Responses Pursuant to Motion to Compel
of Interrogatories & Compliments

- 4) Mr. Bathgate has not yet made measurements and calculations, but will do so at the end of March 2020.
- 5) This will be elucidated in Mr. Bathgate's report to be generated at the end of March 2020. By way of further answer, Compliments have already submitted scientific studies in large numbers to the "comf" the PC secretary and the Reporters. Please see memo per the Parker reply.
- 6) This will be elucidated in Mr. Bathgate's report generated at the end of March 2020.

RECEIVED
2020 MAR 12 AM 10:16
PA PUBLIC AFFAIRS
SECRETARY'S BUREAU

7) The calculations taken by Donnell were lost so they cannot be submitted here. However, Mr. Balzote expect results to be generated the end of March 2020 will be able to reiterate the toxic levels.

8) Readings show radon levels nearly double a all 3 tower were made in April 2019 and duplicated in the summer of 2019. Readings were taken at the property of the Suckers shortly after adjacent to Mr. Curry's property and also at all the rooms in Mr. Curry's house. These were done by a radonmeter and a scintillation counter. However all calculations were lost subsequently so it is incumbent on Mr. Balzote to remeasure the radonmeter energy from the Suckers' property and determine Mr. Curry's property and inside his home.

- 9) As ~~asked~~ answered!!
 Duty declared is the same 'that
 rules on the lines of 'is' treatment
 given to case health problems
- 10) No documents were provided
- 11) No known announcements well as
 of any reports or facts witnessed
- 12) Mr. Bathgate testified in spring
 2011 before US PA Committee.
 In said testimony, Mr. Bathgate
 testified about the dangers of smart
 meters including radiation and other
 electrical dangers.
- 13) Included herein.
- 14) The document is included herein.
 Two other documents are in
 Resplendent's possession with all
 parties. To test no be supplemented

9) Ashel and ³ answered already
Only electrolysis is the most that
rules on the wires and is scientifically
known to cause health problems.

10) Mr. Batzale will, reason for
secondary antenna effect where
the radiation infiltrates a different
residence through the wires.

11) No documents were provided.

12) No known communications ensued
between Mr. Batzale and any
witness we have identified.

13) a) Dr. Kracht testified via
telephone on behalf of a patent in
his practice before the PUC in 2019

b) Since knowledge of same violates
HNPA laws, this information is not
available.

14) This is provided herein.

and was not readily available

17) Complainants are not responsible for Respondent Attorney's illiteracy including but not limited to MISSPELLING, PUNCTUATION ERRORS, SYNTAX/GRAMMAR ILLITERACY. Mr. Cummings is NOT Dr. Kracht's patient. You cannot write a brief that is ~~illiterate~~ illiterate!!

18) Since ^{approximately} March 27th, 2019 Ms. Maguire has apprised Dr. Kracht of her increasing sickness from the adjacent smart meter. In one such meeting Dr. Kracht recounted that other patients were being subdued by the smart meters as well.

Dr. Kroacht testified before the PUC in 2019. A decision is unknown in light of the fact that such information violates NHPA laws, per the patient in said phone testimony. The PUC would never adopt the findings that smart meters are unsafe despite the hundreds of settled scores because the PUC is corruptly in bed with the utility companies and has a ~~good~~ ^{poor} imperative.

Vomiting blood, extreme chest pain, difficulty breathing, stabbing pain in joints and muscles, shingles pain in wrists, weight loss, ^{from radiation}, swelling of throat, head pressure, overall misery.

16 Ms. Mousis' electrocution severity has worsened so extremely that now she cannot even go into a store, bank or edifice without becoming extremely ill if they have WiFi.

18) continued

of any wireless security or wireless in existence. Before becoming sick from the small water, Ms. Mauscos gets somewhat ill from exposure to RFs/EMFs. However, since becoming profoundly ill and homeless as a result of the small water [see next page], her entire quality of life has been devastated. She cannot walk into any building with any type of wireless without becoming extremely ill with lasting effects. Ear ringing is especially worse. Ms. Mauscos' immune system is much more compromised and previous allergies are far worse.

19) Complainants are NOT RESPONSIBLE FOR RESPONDENTS' VIRTUAL ILLITERACY, MISSPELLINGS THAT ARE UBIQUITOUS, PUNCTUATION AND GRAMMAR IDIOTY.

18 combined 6

COMPLAINANTS ARE NOT RESPONSIBLE FOR RESPONDENTS ILLITERACY. RESPONDENTS CANNOT SPELL DR. KRACHT, NOR PUNCTUATE OR FOLLOW SYNTAX AND GRAMMAR.

On one occasion in 2019, Dr. Kracht noted the thyroid swelling of Liya Mousios. After Ms. Mousios had been away from the smart meter due to state-mandated homelessness, Dr. Kracht noted that the thyroid swelling had gone down.

In 2020 Ms. Mousios informed Dr. Kracht that she was now hyper-intolerant of WiFi.

b) See three letters, supplied to all parties from Dr. Kracht, 24 Answered on page 4,

(7)

- 25) Ms. Ott's CV was not made available to complainants.
Ms. Ott is a PhD in Physical Therapy.
- 26) No documents were provided to Ms. Ott.
- 27) No known communication between Ms. Ott and any fact or expert witness.
- 28) In April 2019 and summer of 2019 Ms. Ott took measurements of the intense radiation at the neighbor's property and inside Mr. Cummy's house. She used an acoustometer and a dustation. The measurements showed heavy dose of radiation from all tower, Ms. Ott measured all the rooms in Mr. Cummy's house. This was formerly Ms. Mouras' home but Ms. Mouras was forced

to be homeless by state-forced toxic smart meters.

Ms. Oty's health has been decimated by smart meter exposure. Her doctor has advised her not to testify when health is seriously compromised from radiation and effects from the smart meter. Therefore she is unavailable to testify for complainants.

It should be noted that the toxic results from the adjacent smart meter were accidentally lost. It should also be noted that Respondents are legally targeted and harassed in these intelligent complaints will be consistent with ADA exposed for said harassment and targeting.

Liza Mousios
P O. Box 116
Revere, PA 18953-

To Whom It May Concern:

Since 1996, Ms. Mousios has resided the majority of the time at her home residence without incident. However, on or about March 27, 2019, she has been living in her car or tent since, beginning of the day after the a smart meter was installed at her adjacent next door neighbor's house. She continues to be itinerant, living in various locations including her car, a tent and intermittently at friends houses who do not have a smart meter or smart meter close to their house.

Prior to the instillation of the adjacent neighbors smart meter, she had been treated at our office for chronic kidney infections, multiple chemical intolerance syndrome and neuralgia pain from a motor vehicle accident.

However, she developed sudden and new symptoms upon the smart meter installation at the end of March, 2019. She was first evaluated at our office on 4/2/2019 with exposure related symptoms included stabbing chest pains, shortness of breath with tightness in the chest, headache, head and ear pressure with high-pitched ringing, joint and muscle pain. In addition she had new onset of vomiting blood and accompanying weight loss. At that office visit of 4/2/2019, she had physical examination findings revealing new thyroid fullness and swelling. Of note, and unrelated to her medical conditions, she also reports that her pet dogs began vomiting and losing weight.

Despite having to experience significant cold temperatures and wind conditions, her symptoms improved from living in her car or tent away from the smart meter. She also reported that when she was able to periodically stay with friends that did not have a smart meter nor any neighbor adjacent smart meter, her symptoms resolved. Anytime she would return to her residence, with the adjacent neighbor smart meter, her above-stated symptoms would return.

On 5/31/2019, at a follow up office visit, after the patient left her residence to avoid smart meter exposure, she had a repeat thyroid exam that was entirely normal.

In my medical opinion, to a reasonable degree of medical certainty, Ms. Mousios has electromagnetic hypersensitivity. Her smart meter exposure symptoms consistently recur upon exposure and dramatically improve with avoidance measures. The current smart meter at her adjacent neighbors home prevents her from residing in her residence in which she has a piano, and a companion, heat, shower and a bed. She is a professional musician and her piano is required in order for her to perform her music profession. Consequently, I medically recommend that her neighbors smart meter be removed or relocated at a significant distance from Ms. Mousios' residence.

Sincerely,

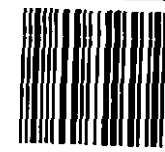

Provider:
