Docket # C-2018-3001526
Jan. 28, 2019

Administrative Law Judge Jeffery A. Watson,
Rosemary Cravetta, Sec. of the PA. P.U.C.,
Met Ed. Co.

RECEIVED

MAR - 4 - 2019

PA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU

I received your letter of Jan. 18, 2019.
Let me refresh your memories. My
suit against Met. Ed. was started 23 months
ago. It was and still is 3 fold #1 - My
Suit against Met. Ed. was to prove to the court that
Met. Ed. was misrepresenting the true Smart Meter
Law & misleading its customers. I proved it
without a shadow of a doubt. You have pages
& pages of proof #2 - I told you to stop
taking my rights away. I am a U.S. Citizen
Protected by the American Constitution. I showed
you proof thru the Fourth & Fourteenth Amendments.
I sent you hundreds of Pages of Proof that I am
correct on all things I tell you. #3 - Judge
Jeffery A. Watson at my first court appearance
gave me the right to keep my case moving
on - I could proceed with it & try to make
a Mediation Settlement with Met. Ed. I presented
my Mediation Requests & they were turned down.
So now we are going to court again. Only
this time I have more Mediation Requests. - (Enclosed)

I did not want to listen to some doctors that
are paid witnesses from a Big Corporation like Met. Ed.
Health, Privacy, Safety are issues that I had to
show you to prove I am correct on everything I say.
But once I win my case on the 3 above points then

Norma Mosley 2-20-19

we no longer have to pursue them & present them to the Court as proof that I am ~~right~~ about everything I sent you. There is no question in my mind that Health, Privacy, Safety are extremely important that is why I want to keep my Analog Meter.

You want to show the Court thru your witnesses that ^{smart meters} they are safe, and testify about RF fields and compare them to other sources in everyday life.

The difference is that other sources that have RF Emissions & other forms of EMF Emissions can't be compared. None of the other sources have threatened me & billions of other people with Nazi like threats thru letters and over the phone. To tell me that I will get a Smart Meter or else !!! ^{you} Prove the sinister Plot of those pushing, lying & threatening the people all over the World. Do you know if you refuse Smart Meters in other parts of the World you are either shot or imprisoned. Here in the U.S. - if you don't comply they turn off your electric & threaten you! Even the Elderly! I've talked to people all over the U.S. And there is only one thing we all agree on Smart Meters are Pure Evil & So are those that threaten & die to you!

Very Important Law Suits Concerning Smart Meters

* The first successful Law Suit - Portland, Maine reported May 25, 2011, "Skelton, Taintor & Abbott Wins Landmark Smart Meter Case".

(<http://www.skeltonaintorabbott.net/news/85177/skelton-taintor-abbott-wins-landmark-smart-meter-case.html>)

On behalf of several Maine residents, the law firm Skelton, Taintor & Abbott secured a landmark decision that will benefit utility customers throughout the country. Alan Stone, chair of the firm's energy law group, successfully convinced the Maine Public Utilities Commission (MPUC) to find that it was an unjust and unreasonable practice for Central Maine Power Company (CMP) to refuse to permit residential and small commercial customers to opt-out of CMP's smart meter program and to retain their existing electromagnetic meters.

Stone proved that because of unresolved concerns relating to health, privacy and cyber security resulting from the installation of wireless meters on their homes, customers should have a choice concerning the installation of those meters. CMP argued vigorously that customers should not be allowed to opt out, and the MPUC found that position to be unjust and unreasonable. The Portland Press Herald has

characterized the decision as a "landmark"

case that reports to the first time

any state had evaded an election

activity to permit customers the

choice to opt out of a smart meter

program. The case has been

followed by other Public Utilities

Commission and utility experts

around the country, and will

serve as precedent for others

in the determination of how

to resolve what has become a

growing debate about customer

choice and smart meters.

Glan Store is also chair of

the trial practice group at SP2010,

Tanaka and Ueda, and has

been recognized by "Best Lawyers"

in the area of Energy Law.

I read the Handmade Case and agree & applauded

its process. My only disagreement is that I

know the "Law Law" feel that the people should

have a choice not to opt into the smart meter,

Smart Grid program. We need a hard

from the many people that if you opt out

than the electric company puts charges on your

bill & opt out to keep your analog meter. Rip

off!

You cannot opt out if you didn't opt into the smart meter,

Smart Grid program. And no one can be forced to

comply with an unreviewed contract before purchase

Norma K. Mosley

"First of all can you tell me when
our court date is?" I am still investigating
"Sending to you proof that everything I
say is truth. This is the 13th month
of my investigating! The longer I work
on proving my case the more I'm going
to ask for in compensation! I've sent
you everything you asked for & more!

Sent Copies to Met-Ed.

Just a Reminder the Video I left
Met-Ed Review must be submitted to
The Court "The Dark Side of Smart Meter"
by Rob States, the scientist who is
speaking on the Video clip. If Met-Ed
holds back proof about the "Dark Side
of Smart Meters" that I sent them to Review -
They will be obstructing justice. And I
did ask for the return of the Video after
Court is over.

Norma Mosley 2-20-19

Given To Met-Ed to Review!

Introduction to the Video - "The Dark Side of Smart Meters"

(<http://www.youtube.com/watch?v=FLcTASGa-U>)

This is an excellent video that makes one aware of the "dark side" of smart meters, mainly from health & privacy issues. The man speaking, Rob Stokes, has several masters degrees in science; one from MIT; he is an engineer and has made microwave synthesizers; he knows all about the chips that are inside the meters, he is an expert on pulse-power generation. He gives proof that the radiation given out by the meters can be very dangerous to one's health.

We say Smart Meters are a violation of our 4th Amendment privacy rights

PA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU

If you are told from your electric company that smart meters are mandatory, tell them they are wrong. The Energy Policy Act of 2005 says the installation is not mandatory. It should only be installed "upon customer request!" I am the customer and I did not request them, I refused them!

Read it yourself at <http://www.gpo.gov/fdsys/pkg/BILLS-109hr6.enr/pdf/BILLS-109hr6.enr.pdf>. The entire bill is 550 pages of very fine print. Section 1252 is on pages 370-374. Here is another place to find the bill [http://thomas.loc.gov/cgi-bin/bdquery/z?d109:h.r.00006:\(click on Text of Legislation\)](http://thomas.loc.gov/cgi-bin/bdquery/z?d109:h.r.00006:(click on Text of Legislation))

There ~~is~~ ^{is} such a thing as the Tenth Amendment to the Constitution; which essentially tells the Federal Government - "Sorry", if such is not written in the U.S. Constitution, then the right belongs to the people and states respectively.

There are 2 other parts of the U.S. Constitution that I believe are being violated by the Smart-meter program - The fourth Amendment and the Fourteenth Amendment

The Fourth Amendment States: "The right of the people to be secure in their persons, houses, papers, and ~~effects~~ effects against unreasonable searches and seizures, shall not be violated" When you have a Smart Meter constantly

Norma Mosley 2-20-19

snapping into your home 24 hours a day, keeping data on what you are doing, what part of the house you are in, where the electricity is being used, what appliances you are using and when, that is an invasion of privacy. You are no longer secure in your own home!

The 14th Amendment States: "No State shall make or enforce any Law which shall abridge the privileges or immunities of citizens of the USA, nor shall any State deprive any person of Life, Liberty, or Property without the due process of law; nor deny to any person within its jurisdiction the equal protection of the laws."

Forcing citizens to pay to opt out of the SmartMeter program is "abridging privileges" and not granting "equal protection" under the law. Those people who allow the installation of the Smart meter (mainly because they do not know that it was installed or are totally uninformed of its harmful) effects will be treated as the privileged ones and will not have to pay any additional charges. We, who refuse it, will be forced to pay the additional charges to opt out. That is a clear violation of not being treated equally. And I said many times (I did not opt into the SmartMeter program!) If you don't opt into it - You do not have to opt out!

Norma Masley 2-20-19

I have shown you the truth about the
How:

1. I know my Rights!
2. I am defending my life & Liberty
3. I am possessing and protecting my own Property.
4. I am pursuing and obtaining my Safety, Happiness and Privacy
5. I am protecting my Rights as a Citizen against Powerful Companies like (Met Ed).
6. I do not yield my sovereignty to any company or agency which serves me. And I will not let them have power over me.
7. I consider Met-Ed public servants. We give them the authority to serve us. But, we do not give them the right to decide what is good for us and what is not! And if they try to usurp that authority - we the people need to stand up for ourselves and fight for what is our rights! They (Met-Ed) are not our Lord or Ruler! No one will dictate to me what I can or cannot do with my own Property (such as my own analog meter.)

MAR - 4 2019

For Your 3 Witnesses
And The Court!PA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAUNorbert Hankin, U.S. Environmental Protection
Agency, 2002http://www.emrpolicy.org/litigation/caselaw/docs/naiepa_response.pdf

The FCC has ruled that the smart meters are safe, that "the RF emissions are only $1/6,000^{th}$ of the Federal health standard at a distance of 10 feet and far below the RF emissions of many commonly used devices." (as quoted from the CPUC at their hearing Dec. 2, 2010)

* * However, according to Norbert Hankin of the U.S. Environmental Protection Agency, in a report of 2002, the FCC health standards are only for "thermal" exposure. The nonthermal exposure has never been tested. The smart meters give off nonthermal radiation, which is actually much higher and far above what would be considered safe according to FCC health standards.

"The FCC's current exposure guidelines, as well as those of the Institute of Electrical and Electronics Engineers (IEEE) and the International Commission on Non-ionizing Radiation Protection (ICNIRP), are thermally based, and do not

Norma K Mosley

apply to chronic, nonthermal exposure situations. They are believed to protect against ~~that~~ injury that... results) in tissue heating or electric shock and burn... The FCC's exposure guideline is considered protective of effects arising from a thermal mechanism. The generalization by many that the guidelines protect human beings from harm by any and all mechanisms is not justified."

I will send more information so your witness will have no doubt that I'm very well versed in the knowledge of Smart Meters & its effects on our health.

Norma Mosley 2-20-19

MAR - 4 2019

From Your 3 Witnesses

PA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAUThe Reality and Toxicity of ElectroMagnetic
Fields Surrounding Us

Biologically, we are electromagnetic beings; our nerves run on EMF's (electromagnetic frequencies). It therefore stands to reason that when an artificial EMF network is set up all around us, it WILL affect us. The wireless industry did its own studies in the 1990's and found that EMFs were carcinogenic but covered it up. Increased use of cell phones, smart meters, Wi-fi, etc. has been shown to lead to malignant brain tumors, adverse effects on neurotransmitters in the brain (resulting in mood swings, memory loss and stress), disruption in brain glucose metabolism (linked to Alzheimer's) and disruption of melatonin production, a strong antioxidant.

Smart meters, which I call Dumb Spy Meters are weaponized EMF devices that emit dangerous, "pulsed radiation" and are hazardous to our health; they are the most sinister ^{form} of them all. The World Health Organization lists Smart Meters Radiation as a Class 2B Carcinogen.

If you go to www.refuseSMARTmeters.com and read the article (18pgs. long) entitled "Bioeffects of Selected Non-Lethal Weapons" it reveals the deeper, darker agenda for the use of Radiofrequency, Electromagnetic Frequency, microwaves and Laser devices by the U.S. Military. The document states that the military knew many years ago

Norma K. Mozley

that all of the above waves have adverse effects on human beings and they are preparing to use it on human beings. Ms. Phyllis Birchhead of the Dept. of the U.S. Army Intelligence and Security Command said that the information on the website was indeed accurate and now declassified!

Maybe the Court is not familiar with 5G network, domestic electrical installations, cell phone household equipment, transformers, high-voltage lines, baby monitors, computers, WIFI LANS, Naarp (in Alaska), & Digital Dementia, etc. etc. but I've studied it all. Then there are cheap appliances, that I have no intention to buy.

I will keep writing to show you I'm extremely knowledgeable about Smart meters, the Smart Grid and their dangers.

Name: MOSLEY, NORMA K
HMC Number: 1701378
DOB: 05/08/1947
Date of Service: 07/02/2018

Eugene Fellin DO
PSH-SJMG Fleetwood Medical Associates (PP+)
805 North Richmond Street, Suite 101
Fleetwood, PA 19522

Dear Dr. Fellin:

I had the pleasure to follow up at the cardiology clinic with Mrs. Norma Mosley, a 71-year-old patient who underwent an aortic valve replacement with bioprosthetic valve #23 mm Medtronic Mosaic porcine valve on 10/02/09 (Dr. Pae), history of poor tolerance to beta-blocker with metoprolol, asthma, extreme tiredness, with diltiazem 240 slow heart rate and dizziness, Bystolic was tolerated for several years, but finally discontinued due to low blood pressure numbers. Other history, dyslipidemia, asthma, back pain with multiple surgeries (last one in April 2017 for L5). She may have pain in her back again and has been offered steroid infiltration in the past; however, as you know, I do not recommend to use it lightly in a patient who has a bioprosthetic aortic valve due to the risk of infection of the prosthesis with any invasive procedure including infiltration with steroids.

Over the last year, Norma denies having had any cardiac problems. She walks about 3 miles per day with her dogs. She is still working on her farm, mowing the lawn herself for several hours, taking her dogs to the vet. She is very active. Denies any chest pain, shortness of breath, palpitations, or dizziness. She feels physically great, however she is under a lot of emotional stress (anxiety, sleep disturbances) due to a problem with her electricity company (see below).*

Current medications are aspirin 81 mg, atorvastatin 40 mg, levalbuterol, losol and ProAir.

On physical examination, her weight is mildly down at 83.6 kg (-3 kg over the last year), BMI is 34.8, blood pressure 124/80, pulse 60 beats per minute, saturation on room air 100%. Auscultation of the heart is unchanged with a 2/6 systolic murmur at the right upper sternal border consistent with flow through the bioprosthetic valve, very mild radiation to the base of the neck. No diastolic murmur heard. There is a 3/6 systolic apical murmur consistent with mitral regurgitation and definitely noted more intense than during my previous exam where I graded it only 1/6. No gallop. Lungs are clear to auscultation bilaterally. Examination of the neck does not show any JVD, no carotid bruit, no palpable thyroid, no adenopathy. Abdomen is soft and nontender. There is no hepatomegaly and no hepatojugular reflux. Peripheral pulses, tibial posterior are present and symmetrical 2+ and there is no peripheral edema. No clubbing. No cyanosis.

EKG is unchanged since previous with normal sinus rhythm at 61 beats per minute and remains within normal limits, all intervals of normal duration.

An echocardiogram was performed today to reassess the bioprosthetic aortic valve and mitral valve disease as well as the LV function and pulmonary pressure. Normal LV size and systolic function with no regional wall motion abnormalities. Ejection fraction 65%.

No concentric left ventricular hypertrophy.

Mild left atrial dilation.

s/p 23mm porcine AVR (Medtronic). Moderate aortic stenosis with mild aortic valve regurgitation. LVOT/AV = 0.31 (same as last year).

Mild tricuspid regurgitation.

Since study of 7/25/16, the aortic stenosis and aortic insufficiency is similar. LV function and TR is unchanged. Pulmonary pressure remains normal, less than 30 mmHg.

I have not seen any recent labs, but as a goal, we should keep LDL under 70 or at the very least under 100.

IMPRESSION AND PLAN: Norma continues to do very well. She is clinically asymptomatic. We are going to follow up on the results of her echocardiogram today. If everything is well, I will follow up with her in a year with a new TTE.

PS: Norma mentioned that a new "Smart meter" instead of analog electric meter was about to be installed outside her home. She is very distressed by that thought. I have no competence to evaluate the effect of such "smart meter" on people's health in general, however I can see that this is very distressing for Norma, generating high anxiety in her case, and that could definitely affect her well being and overall health. I hope that the electricity company can work some kind of arrangement with Norma in order to reduce as much as possible the important emotional stress to which she is currently submitted. *

Read all

! So you want to compare! So
lets compare. Many studies show that
there is a link between cell phones and
cancer. But, you can turn off your cell
phone when not in use, keeping it away from
the body, using it for only brief conversations.
None of this can be done with a smart meter.
We will have no choice. It will be on
all the time pulsing into our homes - 24
hrs. a day every day! "Many smart meters
are close to bedrooms, kitchens, playrooms. These
devices are never off and the exposure is not
voluntary. The smart meters are being forced
on citizens everywhere. The exposure of millions
to billions of human beings to pulsed microwave
radiation should immediately be prohibited
until the 'RED FLAG' can be hauled down
once and for all!"

Stop Smart Meters!" <http://stopsmartmeter.org>

What people are reporting:

"I am running scared living this nightmare.
I don't know where to live and fear for my
well-being. I already have a prior immune
disability and "I thought I would be legally
protected by the ADA". I don't know where
it is safe for me to live. In addition, the
financial impact of this disaster compounds the
problem. I pay my monthly mortgage and
rented a place, which due to symptoms, I cannot

Norma Masley 2-20-19

stay in. I am not sure I can rent
or sell my condo in good conscience. I
am seeking medical care including
treatments not covered by my insurance.
My out of pocket costs continue to grow.
Stop Smart Meters Now!

"Medusa" Smart Meters will serve as Multi-Data Collecting Devices

These collecting meters will take
the place of collecting towers like a
mini cell phone tower. How is the home
~~chosen~~ to receive the special meter? They
choose a good, faithful, reliable customer,
who always pays his bills on time. What
a nice reward for being a good customer!
One can only imagine the extra radiation
that will be emitted from such a meter
on the people who live inside that home
and the surrounding homes close by!

Bob Stater, the scientist who is speaking
in the video clip "The Dark Side of Smart Meters"
told us that he was speaking to a woman
who was complaining of some enormous headaches
ever since her smart meter was installed. He
Went to her home and found out that
she did have the larger meter (Medusa)
that was collecting data from many other
homes.

Reminder Met-Ed the Video I left
Your to Review must be submitted into Court!

Read It all!

Radiofrequency Interference and
Medical Devices:

The Institute of Electrical and Electronics
Engineers (IEEE) Medicine and Biology
Magazine 17(3): 111-114 (1998)
<http://cwh.ieee.org/soc/embs/comar/interfer.htm>

The past few years have seen increased reports that medical devices, such as pacemakers, apnea monitors, electrically powered wheelchairs, etc. have failed to operate correctly because of interference from various emitters of radio-frequency energy. The condition is called radiofrequency interference (RFI). The consequences of these failures range from inconvenience to serious injuries and death. Reasons for this problem are twofold: (1) increasing numbers of electronically controlled medical devices with inadequate electronic protection against RFI, and (2) a significant increase in the number of RF sources in the environment. Medical devices are widely used outside the hospital and may be attached to, or implanted in, patients. Some medical devices are especially sensitive to the type of digital modulation that some of the wireless communications devices utilize.

Other Harmful Effects of Smart Meters -
Safety and Security Issues.

Smart Meters Are Not UL Certified

Underwriters Laboratory Confirms Meters
Not Safety Tested, Raising Fire Safety
Fears:

Capitola^(CA) - During a meeting last week
in which they joined six other local
governments who have passed laws criminalizing
the installation of wireless "smart" meters,
the Capitola City Council discovered that the
wireless "smart" meters that California utilities
are trying to install are in fact not
certified by Underwriters Laboratory, a
certification that is required under the
State electrical code for all electrical
appliances and equipment within the home.

The lack of certification was confirmed by
Karl Moeller, a senior engineer with UL.

Product certifications can be verified
by going to www.UL.com then scroll
down to the bottom and click on "on-line
certifications directory." You can search for
active certifications at the On-line Certifications
Directory.... In summary, you cannot
confirm these devices as being UL certified!

Karl E. Moeller

Senior Customer Service Engineer II

H.V.A.C., Appliances, and Lighting

Underwriters Laboratories Inc.

1285 Walt Whitman Road

Melville, N.Y. 11747

Norma Maly 2-20-19

The revelation came after Council member Termini, who is a electrician by trade, asked PG&E about the ^{ur} certification. After PG&E staff went to their car to fetch a Smart Meter, the council and PG&E unsuccessfully tried to locate the UL symbol on the meter. This convinced Termini that an immediate Ordinance was required to protect public Safety.

Counties of Santa Cruz, Maria, Mendocino and Cities of Watsonville, Fairfax, and Rio Dell have criminalized smart meter installations. A total of 26 local governments in California have demanded an immediate moratorium.

Five Hazards of Smart Meters

Interview with the Wellington Energy Whistleblower.

A former Wellington employee reveals the dangers of unqualified, untrained employees with no electrical experience installing the Smart Meters. ~~(Posted)~~ (Posted on Jan. 26, 2011 by onthelevel blog.)
www.StopSmartmeters.org also (see <http://bit.ly/fWUqA7>)

~~From~~ From website: The Whistleblower states: I'm disgusted by what I've seen. PG&E and Wellington need to make the public aware that there are risks with Smart Meters. They need to come clear about the emissions of harmful radio waves, potential arcing, employees not trained properly to install the meters, etc. No one is taking the steps necessary to protect the public. People need to be aware of the risks that are being taken with their homes and with their lives.

He states that PG&E + Wellington are concerned about one thing, (money). Safety was an afterthought, if that!

There is only a 2 week training period for Installation training. And managers were always telling that the installers were not trained properly. Many installers would come back to the yard and report that they had seen meters that were hanging by an electrical wire, or other clearly unsafe conditions. There was a lot of pressure on workers to install as many meters as possible in a day.

Norma Masley 2-20-19

in order to earn bonuses. Needless to say, improper training, and being under incredible pressure, there is always Error!, especially with new people working in new territory. I overheard numerous times while at work "you could have burned that goddamned house down." (Sorry God!)

And when you tried to report the errors to Wellington, nothing gets done - and they made your record look bad for reporting what you see wrong. I saw sparks coming from one of the meters on a home reported to Wellington. They never reported back to me if anything was done about the problem.

I feel that the public should be informed enough to prepare for what could realistically turn into another San Bruno. At the time of the San Bruno explosion they were 100% installed with Smart Meters. Are you aware that PGE and the CPUC have not yet responded to questions about what safety precautions they took while installing Smart Meters adjacent to gas lines? Seems like a fairly reasonable question given that the technology can generate sparks. It really doesn't surprise me that they haven't answered questions regarding the smart meters and San Bruno. When I asked one of the managers, who was in charge of training, "is it possible in your opinion that a fire could start from an arc from a meter"

Norma Masly 2-20-19

located above a gas meter" (which always
has some blow off gas emitting from it) he
would not give me a direct answer! He
avoided the question like the plague, quoting
some plumber he knew and on and on, avoiding
an answer! Could the San Bruno fire have
been started by an arc from a meter?
I'll let you decide. The definition of
an electrical arc is: "a sustained luminous
discharge of electricity across a gap in a
circuit" The definition of ignition: the
process ~~of~~ or means (as an electric spark) of
igniting a fuel mixture. Gas is a
fuel. It doesn't take a rocket scientist
to put it all together.

Smart Meters Can Be Hacked

Written by Gordon Robertson, AP Technology Writer,
Mar. 26, 2010 (<http://www.TheBusinessJournal.Com/Energy/4343-AP-Exclusive-Smart-Meters-Can-Be-Hacked>)

(AP) - Computer security researchers say new "Smart" meters that are designed to help deliver electricity more efficiently also have flaws that could let hackers tamper with the power grid in previously impossible ways.

At the very least, the vulnerabilities open the door for attackers to jack up strangers' power bills. These flaws also could get hackers a key step closer to exploiting one of the most dangerous capabilities of the new technology, which is the ability to remotely turn someone else's power on and off.

The attacks could be pulled off by stealing meters - which can be situated outside of a home - and reprogramming them. Or an attacker could sit near a home or business and wirelessly hack the meter from a laptop, according to Joshua Wright, a senior security analyst with IsoGuardians Inc. The firm hired by three utilities to study their Smart Meters' resistance to attack.

Mike Davis, a researcher from IOActive Inc, showed how a computer worm could hop between meters in a power grid with smart meters, giving criminals control over those meters. Our power grids which are already under hacking attacks from adversaries believed to be working overseas.

Norma Mosley 2-20-19

Wright said his firm found "egregious" errors, such as flaws in the meters and the technologies that utilities use to manage data from meters. "Even though these protocols were designed recently, they exhibit security failures we've known about for the past 10 years."

One of the most alarming findings involved a weakness in a communications standard used by the new meters to talk to utilities' computers. Hackers could exploit the weakness to break into meters remotely, which would be a key step for shutting down someone's power. Or someone could impersonate meters to the power company, to inflate victims' bills or lower his own. A criminal could even sneak into the utilities' computer network to steal data or stage bigger attacks on the grid.

For instance, the meters encrypt their data - scrambling the information to hide it from outsiders. But the digital "key" needed to unlock the encryption were stored on data-routing equipment known as access points that many meters relay data to. Stealing the keys lets an attacker eavesdrop on all communication between meters and that access point, so the keys instead should be kept on computers deep inside the utilities' networks, where they would be safer. That lesson seems

to be lost on these meter vendors. That
speaks to the "relative immaturity of
the meter technology.

Norma Mosley 2-20-19

Read it all!

This will take away our LHM Amendment

(Appliances that will have the Chips
for the Smart Meters to "Talk to" and
The U.S. Senate Bill Authorizing them.)

Appliances that have Chips are rolling out since 2012, and the current non-chipped appliance version will be phased out. Lowell's has confirmed this, and Home Depot already has the Water Heaters (GE). I went to a few local Appliance Stores and they are all chipped appliances in their stores.

If we really want to stop this we must start defunding the EPA and start aiming at FERC. (Federal Energy Commission)

If a monster is coming you want to aim at the heart of the matter. Of course we MUST do what we can, lets aim higher!

Stop Mandatory RF Appliances - Stop Federal Bill

How Smart Meters Got in Our State And Why Met-Ed will Not Settle With Me !!!!!

Demand Response and Smart Metering Policy
Actions since the Energy Policy Act of 2005.
This summary is the guide document instructing
state officials on how to implement this
business plan in their respective states.

Follow the Money !!!!!

In late Oct. 2009, The Dept. of Energy (DOE)
announced the recipients of the 3.4 billion
in stimulus grants under the American
Recovery and Reinvestment Act (ARRA). Award
selections were announced for 100 smart grid
projects that are intended to lead to the
rollout of approximately 18 million smart
meters, 1 million in-home energy management
displays, and 170,000 smart meter thermostats,
as well as numerous advanced transformers and
load management devices. The award
selections were organized by category !!

1) Advanced Metering Infrastructure;

2) Customer Systems

3) Electric Distribution Systems

4) Electric Transmission Systems

5) Equipment Manufacturing

6) Integrated and/or Crosscutting Systems

In its announcement, the DOE said the \$3.4 billion
represented the largest amount of ARRA funding
ever made in a single day.

But smart-grid projects that are competing
for the \$800 million in federal grants under the
stimulus program would have to meet strict
cybersecurity guidelines. The standards institute

which they did not

RECEIVED

MAR - 4 2019

PA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU

and other groups are working on a set of recommendations for state utility boards and the Federal Energy Regulatory Commission. (This in addition to the 3.4 Billion the D o E handed out under the stimulus package and does not include the staggeringly number of other quickly devised "grant" programs which were nothing more than federal subsidizing of private corporations identified as "Stakeholders" in this assault on the public, amounting to billions more.) !!!

Absolutely no testing was ever done on the Smart Meters to substantiate the claims by government and manufacturers that the meters are safe. Independent testing however, exposes the danger of these meters to the overall public health. "Smart" meter radiation is a Class 2 B Carcinogen according to the World Health Organization (pdf) (from <http://stop.smartmeters.org/>) And this is just the tip of the SMART METER iceberg. No one knows what the effects of metered systems will have on communities and neighborhoods as they are bombarded with massive amounts of radio frequency radiation thousands of times a day.

So How Did They Do It !!!

It is an assault on the senses that as the country foundered on the edge of near total economic collapse due to the corruption on Wall Street and in banking, that our greedy congresses and presidents for the

last ten years used this crisis to finance a massive assault on the public meant to further cement a political state while pandering to corporations to enrich them and by extension and as a repayment of favors owed, enriched themselves. met Ed

Congress flooded the Dept. of Energy and the Commerce Dept. with billions of dollars loaded into the Economic Stabilization Act 2008 and the Stimulus 2009 package to buy access to individual states. Considering the abhorrent state of our economy, you might be wondering where these billions came from ???

First came the "economic stabilization act of 2008", then the "stimulus" package of 2009 where billions and billions were funneled to federal corporate agencies. Then came a meeting with the "Council of governors" to determine how to access

the states, flood them with cash during severe economic distress that they allowed to happen, and gain access inside the geographical boundaries of the states.

Of course, the "Council of governors" jumped right on the wagon and every governor in every state followed them with their hands out for the free cash... that came from borrowing against the full faith and credit of the United States (Inc.)

which turns out to be ^{me} you, the
Taxpayer. !!!

This allowed the DoE and various other
unlawfully created corporate federal
agencies to disperse massive wads of
cash to those "Stakeholders" they cherish so
much.

In short, the public is being forced
to subsidize the capital investment
and expansion of privately own utilities ^(not Ed)
in addition to being forced to pay a
second time as these same parasitic
corporations ^{not Ed} recoup these same investments
that were funded by the stimulus package
to begin with.

Reading through the Energy Policy Act of
2005 and the subsequent EISA 2007 energy
bill, it is absolutely clear that what did
pass pertaining to Smart Metering pertained
only to Federal buildings and (Federal housing).
This is in adherence to the Constitution
which gives the federal government power only
over needed buildings, insular possessions
and territories. In every other instance
the word "VOLUNTARY" precedes any
item.

The Smart Grid system is nothing more
than a system of accelerated energy costs
with accompanying tax increases. The
System cannot and does not deliver more
efficient use of energy and isn't meant to.
The Intent of the Grid and the Meters is to

Let Me Say This Again!

SECRETARY'S BUREAU

big part of how we ~~lose~~ ^{are} losing
our sovereignty, rights and freedom!

An Adhesion Contract is one that
heavily restricts one party while leaving
the other free with all the bargaining
power. You have tried to restrict
me through threats of turning off my
Electricity time after time. You think
you can bully me into doing something
which is morally wrong & dangerous
to my life & freedom. You lie to me,

And have taken 2 years of my precious
life from me. I've offered you 3
Mediation Settlements & you refused both all three.

By law all valid contracts require parties
to enter knowingly, willfully, and voluntarily,
with full disclosure of all of the terms,

Marma Moody 2-20-19

if not, then the contract is considered unconscionable and an "act of fraud", and may be nullified, rescinded and revoked dating back to its original signing.

By Lying to the people and not giving them the truth ~~of~~ about Smart Meters and forcing them on them is an Act of Fraud. And "Met-Ed" & all other companies should be punished thru the Law for acting like the ~~Criminals~~ Criminals they are !!!

My knowledge & determination will make me free and untouchable and I will not ever live in fear from you again!

You should have taken my last Mediation Requests! If you need another copy let me know - (My Requests) They will be a lot more next time!

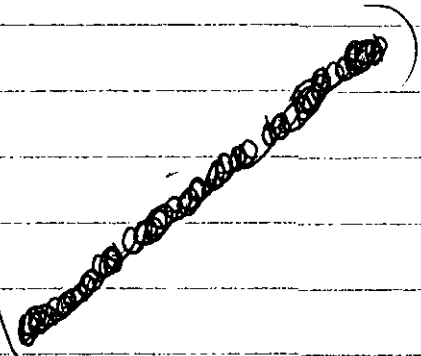

If I have anymore to say you'll hear it in court!

What I wrote up for you on Smart Meters

Norma Maly 2-20-19

Is just the tip of the Ice Berg. I can fill
5 books with the knowledge I have.
So if you have a specific question or
want me to respond to something you
don't know I'll try & educate you!

Norma Masley

Do you know that the American Government
was changed without the consent of the
people in 1871?

Washington DC may be the capital -
but the capital of what? Did you know
DC was deliberately set up in 1871 as a
body corporate and municipal jurisdiction?
And that it only rules by implied consent?
Do you know why each state is its own
sovereign republic?

Smart Meter Q&A

Find out more about Smart Meters and Act 129 and how they affect you.

ARE SMART METERS REQUIRED IN PENNSYLVANIA? *Your Own Words Connected you of signing to the Public Request + Consent!* NO They Are Not!

Yes. Pennsylvania's Act 129 of 2008 requires the state's seven largest electric distribution companies (EDCs) to develop energy efficiency and conservation (EE&C) plans and adopt other methods of reducing electricity used by customers - including the use of smart meters by their customers. The EDCs impacted by Act 129 are Duquesne Light; Met-Ed; Penn Power; PECO Energy; Penelec; PPL Electric Utilities; and West Penn Power.

The Public Utility Commission (PUC) is charged with implementing Act 129 and helping consumers and electric utilities reduce energy consumption, especially at peak times during the day. Smart meters are being installed in new construction and at individual customers (request) with the goal of all customers utilizing smart meters by 2023.

WHAT IS A SMART METER? *I did not request - I said 'No!' 'Request' is your Key word*

A smart meter is an advanced meter that measures electric usage more often than conventional meters and sends that information more quickly to the customer and the EDC. Through two-way communication, smart meters also can monitor the electric distribution system to ensure it is functioning properly.

Smart meters have the following basic functions: measure the electricity used; with (customer consent) remotely coordinate electricity consumption; and interface with EDCs to identify outages and provide real-time visibility into the operational status of an electrical distribution system. *NO consent given*

HOW WILL I BENEFIT FROM THE USE OF A SMART METER? *There is no Benefit*

- Smart meters can help your utility restore your service faster during power outages.
- Smart meters can help you better understand how much electricity you are using throughout the day.
- Smart meters can reduce meter-reading costs and help detect theft of electricity.

HOW COULD A SMART METER HELP ME SAVE ON MY ELECTRIC BILL? *It will not save you money*

Customers on time-of-use rate plans can use the information from smart meters to shift their usage to different times of the day when electricity costs less to produce. By using electricity more efficiently, customers can realize savings on their electric bills. For example, rather than running the dishwasher right after dinner when electric prices are higher, customers can wait until later in the evening to run the dishwasher. *DO NOT HAVE A Dishwasher*

IS THERE CURRENTLY A SMART METER CHARGE ON MY BILL?

Yes. The charge will be included as a separate line item or in your electric utility's base rate. You can confirm that information by contacting your utility. This charge covers the costs of assessing and deploying smart meter technology in accordance with Act 129. Under the law, utilities may begin assessing the surcharge for the work being done prior to actual installation of the meter. This charge applies to all customers.

I am not a customer of smart meters + should not pay this charge !!

Norma Maly 2-20-19

HOW LONG WILL I PAY FOR THE SMART METER SURCHARGE THAT APPEARS ON MY BILL?

This surcharge is reviewed and approved by the PUC annually, and is subject to change. While there is no definitive timeframe to date, the surcharge is expected to remain on customers' bills as utilities work to achieve full smart meter deployment by 2023.

I should not pay this surcharge! Please Refund my money already taken!

CAN I OPT OUT OF THE CHARGE IF I DON'T WANT A SMART METER?

No. State law does not allow a customer to "opt out" of their EDC's smart meter program or surcharge. Installation of a smart meter is a condition of service to more accurately reflect rates and usage, and will ensure no disruption to your service. Questions concerning the process or timetable for the installation of your metering equipment should be directed to your electric utility.

I can't "opt out" of something I didn't "Opt In to"

WHEN WILL I HAVE MY SMART METER?

NEVER

Smart meters must be installed no later than 2023 for customers of the seven EDCs covered under the law. Customers who want the technology sooner may ask the EDC to install it. The customer must pay a fee for the early installation. That fee may be as little as \$17. Contact your electric utility for more information.

DO NOT WANT SMART METER

WILL MY SMART METER INFORMATION BE SECURE?

NO

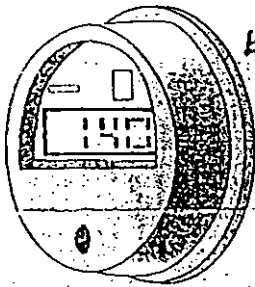

Smart meter communication network is a high-security environment that employs layers of protection from unwanted and unlawful access. Pennsylvania regulations restrict access to customer information, and do not permit an electric company or electric supplier to release private customer information to a third party without customer consent.

HOW DOES A SMART METER WORK?

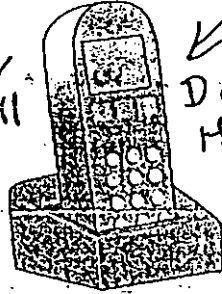

Smart meter communications can happen over the power lines or by radio frequency (RF), just like many other devices in your home. According to a study by the California Council of Science and Technology, wireless smart meters, when installed and properly maintained, result in much smaller levels of RF exposure than many existing common household electronic devices.

Smart Meters

How did we get into this mess?

Well, back in 2008 the PA PUC, illegally mandated that utility companies, with some exceptions, must use smart meters to record usage. I say illegally because in 2008 the PA General Assembly passed a law authorizing the use of smart meters. The Law did not say that they must be mandatory!!! That was an unauthorized interpretation by the PA PUC.

THE GENERAL ASSEMBLY OF PENNSYLVANIA

HOUSE BILL

No. 1565 Session of 2017

INTRODUCED BY REESE, BARRAR, BOBACK, V. BROWN, DeLUCA, DUNBAR, GABLER, GILLEN, GROVE, PHILLIPS-HILL, JAMES, KAUFFMAN, LAWRENCE, MARSHALL, METCALFE, METZGAR, B. MILLER, ORTITAY, PETRARCA, PICKETT, ROTHMAN, SACCONI, WALSH, WARD, WARNER AND ZIMMERMAN, JUNE 16, 2017

REFERRED TO COMMITTEE ON CONSUMER AFFAIRS, JUNE 16, 2017

AN ACT

1 Amending Title 66 (Public Utilities) of the Pennsylvania
2 Consolidated Statutes, in restructuring of electric utility
3 industry, further providing for duties of electric
4 distribution companies.

5 The General Assembly of the Commonwealth of Pennsylvania
6 hereby enacts as follows:

7 Section 1. Section 2807(f) of Title 66 of the Pennsylvania
8 Consolidated Statutes is amended to read:

9 § 2807. Duties of electric distribution companies.

10 * * *

11 (f) Smart meter technology and time of use rates.--

12 (1) [Within nine months after the effective date of this
13 paragraph, electric] Electric distribution companies [shall]
14 may file a smart meter technology procurement and
15 installation plan with the commission for approval. [The plan
16 shall describe the smart meter technologies the electric
17 distribution company proposes to install in accordance with

Norma Mosby 2-20-19

Over
Paragraph 2 (i)

Can you Read!

paragraph (2). X

~~(2)~~ Electric distribution companies shall furnish smart meter technology as follows:

~~(i)~~ Upon request from a customer that agrees to pay the cost of the smart meter at the time of the request.

(ii) In new building construction.

(iii) In accordance with a depreciation schedule not to exceed 15 years.]

(3) Electric distribution companies shall, with customer consent, make available direct meter access and electronic access to customer meter data to third parties, including electric generation suppliers and providers of conservation and load management services.

(4) In no event shall lost or decreased revenues by an electric distribution company due to reduced electricity consumption or shifting energy demand be considered any of the following:

(i) A cost of smart meter technology recoverable under a reconcilable automatic adjustment clause under section 1307(b), except that decreased revenues and reduced energy consumption may be reflected in the revenue and sales data used to calculate rates in a distribution rate base rate proceeding filed under section 1308 (relating to voluntary changes in rates).

(ii) A recoverable cost.

(5) [By January 1, 2010, or at the end of the applicable generation rate cap period, whichever is later, a] A default service provider [shall] may submit to the commission one or more proposed time-of-use rates and real-time price plans. The commission shall approve or modify the time-of-use rates

1 and real-time price plan within six months of submittal. The
2 default service provider [shall] may offer the time-of-use
3 rates and real-time price plan to all customers that have
4 been provided with smart meter technology [under paragraph
5 (2)(iii)]. Residential or commercial customers may elect to
6 participate in time-of-use rates or real-time pricing. [The
7 default service provider shall submit an annual report to the
8 price programs and the efficacy of the programs in affecting
9 energy demand and consumption and the effect on wholesale
10 market prices.

11 (6) The provisions of this subsection shall not apply to
12 an electric distribution company with 100,000 or fewer
13 customers.]

14 (7) An electric distribution company may recover
15 reasonable and prudent costs of providing smart meter
16 technology [under paragraph (2)(ii) and (iii)], as determined
17 by the commission[. This paragraph includes], including
18 annual depreciation and capital costs over the life of the
19 smart meter technology and the cost of any system upgrades
20 that the electric distribution company may require to enable
21 the use of the smart meter technology which are incurred
22 after the effective date of this paragraph, less operating
23 and capital cost savings realized by the electric
24 distribution company from the installation and use of the
25 smart meter technology. Smart meter technology shall be
26 deemed to be a new service offered for the first time under
27 section 2804(4)(vi). An electric distribution company may
28 recover smart meter technology costs:

29 (i) through base rates, including a deferral for
30 future base rate recovery of current basis with carrying

1 charge as determined by the commission[; or
2 (ii) on a full and current basis through a
3 reconcilable automatic adjustment clause under section
4 1307].

"Mediation Requests" (My Last Request

* My Requests for Settlement Between
Met-Ed & Myself, Norma Mosley. *

When I first approached Met-Ed about my keeping my Analog Meter. I asked very nicely that I want to keep my Analog Meter & I will read the meter each month & call in the readings. I told you I do not want a Smart Meter & will not "opt into" the Smart Meter, Smart Grid System. Just provide me with the same service that I've always had with the Analog Meter. I sent you all the reasons with proof why I would not go along with Smart Meters. I showed you that you were representing a false view to the people. I showed you the real law with proof. I showed you how Smart Meters were dangerous to every human here on Earth with proof. I showed you that they weren't UL Approved or safe to be on houses. I listed all the medical problems people would face. I told you all the true facts about Smart Meters which you try to deny - but can't. At that time I asked just to leave my Analog Meter on my house - don't turn off my electricity & I'll call my reading into you each month. And leave me in peace. You rejected my offer with threat after threat. I went to my State Representative's Office (David Argall) in Hamburg which is a 20 min. drive each way. I sat there & waited my turn to talk to his representative & we filed papers with the District Attorney's office. I dealt with David Argall's office & the District Attorney's office stating my complaints. I told them I tried to resolve my problem with certified

"Mediation Requests"

"According to the Law"

Along with the first 10 Amendments, we see, the Fourteenth Amendment has been used by the courts to bring about the enormous changes in the American legal structure that have taken place since the end of the Civil War.

The language of the first section of this Amendment is interesting, directed as it is against the States, whereas the first ten Amendments are directed against the federal government.

Section 1: All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of laws.

I am a Natural Born Citizen

I've sent you 100's of pages of truth on this matter - read them

22 - Your Right to Individual Privacy... Smart Meters Take Away my Privacy!! All of It!!!

* (# 41 - Interference with Your Person)
I have a right to be free from bodily injury, however slight. You also have a right to freedom from threats of injury that you sensibly believe may be carried out. In recent times the courts have also devised ways to compensate you fast.

Mediation Requests

Read It all!

* suffering or distress that may be more mental
than physical or that may be a combination of
both. The actions against me were both mental
& physical. Met-Ed interfered with both, by
their threats sent to me over the phone. My damages
are therefore for mental upset, fright, extreme stress
as reported by my (heart doctor). Met-Ed knew
I had a heart problem, Asthma, & Immune Problems
from my first contact with them. But they insisted
on threatening me by removing my Analog Meter
and turning off my electric. It did not matter
to them that they were inducing stress on me
producing Asthma Attacks all the time. And
that after 9 years since my last ^{heart} operation - they
put more stress on me that I've had in the
last 9 yrs. effecting my heart. They do not
care about their customers. They care about 1 thing
putting Smart meters on every house rather the
people don't want ^{now} causing all kinds of
mayhem!

^{23 months} I've been fighting for closure to this problem
for over ²³ months ^{now} & ^{still} counting. My neighbor
who was also fighting Smart Meters (Mrs. Youse) went
up to Hershey to pick her brother up at the Hospital,
to come ^{home} only to see her Analog Meter gone & a Smart
Meter in its place. So, now more stress & worry
comes in that while I'm away from my house
the same thing will happen to me. After all, I
was helping her to fight Smart Meters also. I
go to PASM (Pennsylvania's Against Smart Meters) meetings
& these stories are the same everywhere - people fighting
to keep their analog meters. Come home from work
or just walking their dog & Met-Ed is that quick!

* Mediator Requests *

to take their Analog Meters, so they can put another notch in their belt that they just destroyed someone else's life!!! All Across Pa. & America & the World, people are forced (to some it's to die or go to jail or they just shoot you) to have Smart Meters. And all in the name of the Almighty Buck unto Evil that wants to eliminate us. (Read my Report). Go to Washington D.C. & look at the White Tombstones & tell them & their families they died for nothing!! Because, evil has come to America & they don't care about those who died to keep us free!!! Listen to a little child who asks when his daddy is coming home (and he never does). Look at the Service men & women coming home without limbs. Tell them they did it for nothing. Sorry, not me. I will continue their fight for freedom because it is also my fight. And their families will know my fight for them & what they did!

46. Keeping others off your Property.

If someone comes onto your land or into your house or apartment without your permission, he has committed a tort of trespass, and you may sue him even though he does no damage whatever to your land, house or property. As the person legally in possession, you are entitled to the complete and unrestricted "quiet enjoyment" of your property. And can bring the action of trespass!! In fact, you must assert your rights over your property or run the risk of losing some of these rights. This is called prescriptive right. You are said to in effect to have surrendered

* "Mediation Requests" *

your right to the exclusive use of your own property by failing ever to mention or complain about trespassers. I have "NO TRESPASSING SIGNS" all over my property and around my analog meter. There are 3 Different Kind - Mostly Directed toward Met-Ed ^{at the} Electric Company's Contractors. Met-Ed has Copies of the Signs - So does David Argall's office, The Attorney General's Office, The P.A. PUC office. And also the Fleetwood Police. The Police ^{Chief} came to my house & we had a long talk. There are also the same signs on my doors to my house, just in case they by pass the ones in the yard. "Double Warnings" !!!!!

Now Lets Talk About Fees:

The amount of time & effort I spent on this particular problem or case has been tremendous. As I could not afford a lawyer, I had to take it upon myself to defend my rights as a citizen. I had to prepare to protect myself by learning all I could about Smart Meters and The PUC. So I am entitled to and do charge you for expenses occurred (disbursements) in the handling of any case. You did not respect me as a customer or human being. Nor did you respect my time. In the last ²³ mos. I lived & breathed Smart meters every second of my life even to the point that at night I would get up & study the law and keep on writing & go outside at midnight to

23 months

* Mediator's Requests *

See if my Analog Meters was still there on my house.

Studying the Law + Smart Meters themselves (Every Aspect of them) with their multiple complications + many directions I was taken + still am is totaling Exhausting. And no amount that I would charge to do this job would not compensate me with all the "Anxiety" I have gone through so far!! I couldn't have paid a lawyer to take this case. I would have gone into Bankruptcy.

Bill for 8 mos. + Counting 40 or more hours a wk. research + studying for 32 weeks so far. C² 50⁰⁰ an hour (my lawyer would have charged me 200⁰⁰ an hr.)

Expenses - Gas, mileage to + from State Representative David Argallo's office, 20 miles each way Gas + mileage from Library, Book Stores + to have Copies made, etc.

Cost of materials to Read + Study to fight Smart Meters.

Hours on the Phone w/ P.A., P.U.C., State Attorneys Office, PASM, People who won cases against Smart Meters, etc.

Cost of 1,000's of Copies made! Went thru 25 pens + 1,000's of sheets of Paper.

Five thousand eighty eight minutes of Stress + Health effects on my body + mind every day for 8 mos. Numerous Asthma attacks + Stress on my Heart. What Is Your Life Worth?

Cost to the P.O. to send certified mail to met Ed.

* Mediation Requests *

23 months & Counting

In ²³ mos. & Counting I spent
32,000 hrs. that's 40 hrs a week. x
32 weeks

I spent about 2,000 in Expenses
Plus 5,088 minutes of every day
Under Stress & threats interfering
with my peace of mind & health,
You took 8 mos. of my life away from
me!! Now ²³ mos.

And the case isn't even over yet!!
So far I figure 32 weeks fighting the Case
x 40 hrs a week writing &
Studying, etc

1280 hrs so far
x 50.00 an hr. (my Lawyer gets 200.00 an hr.)
= 64,000 (& counting)
2,000 Expenses

Now 23 Months

And for Destroying my Health
Life for the last ²³ mos. & Counting 2 million dollars & Counting
my Life & Health are everything to me & No Am't
amount can be enough to get those ²³ mos back!!

Total (2 million ⁷⁵ thousand) X X

+ 10,000 a week starting Feb. 1st
until Settlement

(Well up it to 2 million 75 thousand
if we have to go to Court)
OR More! + 10,000 a week from
Feb 1st to settlement

Now 23 months & Counting
2 million 75 thousand
Plus 10,000 a week starting in Feb until we
get to Court.

* Mediation Requests *

Besides the Fees, I want a
Court order of Injunction issued against Met-Ed &
all electric companies in PA. along with all
contractors including Wellington and anyone else
to refrain from taking any retaliatory action
against me!! Do Not Remove my Analog Meter!!!
Do Not Put a Smart Meter on my Property!!!
Never turn off my electricity or threaten to do
so ever again!! No one is allowed on my
property!! I want the court order to reflect
that if I should move from this residence that
the order be legally binding in all of PA.
I will have the right to arrest anyone that tries
to break the Injunction.

I want all charges on my previous
bills. Future bills not to have any charges
that represents Smart Meter, Smart Grid on my
bill. Return all charges that I have been
billed so far. I did not "opt in" too
your Program.

Do Not Charge me with an "Opt Out"
Charge because I never "Opt In"! I
will not be a party to destroy humanity.

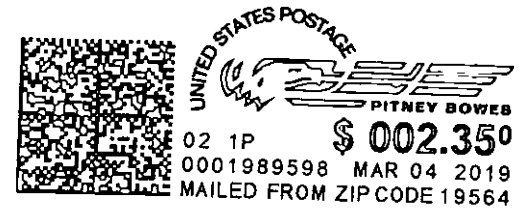

I want a letter of Apology for
putting me thru ⁴³³ ~~the~~ Mis of Hell

Last but not least, I want you
to tell the People of PA. the truth. That Smart
Meters are not mandatory, And if they want
their Smart Meters Removed just to call you. They
can have their Analog Meters Replaced at
no charge to them! There should also be
a Public Apology to me & all your
customers!!
