

**BEFORE THE  
PENNSYLVANIA PUBLIC UTILITY COMMISSION**

**RECEIVED**

OCT 21 2019

PA PUBLIC UTILITY COMMISSION  
SECRETARY'S BUREAU

**Jay Larry Moyer, Complainant**

**V.**

**RE: Docket No. C-2017-2629683**

**PPL Electric Utilities Corporation, Respondent**

**Third Petition to Reopen Proceeding**

**October 18, 2019**

## **INTRODUCTION**

This “Third Petition to Re-open” the above case is submitted pursuant to 52 Pa. Code § 5.571(b) and 52 Pa. Code § 5.571(d)(2). The “conditions of fact” have again changed substantially. PPL has again made inscrutable, incoherent, and unexplained “material changes of fact” to my solar bills. Information which was added to my solar bills in March, 2019, has now disappeared entirely.

As with information in previous petitions to re-open, that “material change of fact” offers “good cause” – 52 Pa. Code § 431(b) - for re-opening the case.

## **MATERIAL CHANGES TO MY SOLAR BILLS CONTINUE UNABATED**

On October 25, 2018, I submitted a petition requesting that the Commission re-open the above case for the purpose of reviewing new information about the data that is available on PPL’s “Energy Analyzer”. That petition described the difficulty in using the “Energy Analyzer” and its failure to serve as a “post for accessing virtual meter aggregation data”.

On or about December 10, 2018, I submitted a second petition to re-open the above case. The “additional matter” in the second petition was in the form of actual data from PPL’s web-based “Energy Analyzer”. Printouts from the “Energy Analyzer” demonstrated that data from PPL’s “Energy Analyzer” was not adequate or even credible. That data did not show any actual meter readings, or any evidence of meter aggregation. The data also failed to indicate “full retail value”,

or any calculations regarding credit for my generation. It offered conclusive evidence that comprehensive monthly aggregation data are not available “by other means”, as PPL had long claimed, and as ALJ Judge Cheskis asserted in his Initial Decision.

In March, 2019, the format of my solar bill was revised, and I referred to this revision in my letter to the Commission on May 30, 2019. I applauded it as an “important step toward correcting past failures”. I also described the lingering problems and the “ongoing failure” of the billing process

### **A THIRD PETITION TO RE-OPEN VS. A NEW FORMAL COMPLAINT**

This Third Petition to re-open the case is submitted in the hope of avoiding a new Formal Complaint.

These new and recent changes in my solar bills show, once again, that PPL’s “manual” billing procedures for virtual meter aggregation are inconsistent, disordered, inadequate, and unreliable. The new information attached to this petition offers clear and ongoing evidence of the disarray in PPL’s billing process and the utter failure of PPL’s billing procedures for virtual meter aggregation.

In my letter of May 30, 2019, I cited the specific solar bill for May 13, 2019, although the new format and the new data (“kWh Received” from Customer) was actually introduced on March 11, 2019.

Now, inexplicably, as detailed below, that data has again been removed from the bills. That entire box (“Kilowatt received”) has been removed completely.

The bills now do not include any meter readings or any information about the kilowatt hours of generation.

### **GROUND FOR A THIRD PETITION TO RE-OPEN THE PROCEEDINGS**

As noted above, significant changes to my solar bills are evident on the bill for March 11, 2019. That bill also indicates the installation of a new meter.

There is no suggestion here that the installation itself was improper. Nevertheless, at the same time, the format of my solar bill was revised. The bill for March 11, 2019, includes not one, but two separate boxes of information.

In this new format, one box reported the number of kilowatt hours “delivered” (“to customer”) and the other box showed the number of kilowatt hours “received . . . from customer” (i.e. generated by the solar panels and sent to the grid). In the separate boxes, the March 11 bill showed kilowatt hours that PPL “received” from me (-234) and the amount that PPL had “delivered” to me (“1” kilowatt hour of electricity).

Nine days later, on March 20, 2019, a new solar bill revised the numbers in the March 11 bill. On March 20, 2019, the number of kilowatt hours “received” (-234) becomes -235. Without justification, the March 20 bill apparently combines

the amount “delivered” with the amount “received”. It also revises the “Due Date” and the “Amount Due”.

The following statement (April 10, 2019) updates the amount “received” (00235 to 00805 = -570 kWh) and reduces the bill’s size from three pages to two pages.

Bills for May 13, June 12, and July 12 continue the pattern seen on April 10.

In the August 12 bill, however, meter readings disappear completely. In fact, the entire box showing “kWh received (from customer)” is missing from the bill.

In the bill for September 11, 2019, the box, the meter reading, and the amount “received” are again absent from the bill.

These irregularities, along with other frequent aberrations in my bills, make a mockery of repeated claims such as the following :

*“since June 1, 2012, the Company has used consistent billing processes for virtual net meter aggregation.”* PPL Electric Statement No. 1, March 6, 2015, at 15

The bills attached to this third “petition to re-open” offer incontrovertible evidence that the billing process is by no measure “consistent”, nor are the bills themselves -- or the pattern of reporting. There can be no justification for the continued failure to report an accurate “combination of readings and billing”, as

the Public Utility Code demands. 52 Pa. Code § 75.12 (“Virtual meter aggregation”)

As noted before, PPL’s methodology affects every current virtual metering customer -- and every potential customer of virtual meter aggregation -- in its service area. The public interest demands redress for PPL’s irresponsibility, negligence, and misfeasance. Penalties for PPL’s perpetual misconduct are long overdue.

The Commission has complete authority to re-open the case. 52 Pa. Code § 5.571(a) and 52 Pa. Code § 5.571(d)(2).

With this Petition, I’ve also attached an Appendix. That Appendix is included to offer perspective on a decade of violations, irregularities, and grievances associated with PPL’s billing procedures for virtual meter aggregation.

The “additional matter” provided with this third petition reveals again the capricious conduct of PPL; the disingenuous claims of PPL; and the still more egregious falsehoods perpetrated by PPL throughout prior proceedings.

I respectfully request once again that the Commission re-open the above proceeding; consider the “additional matter” in this Third Petition; reject PPL’s opaque and faulty methodology; and order PPL to replace its current procedures with a coherent “billing process” that assures its virtual metering customers

complete, accurate, and transparent bills as well as the “full retail value” for generation that the AEPS Act specifies.

Respectfully Submitted

A handwritten signature in black ink that reads "Jay Larry Moyer". The signature is written in a cursive style with a long, sweeping underline.

Jay Larry Moyer

PA PUBLIC UTILITY COMMISSION  
SECRETARY'S BUREAU

## APPENDIX

### A HISTORY OF DECEPTION, SUBTERFUGE, CAPRICE, AND FALSEHOOD

*The "serial" Complaints against PPL since 2010 have been propelled by PPL's persistent pattern of unrelenting "serial" aberrations in company policy; serial errors; serial misrepresentations; serial irregularities in billing; and serial violations of the regulations.*

*The actions of PPL, starting in 2010 have frustrated and denied my full access to the provisions of virtual meter aggregation under the AEPS Act. The company repeatedly prevaricated, issued false claims, employed subterfuge, gave false testimony, and limited my access to the full benefits of the law's provision.*

*The falsehoods and deceptions of PPL were perpetrated, not only on me, but on the PUC, which assumed the accuracy of PPL's claims. So complete was the Commission's deference to PPL that it failed to question the veracity of PPL or to investigate discrepancies that were presented to it. In one example after another, the Commission accepted PPL's claims as implicitly accurate and correct. The PUC did not question PPL's claims, nor did it investigate them, even when they were shown to be false.*

*Invariably, in response to these falsehoods, the PUC looked the other way, declared PPL's conduct "reasonable", and accepted PPL's assertions and assurances. Again and again, the Commission refused to adequately examine evidence that contradicted PPL's false claims.*

*Again and again, PPL has enjoyed immunity from scrutiny as demonstrated by the examples below.*

- 1. Example :** Incriminating internal emails provided in discovery show irrefutably that, long after approving my PV system, and in spite of assurances to the PUC, PPL remained unprepared to implement procedures for virtual meter aggregation.
  - a. In the Formal hearing on August 15, 2012, a critical internal email (July 12, 2011) was admitted into evidence as Moyer Exhibit "JLM-11", but its significance was dismissed or overlooked. In that email, Keith Erney, PPL's point person for my first Formal Complaint, said, "We still do not have a process in place to apply virtual metering to all the customers who request it on a monthly basis."

- b. In that same Formal hearing on August 15, 2012, ALJ Cynthia W. Fordham denied admission of a separate internal PPL email, also sent on July 12, 2011, more than two years after my system was installed. That internal email (Moyer Exhibit "JLM-15") was marked "high" importance and was circulated to no fewer than 11 people in the company. It stated, along with other incriminating information, that "Mr. Moyer is just one customer with this issue – [NAME REDACTED] is a second. The fact is that we are not doing things correctly, period . . ."
- c. In still another internal email on April 7, 2011, Mr. Erney, the designated point person for my Complaint, summarized PPL's actions: "Mr. Moyer requested virtual meter aggregation. At that time, like now, we did not have a process in place to handle this request. However, we offered to virtual meter his accounts manually and we completed this for several months. We eventually stopped the virtual meter aggregation because we were not able to provide the service to all customers and felt it was not fair." (Underlining added)
- d. Mr. Erney's explanation differs sharply from PPL's official reason for halting credit, namely that my system lacked "non-generational load".

NOTE: In his email on April 7, 2011, Keith Erney invokes PPL's requirement of "non-generation load", but does not explain how my system could have been approved under such a policy, as indeed it was in 2009.

- 2. **Example :** In the company's Original Investigation into my Informal Complaint (2010), PPL made the false claim to the PUC that "the generation producing meter would not offset the usage at the house account because of its remote location." (Exhibit "PPL Electric 6", as entered into evidence on August 15, 2012 -- Underlining added) This remarkable claim ignores the facts and the law. In particular, it disregards the "two-mile" provision that is explicit in the AEPS Act. The two aggregated meters which make up my system are merely 400+/- yards apart and comply fully with the AEPS Act. The comment reflects either an utter disregard for the law or a deliberate attempt to discredit the PV system which PPL had approved.
- 3. **Example :** Confusion and uncertainty regarding the "load requirement" are evident in PPL's email exchanges. In November, 2010, I filed an Informal Complaint disputing PPL's billing methodology. The staff member who "researched" my case, Mr. Dennis R. Worthington, describes his confusion in an email on January 6, 2011. Mr. Worthington says, "Despite the fact that this customer uses an average of 6 kWh monthly, it does not qualify as a load-bearing meter." Mr. Worthington then asks, in a footnote, "Is there a minimum amount of kWh the customer should be using to be considered 'load-bearing'?"
- 4. **Example :** Data on PPL's "Energy Analyzer" is incomplete and misleading. PPL's "Energy Analyzer" does not separate usage from generation. Instead, it reports only

the net amount of kilowatt hours after the two (usage and generation) are combined. Because generation usually exceeds usage, the amount of “load” is obscured and hidden in the data.

5. **Example :** The ongoing, measurable load which does occur at my solar panels was, in fact, reported on my bills from 2009-2011. PPL’s current failure to report actual load implies, falsely, that there is no load at the solar panels. PPL’s own documents, however, report the existence of ongoing, measurable “load” at my solar panels.

- a. In its reply to my Informal Complaint in 2010, PPL stated explicitly that “The Company explained that approximately 60 kWh was used to offset his load at 67277-97002 (solar account) and the remaining 1,900 kWh were applied against his house account.” (Exhibit “PPL Electric 6”, as entered into evidence on August 15, 2012) (Underlining added)
- b. From April, 2009 to March, 2011, the solar bills routinely reported “usage” at the solar panels. Although measurable load (usage) continues, it no longer is reported, either on the bills or on PPL spreadsheets.
- c. When generation data is reported on the “Energy Analyzer”, PPL refers to it as “negative usage”. Although generation normally exceeds usage, as noted above, this is not always the case. Sometimes they cancel each other out, and the result is “zero”. Occasionally, there is even a “positive usage”, as on November 24, 2018, when PPL’s “Energy Analyzer” showed a positive net load (usage which exceeds generation) of “+ 03 kWh”. (See report of the “Energy Analyzer” for November-December, 2018, attached)

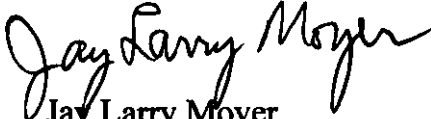

6. **Example :** PPL’s many claims about providing data through its “year-end spreadsheets” have been inconsistent, contradictory, and disingenuous.

- a. In an internal email obtained through discovery (February 22, 2012) from Mr. Aloysius P. Cannon, PPL’s head of billing, Mr. Cannon said, “I believe in our dialogs – that we would be providing a copy of this spreadsheet every May – at the time of the annual cash out.”
- b. In its Opinion and Order, January 9, 2014, the Commission stated “PPL notes that it provides a detailed, twelve-month worksheet to each virtual net metering customer at the end of the PJM Planning Year.” Opinion and Order, January 9, 2014, at 13
- c. In 2016, the Commission declared that “.. while the additional information the Complainant sought was not on his bill, PPL offers such information on a spreadsheet on a monthly basis.” Opinion and Order, May 19, 2016, at 17
- d. In April, 2017, I requested year-end spreadsheets, but PPL made no response. An internal email dated May 26, 2017, provided an apparent explanation for the lack of response. In that email provided through discovery, Deborah L. Keiser wrote to her boss, Cheryl T. Oehler, the head of billing: “Larry Moyer sent a letter

requesting year end sheets but Al had said we were not providing them.” TWO-LINES ARE THEN REDACTED in the email. Only after I filed a Formal Complaint did PPL provide the spreadsheet.

- e. PPL has not provided any year-end spreadsheet for the 2017-2018 or the 2018-2019 Reporting Years.
7. **Example :** PPL, in sworn testimony, assured the PUC that “There also is a virtual net meter aggregation post where a customergenerator (sic) participating in that program can see the host account’s generation hour by hour each day.” Cannon Rebuttal, PPL Electric Statement No. 1, March 6, 2015, at 46 No such on-line hour-by-hour reporting has ever been shown to be available.
8. **Example :** In 2014, PPL, under orders from the PUC, prepared a spreadsheet which included fabricated (and false) meter readings. These readings explicitly contradicted the meter readings on the monthly bills for the same period. Those false readings continued to appear on subsequent spreadsheets.
9. **Example :** For reasons that are not explained, every solar bill is stamped as an “adjusted” or, in 2019, as a “corrected” statement. This notation, unfortunately, is not trustworthy. When errors do appear in my bills, it is evident that PPL’s billing process is incapable of re-issuing bills that are truly “corrected” and accurate. This inability of PPL is seen on four of the original bills submitted with the above Complaint. Contrary to the notation, those four bills remain incorrect to this day. PPL admits that “Ms. Nalesnik tried to cancel the bills and issue corrected bills to the Complainant that showed the credits applied as a separate “Excess Credit” line item; however, this was not successful.” PPL Reply Brief, May 4, 2018 at 22
10. **Example :** PPL claims that the two meters are read “on the same day” (PPL Electric Statement No. 1, March 6, 2015, at 14) but its actual process suggests otherwise. The attorney representing me, John Baillie, in an email (February 22, 2012) asked PPL why “the meter readings on Moyer’s host account are not showing the amounts his panels are generating”. In a reply on the same day, Mr. Aloysius P. Cannon, PPL’s director of billing, explained the actual process: “Virtual Metering host accounts do not bill automatically each month when the meter is running backwards. The reading for billing is entered manually in our system each month – the reading entered reflects the ‘highest’ reading on the meter – before it ran backwards.” Mr. Cannon’s account confirms the fact that the readings are not completed on a specific date, as they are on my house account. It seems clear, from PPL’s method, that the dates for solar readings are not specific and will vary considerably. It would be sheer coincidence if the date for the “highest” reading on the solar panels fell on the same date as the “automatic” reading on my house (satellite) meter. In addition, since the readings are “entered manually”, it seems likely that the dates, like the meter readings, are also entered manually to correspond to the “automated” reading dates at the house meter.

**11. Example :** One internal email on December 2, 2011, confirms that PPL failed to sign the “Certificate of Completion”, although the date of “3/17/09” appears on the Certificate. Later, however, in 2012, PPL, ex post facto, crossed out the original date and entered a new date, “3/7/12”. This post dating of the Certificate of Completion by three years is clearly fraudulent. The signature of Keith R. Erney is also entered on the Certificate (page 2), with the date of “3/8/12”. This document was submitted in two parts in the Formal Hearing as Exhibit “JLM-19” and “JLM-20”.

Account Balance		\$635.41

## General Information

Generation prices and charges are set by the electric generation supplier you have chosen. The Public Utility Commission regulates distribution rates and services. The Federal Energy Regulatory Commission regulates transmission prices and services.

PPL Electric Utilities uses about \$6.14 of this bill to pay state taxes and about \$37.39 is used to pay the PA Gross Receipts Tax.

## kWh Use By Meter

### kWh Delivered (to Customer)

Reading Dates	Meter Number	Meter Constant	Meter Reading Previous/Present	Kilowatt Hours
Feb 19 Mar 11	301181118	1	00000 00001	1
Feb 8 Feb 19	10069153	1	63189 63189	0
Days Billed: 31			Total Delivered	1

## Understanding Your Bill

**Customer Charge** - Monthly charge to recover costs of billing, meters and equipment.

**Generation Charge** - Monthly charge to recover the cost of the production or purchase of electricity.

**kWh (Kilowatt-hour)** - A measure of how much electricity your household uses. One kilowatt-hour equals the amount of electricity used by ten 100-watt lights left on for one hour.

**Smart Meter Rider** - Monthly charge to recover costs associated with the smart meter programs approved by the PUC.

**Tax Cut and Jobs Act Credit** - Monthly adjustment for federal tax changes.

**Transmission Charge** - Monthly charge to recover the cost of moving electricity over high-voltage transmission lines from generation facilities to PPL Electric Utilities' distribution lines (see Distribution Charge).

**kWh Delivered to Customer** - The amount of electricity we delivered to you for your use.

**kWh Received from Customer** - The amount of electricity you returned to the grid.

**kWh Net:** kWh Delivered - kWh Received.

**Type(s) of Meter Readings:**

**Actual** - Measures your monthly electricity use based on an actual reading.

## Your Message Center

- With paperless billing, you can receive and pay your PPL Electric Utilities bills online. The process is free, quick, convenient and secure. To learn more or sign up, visit [pplelectric.com](http://pplelectric.com).
- Before digging around your home or property, you should always call the state's One Call notification system to locate any underground utility lines. You can do this by simply dialing 811, which will connect you to the One Call system. Be safe and call 811 before you dig.
- Save postage and late charges - sign up for Automated Bill Payment.

## General Information

Generation prices and charges are set by the electric generation supplier you have chosen. The Public Utility Commission regulates distribution rates and services. The Federal Energy Regulatory Commission regulates transmission prices and services.

PPL Electric Utilities uses about \$6.14 of this bill to pay state taxes and about \$37.38 is used to pay the PA Gross Receipts Tax.

## Understanding Your Bill

**Customer Charge** - Monthly charge to recover costs of billing, meters and equipment.

**kWh (Kilowatt-hour)** - A measure of how much electricity your household uses. One kilowatt-hour equals the amount of electricity used by ten 100-watt lights left on for one hour.

**Smart Meter Rider** - Monthly charge to recover costs associated with the smart meter programs approved by the PUC.

**Tax Cut and Jobs Act Credit** - Monthly adjustment for federal tax changes.

**kWh Delivered to Customer** - The amount of electricity we delivered to you for your use.

**kWh Received from Customer** - The amount of electricity you returned to the grid.

\*Federal I.D. 23-0959590

## Your Message Center

- Peak Demand, 0.10 kW.
- With paperless billing, you can receive and pay your PPL Electric Utilities bills online. The process is free, quick, convenient and secure. To learn more or sign up, visit [ppl electric.com](http://ppl electric.com).
- Before digging around your home or property, you should always call the state's One Call notification system to locate any underground utility lines. You can do this by simply dialing 811, which will connect you to the One Call system. Be safe and call 811 before you dig.
- Save postage and late charges - sign up for Automated Bill Payment.

## General Information

Generation prices and charges are set by the electric generation supplier you have chosen. The Public Utility Commission regulates distribution rates and services. The Federal Energy Regulatory Commission regulates transmission prices and services.

PPL Electric Utilities uses about \$7.28 of this bill to pay state taxes and about \$44.33 is used to pay the PA Gross Receipts Tax.

## Understanding Your Bill

**Customer Charge** - Monthly charge to recover costs of billing, meters and equipment.

**System Improvement Charge** - Monthly charge to recover costs for improving, repairing and replacing equipment that delivers electricity to your home or business.

**Smart Meter Rider** - Monthly charge to recover costs associated with the smart meter programs approved by the PUC.

**Tax Cut and Jobs Act Credit** - Monthly adjustment for federal tax changes.

**kWh (Kilowatt-hour)** - A measure of how much electricity your household uses. One kilowatt-hour equals the amount of electricity used by ten 100-watt lights left on for one hour.

**kWh Delivered to Customer** - The amount of electricity we delivered to you for your use.
