RE: Jerry McMullen, et al. v. Sunoco Pipeline L.P. FLYNN FORMAL COMPLAINT AND PETITION Complaint
No. C-2018-3006116
Docket No. P-2018-3006116

Dear Secretary Chiavetta,

I am writing to you today in support of Jerry McMullen and the other plaintiffs in their request that the PUC conduct a review of Sunoco's public awareness program. If the PUC determines that Sunoco is unable to comply with applicable law, I ask that the PUC direct Sunoco to cease operations on the ME1 and workarround pipeline as defined in the Complaint.

The workarround pipeline increases the volume of hazardous, highly volatile liquids being transported through my neighborhood, past the stores where I shop, the library I frequent, and my daughter's school. . The repurposed ME1, has greatly increased risk of injury, death, and property damage for me and my family. I strongly support the requirement that the Commission perform a thorough review of Sunoco's public awareness program, including public outreach and education process, and emergency procedures sufficient to ensure the safety of the public in the event of a leak or rupture of the pipeline. I have lost faith because Sunoco failed to provide to the public any legally adequate guidance, such as an emergency notification system or emergency management plan. We are left with great questions and in fear.

Knowing Sunoco's pathetic safety record it is extremely disconcerting with the age and questionable condition of The ME1 and workarround pipeline, the ME2, and ME2X. Great questions surround the pipe and its welds, pipe materials, wall thicknesses, and the depth at which ME1 is buried. In Jerry McMullen's yard, it is only 20" below the soil and 25 feet from his bedroom! Based on Sunoco L.P.'s safety history I strongly feel that operations on Mariner pipelines be halted until the safety of our neighborhood and environment can be assured.

Respectfully submitted,
Libby Madarasz
