Data Requests
Docket No. A-2019-3007090

Note: If any responses contain Confidential Security Information (CSI),
please inform TUS staff via phone call or email.

- A-18 Reference TUS Data Requests, Response to A-2. Please explain why Duquesne's customers will pay for a transmission line project for NOVA Chemicals, Inc.

Response:

Duquesne Light's customers will pay for this project if the Commission determines that the project is needed for the provision of public utility service. If the Commission determines that project is not needed for public utility service; or is otherwise inconsistent with the PUC Code, Commission regulations or orders, or Duquesne Light's tariff; then Duquesne Light will not construct the project as presently proposed.

- A-19 Reference TUS Data Requests, Response to A-2. Please explain whether Duquesne paying for the subject project is consistent with its tariff and provide a copy of any relevant tariff sections.

Response:

The most applicable tariff rule is Rule 8:

8. NONSTANDARD SERVICE The Company reserves the right to require a customer or applicant for service to pay the cost, including the related income tax, of any special installation necessary to meet the unusual requirements of the customer or applicant for service, including, but not limited to:

...

(5) redundant service requested by the customer and not required by the Company.

- A-20 Reference TUS Data Requests, Response to A-6. Please provide a 5-year history of maintenance expenses for the transmission facilities to be replaced as part of the proposed project.

Response:

Since 2014, the Kobuta Tap was inspected once in 2018, at an estimated cost of approximately \$2,000.
