When is My
Court Date? Please
let me know !!!

The way things are going
electromag is sure to be the death
of us all !! Unless Judges & Citizens
fight together to stop it! It's pure
insanity! It's murder & extortion
rolled up into a meter & grid! The
enemy is the people behind them. And
they need to be held accountable!

Do you know I study Bible Prophecy,
and there is no longer a U.S. of
America in Prophecy because of
the Greed of the Electric Companies, Gas
Companies, Water Companies, Liberals, New
World Order, Obama, Al Gore, The Illuminati,
etc, etc, etc - No End to Greed!

The USA - "Where Love Once Lived !!!"

Norma Maly 3-13-19

One More Reason Met-Ed Refuses To Make
Settlement With Me!

To Met-Ed & all Other Utility Companies:

Let Me Remind You that public agencies exist to aid in the conduct of the people's business. The people of this state do not yield their sovereignty to the agencies which serve them. We did not give these public servants the right to decide what is good for the people to know and what is not good for them to know.

You are a ~~public~~ public agency, created by the people. You and your various utility companies are supposed to be serving us, not being our Lord and master telling us what we can do and cannot do with our own property, removing our analog meters and forcing smart meters on us, without our permission or even knowledge!

Instead of serving us, you have become the servants (or slaves) of a powerful international organization that is dictating to you and you, in turn, force those dictates upon us. It is, as our utility rates that get to pay for your affiliation with this powerful group, which is probably costing millions of dollars. This group is called I.C.E.I., which stands for International Council on Local Environmental Initiative!

Now they try to disguise their international connections and call themselves "Local Government for Sustainability" It is a United Nations NGO

4
(non-governmental organization) So, in other words, whoever is a member of ICLEI is now coming under the mandates of the U.N.

This is contrary to the U.S. Constitution that prohibits states or local governments from entering into any agreement with a foreign power. (Article I, Section 10)

We urge you to drop your membership with ICLEI and the stranglehold that they hold upon you. We the people, who are supposed to be your sovereigns, are the ones whom you are to serve.

The mandate that ICLEI is pushing upon all of its members is called UN Agenda 21, now called Agenda 2030, created in 1992 in Rio and signed onto by 179 heads of State. It is a comprehensive blueprint to control every aspect of how man interacts with the environment. That includes state and local governments, the food we eat, the water we drink, the air we breathe, our mode of transportation, and, of course, the energy we use.

ICLEI is pushing Agenda 21 (30) on their members utility companies through what ~~we~~ they call "The Green Communities (G.C.) program" which according to them is "designed

5

to provide data, tools, and training to local governments customers to enable them to better understand and manage their municipal and community-wide energy usage in order to develop and implement climate action plans." However, ICLEI does not just make suggestions to their member organizations, there are more like mandates.

The Mandates of ICLEI upon utilities through their Green Communities (GC) Program to "implement climate action plans": 1. Whom they are to work and contract with; 2. What goals they will have; 3. Standardized energy data collection; 4. Additional possible demands; 5. The ultimate goal - 100% compliance by the year 2020.

1. Who they will work and contract with: They will contract with seven different NGOs and government organizations to provide the GC Program services and products. They are told who the government agencies will be: Example - "PG&E" will contract with the Association of Bay Area Governments (ABAG), the Association of Monterey Bay Governments (AMBAG), the Great Valley Center (GVC), the Sierra Business Council (SBC), and local Governments for Sustainability (ICLEI) to provide GHG inventory and climate action plan development assistance and resources to foster "benchmarking".

2. Their goals are determined for them: "Major program

activities fall into three sub-programs

- a. Statewide Assistance for Local Governments (Statewide Program);
- b. Climate Planning Assistance for Local Governments (Climate Program); and
- c. Fluorescent Lamp Recycling Program (FLR Program)

3. Standardized energy use data collection:
"for climate planning purposes:" "P.G. & E. has collaborated with ICFEI to develop standardized reports to provide local governments aggregated non-customer specific data on the GHG emissions associated with their electricity and natural gas use at the municipal level and at the Community-wide scale."

4. Other possible demands: "include integrated audits, coordination and alignment of emergent residential retrofit programs, or green building support." This program may also provide additional services, subject to funding availability and future contract negotiations."

5. The ultimate goal: "This program supports the Strategic Plan's goal for 50% of governments to adopt energy/sustainability/climate action plans by 2015 and 100% by 2020."

Doesn't all this sound like a little too much big brother dictating to you what you should be doing or not doing - all

under the excuse of climate action
 planning? Who has ever been able to
 plan what the climate is going to be
 like anyway? Weather is very unpredictable!
 What a shaky house of cards to be
 basing all of this planning on! We
 urge you to drop your affiliations with
 ICLEI!

She states, "my group which includes four physicians (MD's), two Los Alamos physicists, and homeowners, parents, & residents, is resisting Smart meters due to the data from over 2000 peer-reviewed studies that show exposure to these devices causes a 400% rise in cancers in adults, a larger impact on children and the children carried in the womb; and the children's skulls, being thinner, are much more permeable to the electromagnetic radiation. This electromagnetic radiation is also particularly dangerous for the elderly and those with implants, heart problems, or other health problems. I have attached one abstract that contains the following finding:

One remarkable observation is the fact that the lowest energy levels give rise to the most pronounced albumin leakage. If mobile communications, even at extremely low energy levels, causes the users' own albumin to leak out through the blood-brain barrier (BBB), also other unwanted and toxic molecules in the blood, may leak into the brain tissue and concentrate in and damage the neurons and glial cells of the brain.

Nancy Moly 3-13-19

Continued

In later studies we have shown that a 2-h exposure to GSM 915 MHz at non-thermal levels, gives rise to significant neuronal damage, seen 28 and 50 days after the exposure. In our continued research, the non-thermal effects (histology, memory functions) of long-term exposure for 13 months are studied as well as the effects of short term GSM 1,800 MHz upon gene expression.

As health care providers, we are concerned that there will be a sharp rise in cancers, although the initial symptoms of this exposure includes: Brain fog, anxiety, depression, sleep problems, asthma, palpitations and arrhythmias. I can ask you to please read the web-site I listed at the beginning of the article. It's about youth suicides of young people living next to a "mast" (smart meters) as they are called in Europe.

But, as an American citizen, I share your fears that these ^{smart} meters, this grid, comprises a much greater threat - especially as people literally lose their healthy brains, their strength and will to resist.

Yours truly, Felicia N. Trujillo, ND, GCFP
