Metropolitan Edison Company

:

Docket No. C-2018-3005907

Reply to 'Notice to Plead filed by Metropolitan Edison Company

To the Pennsylvania Public Utility Commission:

In addressing Met Ed's responds to The Formal Complaint

We both agree on Items 1,2,3.

On item 4, Met Ed was actively seeking to terminate service and only ceased such activity when receiving a notice of formal complaint being filled, November 9, 2018. While Met Ed put a denied on this activity, it is not true, activity only ceased after notice was received.

The history put forth my Met Ed looks like it is all correct in their pursuit to turn off my electric.

While the company claims to be reasonable, the mailing to me was not by First Class Mail Postage Prepaid but by First Class Mail Presorted. See attachment 5. This, in my opinion, delayed the actual "in the mail date" to a date much later as such mailing require 500 letters before being truly mailed. Met Ed's mailing did not arrive until after the 10 days requirement for me to respond too, seeking for a failure on my part. In talking to the Post Office, there still is a possible of something being misplaced or delayed in the Postal system, but is very remote. See attachment 5 where it shows the Presort meter stamp and another sticker which, to the Post Office, was unusual to them other than the 'Address Service Requested' part of the sticker. On this sticker, there appears to be a date stamp of '181130'. The Post Office did not believe that this was their sticker. I believe that Med Ed totally mislead you as to the true mailing date and should be held accountable.

See attached (Met Ed's responds): My responds to Met Ed responds.

Met Ed's responds is VAGE. Much is just plain common reasoning with a slight bit of common knowledge on each. As for attachments 2 to 4, speaking for themselves, clearly it is stated that what is being done is illegal.

As for my health, It has been very frustrating on my part as there is only one Doctor that will do PROPER testing (for lawsuits only), but will not do any more. This doctor is in central NJ. All the rest

that I have seen have been USLESS in handling tinnitus. That one doctor's technician said that she never seen a case like mine and that their equipment could not handle it. This was the ONLY object test. Everyone else only did subjective testing. If the best could not handle it, the rest fall far behind as equipment needs to be able to handle my condition and then there is the big question, "Can anything be done?" The long standing answer is "NO!" The long standing answer is "Avoid any problem causing situations." Clearly, I am trying to avoid a "Problem causing situation." I tried to get tinnitus solved and called every ear doctor and audiologist in the phone book to no avail. Needless to say, added radiation is not good for my health and my need to avoid it is great as my experience warrant it.

5. My responds to Med Ed's responds:

Clearly Med Ed does not care about my health and safety, (see paragraph above). Med Ed does not talk about the added electric that is used by the smart meter to maintain the ongoing transmission. Med Ed's denial is rejected.

6. I don't know for sure why a Denied was stated. I probably should have a protective of abuse order against Med Ed. Currently I don't have one.

7. Admitted.

8. 9. 10. Not applicable.

New Mater – Legal Insufficiency

11. Met Ed has refused to cover Health, Safety and Monthly Cost of Smart Meters, in this case.

I have provided information regarding Health and Safety and how peoples bill have jumped up.

Clearly, Med Ed has sought to make this case go away by improper and questionable mailing methods contrary to what they have stated. I believe that Med Ed has insufficient ground to force the install of Smart Meters on my house or anyone's house.

12. History appears correct.

13. I believe that Met Ed does not have the right to FORCE install or shut off electric to customers as stated in attachments.

14. 15. My representative assured me that I could opt out. This has proven to be wrong.

16. 17. 18. 19. Both Med Ed should have complained to the Commission and to the state Congress that there are major problems with Act 129. Med Ed failed to address this issue and in my opinion did so at the cost of consumers, both in health and lives, and in the large amount of money to be gained by the increase in electric usage by the Smart Meters.

WHEREFORE, I Believe that Metropolitan Edison Company has not looked after the individuals rights and much wants to make as much money off of this as they can and do not care about the health and safety of people in general or people like me who cannot have more radiation and must stay away from as much as possible and do not care about people that do not have money to pay forever the costs associated with Smart Meters. I believe this matter should be ruled in my favor or go on to prehearing conference.

Respectfully Submitted,

Ethan A Habrial
