and

Liza Mousios C-2019-300-7995

RECEIVED

2020 JAN 17 AM 10:18

PA PUC
SECRETARY'S BUREAU

Met vs. Mr. Cumming agrees for this brief
Ed to be in writing.

On or around December 25, 2019, complainants Roy Cumming and Liza Mousios sent a Motion to Stay the Hearings to Judge Heap.

PUC claimed the motion was not received until Jan 3, 2020, six days later. Heap had previously denied a continuance pending the outcome of ten appeals.

On January 8, 2020 Heap still had not contacted complainants Cumming and Mousios regarding the disposition of their Motion to Stay. Ms. Mousios called Judge Heap's office whereby the latter, through an assistant, denied the Motion to Stay. Complainants had coached the Motion to Stay in terms of the outcome of the ten appeals, the outcome of the Haas v. PUC lawsuit and the availability of Cumming and Mousios' expert witness, engineer Mr. Bill Rathgates.

(2)

In their motion to stay, complainants elocuted in writing that Mr. Bathgate was scheduled to come to complainants' home and displaced by PUK home, in November 2019, but then was unable to. Mr. Bathgate informed complainants that since the weather is very inclement in Michigan, it would be too dangerous for him to travel until late March 2020 for the toxicity evaluation for his expert witness testimony, when road conditions would be safer. Mousios and Cumming elocuted that Mr. Bathgate is a highly specialized expert and perhaps the only expert on the secondary antenna effect from smart meters.

It should be noted that an activist measured the radiation from the adjacent neighbor's smart meter twice: once in April 2019 and once in October 2019. Both times the radiation levels measured double the radiation of a cell tower at the same distance.

Roy Cummins
and
Liza Mousios
vs.
Met Ed

been expected to testify

Mr. Bathgate would have testified to:

- 1) the radiation in Complainant's house and on complainant's property emanating from the adjacent smart meter and, resulting health dangers,
- 2) the conducted emissions/dirty electricity from the adjacent smart meter in complainant's home and property,
- 3) the outrageous amounts of radiation and conducted emissions out of compliance with FCC standard from mesh smart meters,
- 4) the falsification of documents relating to the health dangers of smart meters by the utility company,
- 5) the suppression of scientific and medical proving the health perils of smart meters being witness to the forced homelessness of Mousios by Met Ed, PUC, via the smart meter. Mr. Bathgate would also

1) disseminate incontrovertible evidence regarding the health toxicity and endemic dangers of smart meters

8) Discuss the high trajectory of the smart meter, whereby it augments its signal by the metal in complainants' house.

By denying Mousios and Cumming's Motion to Stay concomitant with the availability of their inimitably qualified expert witness, Heap abrogated, extirpated and denied due process of Mr. Cumming and Ms. Mousios' uniquely qualified expert witness expert testimony for their case.

Heap denied the ability of complainants to preserve their issues for appeal - a flagrantly illegal and contumacious move.

Heap, through her assistant on January 8, said she would remove all wireless from the hearing i.e. cellphones and WiFi due to

Ms. Mousios' electromagnetic sensitivity [which has severely worsened since she was sickened by the smart meter next door].

(4)

However, Judge Neap conveniently left out the fact that the smart meter would not be removed, rendering an in-person hearing unfeasible, as Ms. Mousios would most likely vomit blood and have other extreme suffering.

Whereupon, on January 8th, Judge Neap allowed complainants' brief to be submitted in writing. It should be noted that since Judge Neap did not contact Mousios Cummins, even failing to call on Cummins's phone prior to January 8 regarding the ruling on the Motion to Stay, Neap should not expect complainants' exhibits in total to be entirely timely: as Judge Neap hung up the complainants and was not timely, she should not expect ~~all~~ the exhibits to have been submitted by a date when complainants did not

Cummings & Maurio

v.
Met Ed

Know whether a hearing was to take place, given the Motion to Stay and Judge Heap's dilatory inaction.

As a further appealable action, Heap ruled, on Met Ed's ^{to continuance} objections before even allowing Complainants sufficient legal time to respond. On December 19, 2019, Complainants received Met Ed's objections, with Judge Heap's ruling received by Complainants on December 21, 2019. Judge Heap UNILATERALLY ruled against Complainants without allowing their response to Met Ed's objections to a continuance pending the outcome of 10 appeals!!

This is illegal and appealable,

The exhibits of Metropolitan Edison denote procurement and installation, approved deployment etc. Nowhere is there mention that the World Health Organization classifies smart meters as a CLASS 2 B CARCINOGEN. The American Academy of Pediatrics denounces smart meters, but respondents and the PUC are unctuously unconcerned.

Exhibit C shows a list of peer-reviewed studies as to the health dangers of smart meters. Per Daybert it must be considered.

Dr. John Opeschuk Ph.D. of Harvard University collated ⁵²20,000 C+ twenty-thousand scientific and medical studies documenting the health dangers of EMFs and RFs.

(7)

One hundred twenty-five experts from Harvard University and Boston University signed a 1997 consensus statement to avert harm to public health from microwaves used in telecommunications.

Also, since the FCC does not regulate the EMFs from the smart meters, there are no applicable safety guidelines.

However, Met Ed and the reciprocal PUC, seek to make us sick for their acquisitive purposes.

Act 129 is bastardized and misinterpreted by the PUC and Met Ed and utilities.

Act 129 was intended as an OPT-INV measure, not as draconian mandate,

8

Smart meters are a violation of the Energy Policy Act of 2005 § 1252. And PA title 66/150) decrees that electric service is required to be safe and reasonable. Destroying peoples' health, making them homeless and killing their pets is neither safe nor reasonable. See EXHIBITS from Dr William Kragt, physician of Vita Mousios.

Furthermore, the Daubert ruling by the Supreme Court decrees that any relevant peer reviewed study must be considered. So Judge Keap, cannot eschew medical and scientific documentation as to the dangers of smart meters solely because she is solipsistically in bed with the incestuously reciprocal PUC

(9)

and utility companies

Judge Neep's pontification that the law can only be applied as it exists is amoral and venal at best.

The Fugitive Slave Act of 1850 was applied as it existed. Laws prohibiting women from being judges and lawyers were applied as they existed.

It is illegal for a communications device to be installed on private property, yet that is what smart meters are. One can only assume that Judge Neep would rally to the cause to uphold such bad law as the Fugitive Slave Act and prohibiting women from being judges and lawyers.

Cummins Mousios (10)

Ms. Mousios had lived most years peacefully in the same house in Revere. The day before the smart meter was installed things were fine. But shortly after March 27, 2019, Ms. Mousios began having health problems she never before had experienced. Whereupon her lungs and heart were seemingly inviolate, she had difficulty breathing, with one dog developing pneumonia. She started having overwhelming chest pain and weakness in her arms. She had no history of gastric problems but began vomiting blood. All her dogs, who had been previously healthy started vomiting profusely and refusing food.

A previously healthy dog who had been a star champion began losing her balance, despite the fact that pre-smart meter she had been trotting and

11
Cummins & Mousios

running in the field. Within days after smart meter installation, she was losing her balance. She fell, broke her jaw and had to be euthanized. She may have suffered for many hours because Ms. Mousios was forced by state

mandate to live in her car and could not observe her, as she was hopeless by state mandate. Ms. Mousios' vet bills accrued to \$3,161. Ms. Mousios' veterinarian calculated the amount of potassium iodide ^{in micrograms} for radiation poisoning for the dogs.

There was plangent temporal association with Ms. Mousios and the dogs better away from the smart meter.

12

Cummins + Mousias

From the car, Ms. Mousias and the dogs moved to the tent, even in 38° weather. Some of the relief of being away from the pernicious

smart meter ^{was immediate} ~~was immediate~~ some took ^{occasional stays with non-smart meter friends health problems} 12 days or so and ~~some have~~ not resolved.

Ms. Mousias is in a painful, weakened state from the tortuous smart meter exposure. She and the dogs moved to a shed with no water and only a small non-electric heater. When she has to take a shower, she is sick from re-exposure.

Mr. Cummins's PSA was consistently improving pre-smart meter. Now he has chest pains and probable prostate cancer since the installation of the adjacent smart meter.

We are fully aware that there is solipsistic, reciprocal diabolical reciprocity among Judge Heep, the PUC and the electric companies ^{and counsel}, there is too much greed, money and evil at stake. We acknowledge that the hired whores, Israel and Davis pretend to know more than one's own doctor or a complainant with her I.Q. in the top 1% percentile.

We are fully cognizant that even when ^{another} complainant had 3 doctors stating she was harmed by the smart meter, Judge Heep lobotomized her conscience (if she ever had one) and ruled against her.

We realize that the grammatically deficient Tori Giesler is corrupt as well.

14

Cummins
+
Mousias

We realize there is settled and established science confirming the dangers of smart meters. We know there is too much evil and venal, unctuous, scornful, spurious depraved reciprocity among Judge Neap, the PR and Met Eds to do the right thing.

We get it that we are just collateral damage in your morally degenerate, turpitudinous depravity.

We cannot win. You are too evil.

But we will appeal in forma pauperis. And we will go to the Judicial Board. We understand the sordid, incestuous bond and venal reciprocity that justice cannot infiltrate.

(15)

Stop Smart Meters!

Fighting for health, privacy, and safety

The Science

Evidence is accumulating that wireless technologies in general- and the “smart grid” and “smart meters” in particular- are causing serious health problems.

Familiarize yourself with the science, and share this knowledge with your friends, family, neighbors and especially politicians and others who have the ability (and grave duty) to change policy, recall smart meters- and order a full, impartial

investigation into health impacts, privacy violations, overcharging, fire safety, and other flaws with this technology.
