DOCKET No. C-2019-3007637

To all this concerns,

3/8/19

Anthony + myself (Kelly) Giamoni have researched all the material given to us by medical, net-ed and studies done world wide and found frightening information. My daughter suffers from PURA syndrome and has medical issues already. We found many reasons why we do NOT want a smart meter on our home.

1. Smart meters are a fire hazard, and such devices have been responsible for thousands of fires, explosions and other serious safety problems.

2. Smart meters have caused documented health problems. The bursts of RF radiation emitted by their antennas is considered by the World Health Organization to be a Class 2B carcinogen.

3. Smart meters are surveillance devices and violate our 4th Amendment right to privacy in

Our home guaranteed under the United States Constitution. All portions of the political spectrum agree it's about individual freedom of choice and residents' basic property rights.

4. Smart meters typically overcharge and inaccurately represent usage, when compared with reliable, accurate analog meters.

5. Lastly, "Smart ~~meters~~ meters" and the "Smart grid" risk national security and reliability of the electricity supply by opening a new portal to hackers and others who wish to disrupt services. This is a major cyber-security problem created by "Smart meters."

For these reasons (but not only these) we request that no smart meter is placed on our home. We will gladly read our meter monthly and call it in. Please respect our family.

Anthony J. Di... Sincerely - Anthony J. Di...
