

Administrative Law Judge (Jeffery A Watson);

6-5-2018.

Piatt place suite 220, 301 fifth ave, Pittsburgh Pa, 15222. Sent; CERTIFIED MAIL.

Judge Watson;

MY COVER LETTER;

Please find a full report and exhibits pertaining to Docket # C-2018-3000257.

Kim Betchy V's West Penn Power.

I would like to start by addressing the INTERIM ORDER; Not sure why you would even consider the granting for a mediation. You made your order, the only thing that you are doing is allowing wppc, to drag this out, waste taxpayers dollars and the courts time. I understand that they are your co-workers, but enough is enough.

It is in my opinion that the Collusion and Corruption needs to stop. You all need to take your job (position ) more seriously. The PUC, is there to protect the people and not work against them. You all are violating the law by forcing those killer smart meters onto customers, knowingly that the meters have not been proven to be safe and that the smart meters are proven to be a health risk and dangerous and that a customer has to give their consent for the recording's of data usage before it can be released to the government and third parties, which is considered an invasion of our privacy and AGAINST the LAW. You all that are involved are intentionally committing an unlawfull act, and that's a crime. I remind all of you of your SWORN in OATH that you all had to take.

If you are going to allow the PUC, wppc to drag these cases out, then I suggest that you order for the return of analog's to be installed until these cases are settled. That would be the right thing to do! Customers lives are at risk every day that these killer meter's are attached to their homes.

MY REQUEST; To the Law Judge Jeffery A. Watson;

REQUESTS; (1) That you deny wppc. to drag this any further and that means, to deny them a court date for a in court hearing.

(2) That you grant for an immediate removal of the smart meter and order an ANALOG to be re-installed, due to health issues and risks and the un-safe meter.

(3) Have meter removed until independent studies have been conducted that can show that they are safe.

EXHIBITS; A thru M. included.
