health issues, that they would consider allowing me to keep the analog. Please find that enclosed. Once the inspection passed with no power for a week, they still refused to allow me to keep my analog meter. They forced the smart meter on me, just to restore the power. I was told no smart meter, no power! A loyal customer for over 30 years and this is the thanks we get, a slap in the face.

By forcing those killer smart meters on us, knowing how unsafe they are, and burning homes down, someone has to be responsible! Homeowner ins. will not cover damages to your home caused by a smart meter. It looks like the power company will be flooding in lawsuits!

The workers need to get educated on these smart meters, they are being exposed with high amounts of radiation every time they install or read one. Higher medical bills for everyone!

I have a EME tester, the radiation in my household is unbelievable and unexceptable. I can't even use my clothes dryer any more, it's 220 amps raise the meter thru the roof, I had to turn that breaker off. I don't run my furnace any more due to the high amts. of exposure, I use gas wall heaters. I can't use the computer every day due to my increased blurred vision when I do use it. I keep everything that I can unplugged, but you can't stop what is coming thru the walls and ceiling causing us harm! I had to do away with my cordless phones do to the exposure and burning in my ear. There has been alot of dead small animals on my property, mostly birds. I wake up to a racing heart beat. As I am typing this letter from my computer, I am getting stabbing pains in my chest area, back and neck and alot of blurred vision, and a headache, so it's time to shut this down.

Every 4 seconds that smart meter blasts a high amt. of radiation all thru your home. There was nothing wrong with the safe analog meter! Peoples

bills have trippled in cost. Between 3-5 am, even a higher blast is transmitted of radiation. Maybe, this is why my dog goes crazy at bed time!

Enclosed are the letters for both homes, medical script for the removal of the smart meter, medical reports and a copy of the INPOWER LIABILITY ACTION PROCESS.

Keep in mind, spying, surveillance devices, recording, storing our data without our consent is in

violation of Federal and State Laws. It's an invasion of our privacy.

The power Company's should not have any control over our well being.

Thank you for your time: Who ever reviews this case, I only pray and hope that you care about saving lives and peoples health safety.

Kim Betchy

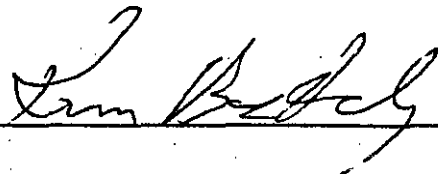

A handwritten signature in cursive script, appearing to read "Kim Betchy", written over a horizontal line.

Exhibit B

West Penn Power

April, 2, 2018.

76 south main street A-rpc. Akron Ohio, 44308-1890

Docket # C-2018-3000257 Kim Betchy 140 Inwood ave. Carm, Pa 15320.

My response to your Preliminary Objections:

On page 2, # 3, you quoted three different times that disputed rights were mailed to her, that is incorrect, wppc. never ever sent a response of anything of any kind to me. Also on the same page you quoted a foreign meter had been installed and a potential unsafe condition. That meter came from Rockford, IL. and is government approved. I made sure of that before I purchased that analog meter.

There is a contradiction to the Legislative History, intent, enactment, and what was published in official public state records declaring AMI Smart Meters are not mandated! Basically, the bill SB2200, as passed by the PA Legislature, is/ was an " opt IN bill ", refer to HB2200, 280 / (f) 7 (2) (1)!

AMI Smart Meters operate on microwaves to send, receive and collect information to and from the meters at customer's homes. Those messages can occur every 15 seconds, which can allow Dirty Electricity, (harmonics or sinusoidal waves) to travel over the copper wires inside the walls of customer's homes every 15 seconds every hour, every day of every month of every year, as customers cannot turn them off like you can your cell phone. microwave oven, etc.

Page 3 You stated that Act 129 is the Law, that is incorrect; there is nothing in there that states that the smart meters is mandatory or that it's the law that we must except those meters! Same page; you stated dismiss the allegations regarding the neighboring property with prejudice. OWN THAT PROPERTY @ 150 Inwood ave. Carmichaels, pa. 15320. So therefore that property will not be excluded.

Page 4; A repeat page from page 2. Page 5; Also a repeat.

Page 7; You stated that the Complainant does not have standing to file a complaint or request relief on behalf of the resident or owner of the neighboring property located @ 150 Inwood ave. Carmichaels, pa. 15320. That statement is incorrect! I am the property owner.

Page 8; Quotes that have nothing to do with this case!

Exhibit B

Rosemary Chiavetta, Secretary, PA PUC, Commonwealth Keystone Bldg. 400 North street, 2 nd Floor Harrisburg, Pa 17120

West Penn Company;

April 4, 2018.

First Energy Service Company; 2800 Pottsville Pike, P.O. Box 16001, Reading Pa 19612-6001.

Docket # C-2018-3000257

Kim Betchy, @ 140 Inwood Ave. Carmichaels, Pa 15320.

my response to your preliminary objections:

I just realized, that I mailed my response to W.P.P.c. address instead of what was on the paper work, so I will correct that and get this add-on to you.

Also, I was to respond with in 10 days. The paper work was drafted on March 26, 2018; post marked on March 28, 2018 and I did not receive it until March 30, 2018. So therefore, that does not allow much time to prepare, but I will do my best.

The previous response was mailed out on April 3, 2018.

You stated that if the Commission did rule in the Complainant's favor and required the company to remove the currently installed a smart meter at the service location, the Commission would be forcing the company to be in violation of Act 129. The company would not be in violation cause Act 129 does not mandate for install and it is not a law. But, you are in violation of forcing those smart meters on customers, spying, invading their privacy, with out their consent and dangers to ones health!

I should not have to bear the burden of proof to show that the AMI Smart Meters are unsafe. In general, there is no proof that these meters are safe, other than by PECO'S employee and their paid expert witness testimony and with no outside third party certification on the meters, e.g., Underwriters Laboratories (UL) seal or approval. I here just attempting to inflict their unsafe meters upon us with out our consent; against basic fundamental property rights; and in excess of PECO's regulatory authority granted by both federal and PA law. Both those government authorities make the smart meter program voluntary only Published 109-58 the Energy Policy Act of 2005.; 1252. Smart Metering; PA; HB2200, 2807 (f) 7 (2) and PA, P.L. 1592, No. 129.

Current standard AMI Smart Meters contain numerous plastic parts which are prone to overheating (thus the built-in PECO " alarm system "), especially if or when PECO sends out microwave message instructions to their meters to raise temperature monitoring levels to prevent summer heat buildup "false alarms." Standard AMI Smart Meters are not built with surge resistors. The meter has flammable plastic meter parts, establishes PECO's legal culpability for supplying unsafe and unreliable utility service, something violating the PA PUC Mission

statement.

Consumers are forcefully subjected to 3.5 GHz and an added 2.4 GHz without their knowledge or consent with unknown side effects, which basically is an experiment on the human organism. Our homeowners insurance will not cover that unsafe meter if it would catch fire and burn ones home down. What does that tell us? They will not cover it because it does not have the (UL) sealed approval on it. Will the power company's pay for their homeowners policy (FIRE LOSS)?

PECO fails to provide additional incriminating information, the Port Angeles City Council Public Works and Utilities in Washington State ended the Smart Meter program and approved a \$ 1.8 million settlement so that all water and electric meters will be free of the controversial, electromagnetic Smart Meter components.

Act 129/SB2200 as published in the public record did not mandate AMI Smart Meters. Based upon the preponderance of evidence that the PA, State Legislature did not vote into law a mandatory smart meter bill/act, as published in the public record, the PA PUC is guilty of administrative agency overreach in creating regulations contradictory to legislation passed by the only law-making entity in the state-the State Legislature. Therefore, according to the laws of the Commonwealth of PA and the United States of America, I should not be made to accept an UNICERTIFIED as "safe" ANI smart meter, nor have my electric service terminated because I am not in violation of Act 129/SB2200.

CONCLUSION AND PROPOSED ORDERING PARAGRAPHS;

Whereas, this case comes before this Honorable Court seeking a decree of relief from legal and customer harassment tactics by PECO and the PA PUC regarding the mandated retrofitting of an AMI Smart Meter on to me @ 140 and 150 Inwood ave. Carmichaels, Pa, 15320.

That I am not in violation of Act 129 with no termination of electric power service to my home and the other home @ 150 Inwood ave, Carmichaels, Pa 15320 as I provided a preponderance of evidence that Act 129/HB2200 is illegally enforced due to the administrative overreach of the PA PUC which, therefore, makes the act as implemented and administered by the PA PUC not enforceable. Whereas I seek to have my US Constitution and Pennsylvania Constitution rights to remain intact; enforced, not violated, nor impinged upon by PECO and / or the PUC. Whereas the ADA requires that I should at a minimum be reasonably accommodated, and not forced to have a smart meter, which may kill me or adversely affect my health, as so many other cases before this Honorable Court have claimed but have been overruled.

Furthermore, my electricity as an older American in winter cold and summer heat and humidity should not be disconnected. This is a threat to my very life. PECO seems unaware of the consequences of their draconian demands. Reasonable accommodation on the part of PECO, including the PA PUC's erroneous interpretation of HB2200/Act 129 (2008), Whereas, Act 129 (2008) implementation regulations generated by the PA PUC and PECO's smart meter retrofits

are at legal variance with HB2200, 280 / (f) / (2) Legislative History as published of public record and enacted into law, and must be enforced retroactively for all utility customers in the Commonwealth:

I request that this Honorable Court to instruct the PA, PUC to issue immediately revised and corrected implementation rules and regulations for AMI Smart Meters for electric, natural gas and water utilities customer services to reflect the non-mandatory status of smart meters the PA, State Legislature intended, enacted and was published of public record in the PA House and Senate Journals, and further issue automatic opt-outs with no special service fees, as PA consumers have suffered greatly due to misinformation and faulty implementation rules and regulations, including utility company harassment in some cases, as various Complaints had and still have pending cases before the PA PUC and this Honorable Court. It is well established under federal and state law that administrative agencies are creatures of statute and may not establish regulations outside the boundaries established by the legislative. (5)

PA State Senator Fumo is on record in PA Senate Journal October 8, 2008 (pp. 2626-2631) stating, In addition we did not mandate smart meters, but we made them optional, Therefore, the PA PUC, PECO and all public utilities in PA by law must adhere to and abide by the optional smart meter mandate enacted by the PA State Legislature, as only the PA State Legislature can make law, not the PA PUC, a state administrative agency. Whereas, a preponderance of evidence exists that the PA PUC overreached it's administrative powers when formulating implementation regulations for HB2200/Act 129 (2008) thereby causing much physical, emotional, mental and health harms to utility customers who are sensitive to EMF/RF/ELF electronic pollution and or persons with health issues which can be impacted by EMF/RF/ELF non thermal radiation waves.

PECO has no right, nor authority, to make personal decisions for myself, especially regarding my health status, wanting to protect my health from further damages that can and will compromise my immune system and general wellbeing. However, PECO's opinionated legalese proffers 'safe' and inserts that word. The very fact that PECO's FlexNet AMI Smart Meter does not have the Underwriters Laboratories icon prominently displayed anywhere on it's display or housing indicates 'safety' is dubious and, therefore, not proven. Consequently, PECO cannot make nor offer spurious decisions regarding my mandated acceptance of an unsafe AMI Smart Meter to or by this Honorable Court and /or the PA PUC, which essentially is in violation of Act 129 as published of public record and enacted by the PA Legislature, the only law-making entity in the commonwealth. There is the UN's Universal Declaration of Human Rights (7), which in Article 3 states: Everyone has the right to life, liberty and security of person." Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media and regardledd of frontiers." Article 30 " Nothing in this Declaration may be interpreted as implying for any state, group or person any right to engage in any activity or to perform any act aimed at the destruction of any of the rights and freedoms set forth herein."

Respectfully submitted, I did not have a lawyer representing me; I am representing myself. As you can see from my argument, Conclusion and Ordering Paragraphs there's alot that's not legally correct regarding AMISmart Meters in PA and utility customers have had the "Wool pulled over them and by utility companies harassment techniques, which has to stop, as many people are suffering from and with electromagnetic hypersensitivity and other health issues since AMI Smart Meters were retrofitted on to their utility meters. Some customers have three; electric, natural gas and water!

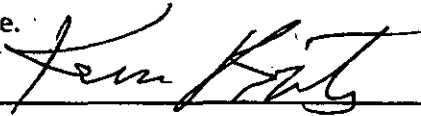

Shortly after PECO started retrofitting AMI SMs, numerous meters exploded and/or caught fire damaging homes, which homeowners insurance policies did not and will not cover! PA is rather unique insofar as utility customers are not permitted to have an Opt-out from AMI SMs, which is not necessary, since the original HB2200 bill was signed into law as Act 129 (2008) as NOT mandatory," and basically it is an "OPT-IN" law; see HB2200, 2807 (f) 7 (2) (i).

We demand that legislature passed into law regarding AMI Smart Meters-not mandatory, and not be forced to accept what the PA PUC thought, " believed " or wrote as implementation regulations. The PUC's implementation regulations have caused health harms to numerous utility customers and family members, so the Commonwealth must be made accountable for the untenable wrong committed by one of it's administrative agencies.

West Penn Power Company, never gave me any notices that they were going to remove my analog meter and install a Killer smart meter, they do not have my consent to remove and replace a spying, unsafe smart meter. Furthermore, they do not have my permission to record data usage and pass it on to Government or a third party. I demand that an analog meter to be re-installed and that the property @ 150 Inwood Ave. be allowed to keep the present analog, so that power can be restored. It has taken some time to put this all together, due to the fact that I cannot spend that much time on the computer at one time due to the side affects of how much radiation that I am being exposed to. Like I said in previous letters, I could leave my property and go to my moms place that has no smart meter and everything goes away, when I return, it all comes back. None of us are above the law!

I thank You; for your time.

Exhibit D

HPI/Reason for visit: Kimberly Betchy is a 55 yrs year old patient, here for new evaluation. Patient has blurred vision OU for about a year. Sometimes has pain in her head but it comes and goes. Gets migraines when she's around anything "electrical". She thinks it may have something to do with the new smart meter the power company installed outside her home. No flashes of light or floaters. Constant watering of eyes- OU. Patient also concerned about electrical "smart meter" causing some health problems.

Past ocular history: none
 Past family ocular history: Mother- cataracts
 Referred by: Carla Franks

Medications were reconciled during visit.

Objective

Neuro-psych: mood normal, patient alert to person, place and time

Visual acuity (with glasses): OD 20/60 PH 20/40
 OS 20/25 NIPH

Pupils: OD - mm 5, constricts to 4 mm with light;
 OS - mm 5, constricts to 4 mm with light

No RAPD OU

Extra-ocular movements: Full OU

Muscle balance: orthophoric OU

Gross Visual Fields by confrontation: Full to all quadrants OU

Intraocular Pressure: 15 mm OD, 14 mm OS.

Slit-lamp examination: OD
 External/adnexa: normal
 Lids/Lashes/Lacrimal: normal
 Sclera/Conjunctiva: white and quiet
 Cornea: clear
 Anterior Chamber: deep and quiet
 Iris: no lesions
 Lens: 1+NSC / 1+PSC

Slit-lamp examination: OS
 External/adnexa: normal
 Lids/Lashes/Lacrimal: normal
 Sclera/Conjunctiva: white and quiet
 Cornea: clear
