In reply to the correspondence from Kimberly G. Krupka dated October 21, 2019 which I received on 10/30/2019. Council has overlooked the fact that we asked for input from the Utility in order to complete the application that was required.

We would require a face to face hearing in order to go over the plans and drawings that we attempted to show the Utility in the past.

Is the Utility ready to answer our questions concerning the location of the new three phase electrical service?

Is the Utility ready to discuss the permitting of a Solar PV System and the location of the connection to the power lines?

Will the Utility provide conformation of any monetary assistance that it is able to provide us for the installation of the aforementioned PV Systems?

Will the Utility confirm the PV array physical installation methods and concerns, type and function? Interactive systems, Micro-inverter and string inverter systems? All of which could have been provided to us if we were granted a meeting with the engineering department of the Utility before that point in time?

Thank you for your time and consideration concerning this matter.

Respectfully,

Frank J. Festa, Jr.
