PA PUBLIC UTILITY COMMISSION  
SECRETARY'S BUREAU

Norma Mosley  
197 Forgehill Rd.  
Hamburg, PA - 19526  
484-877-3750  
Docket # C-2018-3001526  
April 11, 2019

To: Rosemary Chavetta, Secretary of PA.PUC  
Administrative Judge Jeffrey A. Watson  
Met-Ed

I received the information enclosed  
back to me stating you could not accept  
it because Met-Ed did not receive a copy.  
But Met-Ed did receive a copy of everything.  
So I am sending it back again to everyone.  
I always send everything the same to all  
parties involved.

Norma K. Mosley

MAR 18 2019

Pittsburgh Office of A.L.J.  
Public Utility Commission

When is My  
Court Date? Please  
let me know !!!

The way things are going  
electromog is sure to be the death  
of us all !! Unless Judges & Citizens  
fight together to stop it! It's pure  
insanity! It's murder & extortion  
rolled up into a meter & grid! The  
enemy is the people behind them. And  
they need to be held accountable!

Do you know I Study Bible Prophecy,  
and there is no longer a U.S. of  
America in Prophecy because of  
the Greed of the Electric Companies, Gas  
Companies, Water Companies, Liberals, New  
World Order, Obama, Al Gore, The Illuminati,  
etc, etc, etc. - No End To Greed!

The USA - "Where Love Once Lived !!!"

## One More Reason Met-Ed Refuses To Make Settlement With Me!

To Met-Ed & all Other Utility Companies:

Let Me Remind You that public agencies exist to aid in the conduct of the people's business. . . . The people of this state do not yield their sovereignty to the agencies which serve them. We did not give these public servants the right to decide what is good for the people to know and what is not good for them to know.

You are a ~~public~~ public agency, created by the people. You and your various utility companies are supposed to be serving us, not being our Lord and master telling us what we can do and cannot do with our own property, removing our analog meters and forcing smart meters on us, without our permission or even knowledge!

Instead of serving us, you have become the servants (or slaves) of a powerful international organization that is dictating to you and you, in turn, force those dictates upon us. It is also our utility rates that get to pay for your affiliation with this powerful group, which is probably costing millions of dollars. This group is called I.C.E.I., which stands for International Council on Local Environmental Initiative!

Now they try to disguise their international connections and call themselves "Local Governments for Sustainability". It is a United Nations NGO.

(non-governmental organization) So, in other words, whoever is a member of ICLEI is now coming under the mandate of the U.N.

This is contrary to the U.S. Constitution that prohibits states or local governments from entering into any agreement with a foreign power. (Article I, Section 10)

We urge you to drop your membership with ICLEI and the stranglehold that they hold upon you. We the people, who are supposed to be your sovereigns, are the ones whom you are to serve.

The mandate that ICLEI is pushing upon all of its members is called U.N. Agenda 21, now called Agenda 2030, created in 1992 in Rio and signed onto by 179 heads of state. It is a comprehensive blueprint to control every aspect of how man interacts with the environment. That includes state and local governments, the food we eat, the water we drink, the air we breathe, our mode of transportation, and, of course, the energy we use.

ICLEI is pushing Agenda 21 (30) on their members utility companies through what ~~we~~ they call "The Green Communities (G.C.) program" which according to them is "designed

to provide data, tools, and training to local governments customers to enable them to better understand and manage their municipal and community-wide energy usage in order to develop and implement climate action plans." However, ICLEI does not just make suggestions to their member organizations, there are more like mandates.

The Mandates of ICLEI upon utilities through their Green Communities (GC) Program to "implement climate action plans": 1. Whom they are to work and contract with; 2. What goals they will have; 3. Standardized energy data collection; 4. Additional possible demands; 5. The ultimate goal - 100% compliance by the year 2020.

1. Who they will work and contract with: They will contract with seven different NGOs and government organizations to provide the GC Program services and products. They are told who the government agencies will be: Example - "PG&E" will contract with the Association of Bay Area Governments (ABAG), the Association of Monterey Bay Governments (AMBAG), the Great Valley Center (GVC), the Sierra Business Council (SBC), and local governments for Sustainability (ICLEI) to provide GHG inventory and climate action plan development assistance and resources to foster "benchmarking".

2. Their goals are determined for them: "Mayor program

activities fall into three sub-programs . . . .

- a. Statewide Assistance for Local Governments (Statewide Program);
- b. Climate Planning Assistance for Local Governments (Climate Program); and
- c. Fluorescent Lamp Recycling Program (FLR Program)."

3. Standardized energy use data collection: "for climate planning purposes:" "P.G. <sup>City</sup> E has collaborated with ICFE to develop standardized reports to provide local governments aggregated non-customer specific data on the GHG emissions associated with their electricity and natural gas use at the municipal level and at the Community-wide scale."

4. Other possible demands: "include integrated audits, coordination and alignment of emergent residential retrofit programs, or green building support." This program may also provide additional services, subject to funding availability and future contract negotiations."

5. The ultimate goal: "This program supports the Strategic Plan's goal for 50% of governments to adopt energy/sustainability/Climate action Plans by 2015 and 100% by 2020."

Doesn't all this sound like a little too much big brother dictating to you what you should be doing or not doing - all

under the excuse of climate action  
planning? Who has ever been able to  
plan what the climate is going to be  
like anyway? Weather is very unpredictable!  
What a shaky house of cards to be  
basing all of this planning on! We  
urge you to drop your affiliation with  
ICLEI!

<http://whyfry.org/youth-suicides-linked-to-phone-masts-uk/>

She states, "My group which includes four physicians (MD's), two Los Alamos physicists, and homeowners, parents, & residents, is resisting Smart meters due to the data from over 2000 peer-reviewed studies that show exposure to these devices causes a 400% rise in cancers in adults, a larger impact on children and the children carried in the womb; and the children's skulls, being thinner, are much more permeable to the electromagnetic radiation. This electromagnetic radiation is also particularly dangerous for the elderly and those with implants, heart problems, or other health problems. I have attached one abstract that contains the following findings:

One remarkable observation is the fact that the lowest energy levels give rise to the most pronounced albumin leakage. If mobile communications, even at extremely low energy levels, causes the users' own albumin to leak out through the blood-brain barrier (BBB), also other unwanted and toxic molecules in the blood, may leak into the brain tissue and concentrate in and damage the neurons and glial cells of the brain.

Continued →  
Nasru Maly 3-13-19

Continued

In later studies we have shown that a 2-h exposure to GSM 915 MHz at non-thermal levels, gives rise to significant neuronal damage, seen 28 and 56 days after the exposure. In our continued research, the non-thermal effects (histology, memory functions) of long-term exposure for 13 months are studied as well as the effects of short term GSM 1,800 MHz upon gene expression.

As health care providers, we are concerned that there will be a sharp rise in cancers, although the initial symptoms of this exposure includes: Brain fog, anxiety, depressive, sleep problems, asthma, palpitations and arrhythmias. I can ask you to please read the web-site I listed at the beginning of the article. It's about youth suicides of young people living next to a "mast" (smart meters) as they are called in Europe.

But, as an American citizen, I share your fears that these meters, this grid, comprises a much greater threat - especially as people literally lose their healthy brains, their strength and will to resist.

Yours truly, Felicia N. Trujillo, ND, GCFP

**SAN FRANCISCO**  
**Utility: Equipment may have ignited fire**  
 Pacific Gas & Electric Corp. inched closer to taking responsibility for the deadliest U.S. wildfire in a century, saying Thursday that it was "probable" that one of its transmission lines sparked the blaze last year that killed 86 people and destroyed most of the city of Paradise.  
 The embattled utility company, which filed for bankruptcy protection in January, said it's taking a \$10.5 billion charge for claims connected to the fire in its fourth-quarter earnings. The fire destroyed 14,000 homes in and around Paradise, a city of 27,000 people.

How Many Lives Must  
 Be destroyed until the  
 Courts see that the  
 Customers are right - The  
 Electric, Gas Water Companies  
 are wrong!  
 It only takes 1 bolt of Lightning  
 to hit at the right place & a  
 Whole Town Goes up in Flames!

Paradise destroyed

Another San Bruno - 100% of the Homes Had  
 Smart Meters at the time of the Explosive  
 Report already sent to you!

P.G. & E has no conscience!

The people of California for years have fought  
 Pacific Gas & Electric - But P.G. & E did not  
 listen! Money <sup>has</sup> <sup>power</sup> <sup>is</sup> <sup>what</sup> <sup>counts</sup> move to them & then lives of  
 other people. P.G. & E were told by their customers  
 that this would happen & fought with everything  
 they had. This was murdered - ~~not~~ Plain & Simple.

Have you  
 been listening to me for the last 2 years Net-Ed?  
 I'm trying to make you see that you're wrong?

Remember the article published in "The National"  
I sent it to you! Did you read it!  
Let me write it up for you again!

This is an excellent article detailing the resistance and potential international failure of the Smart Grid, Smart Meter based on the Consumer Pushback. The National is an English language journal from the middle east - located in Abu Dhabi

(<http://www.thenational.ae/lifestyle/personal-finance/health-risks-could-switch-off-home-energy-meters>.)

Storm clouds are gathering over the booming domestic energy monitoring sector in the U.S. as concern grows that household electricity Smart Meters pose serious health risks.

Investors in this new sector should be aware that, despite its <sup>false</sup> energy saving credentials, the Smart Metering industry could become the focus of international concern regarding levels of radiation generated by the new digital devices.

The Smart-Meter sector is now starting to see a trend towards mergers and acquisitions. But reports in mid Feb. that smart-meter maker Landis & Gear, believe to be worth roughly US \$1 billion (Dh3.6bn), is about to be auctioned coincided with news of mounting anti-Smart Meter protests in the U.S.!

The energy-monitoring industry is likely to experience a degree of wariness on the part of investors. Markets are driven by "sentiment," a polite word for greed & fear. The fear now

Norma Masley 3-6-19

Among investors is that the Smart-Meter industry could suffer a dramatic setback if health & safety concerns begin to escalate globally!

The global growth of the industry in the Asia Pacific and elsewhere is suffering a severe setback because of consumer resistance to smart-meters. (p.f@thenational.ae)

The Article is a lot longer and deserves to be read in its entirety.

And it's in English  
Easy to read

Norma Masley

The Smart Grid in Canada - Plans  
for a North American Grid - Including  
USA and Mexico

These are just a few of the You Tube videos clips!

Why should we be concerned with what Canada is doing with the Smart Meters and Smart Grid? The Smart Grid that is planned is for all of North America. We will be sharing our energy grid with Canada and Mexico and treated as one big nation, just as the European Union. Although it has not officially happened yet, the Smart Grid will help to bring about a North American Union, something for which many people high up in government have been planning, scheming and preparing for many years, but all under cover. Read the recently published book "By Stealth and Deception, USA Transformation and Its Parallel to the European Union!"

The following are talks and articles given or written by Dr. Ann Cavoukian, Information and Privacy Commissioner of Ontario, Canada, entitled, she reveals many disturbing issues of the Smart Grid, how it will be used to collect data on all of us, greatly affecting privacy rights (The following are You Tube video clips with the length of time for each)

- Reuse smart meters, What Happened to Privacy? "Smart Meter or Spy Meter? ... 4:16
- Privacy by Design and the Smart Grid 3:48
- Smart Antivirus 2009 Information 1:18
- Smart Grid SOS 2:04:01
