**NOTICE OF NO CONSENT TO TRESPASS, SURVEILLANCE AND RADIATION POLLUTION  
AND FIRE HAZARD**

**NOTICE OF LIABILITY, ADHESION CONTRACT**

Dear (CEO's name, power company name) and all agents, officers, employees, contractors and interested parties,

In regard to your possible intention to install an electronic utility meter at the above address, those meters violate the law and cause endangerment to users and the public due to the following factors:

- 1) They individually identify electrical devices and record when they are operated causing invasion of privacy.
- 2) They monitor household activity and occupancy in violation of rights of domestic privacy.
- 3) They transmit wireless signals, which can be intercepted by unauthorized and distant parties.
- 4) No power company or other individual or agency has consent to conduct surveillance or monitoring or to emit radiation (RF, EMR, EMF) on our property with an electronic utility meter. If such consent is presumed, it is hereby denied.
- 5) Data about occupant's daily habits and activities are collected by digital meters, recorded and stored in permanent databases, which are accessed by parties not authorized or invited to know and share that private data. Employees and officers of the utility company are not authorized to collect, view or share such private and personal data.
- 5) Those with access to the data can review a permanent history of household activities taken and viewed unlawfully and without the consent of occupants and subjects of the surveillance.
- 6) Those databases may be shared with, or fall into the hands of unauthorized law enforcement, private hackers of wireless transmissions and other unidentified parties for use against the interests of the energy subscribers and the occupants of the structures without their knowledge and consent.
- 7) Electronic utility meters are, by definition, surveillance devices which violate Federal and State wiretapping laws by recording and storing databases of private and personal activities and behaviors in situations where privacy is expected and private activities are recorded without the consent or knowledge of those people who are monitored.
- 8) It is possible for example, with analysis of certain electronic utility meter data, for unauthorized and distant parties to determine medical conditions, sexual activities, and physical locations of persons within the home, vacancy patterns, general affluence, trade secrets and personal habits of occupants.
- 9) Digital meters cause, by intentional transmission and/or incidental disruption of house current with switch mode power supplies, cancer-causing electromagnetic radiation to be emitted in proximity of the installed location and property in violation of laws against public endangerment, assault and commission of bodily harm.
- 10) Digital Meters are designed to transmit using electromagnetic radiation known to cause cancer and many other diseases, illnesses and symptoms.

11) Digital meters have no surge protection and are unlawful fire hazards, which are not permitted on our property.

12) FCC regulations require that no radio transmitters may be installed on private property without the consent of the property owner. Consent is hereby denied.

For the above reasons, and by right of occupancy and property ownership, I prohibit and deny consent of, any installation and use of any monitoring, eavesdropping, monitoring, surveillance and radiation emitting devices on my property and place of residence and rightful occupancy, especially in the form of an electric utility meter. Any attempt to install any such device directed at me or other occupants on my property or residence will constitute trespass, stalking, wiretapping and assault, all prohibited and punishable by law through criminal and civil actions. All persons, government agencies and private organizations responsible for installing or operating monitoring devices which I consider to be unlawful will be fully liable for major financial and compliance claims and demands in unlimited monetary value. This is legal notice. The liabilities and obligations listed above are true and binding upon all parties upon delivery of this notice. These terms and conditions apply without regard to status or existence of any "opt-out" contract.

Utility service may not be denied for refusal of unlawful conduct by the utility company or for any act of self-defense or any exercise of property rights.

Because this issue is related to misconduct, violations and crimes by you and your utility company policies, no fees, charges or penalties may be associated with any remedies you are requested to provide.

Under my authority as owner and/or rightful occupant of the above property, and under your implied or expressed application to enter that property, this is an adhesion contract to which you are now bound until and unless you respond with factual and supported rebuttal to ALL of the above points in a sworn statement by an authorized and identified party within 21 days of this delivery. Any rebuttal must show your authority to install an unlawful radiation-emitting surveillance device (digital electric "meter") on my property without my consent. Because you are violating the law, your easements do not provide that authority. Expect rebuttal to any claim of such authority. Any failure to timely show and prove full and binding authority to install the unlawful and harmful device on my property and/or place of occupancy will be agreement with all terms and conditions herein. I deny and refuse any past, present and future proposal, offer, demand or claim contrary to any terms or conditions herein.

Notice to principle is notice to agent and notice to agent is notice to principal. All rights reserved.
