**Re: Letter of Notification of Duquesne Light Company for Approval to Relocate and Construct 138 kV Transmission Lines in Beaver County, Pennsylvania.  
Docket No. A-2018-3002418**

Dear Secretary Chiavetta:

Enclosed please find Duquesne Light Company's responses to the Data Requests Propounded by the Bureau of Technical Utility Services ("TUS") Set III. Please note that these responses include a CONFIDENTIAL Supplement and a CONFIDENTIAL Attachment. Duquesne Light Company respectfully requests that these CONFIDENTIAL documents not be included in the public file.

Sincerely,

Michael Zimmerman

PA PUBLIC UTILITY COMMISSION  
SECRETARY'S BUREAU

**Bureau of Technical Utility Services**  
**Data Requests**  
Docket No. A-2018-3002418

A-18 Reference Discovery, Response to A-13. Please explain whether a second 138 kV source currently exists. If so, please explain.

**Response:**

At present, the subject area on the south side of the Ohio River receives 138 kV service from two sources: the first source is supplied by the Z-81/Z-83 138 kV facilities that connect to the Company's Raccoon Substation south of the subject area; and first source is supplied by the Z-181/Z-183 138 kV facilities that cross the Ohio River and connect to the Company's Valley Substation north of the subject area. Maintaining a reliable 138 kV river crossing is necessary to preserve this second 138 kV source to the south side of the Ohio River.

A-19 Reference Discovery, Response to A-14. Please whether the transmission structures currently support the river crossing conductor. If so, please explain why their use is no longer acceptable.

**Response:**

Of the structures identified in the response to A-14 (Towers 4065-1, 4066-1, 4067, and 4068), only Tower 4065-1 is adjacent to the Ohio River and supports river crossing conductor. Towers 4066-1, 4067, and 4068 are located on the inland side of Tower 4065-1. In addition to the reasons described in the Company's responses to A-14 and A-15, use of these structures is no longer acceptable because, due to their location, they cannot be used as part of a route that eliminates underground facilities on the south bank of the Ohio River (as this proposed project would do).

Please see also CONFIDENTIAL Supplemental Discovery Response.
