Docket # C-2018-3001526
Jan. 28, 2019

Administrative Law Judge Jeffery A. Watson,
Rosemary Cravetta, Sec. of the PA. PCU,
Met Ed. Co.:

I received your letter of Jan. 18, 2019.
Let me refresh your memories. My
suit against Met-Ed was started 13 months
ago. It was and still is 3 fold #1 - My
suit against Met-Ed was to prove to the court that
Met-Ed was misrepresenting the true Smart Meter
Law & misleading its customers. I proved it
without a shadow of a doubt. You have pages
& pages of proof. #2 - I told you to stop
taking my rights away. I am a U.S. Citizen
Protected by the American Constitution. I showed
you proof thru the Fourth & Fourteenth Amendments.
I sent you hundreds of pages of proof that I am
correct on all things I tell you. #3 - Judge
Jeffery A. Watson at my first court appearance
gave me the right to keep my case moving
on - I could proceed with it & try to make
a mediation settlement with Met-Ed. I presented
my mediation requests & they were turned down.
So now we are going to court again. Only
this time I have more mediation requests - (Enclosed)

I did not want to listen to some doctors that
are paid witnesses from a Big Corporation like Met-Ed.
Health, Privacy, Safety are issues that I had to
show you to prove I am correct on everything I say.
But once I win my case on the 3 above points then

Norma Mosley 2/20/19

RECEIVED

MAR 15 2019

PA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU

we no longer have to pursue them & present them to the court as proof that I am ~~right~~ about everything I sent you. There is no question in my mind that Health, Privacy, Safety are extremely important that is why I want to keep my Analog Meter.

You want to show the court that you witnesses that ^{smart meters} they are safe, and testify about RF fields and compare them to other sources in everyday life.

The difference is that other sources that have RF Emissions & other forms of EMF Emissions can't be compared. None of the other sources have threatened me & billions of other people with Nazi like threats thru letters and over the phone. To tell me that I will get a Smart Meter or else !!! ^{you know} the sinister Plot of those pushing, lying & threatening the people all over the world. Do you know if you refuse Smart Meters in other parts of the world you are either shot or imprisoned. Here in the U.S. - if you don't comply they turn off your electric & threaten you! Even the Elderly! I've talked to people all over the U.S. And there is only one thing we all agree on Smart Meters are Pure Evil & So are those that threaten & die to you!

Docket # C-2018-3001526

To Be Presented into Court Hearing:

Enclosed the first Successful Law Suit -
"Skelton, Tainter, Abbott Wins Landmark
Smart Meter Case" against Maine Public Utility
Commission & Central Maine Power Company.
Alan Stone chair of the trial practice group
at Skelton, Tainter and Abbott has been
recognized by "Best Lawyers" in the area
of Energy Law. This win of this case
has been followed by other Public Utility
Commissions and utility experts around
the Country, and will serve as precedent
for others ~~to determine~~ ^{in the} determination of how
to resolve what has become a growing
debate about customers choice of smart meters.

- #2 Enclosed Proof of RF & EMF Emissions & Dangers for 3 ^{Witnesses}
- #3 Added Mediation Requests.

Very Important Law Suits Concerning Smart Meters

* The first successful Law Suit - Portland, Maine, reported May 25, 2011, "Skelton, Taintor & Abbott Wins Landmark Smart Meter Case".

(<http://www.skeltonaintorabbott.net/news/85177/skelton-taintor-abbott-wins-landmark-smart-meter-case.html>)

On behalf of several Maine residents, the law firm Skelton, Taintor & Abbott secured a landmark decision that will benefit utility customers throughout the country. Alan Stone, chair of the firm's energy law group, successfully convinced the Maine Public Utilities Commission (MPUC) to find that it was an unjust and unreasonable practice for Central Maine Power Company (CMP) to refuse to permit residential and small commercial customers to opt-out of CMP's smart meter program and to retain their existing electromagnetic meters.

Stone proved that because of unresolved concerns relating to health, privacy and cyber security resulting from the installation of wireless meters on their homes, customers should have a choice concerning the installation of those meters. CMP argued vigorously that customers should not be allowed to opt out, and the MPUC found that position to be unjust and unreasonable. The Portland Press Herald has

Norma Mosley 2/20/14

described the decision as a "landmark" case that represents the first time any state had ordered an electric utility to permit customers the choice to opt out of a smart meter program. The case has been followed by other Public Utilities Commissions and utility experts around the country, and will serve as precedent for others in the determination of how to resolve what has become a growing debate about customer choice and smart meters.

Alan Stone is also chair of the trial practice group at Skelton, Taintor and Abbott, and has been recognized by "Best Lawyers" in the area of Energy Law.

I read this landmark case and agree & applaud its success. My only disagreement is that I know the "True Law" - feel that the people should have a choice not to opt into the Smart Meter, Smart Grid program. I've read & heard from too many people - that if you opt out then the Electric Company puts charges on your bill to opt out & to keep your Analog Meter! Rip Off!

You cannot opt out if you didn't opt into the Smart Meter, Smart Grid program. And no one can be forced to comply with an unrevealed contract between private

Norma K. Mosley

Corporations, and to which you were never a party and had no knowledge of !!!!!!

SECRETARY'S BUREAU

Sent Copies to Met-Ed.

Just a Reminder the Video I left
Met-Ed Review must be submitted to
the Court "The Dark Side of Smart Meter"
by Rob States, the scientist who is
speaking on the Video clip! If Met-Ed
holds back proof about the "Dark Side
of Smart Meters" that I sent them to Review.
They will be obstructing justice. And I
did ask for the return of the Video after
Court is over.

Norma Mosley 2/20/19

Given To Met-Ed to Review!

Introduction to the Video - "The Dark Side of Smart Meters."

(<http://www.youtube.com/watch?v=FLcCTaSG2-U>)

This is an excellent video that makes one aware of the "dark side" of smart meters, mainly from health & privacy issues. The man speaking, Rob-States, has several masters degrees in science; one from MIT; he is an engineer and has made microwave synthesizers; he knows all about the chips that are inside the meters, he is an expert on pulse-power generation. He gives proof that the radiation given out by the meters can be very dangerous to one's health.

He says Smart Meters are a violation of our 4th Amendment privacy rights.

Watch The Video In Court
And See All He Has To Say!

Norma Moody
2/20/19

If you are told from your electric company that smart meters are mandatory, tell them they are wrong. The Energy Policy Act of 2005 says the installation is not mandatory. It should only be installed "upon customer request!" I am the customer and I did not request them, I refused them!

Read it yourself at <http://www.gpo.gov/fdsys/pkg/BILLS-109hr6enc/df/BILLS-109hr6enc.pdf>. The entire bill is 550 pages of very fine print. Section 1252 is on pages 370-374. Here is another place to find the bill <http://thomas.loc.gov/cgi-bin/bdquery/z?d109:h.r.00006>: (click on Text of Legislation)

There ~~is~~ such a thing as the Tenth Amendment to the Constitution, which essentially tells the Federal Government - "Sorry", if such is not written in the U.S. Constitution, then the right belongs to the people and states respectively.

There are 2 other parts of the U.S. Constitution that I believe are being violated by the Smart-Meter program: The fourth Amendment and the Fourteenth Amendment.

The Fourth Amendment States: "The right of the people to be secure in their persons, houses, papers, and ~~effects~~ ^{effects}, against unreasonable searches and seizures, shall not be violated. . . ." When you have a Smart Meter constantly

Norma Mosley

2/20/19

Snooping into your home 24 hours a day, keeping data on what you are doing, what part of the house you are in, where the electricity is being used, what appliances you are using and when, that is an invasion of privacy. You are no longer secure in your own home!

The 14th Amendment States: "No State shall make or enforce any Law which shall abridge the privileges or immunities of citizens of the USA, nor shall any State deprive any person of Life, Liberty, or Property without the due process of law; nor deny to any person within its jurisdiction the equal protection of the laws."

Forcing citizens to pay to opt out of the SmartMeter program is "abridging privileges" and not granting "equal protection" under the law. Those people who allow the installation of the Smart meter (mainly because they do not know that it was installed or are totally uninformed of its harmful effects) will be treated as the privileged ones and will not have to pay any additional charges. We, who refuse it, will be forced to pay the additional charges to opt out. That is a clear violation of not being treated equally. And I said many times (I did not opt into the SmartMeter program!) If you don't opt into it - You do not have to opt out!

Narma Maly 2/20/19

I have shown you the truth about the
How:

1. I know my Rights!

2. I am defending my life & Liberty

3. I am possessing and protecting my
own Property.

4. I am pursuing and obtaining my
Safety, Happiness and Privacy

5. I am protecting my Rights as a
Citizen against Powerful Companies like
(Met Ed).

6. I do not yield my sovereignty
to any Company or agency which serves
me. And I will not let them have
power over me.

7. I consider Met-Ed public servants.

We give them the authority to serve us.

But, we do not give them the right

to decide what is good for us and

what is not! And if they try to
usurp that authority - we the people

need to stand up for ourselves and
fight for what is our rights! They
(Met-Ed) are not our Lord or Ruler!

No one will dictate to me what I
can or cannot do with my own Property
(such as my own analog meter.)

RECEIVED

MAR 15 2019

PA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU

The FCC has ruled that the smart meters are safe, that "the RF emissions are only 1/6,000th of the Federal health standard at a distance of 10 feet and far below the RF emissions of many commonly used devices." (as quoted from the CPUC at their hearing Dec. 2, 2010)

* However, according to Norbert Hankin of the U.S. Environmental Protection Agency, in a report of 2002, the FCC health standards are only for "thermal" exposure. The nonthermal exposure has never been tested. The smart meters give off nonthermal radiation, which is actually much higher and far above what would be considered safe according to FCC health standards.

"The FCC's current exposure guidelines, as well as those of the Institute of Electrical and Electronics Engineers (IEEE) and the International Commission on Non-ionizing Radiation Protection (ICNIRP), are thermally based, and do not

Norma K Mosley

apply to chronic, nonthermal exposure situations!!! They are believed to protect against ~~that~~ injury that ... results) in tissue heating or electric shock and burn ... The FCC's exposure guideline is considered protective of effects arising from a thermal mechanism. The generalization by many that the guidelines protect human beings from harm by any and all mechanisms is not justified"

I will send more information so your witness will have no doubt that I'm very well versed in the knowledge of Smart Meters & its effects on our health

Norma Mosley 2-20-19

For Your 3 Witnesses

The Reality and Toxicity of ElectroMagnetic Fields Surrounding Us

Biologically, we are electromagnetic beings; our nerves run on EMF's (electromagnetic frequencies). It therefore stands to reason that when an artificial EMF network is set up all around us, it WILL affect us. The wireless industry did its own studies in the 1990's and found that EMFs were carcinogenic but covered it up. Increased use of cell phones, smart meters, Wi-Fi, etc. has been shown to lead to malignant brain tumors, adverse effects on neurotransmitters in the brain (resulting in mood swings, memory loss and stress), disruptions in brain glucose metabolism (linked to Alzheimer's) and disruption of melatonin production, a strong antioxidant.

'Smart meters', which I call Dumb Spy Meters are weaponized EMF devices that emit dangerous, "pulsed radiation" and are hazardous to our health; they are the most sinister ^{form} ~~that~~ of them all. The World Health Organization lists Smart Meters Radiation as a Class 2B Carcinogen.

If you go to www.refusmartmeters.com and read the article (18 pgs. long) entitled "Bioeffects of Selected Non-Lethal Weapons" it reveals the deeper, darker agenda for the use of Radiofrequency, Electromagnetic Frequency, microwaves and Laser devices by the U.S. military. The document states that the military knew many years ago

Norma K. Mosley

that all of the above waves have adverse effects on human beings and they are preparing to use it on human beings. Ms. Phyllis Birchhead of the Dept. of the U.S. Army Intelligence and Security Command said that the information on the website was indeed accurate and now declassified!

Maybe the Court is not familiar with 5G network, domestic electrical installations, cell phone household equipment, transformers, high-voltage lines, baby monitors, computers, WIFI LANS, Haarp (in Alaska), + Digital Dementia, etc. etc. but I've studied it all. Then there are cheap appliances, that I have no intention to buy.

I will keep writing to show you I'm extremely knowledgeable about Smart Meters, the Smart Grid and their dangers.

As For The Added
Mediation Requests

I told you about my Requests several
times. Everything will stay the same except
I'm going to ask for \$10,000 a week more from
Feb 1, 2019 until we have an agreement. So
that's 2 million 75 thousand + \$10,000 a week
more from Feb 1, 2019 until we have
settlement. (2 Million is for destroying my life for the last

^{28 months + counting}
We are now on the ^{22nd} ~~13th~~ month of
trying to make settlement. You have stolen
²² ~~13~~ months out of my life - Those ²² ~~13~~ months
were full of studying & writing & proving
without a doubt that I am correct in
everything I say. You have threatened me,
making my quality life & time a nightmare.
I've had more stress on my heart and body
in the last ²² ~~13~~ months than ever before.

My Asthma attacks were extreme, I haven't
slept 1 night thru since your threats.
This is strongly reminiscent of Nazi
tactics used by the Gestapo back in
the 1930-40's, when freedom of choice
was being replaced ^{with} dictatorial law.

This tyranny must be opposed, it is
inhumane. Utility customers must stop
any further installation of smart meters.
And understand the source of this insanity.

I sent you a letter from my heart & asked
that she sent to my family doctor. Read it
again!

MOSLEY, NORMA K - HMC1701378

3 pages
of my
Heart test

*** Final Report ***

July 07, 2018

Name: MOSLEY, NORMA K
HMC Number: 1701378
DOB: 05/08/1947
Date of Service: 07/02/2018

Eugene Fellin DO
PSH-SJMG Fleetwood Medical Associates (PP+)
805 North Richmond Street, Suite 101
Fleetwood, PA 19522

Dear Dr. Fellin:

I had the pleasure to follow up at the cardiology clinic with Mrs. Norma Mosley, a 71-year-old patient who underwent an aortic valve replacement with bioprosthetic valve #23 mm Medtronic Mosaic porcine valve on 10/02/09 (Dr. Pae), history of poor tolerance to beta-blocker with metoprolol, asthma, extreme tiredness, with diltiazem 240 slow heart rate and dizziness. Bystolic was tolerated for several years, but finally discontinued due to low blood pressure numbers. Other history, dyslipidemia, asthma, back pain with multiple surgeries (last one in April 2017 for L5). She may have pain in her back again and has been offered steroid infiltration in the past; however, as you know, I do not recommend to use it lightly in a patient who has a bioprosthetic aortic valve due to the risk of infection of the prosthesis with any invasive procedure including infiltration with steroids.

Over the last year, Norma denies having had any cardiac problems. She walks about 3 miles per day with her dogs. She is still working on her farm, mowing the lawn herself for several hours, taking her dogs to the vet. She is very active. Denies any chest pain, shortness of breath, palpitations, or dizziness. She feels physically great, however she is under a lot of emotional stress (anxiety, sleep disturbances) due to a problem with her electricity company (see below).

Current medications are aspirin 81 mg, atorvastatin 40 mg, levalbuterol, losol and ProAir.

On physical examination, her weight is mildly down at 83.6 kg (-3 kg over the last year), BMI is 34.8, blood pressure 124/80, pulse 60 beats per minute, saturation on room air 100%. Auscultation of the heart is unchanged with a 2/6 systolic murmur at the right upper sternal border consistent with flow through the bioprosthetic valve, very mild radiation to the base of the neck. No diastolic murmur heard. There is a 3/6 systolic apical murmur consistent with mitral regurgitation and definitely noted more intense than during my previous exam where I graded it only 1/6. No gallop. Lungs are clear to auscultation bilaterally. Examination of the neck does not show any JVD, no carotid bruit, no palpable thyroid, no adenopathy. Abdomen is soft and nontender. There is no hepatomegaly and no hepatojugular reflux. Peripheral pulses, tibial posterior are present and symmetrical 2+ and there is no peripheral edema. No clubbing. No cyanosis.

EKG is unchanged since previous with normal sinus rhythm at 61 beats per minute and remains within normal limits, all intervals of normal duration.

Norma Mosley 2-20-19

.Outpt Ltr
* Final Report *

MOSLEY, NORMA K - HMC1701378

An echocardiogram was performed today to reassess the bioprosthetic aortic valve and mitral valve disease as well as the LV function and pulmonary pressure. Normal LV size and systolic function with no regional wall motion abnormalities. Ejection fraction 65%.

No concentric left ventricular hypertrophy.

Mild left atrial dilation.

s/p 23mm porcine AVR (Medtronic). Moderate aortic stenosis with mild aortic valve regurgitation. LVOT/AV = 0.31 (same as last year).

Mild tricuspid regurgitation.

Since study of 7/25/16, the aortic stenosis and aortic insufficiency is similar. LV function and TR is unchanged. Pulmonary pressure remains normal, less than 30 mmHg.

I have not seen any recent labs, but as a goal, we should keep LDL under 70 or at the very least under 100.

IMPRESSION AND PLAN: Norma continues to do very well. She is clinically asymptomatic. We are going to follow up on the results of her echocardiogram today. If everything is well, I will follow up with her in a year with a new TTE.

PS: Norma mentioned that a new "Smart meter" instead of analog electric meter was about to be installed outside her home. She is very distressed by that thought. I have no competence to evaluate the effect of such "smart meter" on people's health in general, however I can see that this is very distressing for Norma, generating high anxiety in her case, and that could definitely affect her well being and overall health. I hope that the electricity company can work some kind of arrangement with Norma in order to reduce as much as possible the important emotional stress to which she is currently submitted.

"For the Court"

+

For the 3 Witnesses

So you want to compare! So let's compare. Many studies show that there is a link between cell phones and cancer. But, you can turn off your cell phone when not in use, keeping it away from the body, using it for only brief conversations. None of this can be done with a smart meter. We will have no choice. It will be on all the time pulsing into our homes - 24 hrs. a day every day! "Many smart meters are close to bedrooms, kitchens, playrooms. These devices are never off and the exposure is not voluntary. The smart meters are being forced on citizens everywhere. The exposure of millions to billions of human beings to pulsed microwave radiation should immediately be prohibited until the RED FLAG can be hauled down once and for all!"

✱ Stop Smart Meters! <http://stopsmartmeter.org>
What people are reporting:

"I am running scared living this nightmare. I don't know where to live and fear for my well-being. I already have a pre-ex immune disability and "I thought I would be legally protected by the ADA". I don't know where it is safe for me to live. In addition, the financial impact of this disaster compounds the problem. I pay my monthly mortgage and rented a place, which due to symptoms, I cannot

Norma Mosley 2-20-19

PA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU

stay in. I am not sure I can rent
or sell my condo in good conscience. I
am seeking medical care including
treatments not covered by my insurance.
My out of pocket costs continue to grow.
Stop Smart Meters Now!

"Medusa" Smart Meters will serve as
Multi-Data Collecting Devices

These collecting meters will take
the place of collecting towers like a
mini cell phone tower. How is the home
~~chosen~~ to receive the special meter? They
choose a good, faithful, reliable customer,
who always pay his bills on time. What
a nice reward for being a good customer!
One can only imagine the extra radiation
that will be emitted from such a meter
on the people who live inside that home
and the surrounding homes close by!

Bob Stater, the scientist who is speaking
in the video clip "The Dark Side of Smart Meters"
told us that he was speaking to a woman
who was complaining of some enormous headaches
ever since her smart meter was installed. He
Went to her home and found out that
she did have the Larger Meter (Medusa)
that was collecting data from many other
homes.

Remember Met-Ed the Video I left
Your to Review must be submitted into Court!

Norma Mosley 2-20-19

Radiofrequency Interference and Medical Devices:

The Institute of Electrical and Electronics Engineers (IEEE) Medicine and Biology Magazine 17(3): 111-114 (1998)

<http://cwh.ieee.org/soc/embs/comar/interfer.htm>

The past few years have seen increased reports that medical devices, such as pacemakers, apnea monitors, electrically powered wheelchairs, etc. have failed to operate correctly because of interference from various emitters of radio-frequency energy. The condition is called radiofrequency interference (RFI). The consequences of these failures range from inconvenience to serious injuries and death. Reasons for this problem are twofold: (1) increasing numbers of electronically controlled medical devices with inadequate electronic protection against RFI, and (2) a significant increase in the number of RF sources in the environment. Medical devices are widely used outside the hospital and may be attached to, or implanted in, patients. Some medical devices are especially sensitive to the type of digital modulation that some of the wireless communications devices utilize.

Other Harmful Effects of Smart Meters -
Safety and Security Issues.

Smart Meters Are Not UL Certified

Underwriters Laboratory Confirms Meters
Not Safety Tested, Raising Fire Safety
Fears:

Capitola^(CA) - During a meeting last week
in which they joined six other local
governments who have passed laws criminalizing
the installation of wireless "smart" meters,
the Capitola City Council discovered that the
wireless "smart" meters that California utilities
are trying to install are in fact not
certified by Underwriters Laboratory, a
certification that is required under the
State electrical code for all electrical
appliances and equipment within the home.

The lack of certification was confirmed by
Karl Moeller, a senior engineer with UL.

Product certifications can be verified
by going to www.UL.com then scroll
down to the bottom and click on "on-line
certifications directory." You can search for
active certifications at the On-line Certifications
Directory. In summary, you cannot
confirm these devices as being UL certified!

The revelation came after Council member Termini, who is an electrician by trade, asked PG&E about the ^{UL} certification. After PG&E staff went to their car to fetch a Smart Meter, the council and PG&E unsuccessfully tried to locate the UL symbol on the meter. This convinced Termini that an immediate ordinance was required to protect public safety.

Counties of Santa Cruz, Marin, Mendocino and Cities of Watsonville, Fairfax, and Rio Dell have criminalized smart meter installations. A total of 26 local governments in California have demanded an immediate moratorium.

Five Hazards of Smart Meters

Interview with the Wellington Energy Whistleblower.

A former Wellington employee reveals the dangers of unqualified, untrained employees with no electrical experience installing the Smart Meters. ~~(Posted)~~ (Posted on Jan. 26, 2011 by onthelevel.blog.)
www.StopSmartmeters.org also (see <http://bit.ly/fWUqA7>)

~~From~~ From Web site: The Whistleblower states: I'm disgusted by what I've seen. PG&E and Wellington need to make the public aware that there are risks with Smart Meters. They need to come clear about the emissions of harmful radio waves, potential absency, employees not trained properly to install the meters, etc. No one is taking the steps necessary to protect the public. People need to be aware of the risks that are being taken with their homes and with their lives.

He states that PG&E + Wellington are concerned about one thing, (money). Safety was an afterthought, if that!

There is only a 2 week training period for Installation training. And managers were always yelling that the installers were not trained properly. Many installers would come back to the yard and report that they had seen meters that were hanging by an electrical wire, or other clearly unsafe conditions. There was a lot of pressure on workers to install as many meters as possible in a day.

in order to earn bonuses). Needless to say, improper training, and being under incredible pressure, there is always Error!, especially with new people working in new territory. I overheard numerous times while at work "you could have burned that goddamned house down" (Sunny God!)

And when you tried to report the errors to Wellington, nothing gets done - and they made your record look bad for reporting what you see as wrong. I saw sparks coming from one of the meters on a home & reported to Wellington. They never reported back to me if anything was done about the problem.

I feel that the public should be informed enough to prepare for what could realistically turn into another San Bruno. At the time of the San Bruno explosion they were 100% installed with Smart Meters. Are you aware that PG&E and the C.P.U.C. have not yet responded to questions about what safety precautions they took while installing Smart Meters adjacent to gas lines? Seems like a fairly reasonable question given that the technology can generate sparks. It really doesn't surprise me that they haven't answered questions regarding the smart meters and San Bruno. When I asked one of the managers, who was in charge of training, "is it possible in your opinion that a fire could start from an arc from a meter"

Norma Mosley 2-20-19

located above a gas meter" (which always
has some blow off gas emitting from it) he
would not give me a direct answer! He
avoided the question like the plague, quoting
some plumber he knew and on and on, avoiding
an answer! Could the San Bruno fire have
been started by an arc from a meter?
I'll let you decide. The definition of
an electrical arc is: "a sustained luminous
discharge of electricity across a gap in a
circuit." The definition of ignition: the
process ~~of~~ or means (as an electric spark) of
igniting a fuel mixture. Gas is a
fuel. It doesn't take a rocket scientist
to put it all together.

Smart Meters Can Be Hacked

Written by Gordon Robertson, AP Technology Writer,
Mar. 26, 2010 (<http://www.TheBusinessJournal.Com/Energy/4343> - AP-Exclusive - Smart-Meters-Can-Be-Hacked)

(AP) - Computer-security researchers say new "Smart" meters that are designed to help deliver electricity more efficiently also have flaws that could let hackers tamper with the power grid in previously impossible ways.

At the very least, the vulnerabilities open the door for attackers to jack up strangers' power bills. These flaws also could get hackers a key step closer to exploiting one of the most dangerous capabilities of the new technology, which is the ability to remotely turn someone else's power on and off.

The attacks could be pulled off by stealing meters - which can be situated outside of a home - and reprogramming them. Or an attacker could sit near a home or business and wirelessly hack the meter from a laptop, according to Joshua Wright, a senior security analyst with InfoGuardians Inc. The firm hired by three utilities to study their Smart Meters' resistance to attack.

Mike Davis, a researcher from IO Active Inc., showed how a computer worm could hop between meters in a power grid with smart meters, giving criminals control over those meters. Our power grids which are already under hacking attacks from adversaries believed to be working overseas.

Norma Mosley 2-20-19

RECEIVED

MAR 15 2019

SECRETARY'S BUREAU

Wright said his firm found "egregious" errors, such as flaws in the meters and the technologies that utilities use to manage data from meters. Even though these protocols were designed recently, they exhibit security failures we know about for the past 10 yrs.

One of the most alarming findings involved a weakness in a communications standard used by the new meters to talk to utilities' computers. Hackers could exploit the weakness to break into meters remotely, which would be a key step for shutting down someone's power. Or someone could impersonate meters to the power company, to inflate victims' bills or lower his own. A criminal could even sneak into the utilities' computer network to steal data or stage bigger attacks on the grid.

For instance, the meters encrypt their data - scrambling the information to hide it from outsiders. But the digital "key" needed to unlock the encryption were stored on data-routing equipment known as access points that many meters relay data to. Stealing the key lets an attacker eavesdrop on all communication between meters and that access point, so the keys instead should be kept on computers deep inside the utilities' networks, where they would be safer. That lesson seems

to be lost on these meter vendors. That speaks to the "relative immaturity" of the meter technology.

Norma Mosley 2-20-19

This will take away our LHM Amendment

Appliances that will have the Chips
for the Smart Meters to "Talk to" and
The U.S. Senate Bill Authorizing them:

Appliances that have Chips are rolling
out since 2012, and the current non-
chipped appliance version will be phased
out. Lowell's has confirmed this, and
Home Depot already has the Water Heaters
(GE). I went to a few local Appliance
Stores and they are all chipped appliances
in their Stores.

If we really want to stop this we
must start defunding the EPA and
start aiming at FERC. (Federal Energy
Commission)

If a monster is coming you want to
aim at the heart of the matter. Of course
we MUST do what we can, lets aim
higher!

How Smart Meters Got in Our State and Why Met-Ed will Not Settle With Me!

Demand Response and Smart Metering Policy
Actions since the Energy Policy Act of 2005.

This summary is the guide document instructing
state officials on how to implement this
business plan in their respective states.

Follow the Money!!

In late Oct. 2009, The Dept. of Energy (DOE)
announced the recipients of the 3.4 billion
in stimulus grants under the American
Recovery and Reinvestment Act (ARRA). Award
selections were announced for 100 smart grid
projects that are intended to lead to the
rollout of approximately 18 million smart
meters, 1 million in-home energy management
displays, and 170,000 smart meter thermostats,
as well as numerous advanced transformers and
load management devices. The award
selections were organized by category:

- 1) Advanced Metering Infrastructure;
- 2) Customer Systems
- 3) Electric Distribution Systems
- 4) Electric Transmission Systems
- 5) Equipment Manufacturing
- 6) Integrated and/or Crosscutting Systems

In its announcement, the DOE said the \$3.4 billion
represented the largest amount of ARRA funding
ever made in a single day.

But smart-grid projects that are competing
for the \$800 million in federal grants under the
stimulus program would have to meet strict
cybersecurity guidelines. The standards institute

Norma Mosley 2-20-19

and other groups are working on a set of recommendations for state utility boards and the Federal Energy Regulatory Commission. (This in addition to the 3.4 Billion the D o E handed out under the stimulus package and does not include the staggering number of other quickly devised "grant" programs which were nothing more than federal subsidizing of private corporations identified as "Stakeholders" in this assault on the public, amounting to billions more.)

Absolutely no testing was ever done on the Smart Meters to substantiate the claims by government and manufacturers that the meters are safe. Independent testing however, exposes the danger of these meters to the overall public health. "Smart" Meter radiation is a Class 2 B. Carcinogen according to the World Health Organization (pdf) (from <http://stopsmartmeters.org/>) And this is just the tip of the SMART METER iceberg. No one knows what the effects of metered systems will have on communities and neighborhoods as they are bombarded with massive amounts of radio frequency radiations thousands of times a day.

So How Did They Do It!

It is an assault on the senses that as the country foundered on the edge of near total economic collapse due to the corruption on Wall Street and in banking, that our greedy congresses and presidents for the

last ten years used this crisis to finance a massive assault on the public meant to further cement a police state while pandering to corporations to enrich them and by extension and as a repayment of favors owed, enriched themselves.

Congress flooded the Dept. of Energy and the Commerce Dept. with billions of dollars loaded into the Economic Stabilization Act 2008 and the Stimulus 2009 package to buy access to individual states. Considering the abhorrent state of our economy, you might be wondering where these billions came from.

First came the "economic stabilization act of 2008, then the "stimulus" package of 2009 where billions and billions were funneled to federal corporate agencies. Then came a meeting with the "Council of ^{governors} governors" to determine how to access

the states, flood them with cash during severe economic distress that they allowed to happen, and gain access inside the geographical boundaries of the states.

Of course, the "Council of governors" jumped right on the wagon and every governor in every state followed them with their hands out for the free cash... That came from borrowing against the full faith and credit of the United States (Inc)

which turns out to be ... ^(me) you, the Taxpayer.

This allowed the DoE and various other unlawfully created corporate federal agencies to disperse massive wads of cash to those "stakeholders" they cherish so much.

In short, the public is being forced to subsidize the capital investment ^(not Ed) and expansion of privately owned utilities, in addition to being forced to pay a second time as these same parasitic corporations ^(not Ed) recoup these same investments that were funded by the stimulus package to begin with.

Reading through the Energy Policy Act of 2005 and the subsequent EISA 2007 energy bill, it is absolutely clear that what did pass pertaining to Smart Metering pertained only to Federal buildings and (Federal housing). This is in adherence to the Constitution which gives the federal government power only over needful buildings, insular possessions and territories. In every other instance the word "VOLUNTARY" precedes any item.

The Smart Grid system is nothing more than a system of accelerated energy costs with accompanying tax increases. The System cannot and does not deliver more efficient use of energy and isn't meant to. The Intent of the Grid and the Meters is to

Norma Maloy 2-20-19

The Law

pin energy rates to the ever fluctuating markets enabling the energy provider (Met-Ed) to charge the highest rate possible in any given period of time. Higher rates mean higher taxes. This isn't about energy conservation or any of the other nonsense put out as propaganda to foist these deadly meters upon an unsuspecting public. This is simply a business plan meant to unlawfully spy on private citizens ~~while~~ ^{while} extorting the public for corporate profits. ~~Extorting~~ (which I consider a federal offense - Extorting is a criminal offense)

— And if you get sick from these meters blasting 24 hrs. a day with radio frequency radiation - tough crunchies. There's money to be made.

Since the Smart Meter, Smart Grid Program is part of Agenda 21, and that population control is one of the objectives of Agenda 21, does that help to explain why the government agents do not seem to be too alarmed that R F radiation coming out of smart meters, is changing the DNA, causing clumping of blood platelets and is causing cancer.

Read it!

If Met-Ed would come to court and admit the truth about Smart meters. They would lose the money they are extorting from the Tax payers. + Have to pay Billions of dollars back in ^{stimulus} grants!

Norma Mosley 2-20-19

Let Me Say This Again!

No One Can be forced to comply with an unrevealed contract between private corporations, and to which you were never a party and had no knowledge of.!!!!

I consider this a Adhesion Contract. Adhesion contracts are a big part of how we ~~are~~ ^{are} losing our sovereignty, rights and freedom! An Adhesion Contract is one that heavily restricts one party while leaving the other free with all the bargaining power. You have tried to restrict me through threats of turning off my Electricity time after time. You think you can bully me into doing something which is morally wrong & dangerous to my life & Freedom. You lie to me, And have taken 1 year of my precious life from me. I've offered you 2 Mediation Settlements & you refused both. By law all valid contracts require parties to enter knowingly, wilfully, and voluntarily, with full disclosure of all of the terms,

Norma Moolay 2-20-19

if not, then the contract is considered unconscionable and an act of fraud, and may be nullified, rescinded and revoked - dating back to its original signing.

By Lying to the people and not giving them the truth ~~of~~ about Smart Meters and forcing them on them is an Act of Fraud. And Met-Ed & all other companies should be punished thru the Law for acting like the ~~Criminals~~ Criminals they are!

My knowledge & determination will make me free and untractable and I will not ever live in fear from you again!

You should have taken my last Mediation Requests! If you need another copy let me know - ^(my Requests) they will be a lot more next time!

If I have anymore to say you'll hear it in court!

What I write up for you on Smart Meters

Norma Moody 2-20-19

Is just the tip of the Ice Berg. I can fill
5 books with the knowledge I have.
So if you have a specific question or
want me to respond to something you
don't know I'll try & educate you!

Norma Mosley

Do you know that the American Government
was changed without the consent of the
people in 1871?

Washington DC may be the Capital -
but the Capital of what? Did you know
DC was deliberately set up in 1871 as a
body corporate and municipal jurisdiction?
And that it only rules by implied consent?
Do you know why each state is its own
sovereign republic?

Norma Mosley - 2-20-19

THE GENERAL ASSEMBLY OF PENNSYLVANIA

HOUSE BILL

No. 1565 Session of 2017

INTRODUCED BY REESE, BARRAR, BOBACK, V. BROWN, DeLUCA, DUNBAR, GABLER, GILLEN, GROVE, PHILLIPS-HILL, JAMES, KAUFFMAN, LAWRENCE, MARSHALL, METCALFE, METZGAR, B. MILLER, ORTITAY, PETRARCA, PICKETT, ROTHMAN, SACCONI, WALSH, WARD, WARNER AND ZIMMERMAN, JUNE 16, 2017

REFERRED TO COMMITTEE ON CONSUMER AFFAIRS, JUNE 16, 2017

AN ACT

1 Amending Title 66 (Public Utilities) of the Pennsylvania
2 Consolidated Statutes, in restructuring of electric utility
3 industry, further providing for duties of electric
4 distribution companies.

5 The General Assembly of the Commonwealth of Pennsylvania
6 hereby enacts as follows:

7 Section 1. Section 2807(f) of Title 66 of the Pennsylvania
8 Consolidated Statutes is amended to read:

9 § 2807. Duties of electric distribution companies.

10 * * *

11 (f) Smart meter technology and time of use rates.--

12 (1) [Within nine months after the effective date of this
13 paragraph, electric] Electric distribution companies [shall]
14 may file a smart meter technology procurement and
15 installation plan with the commission for approval. [The plan
16 shall describe the smart meter technologies the electric
17 distribution company proposes to install in accordance with

2-20-19

Turn Page →
Over
Paragraph 2 (i)

1 paragraph (2). X

2 X (2) Electric distribution companies shall furnish smart X
3 meter technology as follows:

4 (i) Upon request from a customer that agrees to pay X
5 the cost of the smart meter at the time of the request. X

6 (ii) In new building construction.

7 (iii) In accordance with a depreciation schedule not
8 to exceed 15 years.]

9 (3) Electric distribution companies shall, with customer
10 consent, make available direct meter access and electronic
11 access to customer meter data to third parties, including
12 electric generation suppliers and providers of conservation
13 and load management services.

14 (4) In no event shall lost or decreased revenues by an
15 electric distribution company due to reduced electricity
16 consumption or shifting energy demand be considered any of
17 the following:

18 (i) A cost of smart meter technology recoverable
19 under a reconcilable automatic adjustment clause under
20 section 1307(b), except that decreased revenues and
21 reduced energy consumption may be reflected in the
22 revenue and sales data used to calculate rates in a
23 distribution rate base rate proceeding filed under
24 section 1308 (relating to voluntary changes in rates).

25 (ii) A recoverable cost.

26 (5) [By January 1, 2010, or at the end of the applicable
27 generation rate cap period, whichever is later, a] A default
28 service provider [shall] may submit to the commission one or
29 more proposed time-of-use rates and real-time price plans.

30 The commission shall approve or modify the time-of-use rates

1 and real-time price plan within six months of submittal. The
2 default service provider [shall] may offer the time-of-use
3 rates and real-time price plan to all customers that have
4 been provided with smart meter technology [under paragraph
5 (2)(iii)]. Residential or commercial customers may elect to
6 participate in time-of-use rates or real-time pricing. [The
7 default service provider shall submit an annual report to the
8 price programs and the efficacy of the programs in affecting
9 energy demand and consumption and the effect on wholesale
10 market prices.

11 (6) The provisions of this subsection shall not apply to
12 an electric distribution company with 100,000 or fewer
13 customers.]

14 (7) An electric distribution company may recover
15 reasonable and prudent costs of providing smart meter
16 technology [under paragraph (2)(ii) and (iii)], as determined
17 by the commission[. This paragraph includes], including
18 annual depreciation and capital costs over the life of the
19 smart meter technology and the cost of any system upgrades
20 that the electric distribution company may require to enable
21 the use of the smart meter technology which are incurred
22 after the effective date of this paragraph, less operating
23 and capital cost savings realized by the electric
24 distribution company from the installation and use of the
25 smart meter technology. Smart meter technology shall be
26 deemed to be a new service offered for the first time under
27 section 2804(4)(vi). An electric distribution company may
28 recover smart meter technology costs:

29 (i) through base rates, including a deferral for
30 future base rate recovery of current basis with carrying

1 charge as determined by the commission[; or
2 (ii) on a full and current basis through a
3 reconcilable automatic adjustment clause under section
4 1307].

5 * * *

X (6 Section 2. This act shall take effect in 60 days. X)

Smart Meter Q&A

Find out more about Smart Meters and Act 129 information on your supply
PENN. PUBLIC UTILITY COMMISSION

Your Own Words Have Caught you in Lies!
ARE SMART METERS REQUIRED IN PENNSYLVANIA? *NO They Are Not!*

Yes. Pennsylvania's Act 129 of 2008 requires the state's seven largest electric distribution companies (EDCs) to develop energy efficiency and conservation (EE&C) plans and adopt other methods of reducing electricity used by customers – including the use of smart meters by their customers. The EDCs impacted by Act 129 are Duquesne Light; Met-Ed; Penn Power; PECO Energy; Penelec; PPL Electric Utilities; and West Penn Power.

The Public Utility Commission (PUC) is charged with implementing Act 129 and helping consumers and electric utilities reduce energy consumption, especially at peak times during the day. Smart meters are being installed in new construction and at individual customers (request), with the goal of all customers utilizing smart meters by 2023.

WHAT IS A SMART METER? *I did not request - I said 'No'! "Request" is 40 Key Word*

A smart meter is an advanced meter that measures electric usage more often than conventional meters and sends that information more quickly to the customer and the EDC. Through two-way communication, smart meters also can monitor the electric distribution system to ensure it is functioning properly.

Smart meters have the following basic functions: measure the electricity used; with (customer consent) remotely coordinate electricity consumption; and interface with EDCs to identify outages and provide real-time visibility into the operational status of an electrical distribution system.

HOW WILL I BENEFIT FROM THE USE OF A SMART METER? *There is no Benefit*

- Smart meters can help your utility restore your service faster during power outages.
- Smart meters can help you better understand how much electricity you are using throughout the day.
- Smart meters can reduce meter-reading costs and help detect theft of electricity.

HOW COULD A SMART METER HELP ME SAVE ON MY ELECTRIC BILL? *It will not save you ^{money}*

Customers on time-of-use rate plans can use the information from smart meters to shift their usage to different times of the day when electricity costs less to produce. By using electricity more efficiently, customers can realize savings on their electric bills. For example, rather than running the dishwasher right after dinner when electric prices are higher, customers can wait until later in the evening to run the dishwasher. *DO NOT HAVE A Dishwasher*

IS THERE CURRENTLY A SMART METER CHARGE ON MY BILL?

Yes. The charge will be included as a separate line item or in your electric utility's base rate. You can confirm that information by contacting your utility. This charge covers the costs of assessing and deploying smart meter technology in accordance with Act 129. Under the law, utilities may begin assessing the surcharge for the work being done prior to actual installation of the meter. This charge applies to all customers.

I am not a customer of smart meters + should not pay this charge!

Norma Maly 2-20-19

HOW LONG WILL I PAY FOR THE SMART METER SURCHARGE THAT APPEARS ON MY BILL?

This surcharge is reviewed and approved by the PUC annually, and is subject to change. While there is no definitive timeframe to date, the surcharge is expected to remain on customers' bills as utilities work to achieve full smart meter deployment by 2023.

I should not pay this surcharge

CAN I OPT OUT OF THE CHARGE IF I DON'T WANT A SMART METER?

No. State law does not allow a customer to "opt out" of their EDC's smart meter program or surcharge. Installation of a smart meter is a condition of service to more accurately reflect rates and usage, and will ensure no disruption to your service. Questions concerning the process or timetable for the installation of your metering equipment should be directed to your electric utility.

I can't "opt out" of something I didn't "opt in to"

WHEN WILL I HAVE MY SMART METER?

NEVER

Smart meters must be installed no later than 2023 for customers of the seven EDCs covered under the law. Customers who want the technology sooner may ask the EDC to install it. The customer must pay a fee for the early installation. That fee may be as little as \$17. Contact your electric utility for more information.

DO NOT WANT SMART MET

WILL MY SMART METER INFORMATION BE SECURE? *NO*

Smart meter communication network is a high-security environment that employs layers of protection from unwanted and unlawful access. Pennsylvania regulations restrict access to customer information, and do not permit an electric company or electric supplier to release private customer information to a third party without customer consent.

HOW DOES A SMART METER WORK?

Smart meter communications can happen over the power lines or by radio frequency (RF), just like many other devices in your home. According to a study by the California Council of Science and Technology, wireless smart meters, when installed and properly maintained, result in much smaller levels of RF exposure than many existing common household electronic devices.

Smart Meters

How did we get into this mess?

Well, back in 2008 the PA PUC, illegally mandated that utility companies, with some exceptions, must use smart meters to record usage. I say illegally because in 2008 the PA General Assembly passed a law authorizing the use of Smart Meters. The Law did not say that they must be mandatory. !!!
That was an unauthorized interpretation by the PA PUC.

Read It!

"Mediation Requests" (My Last Request

* My Requests For Settlement Between Met-Ed & Myself, Norma Mosley. *

When I first approached Met-Ed about my keeping my Analog Meter. I asked very nicely that I want to keep my Analog Meter & I will read the meter each month & call in the readings. I told you I do not want a Smart Meter & will not "opt into" the Smart Meter, Smart Grid System. Just provide me with the same service that I've always had with the Analog Meter. I sent you all the reasons with proof why I would not go along with Smart Meters. I showed you that you were representing a false law to the people. I showed you the real law with proof. I showed you how Smart Meters were dangerous to every human here on Earth with proof. I showed you that they weren't UL Approved or safe to be on houses. I listed all the medical problems people would face. I told you all the true facts about Smart Meters which you try to deny - but can't. At that time I asked just to leave my Analog Meter on my house - don't turn off my electricity & I'll call my reading into you each month. And leave me in peace. You rejected my offer with threat after threat. I went to my State Representative's Office (David Argall) in Hamburg which is a 20 min. drive each way. I sat there & waited my turn to talk to his representative & we filed papers with the District Attorney's office. I dealt with David Argall's office & the District Attorney's office stating my complaints. I told them I tried to resolve my problem with cont'd...

Norma Mosley

Mediation Request

letters to Met-Ed Rdg. office & their Corp. office. I spent several months doing this with more & more proof sent to you thru the ~~State~~ Attorney General's Office. Time & Time Again. I went to David Argalls Office & they sent my information to you thru the Attorney General's Office. And after months getting nowhere, I then ~~went~~ went back to David Argalls office & filed a complaint with the PA. P.U.C. David Argalls office sent all my information (which was over 100 pages to the PA. P.U.C.) Then I've spent the last few months running back & forth to David Argalls office so they could send more & more information to the PA. P.U.C.

Between the Attorney General's Office, David Argalls office & the PA. P.U.C. I've made 1,000's of copies of all my research for proof.

After 8 months of your threats & no settlement, I received in the mail from the PA. P.U.C. that there was an Interim Order signed by Administrative Judge, Jeffrey A. Watson. In which you ^{present} denied your Preliminary Objections & gave me permission to proceed.

Since we are now referred to the Commission's Mediation Unit for a mediation review. I now have written up my part of the mediation response and what I want. After 8 months of threats & taking that time out of my life to prove to you everything I've said is true is something I didn't or wouldn't have to do. But since every minute

suffering or distress that may be more mental than physical or that may be a combination of both. The actions against me were both mental & physical. Met-Ed interfered with both, by their threats sent to me over the phone. My damages are therefore for mental upset, fright, extreme stress as reported by my ^(letter enclosed) heart doctor. Met-Ed knew I had a heart problem, Asthma, & Immune Problems from my first contact with them. But they insisted on threatening me by removing my Analog Meter and turning off my electric. It did not matter to them that they were inducing stress on me producing Asthma Attacks all the time. And that after 9 years since my last ^{heart} operation - they put more stress on me than I've had in the last 9 yrs. effecting my heart. They do not care about their customers. They care about 1 thing putting Smart meters on every house rather the people don't want ^{them} causing all kinds of mayhem.

I've been ^{12 months} fighting for closure to this problem for over 8 ^{months} now ^(still counting). My neighbor who was also fighting Smart Meters (Mrs. Youse) went up to Hershey to pick her brother up at the Hospital, to come ^{home} only to see her Analog Meter gone & a Smart Meter in its place. So, now more stress & worry comes in that while I'm away from my house the something will happen to me. After all, I was helping her to fight Smart Meters also. I go to P.A.S.M. (Pennsylvania's Against Smart Meters) meetings & these stories are the same everywhere - people fighting to keep their analog meters ^{to} come home from work

(Norm Maskey
2-20-19)

* Mediator's Requests *

to take their Analog Meters, so they can put another meter in their belt that they just destroyed someone else's life! All across Pa. & America & the World, people are forced (to some it's take it or go to jail or they just shoot you) to have Smart Meters. And all in the name of the Almighty Buck unto Evil that wants to eliminate us. (Read my Report). Go to Washington D.C. & look at the White Tombstones & tell them & their families they died for nothing. Because, evil has come to America & they don't care about those who died to keep us free!!! Listen to a little child who asks when his daddy is coming home (and he never does). Look at the Service men & women coming home without limbs. Tell them they did it for nothing. Sorry, not me! I will continue their fight for freedom because it is also my fight. And their families will know my fight for them & what they did!

46. Keeping others off your Property.

If someone comes onto your land or into your house or apartment without your permission, he has committed a tort of trespass, and you may sue him even though he does no damage whatsoever to your land, house or property. As the person legally in possession, you are entitled to the complete and unrestricted "quiet enjoyment" of your property. And can bring the action of trespass. In fact, you must assert your rights over your property or run the risk of losing some of these rights. This is called prescriptive right.

(Nona Maly
2-20-19)

"Mediation Requests"

your right to the exclusive use of your own property by failing ever to mention or complain about trespassers. I have "NO TRESPASSING SIGNS" all over my property and around my analog meter. There are 3 different kinds - mostly directed toward Met-Ed ~~and other~~ Electric Company's Contractors. Met-Ed has copies of the signs - so does David Argall's office, The Attorney General's Office, The P.A. P.O. office. And also the Fleetwood Police. The Police ^{Chief} came to my house & we had a long talk. There are also the same signs on my door to my house, just in case they bypass the ones in the yard. "Double Warnings"

Now Let's Talk About Fees:

The amount of time & effort I spent on this particular problem or case has been tremendous. As I could not afford a lawyer, I had to take it upon myself to defend my rights as a citizen. I had to prepare to protect myself by learning all I could about Smart Meters and the Law. So I am entitled to and do charge you for expenses occurred (disbursements) in the handling of my case. You did not respect me as a customer or human being. Nor did you respect my time. In the last ~~mos~~ ²² mos. I lived & breathed Smart meters every second of my life even to the point that at night I would get up & study the law

22 months
~~22~~ months

Norma
Maly
2-20-19

* Mediator's Requests *

See if my Analog Meter was still there on my house.

Studying the Law + Smart Meters themselves (Every Aspect of them) with their multiple complications + many directions I was taken + still am is totaling Exhausting. And no amount that I would charge to do this job would not compensate me with all the Anxiety I have gone through so far! I couldn't have paid a lawyer to take this case. I would have gone into Bankruptcy.

Bill for 8 mos. + Counting

40 or more hours a wk. research + studying for 32 weeks so far @ \$50⁰⁰ an hour (my lawyer would have charged me \$200⁰⁰ an hr.)

Expenses - Gas, mileage to + from State Representative David Argallo's office, 20 miles each way
Gas + mileage from Library, Book Stores + to have Copies made, etc.

Cost of materials to Read + Study to fight Smart Meters.

Hours on the Phone w/ PA, PUC, State Attorneys Office, PASM, People who won cases against Smart Meters, etc.

Cost of 1,000's of Copies made! Went thru 25 pens + 1,000's of sheets of Paper.

Five thousand eighty-eight minutes of Stress + Health effects on my body + mind every day for 8 mos. Numerous Asthma attacks + Stress on my Heart. What Is Your Life Worth?

Cost to the P.O. to send certified mail to

22 mos (20 mos) will be 12 hr Jan

Norma Morley
2-20-19

* Mediation Requests *

In ²² 8 mos. of Counting I spent
 (32,000 hrs. that's 40 hrs a week x 32 weeks)
 I spent about \$2,000 in Expenses
 Plus 5,088 minutes of every day
 Under Stress + threats interfering
 with my peace of mind + health,
 You look 8 mos. of my life away from
 me!! Now 9 mos.

This is for
 8 mos.
 We are now
 on 23
 months
 at most!

And the case isn't even over yet!
 So far I figure 32 weeks fighting the case
 x 40 hrs a week writing +
 Studying, etc

1280 hrs so far
 x 50.00 an hr. (my lawyer gets 200.00 an hr.)
 = 64,000 (+ counting)
 2,000 Expenses

Now 17 months

And for Destroying my Health
 Life for the last 8 mos + Counting 1 million dollars + Counting
 my Life + Health are everything to me + No Am't
 amount can be enough to get those 8 mos back!
 Total (1 Million like thousand) ~~Counting~~ XX

Well up it to 2 million 75 thousand
 if we have to go to Court!
 OR More! + \$10,000 a WK. from
 Feb 1 until settlement

Now 23 months + Counting
 2 million 75 thousand
 Plus 10,000 a week starting in Feb until we
 get to Court
 Norma Mosby 2-20-19

* Mediation Requests *

Besides the Fees, I want a Court order of Injunction issued against Met-Ed & all electric companies in PA. along with all contractors including Wellington and anyone else to refrain from taking any retaliatory action against me. Do Not Remove my Analog Meter !! Do Not Put a Smart Meter on my Property !! Never turn off my electricity or threaten to do so ever again! No one is allowed on my property! I want the court order to reflect that if I should move from this residence that the order be legally binding in all of PA! I will have the right to arrest anyone that tries to break the Injunction.

I want all charges on my previous bills. I want bills not to have any charges that represents Smart Meter, Smart Grid on my bill. Return all Charges that I have been billed so far. I did not "opt in" too your Program.

Do Not Charge me with an "Opt Out" Charge because I never "Opt. In" ! I will not be a party to destroy humanity.

I want a letter of Apology for putting me thru 8 mos. of Hell

Last but not least, I want you to tell the People of PA. the truth - That Smart Meters are not mandatory, And if they want their Smart Meters Removed just to call you & they can have their Analog Meters Replaced at no charge to them! There should also be a Public Apology to me & all your

PA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU

#1 To Be Presented into Court Hearing:

Enclosed the first Successful Law Suit -
"Skelton, Taintor, Abbott Wins Landmark
Smart Meter Case "against Maine Public Utility
Commission & Central Maine Power Company.
Alan Stone chair of the trial practice group
at Skelton, Taintor and Abbott has been
recognized by "Best Lawyers" in the area
of Energy Law. This win of this case
has been followed by other Public Utility
Commission and utility experts around
the Country, and will serve as precedent
for others to ~~the~~ ^{in the} determination of how
to resolve what has become a growing
debate about customers choice & smart meters.

#2 Enclosed Proof of RF & EMF Emissions & Dangers for 3
Witnesses

#3 Added Mediation Requests

Norma K. Murky

Very Important Law Suits Concerning Smart Meters

* The first successful Law Suit - Portland, Maine, reported May 25, 2011, "Skelton, Taintor & Abbott Wins Landmark Smart Meter Case"

(<http://www.skeltonaintorabbott.net/news/85/77/Skelton-Taintor-Abbott-Wins-Landmark-Smart-Meter-Case.html>)

On behalf of several Maine residents, the law firm Skelton, Taintor & Abbott secured a landmark decision that will benefit utility customers throughout the country. Alan Stone, Chair of the firm's energy law group, successfully convinced the Maine Public Utilities Commission (MPUC) to find that it was an unjust and unreasonable practice for Central Maine Power Company (CMP) to refuse to permit residential and small commercial customers to opt-out of CMP's smart meter program and to retain their existing electromagnetic meters.

Stone proved that because of unresolved concerns relating to health, privacy and cyber security resulting from the installation of wireless meters on their homes, customers should have a choice concerning the installation of those meters. CMP argued vigorously that customers should not be allowed to opt out, and the MPUC found that position to be unjust and unreasonable. The Portland Press Herald has

Norma R. Mosley

described the decision as a "landmark" case that represents the first time any state had ordered an electric utility to permit customers the choice to opt out of a smart meter program. The case has been followed by other Public Utilities Commissions and utility experts around the country, and will serve as precedent for others in the determination of how to resolve what has become a growing debate about customer choice and smart meters.

Alan Stone is also chair of the trial practice group at Skelton, Jaintos and Abbott, and has been recognized by "Best Lawyers" in the area of Energy Law.

I read this landmark case and agree & applaud its success. My only disagreement is that I know the "True Law" - feel that the people should have a choice: not to opt into the Smart Meter, Smart Grid program. I've read & heard from too many people - that if you opt out then the Electric Company puts charges on your bill to opt out & to keep your Analog Meter! Rip Off!

You cannot opt out if you didn't opt into the Smart Meter, Smart Grid program. And no one can be forced to comply with an unrevealed contract between private

Norma K. Mosley

Corporations, and to which you were never a
party and had no knowledge of " " " " " "

Norma Mosley

Phone 610 562 8542
Docket # C-2018-3001526
Jan. 28, 2019

Administrative Law Judge Jeffery A. Watson,
Rosemary Cravetta, Sec. of the PA. PCU,
Met Ed. Co:

I received your letter of Jan. 18, 2019.
Let me refresh your memories. My
suit against Met-Ed was started 13 months
ago. It was and still is 3 fold. #1 - My
suit against Met-Ed was to prove to the court that
Met-Ed was misrepresenting the true Smart Meters
Law & misleading its customers. I proved it
without a shadow of a doubt. You have pages
& pages of proof. #2 - I told ^{Met-Ed} you to stop
taking my rights away. I am a U.S. Citizen
Protected by the American Constitution. I showed
you proof thru the Fourth & Tenth Amendments.
I sent you hundreds of pages of proof that I am
correct on all things I tell you. #3 - Judge
Jeffery A. Watson at my first court appearance
gave me the right to keep my case moving
on - I could proceed with it & try to make
a mediation settlement with Met-Ed. I presented
my mediation requests & they were turned down.
So now we are going to court again. Only
this time I have more mediation requests - (enclosed)

I did not want to listen to some doctors that
are paid witnesses from a Big Corporation like Met-Ed.
Health, Privacy, Safety are issues that I had to
show you to prove I am correct on everything I say
but once I win my case on the 3 above points then

we no longer have to pursue them & present them to the court as proof that I am ~~right~~ ^{right} about everything I sent you. There is no question in my mind that Health, Privacy, Safety are extremely important that is why I want to keep my Analog Meter.

You want to show the court that your witnesses that ^{smart meters} (they) are safe, and testify about R.F. fields and compare them to other sources in everyday life.

The difference is that other sources that have R.F. Emissions & other forms of E.M.F. Emissions can't be compared. None of the other sources have threatened me & billions of other people with Nazi-like threats thru letters and over the phone. To tell me that I will get a Smart Meter or else !!! You know the sinister Plot of those pushing, lying & threatening the people all over the World. Do you know if you refuse Smart Meters in other parts of the World you are either shot or imprisoned. Here in the U.S. - if you don't comply they turn off your electric & threaten you! Even the Elderly! I've talked to people all over the U.S. And there is only one thing we all agree on Smart Meters are Pure Evil! So are those that threaten & die to you!

Norma K. Mosley

Norma K. Morley

From Your 3 Witnesses

The Reality and Toxicity of ElectroMagnetic Fields Surrounding Us

Biologically, we are electromagnetic beings; our nerves run on EMF's (electromagnetic frequencies). It therefore stands to reason that when an artificial EMF network is set up all around us, it WILL affect us. The wireless industry did its own studies in the 1990's and found that EMFs were carcinogenic but covered it up. Increased use of cell phones, smart meters, Wi-Fi, etc. has been shown to lead to malignant brain tumors, adverse effects on neurotransmitters in the brain (resulting in mood swings, memory loss and stress), disruptions in brain glucose metabolism (linked to Alzheimer's) and disruption of melatonin production, a strong antioxidant.

'Smart meters', which I call Bumb Spy Meters are weaponized EMF devices that emit dangerous, "pulsed radiation" and are hazardous to our health; they are the most sinister ^{lethal} ~~that~~ of them all. The World Health Organization lists Smart Meters Radiation as a Class 2B carcinogen.

If you go to www.refusmartmeters.com and read the article (18pgs. long) entitled "Bioeffects of Selected Non-Lethal Weapons" It reveals the deeper, darker agenda for the use of Radiofrequency, Electromagnetic Frequency, microwaves and Laser devices by the U.S. military. The document states that the military knew many years ago

Norma K. Morley

that all of the above waves have adverse effects on human beings and they are preparing to use it on human beings. Ms. Phyllis Birchhead of the Dept. of the U.S. Army Intelligence and Security Command said that the information on the website was indeed accurate and now declassified!

Maybe the Court is not familiar with 5G network, domestic electrical installations, cell phones, household equipment, transformers, high-voltage lines, baby monitors, computers, WIFI, LANs, Naarp (in Alaska) + Digital Dementia, etc. etc but I've studied it all. Then there are cheap appliances, that I have no intention to buy.

I will keep writing to show you I'm extremely knowledgeable about Smart meters, the Smart Grid and their dangers.

Norma K Mozley

For Your 3 Witnesses
And The Court!

Norbert Hankin, U.S. Environmental Protection Agency, 2002

<http://www.emrpolicy.org/litigation/caselaw/docs/noi.epa.response.pdf>

The FCC has ruled that the smart meters are safe, that "the RF emissions are only $1/6,000^{th}$ of the Federal health standard at a distance of 10 feet and far below the RF emissions of many commonly used devices." (as quoted from the CPUC at their hearing Dec. 2, 2010)

* However, according to Norbert Hankin of the U.S. Environmental Protection Agency, in a report of 2002, the FCC health standards are only for "thermal" exposure. The nonthermal exposure has never been tested. The smart meters give off nonthermal radiation, which is actually much higher and far above what would be considered safe according to FCC health standards.

"The FCC's current exposure guidelines, as well as those of the Institute of Electrical and Electronics Engineers (IEEE) and the International Commission on Non-ionizing Radiation Protection (ICNIRP), are thermally based, and do not

Norma K Mosley

apply to chronic, nonthermal exposure situations. They are believed to protect against ~~that~~ injury that ... results in tissue heating or electric shock and burn ... The FCC's exposure guideline is considered protective of effects arising from a thermal mechanism. The generalization by many that the guidelines protect human beings from harm by any and all mechanisms is not justified."

I will send more information so your witnesses will have no doubt that I'm very well versed in the knowledge of Smart Meters & its effects on our health

Norma K Mosley

Cos For The Added Mediation Requests

I told you about my Requests several times. Everything will stay the same except I'm going to ask for \$10,000 a week more from Feb 1, 2019 until we have a agreement. So that's 1 million 75 thousand + \$10,000 a week more from Feb 1, 2019 until we have settlement.

We are now on the 13th month of trying to make settlement. You have stolen 13 months out of my life. - Those 13 months were full of studying & writing & proving without a doubt that I am correct on everything I say. You have threatened me, making my quality life & time a nightmare. I've had more stress on my heart and body in the last 13 months then ever before.

My Asthma attacks were extreme, I haven't slept 1 night thru since your threats.

This is strongly reminiscent of Nazi tactics used by the Gestapo back in the 1930-40's, when freedom of choice was being replaced ^{with} dictatorial law!

This tyranny must be opposed, it is inhumane. Utility customers must stop any further installation of smart meters and understand the source of this insanity.

My 3 Witnesses

1 - My Father, Jehovah God - Maker of the Universe

2 My Saviour Jesus Christ - King of Kings
Lord of Lords
+ Final Judge of us All!

3 The Person of the Holy Spirit - 3rd person of the

To: Met Ed, The PA. PUC + Judge Jeffrey A. Watson :

From: Norma Masley

Docket - C - 2018-3001526

PG&E

The Pacific Gas & Electric Co.
Is one of the Companies I've been watching
for a year now.

I was glad to see that their
are Billions of Dollars worth of ^(Law Suits)
being filed & that PG&E has filed for
Bankruptcy.

The people of California forgot
PG&E for years now. They lost their
homes & their lives, I can write a book
on what they did to their customers.

The wildfires destroyed hundreds of homes &
lives and the PG&E Company is responsible.
Their towers & smart meters just fuelled
the fire & the smart meters just exploded
their homes.

I've read & heard about PG&E Co. executives
admitting to secretly snooping on Smart Meter
critics by posing online as a Utility foe.
Reported by San Jose Mercury News of San Francisco
<http://www.sjmercury.com>

Nearly 2 doz. California cities and counties
have demanded a halt to the program. The
DRA commented: "Unless the public's concerns
can be put to rest, there is a very great
risk the PG&E's Smart Meter deployment
will turn out to be a \$2.2 billion mistake
that ratepayers can all afford." Make
that \$2.2 Billion ~~plus~~ Billions
more in Lawsuits! PG&E went
Down the Drain! But the People of

RECEIVED

MAR 15 2019

PA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU

RECEIVED

JAN 22 2019

Pittsburgh Office of A.L.S.
Public Utility Commission

California showed they were right.
PG&E are criminals & should all be
put in jail as I assume they will
be - The people of California will
see to that!

Now if Met-Ed doesn't think
this could have happen to them they
are wrong. You see Met-Ed can
threaten its' Customers, lie to them &
force them to do what the customers do
not want to do. They can try &
control the people. But they can't
control the weather.

Did you ever think that with
all the Smart Meters you forced on
people's Homes & Businesses. Just one
lightning strike in the middle of
a town or city could destroy the whole
city or town.

Lightning is a flash of light in
the sky caused by the discharge of
atmospheric electricity from a cloud
to the Earth. Such a discharge
of electricity hitting just one tower
or smart meter or Medusa could start
a chain reaction flattening a whole
city as if an atomic bomb hit it!

And Met-Ed would be responsible
the same as PG&E is responsible. And
liable for deaths & property destroyed.

Take a lesson from PG&E & take
down your towers & get rid of all

Smart meters - Before you lose Billions
in Revenue + Have to face Billions
in Law Suits + go to Jail as Criminals.

A few months ago in Fleetwood,
Pa. on Main St. a contractor working on
Road Work hit a gas line. Main St has
Complete Smart Meters on every home + business
next to Gas Meters. Do You know that
all of Main St. was evacuated because
the Gas + Electric Companies knew they
had a catastrophe on their hands. But,
the Evacuation did not stop there - They
evacuated the Schools in Fleetwood +
homes + Business blocks away from
the problem! Makes You Think -
They knew the Severity of The Problem!

I've Written This To You Before:

But, since seeing the Refrigerator on TV that exploded awakened me again to this particular problem again. So let me say it again!

If your installer isn't trained properly (which most aren't) Most only receive 2 wks. or less of training before they are sent out to do installations. If the procedure is done wrong, this can lead to arcing, shorts, even explosions & house fires. The blades on the back of the meter have to be aligned properly with the jaws on the socket the meter gets placed in. The workers are under pressure to install as many meters as possible in a day in order to earn bonuses. Improper training, being under incredible stress & working with new people in new territory produces 'Error!' (Another San Bruno could happen at anytime)

And also Remember Not all home wiring is compatible with a Smart Meter. I know in my Old Farm House - I replaced the fuse box & had a transfer box put in to run my Generator & did repair wiring that was bad - the rest of the wiring was in good condition & was suitable for my needs, not a Smart Meter! So if the Refrigerator's Wiring was suitable to run the Refrigerator & could not sustain the Smart Meter Electric or a arc from a meter located above a gas meter (which always has

some blow off gas emitting from it) it would start a fire or Blow up a Refrigerator or melt a Computer, etc.

The definition of an electrical arc is: "a sustained luminous discharge of electricity across a gap in a circuit." The definition of ignition: the process or means (as a electric spark) of igniting a fuel mixture. Gas is fuel. I told you also that my meter is right next to where I have my Oil delivery. Fumes from the Oil Truck could ignite with ~~the~~ ^{an} electric discharge burning down my wood frame house or Blow it Up!

It doesn't take a genius to remember that you should never answer your cell phone while pumping gas into your car tank! Ka Boom! Electric Spark igniting with fuel mixture! Same Thing!

Thank God that no one was hurt when the refrigerator Exploded! A Child could have had his hand on the handle to open it to get some milk! And the Electric Companies would be Responsible for the death!

One of the propaganda ads about the Smart Meter was that this will be a way to save energy and lower costs, but many who already have the meter are finding out that is not the case. A man called to find out why his rates had gone up and was told that now that the meter could read exactly what time of the day that he was washing his clothes or using his air conditioner, PG&E could determine if that was "peak time" or not, and since it was "peak time" then he would have to pay "peak premium rates". If he wanted to save money then he could wash his clothes in the middle of the night or use his other appliances at that time, or his air conditioner then (when he really didn't need it anymore because the temperature is cooler). Many people have reported dramatic increases in their rates, not decreases. Hundred upon hundreds of complaints have been received by PG&E in Northern California because of their faulty rates (<http://www.nbcbayarea.com/news/local/San-Francisco-Moves-To-Stop-Smart-Meters-96618524.html>).

As long as there are pockets of protestors, the federal government, utility commissions, and energy providers cannot implement their total "Smart Meter" program. This is still America. We are not a soviet-style dictatorship. We have property rights. We will not roll over & play dead. Nor will we be intimidated.

My Met-Ed's threats of turning off our electricity.

Some people are actually hiring electricians and having them take off the Smart meters and install an old analog meter. Dr. Bill Diegle told about doing this on his radio program. Perhaps, because he has a national show and 5 million people listening, he is too high profile to try to do anything to him. As long as analog meters are available, there is no law against it. Perhaps that is something you, the reader, should consider doing. I've sent Met-Ed the PA PUC where to buy Analog meters about a year ago.

It is time for our government to require health warnings. The cell phone & Smart meter industry is not telling us the truth about the harmful effects of EMF. But this will never happen because the cell phone & Smart meter regulations are controlled by the cell phone industry and corporations!

Dr. Sam Millham, spoke about his book "Dirty Electricity: Electrification and the Diseases of Civilization." He lists all the diseases caused by EMF. He states, you don't see any of these diseases in countries without electricity, nor do you see these diseases among the Amish in our country, because the Amish refuse to allow any electricity in their villages. If they are permitted, not
(Amish)

to have any electricity. We should all
have the same say about our Electricity!
They Refuse Electricity! I Refuse Smart
Meters! I Refuse 5G!

Dr. Sam Millham also states and warns
schools & teachers of cancer clusters that are
happening in schools where so many teachers
are coming down with cancer because their
schools are exposed to so much EMF Radiation.
He was threatened with a law suit to come
to one of the schools & talk to the teachers
about this. One school had a cell tower
right on campus. Teachers were reporting
that the kids were becoming unruly
and unteachable.

(<http://sammillham.com>; emfields.com - privacy -
TUPA.) If no smoking & child molesters are not
allowed near school zones - Why are Smart meters? (They do the most
Neuro)
Be careful and take precautions to protect
yourself from EMF, because they drain
and weaken our immune systems.

Remember Radiofrequency Interfers with
Medical Devices!

Increased reports that medical devices,
such as pacemakers, apnea monitors, electrically
powered wheelchairs, etc., have failed to
operate correctly!

The Institute of Electrical and Electronics
Engineers (IEEE) Medicine and Biology
Magazine (17(3): 111-114 (1998) <http://ewh.ieee.org/soc/embs/comar/interfer.htm>,

Norman Mosby

It's 2019, a new year to keep
on fighting smart meters & those
responsible for destroying our lives!

The United States was founded as a
Constitutional republic, meaning our
representatives are supposed to protect
the rights of the people, not suppress them.

This is why truth matters in knowledge
and products.

You can count on me & all those
fighting smart meters to keep searching and
providing you with all the truth, even
though you keep suppressing it!

Martin L. Pall, a Washington State
University professor emeritus of biochemistry,
gave a little publicized presentation
in March 2016 in Stockholm, where he
outlined what appears to be a solid
scientific case against humanity getting
so easily carried away by the dizzying
array of electronic gizmos on the market -
which operate via - low-intensity
microwave electro-magnetic fields
(EMFs) that he says are far more
hazardous than commonly assumed.
The big problem, according to Pall,
is that for 47 years, American authorities
and the industry have downplayed the
risks of such EMFs. A 1971 research
report from the office of Naval Research,
said Pall, "Listed over 100 different effects
from low intensity non-thermal (microwave
EMF) exposure. Thus, long before today's

Public Utility Commission

Due to health concerns and petition letters from the people, the City of Mill Valley, CA, has blocked the construction of the infamous 5G wireless antenna towers. Similar movements are in progress across the country as well. 5G is significantly more dangerous than conventional cell phone radiation and has been linked to brain cancer and other disorders.
