Reply objecting to objections of West Penn Power

I would like to restate that after excessive investigation as to the detrimental health effects of a smart meter I feel the weight of evidence is on the side pointing to the harmful effects on my health.

I think article 1 section of the PA Constitution protects me from getting cancer. I don't understand why my science can be judged as wrong.

I don't want the meter knowing what I do in my private life, as this information may impede my practice of a healthy lifestyle.

I am afraid a cyber attack would affect the smart meter differently than my current meter.

Please! I just want information that tells me what filter hardware I can buy to negate any difference between the old and new meters.

I will pay to have the electric company come to my residence and read the old meter.

Most of all I don't want to have to abandon my house because my service has been taken away.

If I can plead my case with the specifics and depth I cited in my formal complaint to a hearing officer I would be happy. As of now I have not been able to present my body of evidenc cited in my foraml complaint. Do I need to email the citations? I have tried to no avail with the electric company and with the PUC form process.

Regards

JAN KIEFER
