

Sept. 12 2018

To The Honorable Judge Elizabeth Barnes :

As you are surely aware, I am still NOT an Attorney, nor do I have the time & inclination to become one, & I still do not want an AMI RF SMARTMETER on my house or property, and since I am apparently going to be forced into having one installed despite the facts pertaining to why they are a terrible idea, I will likely decide to go entirely off grid unless I can find a lawyer to take over this quasi legal - **RFSM** Mandating fight in an Administrative Law Hearing which is evidently just as complex & time consuming as any Commonwealth Court hearing, only as you yourself mentioned on Aug 29th, "cases like these are being generally dismissed" despite the production of any evidence by complainants... None the less, I may have found an attorney that will take the case, and he will need some time to familiarize himself with the facts pertaining to the subject matter of this AMI RF SMARTMETERING "MANDATING" ISSUE as well as the facts surrounding the useage & workings of Constant exposure to the F.H.S.S. pulsing radiation these devices use & emit on a regular and constant basis. Also, I hear Mr. Godshall, head of the PUC, will be stepping down this Dec, so, with the possibility of a new person heading the PUC, evidence of merit just might be heard & allowed into record. For these reasons, I am requesting a changing of date for disclosure & evidence being sent to P.P.L. (from Oct. 2018) to Feb. 2019, if you would please allow it. Thank you - Sincerely, Jonathan Barris.
