The Public Utility Commission has begun a task of bringing together, physically, all application records filed by your company. One standard number will be assigned and all subsequent application filings will be identified with the standard number plus sequential folder numbers.

The many benefits are convenience, easy identification, retrievability, cost effectiveness, computer compatibility and, ultimately, conciseness when microfilmed.

Records pertaining to your company will be refiled contiguously for ease of retrieval. There will be no necessity to renumber historical documents or tariffs containing the old Application number. New Certificates of Public Convenience will not be issued. Simply, the Commission will develop a cross reference index for internal use to locate the files. Since fixed utility vehicles do not carry the PA PUC application number, there will be no need to repaint vehicles. For utilities which have proceedings currently under consideration by the Commission, the process will not start until the proceeding is closed.

Upon reviewing the files for Carnegie Natural Gas Co., we note the following numbers are the complete history of rights, certificated areas and other applications filed by your company with the Public Utility Commission:

See attached page.

We request you verify these numbers with your records, reporting errors or omission within 20 days from the date of this letter. Please address your correspondence to the Secretary, Attention: Mr. Herbert H. Holderman.

Very truly yours,

WILLIAM P. THIERFELDER
SECRETARY
