Re: Thomas and Linda Licht  
V.  
Metropolitan Edison Company  
Docket No. C-2018-3004078

Response/Opposition to Motion to Dismiss from Metropolitan Edison Company

Complainants are respectfully opposing the Motion to Dismiss our case.

We're Seniors on a fixed income and all we want to do is live whatever years left the Good Lord has planned for us in Peace and Harmony.

Never, in all our lives have we ever been through anything like this. This is all unfamiliar territory.

We were unaware of all the procedures involved, nor understood why Respondent asked so many personal questions irrelevant to keeping our original analog meter.

We don't understand why it is necessary to justify why we want to keep our original meter and then back up the justification with documentation and then if any, exhibits.

How could we go to Respondent for assistance when Respondent is threatening to turn off our electric service for refusing a smart meter?

What happened to "No thank you, we're fine with our analog meter, we never had a problem with it."

We're old school "if it ain't broke don't fix it!"

We don't understand how Act 129 approved and signed October 15, 2008 by former Governor Edward Rendell

which states:

(2) Electric distribution companies shall furnish smart meter technology as follows:

(i) Upon request from a customer that agrees to pay the cost of the smart meter at time of request.

(ii) In new building construction

(iii) In accordance with depreciation schedule not to exceed 15 years.

If former Governor Edward Rendell were here, it would be interesting to hear what he would say about

the interpretation of Act 129 forcing people to put smart meters on their homes.

PA PUBLIC UTILITY COMMISSION  
SECRETARY'S BUREAU

Complainants are concerned about the safety, security and privacy of the smart meter.

Our home that we worked so hard for is our castle and sanctuary.

We are responsible for everything that happens to our home, yet the Respondent has no liability to the smart meter forced on us.

Complainant is a diabetic, had cardio bypass surgery and has an implanted pacemaker.

Why add more unknow factors to Complainant's health?

An ounce of prevention is worth a pound of cure.

As beekeepers, smart meters can have devastating effects on our hives. Why chance it? We don't know what the future consequences are.

Cigaretts, asbestos, lead, Monsanto Roundup, mercury, talc powder were all considered to be "safe" by "experts" but were not forced on people. However, a smart meter considered "safe" is being forced on us.

Complainants resources, legal knowledge, legal terminology, computer skills, understanding procedures, regarding this matter are limited. It takes us much longer to learn and prepare.

Complainants respectfully request a much later hearing date to research, read, review, respond, gather information and documents to prepare for this case.

Complainants also request forgiveness using incorrect terminology.

Respectfully,  
*Thomas Licht*  
*Linda Licht*
