

PPUC

Request for a continuance of my case until the holidays are over. But between now and then you better figure out how and who is behind the continuous pounding on the left side of my brain when I sleep so that it reverberates the left side of my head. In addition to daily headaches, I am now nauseous all day. I wake up more tired than when I went to sleep. My central nervous system is not working and I have the shakes. My arms and legs are getting weaker and I barely have the strength to breathe. When I get out of bed, I can't walk straight and run into the door jambs.

I don't know who is behind these meters as your office and PP&L refuse to be held accountable. If you kill my 86 year old mother or my cats have soft cell cancers, I will take from you what you take from me. If I die in my sleep from a heart attack induced from an EMF attack brought on by this meter, I will come for you from an invisible place. Stop pulsing that radiation at us 24 hours a day or I will go above your office with my complaints.

You might want to do some research on EMR induced and exacerbated neurodegenerative diseases including MS, Parkinson's, FIBROMYALGIA, dementia and worse. I now believe my fibromyalgia was purposely caused as you don't just go to bed one night and wake up the next day feeling like you went 10 rounds with a bantamweight fighter. I believe you are trying to kill the elderly and the infirmed by using frequencies to overwhelm the immune system until you are dead.

I think filing this, even with facts, is going to be useless as you are all paid shells, but I will go through the motions. All I really have to do is record the frequency used and find documentation that supports the health effects of that frequency. There are lots of studies and a lot of medical documentation supporting this. If a high frequency can shatter glass than the lower the frequencies can cause serious health problems and death. This has been known for decades and we probably have the Germans to thank for this.

Why when I cut off the main breaker, does this meter continue to pulse? What is it measuring? Besides, I have seen behind that meter to all the little tubes and wires inside the fist sized tube that goes into the meter. You can say it saves money and is more efficient, blah blah blah but you and I both know this is not the real purpose of these meters.

Now, I am hoping to remedy this the easy way or I could call on the other 3+ million people in this country alone that are suffering and all the retired military people to march on the White House. Or, I could kill myself live on utube, but I took an oath to defend this country from enemies foreign and DOMESTIC and I take that seriously so what I will NOT do is sit idely by while my body is under constant attack. My brain gets no rest especially while I am sleeping. That is when your body is to rest but my brain is attacked by noise 24 hours a day. I believe that is what's known as TORTURE in some countries. I've heard to break prisoners at Guantanamo Bay they play Christina Aguilera full blast 24/7. Not going to happen at this house.
