VIASAT CARRIER SERVICES, INC. SUPPLEMENTAL RESPONSE

Viasat Carrier Services, Inc. ("Viasat"), by its counsel, hereby submits this Supplemental Response in support of its petition for designation as an eligible telecommunications carrier ("Petition") for purposes of receiving funding from the FCC's Connect America Fund Phase II Auction (Auction 903) (the "CAF II Auction") in the locations in Pennsylvania for which it was awarded funding.

In response to Pennsylvania Public Utility Commission ("Commission") staff's request, Viasat is submitting the attached spreadsheets listing the rate centers in which its awarded census blocks are located.¹ The Federal Communications Commission has awarded support to companies that submitted bids based on the costs of providing service in various census block groups. In doing so, the FCC concluded that defining bidding units based on census-determined areas is preferable to an approach that is grounded in the network topology of a particular type of service provider.² Accordingly, this information is submitted solely to assist the Commission in its review of Viasat's

¹ The attached rate center data is derived from 2014 rate center data prepared by GeoTel Communications, LLC. Viasat will provide updated information in a future supplement after further discussion with staff.

² Connect America Fund et al., WC Docket No. 10-90 et al., Report and Order and Further Notice of Proposed Rulemaking, 31 FCC Rcd 5949, para. 89 (2016) (noting that "Wire centers are based on the geographic footprint of incumbent local exchange carriers and may not be compatible with the construction or expansion plans of providers that offer alternative technologies.").
