Re: Pittsburgh Water and Sewer Authority Quarterly Compliance Plan Progress Report Consolidated Docket Numbers: M-2018-2640802 (water), M-2018-2640803 (wastewater), P-2018-3005039 (wastewater)

To the Commissioners of the Pennsylvania Public Utilities Commission:

Effective April 1, 2018, pursuant to 66 Pa.C.S. §§ 3201-3209, Act 65 of 2017, the Pennsylvania Public Utility Commission (PUC) was granted jurisdiction over the provision of water, wastewater, and stormwater utility services by entities created by Pennsylvania cities of the second class under the Municipal Authorities Act. Consistent with the new law, the Commission approved the initial water and wastewater tariffs of Pittsburgh Water and Sewer Authority (PWSA or the Authority) effective March 1, 2019 as part of PWSA's first base rate filing at Docket Numbers R-2018-3002645 and R-2018-3002647. Also pursuant to the new law, PWSA filed a Compliance Plan on September 28, 2018 and, to comply with the commitments made as part of the approved settlement of its initial rate case, a Compliance Plan Supplement on February 1, 2019. A Joint Petition for Partial Settlement of PWSA's Compliance Plan is currently pending but, as part of that settlement, PWSA agreed to complete and report on critical activities to the PUC and interested parties on a quarterly basis.[1] The enclosed Compliance Plan Progress Report is being filed consistent with this commitment.

As part of its reporting requirements, PWSA has prepared an update on each of the areas where it is required to provide information and compiled them in a standard format. These areas include Operations, Billing and Customer Service, Lead, Infrastructure/Engineering, Finance and Accounting, and Contractual/Other Issues. Each section addresses the requirements associated with: (1) the Joint Petition for Partial Settlement pending at the above captioned dockets (also referred to as the "Master List of Stipulations"); (2) the Commission approved Settlement of PWSA's initial rate case; (3) the Compliance Plan; and (4) the Compliance Plan Supplement. PWSA intends to use this format to streamline the process of tracking progress toward meeting agreed-to activities thus information PWSA previously provided to the parties pursuant to the rate case settlement have been included in this report.[2]

Sincerely, Will Pickering

William Pickering, Executive Director

---

1 See Joint Petition for Partial Settlement dated September 13, 2019 at Section III.ZZ.

2 The information includes that required by: (1) Paragraph III.A.2 of the Rate Case Joint Petition for Settlement at R-2018-3002645 and R-2018-3002647; 2) the Highland Membrane Filtration Plant quarterly report pursuant to Paragraph III.H.4.i of the Rate Case Joint Petition; and 3) an update on the status of negotiations with the City of Pittsburgh related to the Cooperation Agreement as required by Paragraph III.G.1.a of the Rate Case Joint Petition.

1. Operations

Operations activities are those that involve operations and maintenance (O&M) in the water, wastewater and stormwater systems. This includes O&M activities at the Aspinwall Water Treatment Facility, as well as O&M activities in the water transmission, storage and distribution systems and the wastewater/stormwater collection and conveyance systems.

a. Compliance Plan Supplement Requirements

The Compliance Plan Supplement addresses topics including hydrant replacement, leak detection, valve maintenance, metered service, meter testing/replacement, operational effectiveness, and an expanded use of mobile work, as shown in Table 1. This section lays out each of the requirements that PWSA has committed to meeting, as well as a progress update and/or plan for achieving the PUC's standards. Below the table is a narrative describing each task yet to be completed. Completed tasks are also shown in Appendix A.

Table 1: Compliance Plan Supplement Requirements - Operations

Task	Timeline (if specified in the Compliance Plan Supplement)	Progress to Date
Replace one hundred hydrants per year.	Annual	On Target. 14 hydrants were replaced in Q1 2020, 10 replaced in Q2 2020, 11 replaced in Q3. Contractors replaced 49 hydrants as part of the Small Diameter Water Main Replacement Program.
Record water used for flushing after main breaks by having crews record the time flushed and flow gauges to record water used.	October 2019	On-going. Recording water lost during the leak has been developed and is in Spry Mobile. Water usage is also being recording for flushing hydrants during normal operations.
Provide water meters for each DPW division and have them installed on hydrants.	October 2019	PWSA assigned 12 meters to DPW to track water usage in September 2020
Restructure to support delivery of formal valve operation, flushing, and leak detection programs.	April 2019	PWSA has budgeted additional personnel to support these programs.
Develop a plan to track age of customer meters and to test and/or replace meters over 20 years old.		On Target
Track the 20 Operating Metrics identified in I&E St. No. 4, p. 5.		See Appendix C.

i) Replace one hundred hydrants per year.

PWSA agreed to replace one hundred hydrants per year in 2019 and 2020. The replacement program is focused on removing older models from service on larger diameter mains. PWSA has replaced 14 hydrants in the first quarter of 2020 and 10 hydrants in Q2 and 11 in Q3 2020. PWSA Contractors replaced 49 hydrants in Q3 as part of the Small Diameter Water Main Replacement Program. The work associated with this task is being completed using both contractors and in-house staff. Hydrant replacements are coordinated with the small diameter main replacement program so that new hydrants are installed on new mains that replace older 4- and 6-inch mains that provide inadequate flow and/or pressure. Hydrant inspections continue to exceed previous year totals.

ii) Develop a leak detection program and restructure staff to add more personnel for leak detection

PWSA has hired a manager with considerable utility expertise to oversee its leak detection program. The new manager has initiated weekly meetings with the other operations managers to start formalizing a program, and has initiated cross-training of crews, with the idea being that all crews have some leak detection capability, but that the two designated leak detection crews can focus their efforts

on programmatic surveying and more difficult detections. The Authority has also upgraded its leak detection equipment with new correlators and ground microphones to facilitate faster and more accurate leak detection. Please see Appendix C for additional information.

iii) Record water used for flushing after main breaks

PWSA committed to recording water used for flushing by having crews record the time flushed and using flow gauges to record the water used. PWSA is in the process of shifting a manager to oversee its flushing program, and has developed a system-wide flushing plan, which has already been approved by the Pennsylvania DEP. PWSA has implemented the flushing program and was tracking the information in an excel spreadsheet. With the implementation of Spry mobile this information will be captured utilizing that program.

iv) Provide water meters for each Department of Public Works (DPW) division and have them installed on hydrants

The goal of this initiative is to record water use for street sweeping and street paving activities, and to help PWSA reduce its unaccounted-for water. PWSA has contacted the City of Pittsburgh's DPW to determine appropriate sites for meters for filling street sweeping vehicles. PWSA has assigned 12 meters to DPW to track water usage. PWSA will supply each street sweeper and flusher truck in the DPW with a water meter to track the water consumption.

v) Restructure to support delivery of formal valve operation, flushing, and leak detection programs

PWSA has assigned one of its operations managers to formalize its valve operation, flushing, and leak detection programs, and has hired three additional senior managers to ensure that the programs are appropriately resourced, and has budgeted additional personnel to support these programs. The Operations Department has also started a restructuring effort, which includes assigning designated crews to focus on programmatic valve operation, flushing, and leak detection activities (while supporting other crews during emergencies). PWSA has automated the capture of data for these programs through its mobile platform. Field crews are operating valves and inspecting/flushing hydrants which are being captured and tracked in Spry Mobile.

vi) Develop a plan to track age of customer meters and to test and/or replace meters over 20 years old

According to best available information, PWSA has as many as 50,000 meters that have exceeded the Commission's recommended testing schedule and will need to be tested and/or replaced. Unfortunately, much of the meter data including installation date was lost in a billing system transition, so this number cannot be validated. In its Compliance Plan, PWSA committed to increasing its plumbing staff and changing out 5,000-6,000 meters per year. Moving forward, PWSA will comply with Chapter 65.8 and begin testing meters at a regular interval, so that no small meter is in service longer than 20 years without testing. The Meter Upgrade Program is a concerted effort of the Customer Service and Operations departments. From January through the end of September, PWSA changed 4,514 meters. Customer Service is now tracking the installation date and will be able to query the install date in the future to make sure small meters are replaced prior to being in service for 20 years.

PWSA is prioritizing the testing/replacement of large meters and will make its best efforts to complete the testing/replacement of all large meters/measuring chambers and registers within three years. The Authority has identified 806 large-diameter meters that have been in service for longer than eight years, or where the installation date is unknown, and will comply with Chapter 65.8 to ensure that no large meter is in service for longer than eight years without testing. PWSA entered into a contract in May 2019 to test water meters 3" or greater in-line or at the vendor's testing facility. PWSA has replaced 124 large meters and 4,390 small meters in the third quarter of 2020. With the addition of this vendor, PWSA is able to accommodate all customer-generated meter testing requests.

vii) Track the 20 Operating Metrics identified in I&E St. No. 4, p. 5

PWSA is starting to track the 20 Operating Metrics identified in I&E St. No 4, p. 5. Preliminary results of these operating metrics will be shown in Appendix C as data is available.

b. Compliance Plan Requirements

For PWSA's operational areas, the Compliance Plan addresses topics including metering unmetered accounts, residential and commercial meter change-outs and testing, flushing, and developing standard operating procedures for communications and emergency response (Table 2). Compliance tasks associated with PUC Section 65.8 (Meters – Change-outs) and 65.17 (Standards of Design – Flushing Program) have already been addressed in the Compliance Plan Supplement Requirements. As such, this section lays out each of the remaining operational requirements for PWSA, as well as a progress update and/or plan for achieving the PUC's standards.

Table 2: Compliance Plan Requirements - Operations

Task	Timeline (if specified in the Compliance Plan)	Progress to Date
65.7 Hire a contractor to assist with inspecting, sizing, and installing meters for municipal and unmetered properties.	2024	On Target
65.8 Add additional plumbers to address 50,000 meters that are overdue for testing/change-out.	Immediately	On Target
65.8 Develop a program to test 10-25% of commercial meters annually.	2022	On Target
65.11 Develop SOPs, including communications protocols, for periods of mandatory conservation.	2020	On Target
69.16 Update Emergency Response Plan SOPs.	Within 6 months of Compliance Plan Filing	On-going

i) 65.7 - Inspecting, sizing, and installing meters for municipal and unmetered properties

PWSA has committed to partnering with a contractor to inspect, size, and install meters for municipal and other unmetered accounts (PWSA estimates 200-400 of these accounts in its service area) within the next five years. PWSA developed and released an RFP for these services and has begun inspecting facilities for meter installations. PWSA's Board of Directors approved a consulting contract with the selected vendor (Buchart Horn) on April 26, 2019. A final report was received on October 19, 2020. Please see Section 4, 65.17

ii) 65.8 - Develop criteria for when to test meters that have been pulled from service, prior to disposal

PWSA has installed a test bench and plans to test approximately 10% of the meters that have been pulled from service. Small meters (less than 1.5 inches in diameter) will not go back into service in the system. Operations staff have reached out to the Commission and developed a testing approach in the draft Compliance Plan settlement. PWSA believes that the last sentence of Title 55 § 65.8. Meters (d) (2), which says "Meters permanently removed from service and replaced by new meters utilizing remote reading devices are exempt from this provision." permits PWSA to only test a fraction of the meters pulled from service when they no longer going to be used in the system, in accordance with the American Water Works Association testing protocol. Specifically, PWSA will test 5-10% of the small meters pulled from service and not reused for quality control and to establish accuracy levels. PWSA uses an AMI network for getting data from meters which qualifies as a "remote reading device."

iii) 65.11 - Develop SOPs, including communications protocols, for periods of mandatory conservation

PWSA has an abundant water supply and therefore has never experienced, and is not likely to experience, a period where there would be inadequate source water to meet demands. However, source contamination or a significant failure in the treatment or delivery system may necessitate periods of mandatory conservation. These are extremely rare events, and PWSA has not yet developed Standard Operating Procedures, including communications protocols, for periods of mandatory conservation. The Authority hired a Health and Safety professional in 2020, who will be tasked with developing and communicating a preliminary SOP by, which will be incorporated into the Authority's Emergency Response Plan. The SOP will include provisions that, in the event that such conservation measures are required, PWSA will notify customers via traditional lines of communication (telephone calls, social and traditional media, and the website).

iv) 69.16 - Update Emergency Response Plan SOPs

PWSA has completed an update to its Emergency Response Plan and is continuing to formally document its SOPs. Many departments share in the development of SOPs. As previously mentioned, the Authority has hired a Health and Safety professional in 2020, who will assist in developing and communicating this SOP. PWSA has revised its internal accident investigation operating procedure to ensure that telephone reports are made to Commission staff immediately after becoming aware of the death of a person; an occurrence of an unusual nature (whether or not death or injury of a person results), which apparently will result in a prolonged and serious interruption

of normal service; and an occurrence of an unusual nature that is a physical or cyber security attack, which causes an interruption of service or more than $50,000 in damages, or both. PWSA will also update its internal written Incident Investigation Policies to incorporate telephone reports.

2. Billing/Customer Service

Many of the PUC's requirements relating to Billing and Customer Service fall under Chapter 56 of Title 52, which was created to establish and enforce "uniform, fair, and equitable residential public utility service standards." PWSA has already taken considerable steps to ensure Billing and Customer Service compliance, and many of the initiatives agreed to in the Master List of Stipulation Requirements, Tariff Settlement, Compliance Plan or the Compliance Plan Supplement have already been completed.

a. Master List of Stipulation Requirements

The Master List of Stipulation Requirements was developed in July 2019 in response to feedback from the Parties and to codify additional reporting requirements for PWSA. Table 3 highlights these additional reporting requirements.

Table 3: Billing/Customer Service Requirements from the Master List of Stipulations

Task	Timeline (if specified in the Master List of Stipulations)	Progress to Date
Commitments from motion to move issues from Stage 1 to Stage 2		On-Target (Moved to Stage 2)
BCS input on PWSA CAP Program	Next base rate case	Rate case settlement filed on September 30, 2020.
Commission development of a "Model Water CAP Design"		Enhanced customer assistance program included in rate case settlement filed on September 30, 2020.
Customer outreach		PWSA participates in upwards of 100 community meetings annually. Also, a canvassing program was included in the rate case filing as potential enhancement to PWSA's assistance programs. Refer to the presentation to the Low Income Assistance Advisory Committee (LIAAC) on August 7, 2020 for current initiatives during the pandemic.
56.94 and 56.336 – Interim personal contact procedures immediately prior to termination	Quarterly Progress Reports	On-Target (Moved to Stage 2)

i) Commitments from Motion to Move Issues from Stage 1 to Stage 2

Per the Commission's directive, the following issues were moved to Stage 2 of the Compliance Plan process:

- The language, format, and method of providing suspension and termination notice pursuant to Chapter 14 of the Public Utility Code and Chapter 56 of the Commission's regulations.
- PWSA's compliance with the Discontinuance of Services to Leased Premises Act (DSLPA)
- PWSA's plan for collections; to include strategies to reduce overall delinquencies and to ensure collections practices for residential customers are consistent with legal requirements.

- Personal contact: Per further discussion with the parties, PWSA will: (1) evaluate adding additional information in the quarterly report in line with the examples set forth in Section III.MM.2.a.iii.b of the Stage 1 Compliance Plan Settlement Agreement; (2) assess whether hiring a third party contractor to knock on the door might be a viable option; and, (c) will attempt to specifically reach out to other Pittsburgh utilities to see if they can provide information about how they address safety concerns related to knocking on the door for termination process.

ii) Commission Development of a "Model Water CAP Design"

PWSA included enhancements to its current customer assistance programs in the rate case settlement filed on September 30, 2020.

iii) Customer Outreach

PWSA participates in upwards of 100 community meetings annually. Also, a canvassing program was included in the rate case filing as a potential enhancement to PWSA's assistance programs. Additionally, PWSA's response to the COVID-19 pandemic has included participation in virtual town hall meetings hosted by various state representatives/senators, inserting its customer assistance program flyers in food distribution packages, and adding the customer assistance program descriptions and Dollar Energy Fund telephone number to the redesigned PWSA monthly bill as of June 2020.

iv) Interim personal contact procedures immediately prior to termination

Table 4: Compliance Plan Requirements- Interim Personal Contact Process Results

Telephone Call Completion Rate	0 Total Calls Attempted	N/A
	Live Answer by Customer	0
	Message Left by PWSA	0
	Voicemail Box Full/No Answer/No Answering Machine	0
	Disconnected Number	0
Resulting Cancelations of Termination	0 Total Cancelations	N/A
	Paid in Full	0
	Payment Arrangement	0
	Medical Filed	0
	PFA Filed	0
	Hardship Cash Assistance Grant Pending	0
	Winter Moratorium Eligibility Pending	0

b. Compliance Plan Supplement Requirements

The Compliance Plan Supplement addresses topics including informal complaints, bill changes, use of collection services, customer service metrics, and creating/working with the LIAAC as shown in Table 5. This section lays out each of the requirements that PWSA has committed to meeting, as well as a progress update and/or plan for achieving the PUC's standards. Below the table is a narrative discussion of each task that has yet to be completed. Tasks associated with the Compliance Plan Supplement that were completed in prior reporting periods are shown in Appendix A.

Table 5: Compliance Plan Supplement Requirements – Billing/Customer Service

Task	Timeline (if specified in the Compliance Plan Supplement)	Progress to Date
Conduct a regular review of informal complaint information to determine complaint trends and whether there is a need to implement additional or new internal training policies.		PWSA is regularly reviewing informal complaints to determine trends and is responding with process adjustments and/or further training. Based on BCS feedback, PWSA kicked-off a Call Quality Initiative in October 2020, including increased live monitoring, coaching of staff, and a plan to implement after call surveys by December 2020.
Work with the parties to determine an appropriate informal complaint tracking information review process.		On-Target (Moved to Stage 2)
Make the changes identified in Paragraphs III.1.1 through III.10 of the Settlement consistent with the timeframes established by the final order in this proceeding and provide a copy of the changes to the LIAAC.		The following are complete with (c), (e), and (f) on-going: • Improved outreach and messaging for programs (a) • Launched a social media campaign (b) • Assessed applicable data (d) • Reviewed changes to PWSA customer service policies and procedures (g) • Funding BDP with separate budgets for water and wastewater (h)
Collect and report on requested billing data (Appendix D).	Quarterly	Q3 data in Appendix D of this report
Fund BDP program using revenues collected from approved rates in the tariff filing.		On-going
Submit a detailed Plan that outlines the program parameters for each of its low-income assistance programs.	Next Base Rate Proceeding	Rate case settlement filed on September 30, 2020
Track the following metrics: Abandon %, ACD handling time, average speed of answer, CSR attendance, Customer satisfaction, service level % (Appendix D).	Monthly	Q3 data in Appendix E of this report

i) Conduct a regular review of informal complaint information to determine complaint trends and whether there is a need to implement additional or new internal training policies

PWSA began conducting regular reviews of informal complaint trends in 2018 and has worked to update its customer service training policies and materials since that time. Identified trends relate to catch-up consumption, high consumption, and meter testing. When a process is found to be faulty, PWSA makes the necessary adjustments. When additional training is extended to an employee, yet the employee fails to show improvement, disciplinary action is taken.

ii) Work with the parties to determine an appropriate informal complaint tracking information review process

On target to be addressed during Stage 2 of the Compliance Plan.

iii) Make the changes identified in Paragraphs III.1.1 through III.10 of the Settlement consistent with the timeframes established by the final order in this proceeding and to provide a copy of the changes to the LIAAC

PWSA is in the process of finishing the changes identified in Paragraphs III.1.1 through III.10 of the Settlement, consistent with the timeframes established by the final order in this proceeding. The changes that have been made were reviewed with the LIAAC on August 7, 2020.

iv) Collect and report on the requested billing data

PWSA has started to track data associated with the billing metrics identified in the Compliance Plan Supplement. Appendix D contains these billing metrics.

v) Fund Bill Discount Program (BDP) program using revenues collected from approved rates in the tariff filing

PWSA is funding the BDP program using revenues collected from the approved rates in the tariff filing, and, as such, is in compliance.

vi) Submit a detailed Plan that outlines the program parameters for each of its low-income assistance programs

PWSA included a detailed plan outlining its proposed assistance program enhancements and impacts in its rate case settlement filing on September 30, 2020.

vii) Track the following metrics: Abandon %, ACD handling time, average speed of answer, CSR attendance, Customer satisfaction, service level %

These metrics have been tracked on a monthly basis since January 2019. Appendix E shows data by month for July through September 2020.

c. Compliance Plan Requirements

For PWSA's customer service and billing areas, the Compliance Plan addresses topics including the bill redesign, plain language requirements, and translation assistance for shut-offs (Table 6). This section lays out each of the remaining billing and customer service requirements for PWSA, as well as a progress update and/or plan for achieving the PUC's standards. Tasks that were completed and reported in previous updates have been moved to Appendix A.

Table 6: Compliance Plan Requirements – Billing and Customer Service

Task	Timeline (if specified in the Compliance Plan)	Progress to Date
56.11-56.25 and 56.261-56.275 - Complete bill redesign project.		Completed as of June 3, 2020
56.81-56.118 and 56.321-56.358 - Meet plain language requirements for shut-off notices. (Now moved to Stage 2 of the Compliance Plan.)		On Target (Moved to Stage 2)

i) 56.11-56.25 and 56.261-56.275 - Complete bill redesign project

This task was completed as of June 3, 2020. The redesigned monthly PWSA bill was issued to all customers throughout the month of June 2020, including an infographic bill insert explaining the enhancements. On October 14, 2020, BCS emailed additional requirements that PWSA is now working with the new bill print/mail/EBPP vendor to implement as of January 5, 2021.

ii) 56.81-56.118 and 56.321-56.358 - Meet plain language requirements for shut-off notices

PWSA has made revisions to its shut-off notices towards compliance with the plain language requirements. Note that these requirements will now be handled in Stage 2 of the Compliance Plan process.

3. Lead

One of the major focus areas of the Tariff and Compliance Plan Supplement was PWSA's lead remediation program. The following sections lay out the requirements related to lead, as well as the actions that PWSA has already taken or are underway to address this issue.

a. Tariff and Compliance Plan Supplement Requirements

The Compliance Plan Supplement addresses topics including the Community Lead Response Advisory Committee (CLRAC), customer outreach and communication, feasibility analysis, and service line replacement practices as shown in Table 7. This section lays out each of the requirements that PWSA has committed to reporting on a quarterly basis. Below the table is a narrative discussion of each area.

Table 7: Compliance Plan Supplement Requirements – Lead

Task	Timeline (if specified in the Compliance Plan Supplement)	Progress to Date
Provide Data on lead service line replacements completed and location of replacements.	Quarterly	Please see the report submitted to PA DEP with these details included in Appendix H.
Provide quarterly updates regarding the progress of the orthophosphate program.	Quarterly	Please see the report submitted to PA DEP with these details included in Appendix H.
When PWSA started testing for lead levels.	N/A	1998
Results of the Lead Level Testing	N/A	See Table Below.
PWSA will provide information regarding actual replacement costs including quarterly and cumulative year-to-date data.	Quarterly	Costs through September 2020 are included in the 2019 LSLR and the ILSLR programs. These costs amount to $22,034,110 year to date and $6,156,699 for the 3rd quarter of 2020. These do not include costs for LSLR as part of the Small Diameter Water Main Replacement program.

i) Provide Data on lead service line replacements completed and location of replacements.

PWSA prepares and submits reports to the PA DEP on a quarterly basis that provides data on lead service line replacements, including the number of replacements completed and the locations of these replacements. The latest quarterly report, dated August 15, 2020, is included in Appendix H.

ii) Provide quarterly updates regarding the progress of the orthophosphate program.

PWSA prepares and submits reports to the PA DEP on a quarterly basis that provides an update on the status of PWSA's orthophosphate program including the results of the lead testing program. The latest quarterly report, dated August 15, 2020, is included in Appendix H.

iii) When PWSA started testing for lead levels.

The lead testing first occurred in 1998.

Results of the Lead Level testing are as follows:

Sample Round	90th Percentile Sample Result (ppb)
1998	9
1999	2
2000	8
2001	6
2004	9.5
2007	9
2010	10.3
2013	14.8
2016a	22
2016b	18
2017a	15
2017b	21
2018a	10
2018b	20
2019a	17.5
2019b	10
2020a	5.1

iv) PWSA will provide information regarding actual replacement costs including quarterly and cumulative year-to-date data

Actual replacement costs for the 3rd quarter of 2020 are $6,156,699 and for 2020 year-to-date through the end of the 3rd quarter are $22,034,110. These costs do not include service lines replaced as part of the Small Diameter Water Main Replacement Contracts.
Compliance Plan Requirements

The Compliance Plan requirements associated with PWSA's lead remediation program were addressed through the Tariff and Compliance Plan Settlement document.

4. Infrastructure

Infrastructure activities are those that involve capital planning, investment, and installation/renewal in the water, wastewater and stormwater systems. This includes distribution system master planning, meter installations, capital project cost/projection effectiveness, record keeping, pressure assurance, and design/construction standards updates.

a. Master List of Stipulation Requirements

The Master List of Stipulation Requirements was developed in July 2019 to respond to feedback from the Parties, and to codify additional reporting requirements for PWSA. Table 8 highlights these additional reporting requirements.

Table 8: Infrastructure Requirements from the Master List of Stipulations

Task	Timeline (if specified in the Master List of Stipulations)	Progress to Date
Construction Project Tracking and Evaluation	November 12, 2019	PWSA has developed and is in the process of validating a list of proposed metrics
Selection Processes and Existing Contractors	Annually	On Target
Projected Expenditures	Quarterly	On Target
LTIIP – Materials, Valves, Prioritization	Quarterly	PWSA is in the process of updating its GIS to facilitate reporting on this data
LTIIP – Customer Owned Lead Service Lines		Completed. PWSA will establish an estimate of the number of customer-owned lead service lines by December 31, 2020
LTIIP – Distribution System Improvement Charge (DSIC)	Next base rate case	On Target

i) Construction Project Tracking and Evaluation

PWSA has a sophisticated performance management system and monitors more than 50 metrics through its Headwaters tracking database, as well as additional capital information through its eBuilder system. PWSA is in the process of expanding the number of metrics tracked in these systems, based on the last rate case settlement, Compliance Plan, and Compliance Plan Settlement. As data for these metrics is available, PWSA will begin to provide periodic updates of construction-related performance metrics related to capital project cost effectiveness. PWSA has provided I&E with a list of proposed metrics and will track any mutually agreed upon metrics with updates in the Compliance Plan Progress Reports.

ii) Selection Processes and Existing Contractors

PWSA will continue to follow the requirements of the Municipal Authorities Act (MAA) regarding competitive bidding, which typically requires that all projects with values above $21,000 be competitively bid. PWSA has committed to providing a list of each construction contract in the prior year that was awarded without competitive bidding, as well as an analysis of how those contracts compare to the total number of construction contracts awarded. In the second quarter of 2020, PWSA developed an updated company-wide procurement policy. PWSA will continue to provide updated design engineer and company affiliation for each project in future Compliance Plan Progress Reports.

iii) Projected Expenditures

PWSA will update its testimony to provide the project operations for open and active projects, as of the date of the supplemental testimony, and will provide updated details about the funding sources that it plans to use in each project in future Compliance Plan Progress Reports.

iv) LTIIP – Materials Report, Valves, Prioritization

As the data becomes available and PWSA's GIS is updated, PWSA will provide a comprehensive materials report and updated information regarding types and sizes of valves in future Compliance Plan Progress Reports. PWSA will also provide additional information regarding the prioritization of valve and main replacements and will notify the parties when its Computerized Maintenance Management System (CMMS) project is implemented. Currently, the CMMS implementation is being developed as part of the ERP system.

v) LTIIP - Customer Owned Lead Service Lines

The PWSA filed an amended Long-Term Infrastructure Improvement Plan ("Amended LTIIP") with the PUC on April 27, 2020. Included within Appendix C of the Amended LTIIP is the PWSA's service plan to remove lead service lines existing in and connected to the water distribution system. This plan explains that the PWSA will continue to work with the University of Pittsburgh to develop a machine learning model to predict the material composition of customer-owned (i.e. private side) lead service lines. It is anticipated that the PWSA will establish an estimate of the number of customer-owned lead service lines by December 31, 2020. The total expected expenditures to replace customer-owned lead service lines will be provided at or around that same time.

vi) Distribution System Improvement Charge

The PWSA filed a base rate case in March 2020 proposing to increase its water and wastewater rates. As part of that filing the PWSA will propose to utilize the DSIC mechanism that is presently in its Water and Wastewater Tariffs to recover a portion of its DSIC eligible expenditures. Pursuant to Pa. C.S. §§ 1358(a) and 3202(b), PWSA requests a waiver or suspension of the DSIC limitations (or cap) and approval to establish the maximum allowable DSIC rate to an amount representing 5% of the amount billed to customers under the applicable rates for water and wastewater service (exclusive of an reconciliation amount) with Commission's approval. The PWSA is also requesting waivers of Act 11 to permit the PWSA to use annual, levelized charge as the basis for the DSIC. Specifically, the PWSA is proposing that any under- or -over collection will be reconciled and filed by January 31 of each year and will be billed or credited from April 1 of that year to March 31 of the next year, and will not be part of the 5% DSIC cap.

b. Compliance Plan Supplement Requirements

The Compliance Plan Supplement addresses topics including development of a distribution system master plan, a district metering program, the Highland Membrane Filtration Plant (HMFP)/Highland No. 1 Reservoir, and the cost effectiveness of PWSA's projections, as shown in Table 9. This section lays out each of the requirements that PWSA has committed to meeting, as well as a progress update and/or plan for achieving the PUC's standards. Below the table is a narrative discussion of each area.

Table 9: Compliance Plan Supplement Requirements – Infrastructure

Task	Timeline (if specified in the Compliance Plan Supplement)	Progress to Date
Develop and implement district metering program.	2020	A draft district metering plan was provided as part of the Water Distribution System Master Plan. The first phase will be to rehabilitate metering at the pump stations. Pump Station metering equipment has been delivered and work will commence in July/August 2020.
Provide a detailed cost breakdown of actual and projected operating and capital costs on a calendar year basis incurred and estimated to be incurred to operate the HMFP.	Starting within 30 days of the signature date of the Settlement and quarterly thereafter	On Target, see Appendix G.
A cost/benefit analysis comparing continuing to operate the HMFP instead of covering and placing a physical barrier around Highland No. 1 Reservoir.	With the next base rate filing	On Target
Develop a plan to track cost effectiveness and cost reporting relative to projections.	With future filings	PWSA has begun monitoring several metrics related to the effectiveness of its cost projections through its eBuilder project management software.
Update on Orthophosphate Program	Quarterly	On Target

i) Develop and implement district metering program.

PWSA currently has operational flow meters at the following locations:

- Raw Water Meter: Ross Pump Station Discharge
- Treated Water Meters: Individual filter gallery effluent flow meters
- System Delivery Flow Meters:
    - Aspinwall Pump Station
    - Bruecken Pump Station Highland Reservoir No. 2 (Rising Mains 3 and 4)
    - Fox Chapel Pump Station
- District Meters
    - Highland Reservoir No. 1 60-inch Transmission Line (Meter Number MFP-1)
    - Highland Reservoir No. 1 30-inch Transmission Line (Meter Number MFP-2)
    - Lincoln Pump Station

The following existing flow meters are to be rehabilitated and calibrated in 2019/2020. An evaluation was completed for all these meters in December 2019: New transmitters are required for the district meters and are in the process of being ordered. System Delivery Meters for Rising Mains 1 and 2 will be updated once the Membrane Filtration Plant is online.

- System Delivery Flow Meters
    - Bruecken Pump Station Highland Reservoir No. 1 (Rising Mains 1 and 2)
- District Meters
    - Herron Hill Pump Station
    - Herron Hill Tank Pump Station
    - Howard Pump Station
    - Mission Pump Station
    - Saline Pump Station

Additional district meters will be installed as part of the rehabilitation of the booster chlorination facilities in 2020/2021 at the discharge of the tanks and reservoirs. Additional district flow meters identified in the Water Distribution System Master Plan will be installed after the above-mentioned meters have been installed and operational for an amount of time sufficient to properly review flow versus customer demand in the area.

ii) Provide a detailed cost breakdown of actual and projected operating and capital costs on a calendar year basis incurred and estimated to be incurred to operate the HMFP

PWSA shared the following cost breakdown with all settlement parties on January 23, 2019:

> Actual and projected operating and capital costs to date incurred and estimated to be incurred as a result of the October 25, 2017 Department of Environmental Protection Administrative Order with regard to the HMFP; and

> Actual and projected operating and capital costs on a calendar year basis incurred and estimated to be incurred to operate the HMFP.

PWSA will continue to make these cost breakdowns available quarterly, as well as upon completion of repairs to the HMFP. Please see Appendix G for additional information.

iii) A cost/benefit analysis comparing continuing to operate the HMFP instead of covering and placing a physical barrier around Highland No. 1 Reservoir

PWSA provided a cost/benefit analysis of the relevant legal, technical, and policy considerations, as well as a cost comparison, of operating the HMFP instead of covering and placing a physical barrier around the Highland No. 1 Reservoir.

PWSA provided a cost/benefit analysis of the relevant legal, technical, and policy considerations, as well as a cost comparison, of operating the HMFP instead of covering and placing a physical barrier around the Highland No. 1 Reservoir. Note that operations and maintenance cost projections cannot be verified until the system is fully online. The PADEP State Inspection of the HMFP was successfully completed on 6/4/20. PADEP subsequently issued the HMFP Operating Permit to PWSA on 6/17/20. Since the Operating Permit was issued, PWSA has continued running the membrane filtration and ultraviolet treatment systems to waste while simultaneously ensuring all other relevant components of the distribution system are prepared to bring the HMFP back online. This includes refreshing the Highland No. 1 Reservoir by partial draining and refilling, as well as monitoring algae levels and treating the reservoir to prevent fouling of the HMFP treatment equipment. As of September 14, 2020, the HMFP came back online to feed water into the distribution system.

iv) Develop a plan to track cost effectiveness and cost reporting relative to projections

PWSA has begun to monitor several metrics related to cost effectiveness and cost reporting relative to its projected capital spending. It is using the eBuilder project management software to track project costs and progress, which allows advanced calculation of performance metrics. Currently, PWSA is tracking project total costs and cash flow relative to budget. PWSA working on defining additional metrics such as Estimated Cost at Completion (ECAC), schedule variance, change order volume and percentage of total project, etc., and has scheduled a preliminary internal review to receive, review, and address comments. A list of metrics being considered for tracking, as was requested by the PUC and other interested parties is contained in Appendix C.

v) Update on Orthophosphate Program

Construction of four new Orthophosphate Addition Facilities (one each at both the Aspinwall and Bruecken Pump Stations and two at Highland Park Reservoir No. 1) was completed in April 2019. Start-up of the facilities were taken in phases: Bruecken PS was April 1, Aspinwall PS was April 15 and Highland 1 Facilities began April 29, 2019. Full orthophosphate application is underway, and multiple rounds of water quality testing has shown water quality improvements at customers with lead service lines.

The project associated with the construction of the Orthophosphate Addition Facilities is the “Corrosion Control Chemical Storage and Feed Systems” Project, PWSA Project No. 2017-322-107-0. This project was extended in July 2019 to permit the design and construction of modified orthophosphate chemical storage containers at both the Aspinwall Pump Station and Bruecken Pump Station, converting from temporary soft walled poly totes to permanent double-wall storage tanks with exterior fill stations and associated structural improvements (interior and exterior). This modification is typical of the design implemented at the two Highland No. 1 Orthophosphate Storage Sites and was supposed to be completed by June 2020, but was delayed as a result of the COVID-19 pandemic. This modification was requested by PWSA Operations to reduce concerns associated with handling and transporting the chemical during refilling and replacing totes at these sites.

c. Compliance Plan Requirements

For PWSA’s infrastructure area, the Compliance Plan addresses topics including records management, meeting pressure requirements, metering municipal and flat rate customers, metering all sources of supply, ensuring appropriately sized mains and operable valves, and incorporating the PUC’s design requirements into a formalized design manual (Table 10). Compliance tasks associated with PUC Section 65.8 (Meters – Change-outs) and 65.17 (Standards of Design – Flushing Program) have already been addressed in the Compliance Plan Supplement Requirements. As such, this section lays out each of the remaining infrastructure requirements for PWSA, as well as a progress update and/or plan for achieving the PUC’s standards.

Table 10: Compliance Plan Requirements – Infrastructure

Task	Timeline (if specified in the Compliance Plan)	Progress to Date
65.4 Develop a series of SOPs for records filing, records updates in GIS, and records retrieval.	Within 6 months	On Target

65.4 Update GIS with main installation date and material.	by 2021	Likely 2022 due to delays in scanning and records management contract award.
65.4 Update GIS with hydrant and valve status.		On Target
65.4 Organize, store, and input current records backlog into GIS.		On Target
65.6 Install additional monitoring stations for areas of low pressure.	by 2020	On Target. Sensing lines and crocks were installed and are awaiting shipment of the pressure monitors. The shipment of the pressure monitors is delayed due to the COVID-19 pandemic.
65.6 Develop an SOP to address areas of high pressure.	by the end of 2019	Addressed by Master Plan, but SOP is to be developed.
65.7 Secure a contractor to assist with inspection, sizing, and installation of meters and associated equipment for municipal buildings and flat rate customers.	2024	On Target
65.17 Continue to work on replacing all 4" water mains.		On Target, to be addressed by Master Plan and Small Diameter Water Main Replacement Program.
65.17 Incorporate the PUC's design requirements, specifications, and standard details into a formalized design manual.	2019 and 2020	On-Target
65.18 Complete the development of a comprehensive flushing program.	Starts in 2018	On-Target
65.18 Review the existing system to ensure ample valves.	Starts in 2018	On-Target
65.18 Increase the number of valves inspected and operated per year.	2019	Tracking improved with Spry, increase this year is unlikely due to COVID-19 pandemic.

i) 65.4 - Records

Section 65.4 of Chapter 65 stipulates that utilities must keep complete maps, plans, or records of their entire distribution systems showing the size, character, and location of each main, street valve, and service line. In meeting this obligation PWSA Document Management team has developed and introduced policies and procedures for records digitization, indexing, maintenance, and retrieval. PWSA has begun training staff and leadership in these policies in tandem with the implementation of a digital document management system and a scanning program to digitize the authority's backlog of physical records for use by GIS, operations, engineering, and others. A consultant firm has been engaged to assist in this process and PWSA is on schedule to have fully digitized and indexed the backlog of physical system schematics by Q1 2021. This document access system will be integrated with PWSA's GIS system to the fullest extent possible. Within GIS attributes such as main installation date, diameter, and material and valve and hydrant details are being populated in the PWSA water distribution system GIS database on an ongoing basis as record documents continue to be reviewed. PWSA plans to enable hyperlinks to the updated record document file locations established in the document management system once it is fully implemented. All records will remain available in hard copy in PWSA's offices in accordance with all records retention regulations. Associated metrics are shown in Appendix C.

ii) 65.6 - Pressures

PWSA is aware of locations within its system where pressure falls below 25 psi. In accordance with Part 4 of the PA DEP October 25, 2017 Administrative Order, PWSA has installed 24 pressure monitoring stations, which monitor and record pressures every 15 minutes, and report on low or loss of pressure by text and email alert. An additional 37 monitoring stations are currently being installed throughout the system for continuous monitoring. These additional monitors will be online by the end of the 2020 third quarter. PWSA is also aware of areas where pressure exceeds 150 psi and is in the process of developing an SOP to address this issue. Capital projects associated with areas of low pressure will be addressed in the Water Distribution System Master Plan and CIP, and PWSA is on-target to meet the projected timeframes.

iii) 65.7 - Secure a contractor to assist with inspection, sizing, and installation of meters and associated equipment for municipal buildings and flat rate customers

PWSA has committed to partnering with a contractor to inspect, size, and install meters for municipal and other unmetered accounts (PWSA estimated 269 unmetered municipal services and 495 flat rate services in its service area) within the next five years. PWSA developed and released an RFP for these services and has begun inspecting facilities for meter installations. PWSA's Board of Directors approved a consulting contract with the selected vendor (Buchart Horn) on April 26, 2019. PWSA had originally anticipated that all unmetered and/or unbilled properties would be identified by June 29, 2020. However, delays in field work as a result of the COVID-19 pandemic combined with issues related to obtaining access to properties with unresponsive owners made this original deadline unobtainable. However, field work under this contract has now been completed and a draft final report was received on October 19, 2020. A total of 459 inspections were completed, including 253 on City-owned properties. So far, twenty-two new meters have been installed in previously unmetered properties by PWSA personnel, including seventeen meters installed in City-owned properties.

Based on the recommendations contained within the Buchart Horn report, PWSA is identifying which properties are able to be metered by PWSA staff and when, due to additional plumbing modifications required for the installation of a new meter, the services of an outside contractor will be needed to complete the work. PWSA has allocated funds for future Flat Rate and Unmetered Properties contracts to fund this work. PWSA will continue to actively search for additional municipal, flat rate, and other unmetered properties through various GIS and other data sources, which, when found, will be added to the list of properties requiring meters. As additional unmetered or unbilled properties are metered by PWSA or its contractors, PWSA will identify these properties in future Compliance Plan Quarterly Reports.

iv) 65.17 – Standards of Design

In accordance with the PUC's standards of design, PWSA is focused on continuing to replace all 4" water mains. In 2019, PWSA will replace 2,982 LF of 4-inch main. In 2020, PWSA plans to replace 26,138 LF of 4-inch main. The 2021 Small Diameter Water Main Replacement Program will focus on the replacement of 4-inch mains located within high priority lead neighborhoods. The length of 4-inch diameter mains previously reported was based on a general query of the GIS. However, upon further inspection, some of these 4-inch mains are actually service lines. PWSA is actively working to further refine the GIS to ensure all the 4-inch mains reported are actually distribution mains. PWSA has also determined that some of these 4-inch mains can be abandoned.

PWSA plans to incorporate the PUC's design requirements, specifications, and standard details into a formalized design manual in 2020.

v) 65.18 – Standards of Construction

As discussed in the Operations section, PWSA developed and implemented a comprehensive flushing program as part of the implementation of orthophosphate and is increasing the number of valves inspected and operated each year. The Authority is on target to have these issues addressed within the specified timeframes.

5. Finance, Contractual, and Other Issues

PWSA has already made considerable effort to ensure compliance regarding financial, contractual, and other issues, and many of the initiatives agreed to in the Tariff Settlement, Compliance Plan or the Compliance Plan Supplement have already been completed. The following sections focus on identifying the remaining requirements and highlighting PWSA's progress in each of these areas.

a. Master List of Stipulation Requirements

The Master List of Stipulation Requirements was developed in July 2019 to respond to feedback from the Parties, and to codify additional reporting requirements for PWSA. Table 11 highlights these additional reporting requirements.

Table 11: Finance, Contractual, and Other Issues Requirements from the Master List of Stipulations

Task	Timeline (if specified in the Master List of Stipulations)	Progress to Date
Residential Fire Protection and Standby Charges	Next Base Rate Case	Residential customers who have been charged private fire protection have been identified and have been credited for those payments.
Ownership of Wastewater Laterals	Final Report Submission, January 15, 2021	Consultant is actively compiling the information specified in the Stipulation Requirements with a proposed draft submission to the PWSA in the middle of November 2020

i) Residential Fire Protection and Standby Charges

PWSA has identified 49 current customers that are being charged a separate private fire protection charge, pursuant to PWSA's tariff. These customer accounts have been reviewed, and four accounts have been identified as residential. These four customers will no longer be assessed the private fire protection charges (charges assessed since April 1, 2018 have been removed, and customers have received a credit on their bill or a one-time payment in lieu of credit). PWSA has updated its tariff language and will not report on this issue in subsequent Compliance Plan Progress Reports.

ii) Ownership of Wastewater Laterals

PWSA will conduct a study to investigate the legal, economic, and operational feasibility of owning and/or maintaining (now privately owned) wastewater laterals within public easements. The report will include the cost, feasibility, and appropriateness of alternatives.

b. Compliance Plan Supplement Requirements

The Compliance Plan Supplement addresses topics including negotiations with the City of Pittsburgh and ALCOSAN, rates for public fire hydrant service, flat rates for unmetered customers, the discount for Pennsylvania American Water customers, as shown in Table 12. This section lays out each of the requirements that PWSA has committed to meeting, as well as a progress update and/or plan for achieving the PUC's standards. Below the table is a narrative discussion of each area. Tasks that were completed and reported on in previous updates have been moved to Appendix A.

Table 12: Compliance Plan Supplement Requirements – Finance, Contractual, and Other Issues

Task	Timeline (if specified in the Compliance Plan Supplement)	Progress to Date
Renegotiate the Cooperation Agreement with the City of Pittsburgh.	Quarterly Updates, beginning 4/30	Cooperation agreement signed and filed with the PUC.

Consider the timeframe for developing a separate rate for public fire hydrant service.	Next Base Rate Case	On Target
Consider assessing the City of Pittsburgh a separate rate for public fire hydrant service.	Next Base Rate Case	On Target
Consider the proposal for a flat rate for both water and wastewater for all unmetered and unbilled municipal and government properties or buildings served by PWSA.	Next Base Rate Case	On Target
Analyze the feasibility of assessing a flat rate to the unmetered customers.	Next Base Rate Case	On Target
Investigate the allocation of flows to ALCOSAN and other municipalities to determine the feasibility of measuring stormwater separately from wastewater.		On Target
Propose a plan or method for developing separate cost of service studies for wastewater and stormwater for the development of stormwater rates.		On Target
Evaluate the potential ways to address PWSA's contract with ALCOSAN, including renegotiation of the contract.		On Target

i) Renegotiate the Cooperation Agreement with the City of Pittsburgh

PWSA has renegotiated the Cooperation Agreement with the City of Pittsburgh and began providing quarterly updates to the parties on April 30, 2019. Even though PWSA had given termination notice to the City, the Authority's Board of Directors extended the Cooperation Agreement by two months on April 26, 2019. Prior to agreement on a new Cooperation Agreement, fees for any service provided to or received from the City will be done on an actual cost basis. PWSA's Board of Directors signed the cooperation agreement in December 2019, making the document retroactive to October 3, 2019. PWSA has filed the Cooperation Agreement with the PUC.

ii) Consider the timeframe for developing a separate rate for public fire hydrant service

PWSA has committed to developing a separate, cost-justified rate for public fire hydrant service, to be presented as part of the next base rate case filing. The billing plan for these hydrants will be part of the Cooperation Agreement. This process is underway, and a formal rate will be proposed in the next base rate case, which will show an allocation of 25% of all public fire hydrant costs to the City. PWSA reserves the right to propose an appropriate phase-in period at that time.

iii) Consider assessing the City of Pittsburgh a separate rate for public fire hydrant service

PWSA plans to assess the City of Pittsburgh with a separate rate for public fire hydrant service. Implementation timing and approach regarding this rate will be in the context of, and dependent on, approval of a PWSA public fire hydrant rate.

iv) Consider the proposal for a flat rate for both water and wastewater for all unmetered and unbilled municipal and government properties or buildings served by PWSA

PWSA has begun its consideration of the proposal for a flat rate for both water and wastewater for all unmetered and unbilled municipal and government properties/buildings served by PWSA as part of the rate model for the current tariff filing. PWSA plans to calculate water and wastewater rates for unmetered and/or unbilled properties on a "phased-in" and "stepped" 20-40-60-80-100 percentage basis. Phasing" means installing meters over time at City locations, and "stepping" means fully billing metered properties over a period of time.

v) Analyze the feasibility of assessing a flat rate to the unmetered customers

The Authority has every intention of assessing water consumption and sewer demand charges to unmetered customers. However, the majority of the unmetered customers are non-residential, which complicates development and assessment of a flat rate, because the buildings are not homogeneous and water line size is not necessarily indicative of use. As such, assessing a flat rate will be dependent on the Authority's ability to accurately capture use and avoid assessing an inequitable charge. The Authority plans to conduct its analysis before the next rate case.

vi) Investigate the allocation of flows to ALCOSAN and other municipalities to determine the feasibility of measuring stormwater separately from wastewater

Approximately 70% of PWSA's collection system is combined, which prevents the Authority from accurately measuring stormwater and wastewater separately. However, PWSA is investigating the allocation of flows to ALCOSAN and studying the value, maintenance requirements, and use ratios for its shared conveyance system.

vii) Propose a plan or method for developing separate cost of service studies for wastewater and stormwater for the development of stormwater rates

PWSA has completed separate cost of service studies for wastewater and stormwater, with the goal of proposing stormwater rates. This effort includes further studies of future stormwater Level of Service and other factors that impact the annual operations and capital budgets. The basis of charging customers for stormwater service is being finalized.

viii) Evaluate the potential ways to address PWSA's contract with ALCOSAN, including renegotiation of the contract

PWSA has initiated evaluation of its contract with ALCOSAN and is in the process of identifying opportunities to address existing issues.

ix) Investigate the City of Pittsburgh discount for PAWC water customers as originated under the terms of the 1973 Agreement between the City of Pittsburgh and Western Pennsylvania Water Company

PWSA has investigated the City of Pittsburgh discount for PAWC water customers, in light of rate changes for both organizations, and in the context of PWSA's negotiations with the City of Pittsburgh. Based on the May 2019 billing data, over 80% of residential customers are receiving a subsidy of $1 or less, over one-third of the residential customers are receiving no subsidy; and the average subsidy customers are receiving is less than $.50 per month. Therefore, the subsidy was eliminated on December 31, 2019. PAWC provided notice to customers before the subsidy was eliminated, over the course of two billing cycles.

c. Compliance Plan Requirements

For PWSA's financial, contractual, and other areas, the Compliance Plan addresses topics including the system of accounts, annual financial reporting requirements, a workforce diversity policy, and emergency response planning and self-certification requirements, as shown in Table 13. This section lays out each of the remaining financial, contractual, and other requirements for PWSA, as well as a progress update and/or plan for achieving the PUC's standards.

Table 13: Compliance Plan Requirements – Finance, Contractual, and Other Issues

Task	Timeline (if specified in the Compliance Plan)	Progress to Date
65.16 System of Accounts	2021	On Target
65.19 Filing of Annual Financial Reports	2019	On-going
69.801 Develop a formal policy to improve diversity in the workforce.	By the end of 2019	Not complete
73.3 Annual Depreciation Reports	April 1, 2024	On Target
73.5 Service Life Study Report	April 1, 2022	On Target
73.7 Capital Investment Plan Report	2020	On Target

101.3 Plan Requirements	Various	See completion dates below.
Capital Lease Agreement	2025	On Target
Bulk Water: Sales for Resale	Within 120 days of the Final Commission Order	On Target
Bulk Wastewater Conveyance Agreements	Within 120 days of the Final Commission Order	On Target

i) 65.16 - System of Accounts

Section 65.16 mandates that a public utility, having an annual operating revenue of $750,000 or more shall keep its accounts in conformity with the most recent Uniform System of Accounts for Class A Water Utilities, as prescribed by the National Association of Regulatory Utility Commissioners (NARUC). PWSA has completed its effort to map its current chart of accounts to the NARUC chart of accounts to identify existing gaps. A Request for Proposals was issued for an Enterprise Resource Planning (ERP) contract and closed on March 19, 2020, Future reporting will include the notice of selection of an ERP contractor, the contractor-projected ERP system cost, and a detailed implementation schedule. PWSA is prepared to file all required reports, and complete installation of an ERP system will occur by December 2021.

ii) 65.19 - Filing of Annual Financial Reports

PWSA understands the importance of filing annual financial reports and has filed its first with the Commission in 2019.

iii) 69.801 - Develop a formal policy to improve diversity in the workforce

PWSA is in the process of developing a formal policy to improve diversity in the workforce. The Supplier Diversity Program policy has been approved by the Board of Directors and will be integrated into all procurement documentation. An internal Human Resources policy will be drafted and approved in 2020.

iv) 73.3 - Annual Depreciation Reports

PWSA operates on the cash basis and does not use depreciation in its ratemaking methodology. PWSA acknowledges the importance of keeping accurate fixed asset records and plans to comply with the requirements listed in Section 73.3 and file its first annual depreciation report with the Bureau of Fixed Utility Services by 2024 and partial reports until that time, detailing known and newly constructed plant additions and retirements. PWSA has procured the services of a vendor familiar with this this type of work and will collaborate with the vendor to hone the current asset list to allow for full reporting by 2024.

v) 73.5 - Service Life Study Report

Section 73.5 stipulates that public utilities with intrastate gross revenues in excess of $20 million per year shall file a service life study report with the Office of Special Assistants every five years. PWSA plans to meet this requirement and file a service life study report by April 1, 2022.

vi) 73.7 – Capital Investment Plan Report

PWSA will file the Capital Investment Plan Reports pursuant to 52 Pa. Code 73.7 and 73.8 starting in 2020 and plans to file every five years thereafter.

vii) 101.3 – Plan Requirements

PWSA has developed a physical security plan, based on its recently completed security assessment. Similarly, a cyber security assessment was completed in 2018, and PWSA has completed a formal cyber security plan. PWSA has finalized its emergency response plan. This version of the emergency response plan meets DEP requirements and most of EPA requirements (please note, the ERP will need further updates pending results of Risk and Resilience Assessment). The Business Continuity Plan is complete. Specific completion dates are:

- Physical security plan: 12/31/2019

- Cyber security plan: Approved
- Emergency response plan – 10/31/2019
- Business continuity plan – 10/31/2019

viii) 101.4 - File a Self-Certification Form

PWSA has filed its self-certification form on February 28, 2020.

ix) Capital Lease Agreement

PWSA plans to purchase the system for $1 when eligible in 2025, unless a new arrangement is negotiated and approved by the Commission in advance of that timeline.

x) Bulk Water: Sales for Resale

PWSA has filed a separate docket including all bulk water sales contracts entered into with municipalities and other public utilities, and will file all future contracts with the Commission, as required by Sections 507 and 508. In its next rate case, PWSA will propose a retail rate or rates that will be included in the tariff and potentially charged to new bulk water sales. PWSA will provide costs of providing these wholesale services as part of the cost of service study performed for the next rate case and seek to update rates to reflect the current cost of service.

xi) Bulk Wastewater Conveyance Agreements

PWSA has filed with the Commission a separate docket with all bulk wastewater conveyance agreements with municipalities and other public utilities, and will file all future contracts with the Commission, as required by Sections 507 and 508. In its next rate case, PWSA will propose a retail rate or rates that will be included in the tariff and potentially charged to new bulk wastewater conveyance arrangements. PWSA will provide costs of providing these wholesale services as part of the cost of service study performed for the next rate case and seek to update rates to reflect the current cost of service.

Appendix A – Completed Compliance Plan Requirements

Task	Timeline (if specified in the Compliance Plan Supplement)	Progress to Date
Operations		
Install a new meter test station for testing 5/8" to 2" meters.	April 2019	Complete
Develop a leak detection program and restructure staff to add more personnel for leak detection.	April 2019	Complete
Hire a private contractor to test meters that are 3" and above on site or at their facility.		The PWSA Board of Directors awarded this contract to Vanguard on April 26, 2019.
65.8 Develop criteria for when to test meters that have been pulled from service, prior to disposal.	Within 6 months of Compliance Plan Filing	Complete
61.17 Implement a flushing program	2020	Complete. Flushing program has been implemented. Tracking of hydrants flushed and inspected in Spry Mobile.
67.1 Develop a SOP to notify the Commission during periods of unscheduled service interruptions	Within 6 months of Compliance Plan Filing	Complete
Billing/Customer Service		
Conduct a regular review of informal complaint information to determine complaint trends and whether there is a need to implement additional or new internal training policies.		PWSA is regularly reviewing informal complaints to determine trends and the need for further training.
Track whether customer complaints are related to water, sewer, or stormwater.	Monthly	Complete
Suspend the use of Jordan Tax Service, Inc.	With the Commission's final order approving the Settlement	Complete
Track the following metrics: Abandon %, ACD handling time, average speed of answer, CSR attendance, Customer satisfaction, service level % (Appendix E).	Monthly	Completed
Collect and report on requested billing data (Appendix E).		Q2 data appears in Appendix E of this report.
Provide interested parties and the Commission's Bureau of Consumer Services with a draft of the bill changes for feedback and recommendations.		The bill draft was provided on March 29, 2019. Responses were

		provided in April 2019 by OCA, I&E, and Pittsburgh UNITED.
Inform customers of the payment arrangement terms, based on the consumer's ability to pay upon contact with the customer, and offer payment arrangements as permitted by Chapter 14.		Informal practices in this area have been formalized to demonstrate compliance.
Form a Low-Income Assistance Advisory Committee.	Meetings should occur at least quarterly	Completed
Revise Bill Discount Program rate to provide for a 75% discount on the minimum water and/or wastewater charge for customers with income at or below 150% of the federal poverty level.		Completed, and effective as of March 1, 2019.
56.11-56.25 and 56.261-56.275 - Complete bill redesign project.		Completed as of June 3, 2020
Submit a detailed Plan that outlines the program parameters for each of its low-income assistance programs.	Next Base Rate Proceeding	Completed as of the September 23, 2019 LIAAC meeting
PWSA Affordability Analysis		Completed as of December 15, 2019
Track the following metrics: Abandon %, ACD handling time, average speed of answer, CSR attendance, Customer satisfaction, service level % (Appendix E).	Monthly	Completed
Expand the use of the SpryPoint Mobile app.		Completed as of go live on January 14, 2020
PWSA Affordability Analysis		Completed as of December 15, 2019
Suspend the use of Jordan Tax Service, Inc.	With the Commission's final order approving the Settlement	Completed as of June 30, 2019
Track whether customer complaints are related to water, sewer, or stormwater.	Monthly	Completed
Expand the use of SpryMobile app		Completed as of go-live January 14, 2020
Infrastructure		
65.14 Reestablish operability of meters at each source of supply and install an additional meter at Fox Chapel Station.	2019	Complete
Develop a Water Distribution System Master Plan to address master metering, non-revenue	2019-2020	Final Report was completed in February 2020

water, and include an AWWA Water Audit based on available data		
LTIIP – Customer Owned Lead Service Lines		Completed
LTIIP – Workforce Development		Completed
LTIIP – Construction Coordination with Other Utilities and Municipalities		Completed
Lead		
Form a Community Lead Response Advisory Committee (CLRAC).	Initiated within 30 days of Settlement Agreement	The first quarterly meeting was held January 8, 2019, and subsequent meetings occurred on February 6, 2019, March 4, 2019, April 24, 2019, June 3, 2019, August 12, 2019, September 24, 2019 and December 10, 2019
Make best efforts to send a letter notifying the resident and property owner of the results of a curb box inspection.	Within 90 days of the completion of the inspection, but no later than 120 days	Complete
Make all historical service line records available for public viewing on website.	Within 90 days of effective date of rates	This was completed in early January 2019.
Analyze per-line costs for replacing lead service lines.	Within 90 days of effective date of rates	This information was presented to CLRAC on April 24, 2019.
Develop an outreach program to notify customers of their eligibility for free filters, including at a minimum, a letter or bill insert.	Within 90 days of effective date of rates	Letters sent to all CAP customers in February 2019 with update in April and every month hereafter.
Make best efforts to send a letter notifying the resident and property owner of the results of a curb box inspection.	Within 90 days of the completion of the inspection, but no later than 120 days	Complete
Make all historical service line records available for public viewing on website.	Within 90 days of effective date of rates	Complete
Continue to make a good-faith effort to secure an agreement with PennVEST enabling it to obtain customer consent for private-side lead service line replacements at any point before PWSA completes lead service line replacements for the work order covering the customer's property.	For 2019 program	Approval obtained from PENNVEST.

Finance, Contractual, and Other Issues		
Formally notify the City of Pittsburgh of the record and outcome of this case, that the Cooperation Agreement is being reviewed by the PUC in the Compliance Filing proceeding, and that PWSA's LTIIP Filing is pending with the Commission.		Complete
Serve the City with a copy of Final Commission Orders and file a certificate of service with the Commission verifying that such service was made.	Issued in this matter within 10 days of their issuance	Complete
Investigate the City of Pittsburgh discount for PAWC water customers as originated under the terms of the 1973 Agreement between the City of Pittsburgh and Western Pennsylvania Water Company.	Next Base Rate Case	The analysis has been completed and the subsidy was eliminated on December 31, 2019.
69.16 Update emergency response plan with updated SOPs.	October 31, 2019	Complete
101.4 File a Self-Certification Form	February 28, 2020	Complete

Appendix B – Title 52 Sections where PWSA Believes it is Currently in Compliance

Section	Subchapter	Currently in Compliance
56.1	Preliminary Provisions for Utilities and Customers Subject to Chapter 14 of the Public Utility Code	X
56.31 – 56.58	Credit and Deposits Standards Policy (Water)	X
56.71 – 56.72	Interruption and Discontinuance of Service (Water)	X
56.81-56.118	Include information in Spanish directing Spanish-speaking customers to numbers for translation assistance for shut-offs (Water)	X
56.14 – 56.174	Disputes; Termination Disputes; Informal and Formal Complaints (Water)	X
56.191	Restoration of Service (Water)	X
56.251 – 56.252	Provisions for Wastewater, Steam Heat and Small Natural Gas Distribution Utilities and Victims of Domestic Violence with a Protection from Abuse Order	X
56.281 – 56.307	Credit and Deposits Standards Policy (Wastewater)	X
56.311 – 56.312	Interruption and Discontinuance of Service (Wastewater)	X
56.371 – 56.411	Disputes; Termination Disputes; Informal and Formal Complaints (Wastewater)	X
56.321-56.358	Include information in Spanish directing Spanish-speaking customers to numbers for translation assistance for shut-offs (Wastewater)	X
56.421 – 56.422	Restoration of Service (Wastewater)	X
56.441	Informal Complaints (Wastewater)	X
65.3.	Complaints.	X
65.5.	Interruptions of service.	X
65.9.	Adjustment of bills for meter error.	X
65.10.	Disputed bills.	X
65.12.	Notice of desire to have service discontinued.	X
65.13.	Temporary service.	X
65.14.	Reestablish operability of meters at each source of supply and install an additional meter at Fox Chapel Station.	X
65.15.	Refusal to serve applicants.	X
69.51 – 69.85	Inclusion of State Taxes and Gross Receipts Taxes in Base Rates	X
69.169	Policy Statement Interpreting Terms Included In 66 Pa.C.S. § 1326	X
69.261 – 69.267	Policy Statement on Customer Assistance Programs	X

69.351	Implementation of SFAS 106	X
73.7.	Capital investment plan report	X
121.3.	LTIIP.	X
121.4.	Filing and Commission review procedures.	X

Appendix C – 20 Operating Metrics Identified in I&E St. No. 4, p. 5

Metric	October 2020
Pipeline Materials (% of pipe segments with materials listed in GIS)	Water: 23% (15,839 out of 67,433 water mains have material populated) Sewer: 76% (34,371 out of 45,279 sewer mains have material populated)
Pipeline Age (% of pipe segments with age listed in GIS)	Water and Sewer: Not a field in GIS at this time, but can be calculated using installation date, so same % as below could be provided
Leak History per Mile (number of leaks per 100 miles of pipe per year) *	TBD
Pipeline Pressures (distribution pressure devices recording pressure outside minimum and maximum for more than 10 minutes)	TBD
Installation Year (% of pipe segments with installation year listed in GIS)	Water: 22% (14,644 out of 67,433 water mains have date installed populated) Sewer: 14% (6,547 out of 45,279 sewer mains have a date installed populated)
Pipeline Diameter (% of pipe segments with pipeline diameter listed in GIS)	Water: 100% (67,431 out of 67,433 water mains have a diameter populated) Sewer: 100% of active sewer mains have a diameter populated (includes some assumed inlet lateral diameters)
Pipeline Mileage (miles of active and retired pipe in the distribution system)	Water: Active Water Mains: 963.3 miles; Abandoned Water Mains: 151.76 miles mapped in GIS (includes abandoned water mains layer originally exported from CAD prior to GIS conversion) Active Sewer Mains: 1,225.8 miles; Abandoned Sewer Mains: 61.3 miles mapped in GIS
Addition/Retirements of Plant (GIS or CMMS field denoting active or inactive assets)	TBD
Materials and Supplies (Value of materials and supplies on-hand)	TBD
Leak Repair (number of leaks repaired – distribution main)	114
Leak Repair (number of leaks repaired – service line)	54
Pipeline Damages from Excavation (GIS or CMMS field denoting suspected cause of leak)	TBD
Plant in Service (Asset inventory)	TBD
Corrosion Protection Programs (pipe segments protected by cathodic protection)	TBD
Lead Levels (Lead and copper action level, current period)	TBD

Miles of Lead Pipeline	PWSA reports lead service lines in number of service lines, not by mile
Cost of Lead Pipeline Replacement for PWSA Work Crews (average pipeline replacement cost per period)	TBD
Cost of Lead Pipeline Replacement for PWSA Contractors (average pipeline replacement cost per period)	TBD
Sanitary Flow Reduction (Number of reportable SSOs per year)	TBD
Sanitary Flow Reduction (Volume of reportable SSOs per year)	TBD
Miles of Combined Sewer Separation (per year)	TBD
Unaccounted for Water (% of finished water that is unaccounted for)	TBD
Non-revenue Water (% of finished water that is non-revenue)	TBD

*Leaks will be geotagged to the segments in which they occur

Appendix D – Low Income Customer Billing Metrics

Billing Metrics	April 2020	July 2020	October 2020
Billed revenue	$59,294,394	$56,663,863	$
Receipts actually collected	$54,672,129	$52,358,649	$
Number of accounts in arrears	27,202	24,928	
Dollars of arrears	$14,433,944	$14,897,773	$
Number of accounts disconnected for nonpayment	221	0	0
Number of accounts receiving a notice of disconnection for nonpayment	7,248	0	0
Number of bill discount participants who entered the bill discount program with unpaid account balances	160	96	
Dollars of unpaid account balances for bill discount program participants at the time those participants entered the bill discount program	$163,737.51	$68,985.02	$
Number of bill discount participants by agreed-upon poverty ranges	15214 34.89% 15235 44.29% 15206 49.66% 15203 56.42% 15208 70.63% 15208 73.63% 15221 75.10% 15214 75.23% 15208 76.56% 15214 77.58% 15214 80.56% 15204 86.51% 15211 89.09% 15220 98.27% 15211 110.03% 15212 120.28% 15207 130.57%	15214 30.48% 15212 45.08% 15224 53.66% 15219 75.71% 15208 113.84% 15212 172.48%	
Average usage	3,340 gallons	3,555 gallons	gallons
Average bill including ALCOSAN charges	$95.67	$95.78	$
Number of PWSA customers receiving a PWSA hardship grant	10	1	0
Average amount of PWSA hardship grants	$292.50	$300.00	$0
Average arrearage of PWSA customers receiving a PWSA hardship grant	$771.63	$902.63	$0

Appendix E – Call Center Metrics and Customer Service Monthly Reports

Metric	July 2020	August 2020	September 2020
Abandoned Calls (% of total calls)	0.7%	0.6%	0.5%
Automatic Call Distributor (ACD) Handling Time (minutes)	3:59	4:11	4:19
Average Speed of Answer (minutes)	0:14	0:12	0:13
Customer Service Representative Staffing (FTE – Full Time Equivalents)	17 FTEs 1 PTE	17 FTEs 1 PTE	17 FTEs 1 PTE
Customer Satisfaction (customer survey)	99.9%	99.9%	99.9%
Service Level %	98.3%	98.7%	98.7%

CUSTOMER SERVICE MONTHLY REPORT

AMI and BILLING – JULY 2020

The Non-Access Campaign continued to address the 1,769 aged actual meter readings and the 3,002 estimated meter readings. Under the PA PUC Compliance Plan, customers are continuing to be notified via letters and posting notices to make appointments for a meter upgrade. PWSA successfully upgraded 771 meters in July 2020. Additionally, 2,432 letters were issued. No properties were posted or shut for non-access. Billing received 551 final bill requests and processed them within 7 days. Billing totals for the month of July 2020 were 110,711 bills produced in the amount of $22,290,561.31.

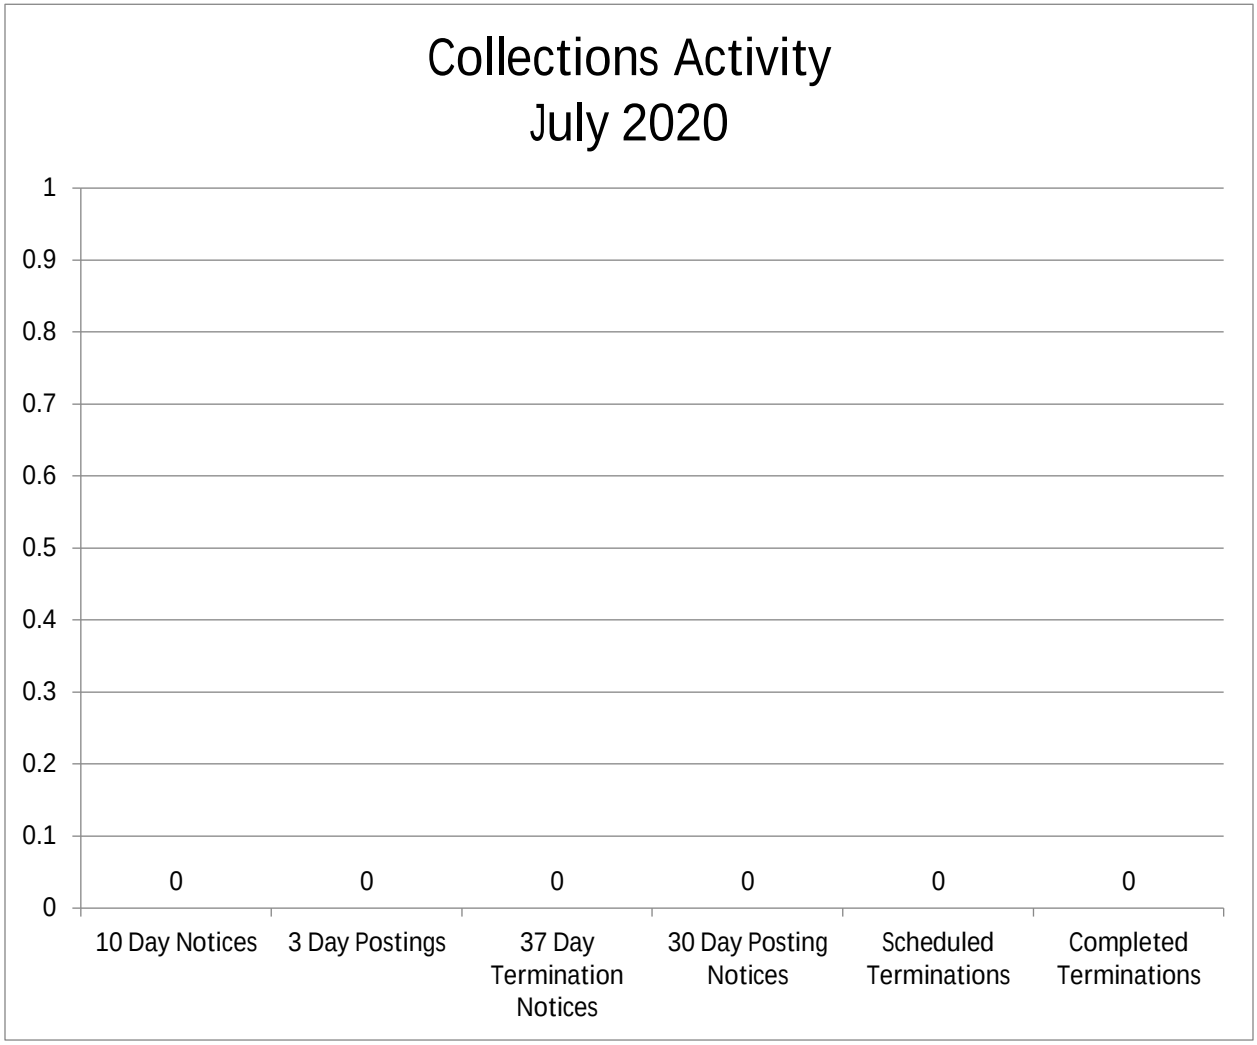
CUSTOMER SERVICE MONTHLY REPORT

COLLECTIONS – JULY 2020

In July 2020, the total Collections were $20,634,886, which was $655,669 more than what was billed in June 2020. Out of a total of 2,028 customer inquiries to info@pgh2o.com, Collections personnel responded to 2,023, all within 48 hours. In this month, the total number of active payment plans was 3,545, and the total number of customers enrolled in the Bill Discount Program was 4,042. PWSA mailed Friendly Reminder letters to 9,632 customers with a past due account balance in the month of July 2020. In addition, 1,128 30-day Notice of Intent to Lien letters were sent to customers in an attempt to collect water/wastewater and ALCOSAN delinquencies. Due to PWSA's response to the COVID-19 pandemic, the walk-in counter will remain closed, and the Moratorium on terminations will continue for all customers through September 6, 2020.



CUSTOMER SERVICE MONTHLY REPORT

CONTACT CENTER – JULY 2020

There were 22 business days in the month of July 2020. The Contact Center's attendance rate remained the same, with 17 full time employees and 1 part time employee. Of the 13,197 calls handled in the month of July 2020, the Customer Service Representatives were able to report a 99.9% customer satisfaction rate. The Contact Center has also yielded another low abandonment rate of 0.7%, with an average speed of answer of 00:14 seconds.

CUSTOMER SERVICE MONTHLY REPORT

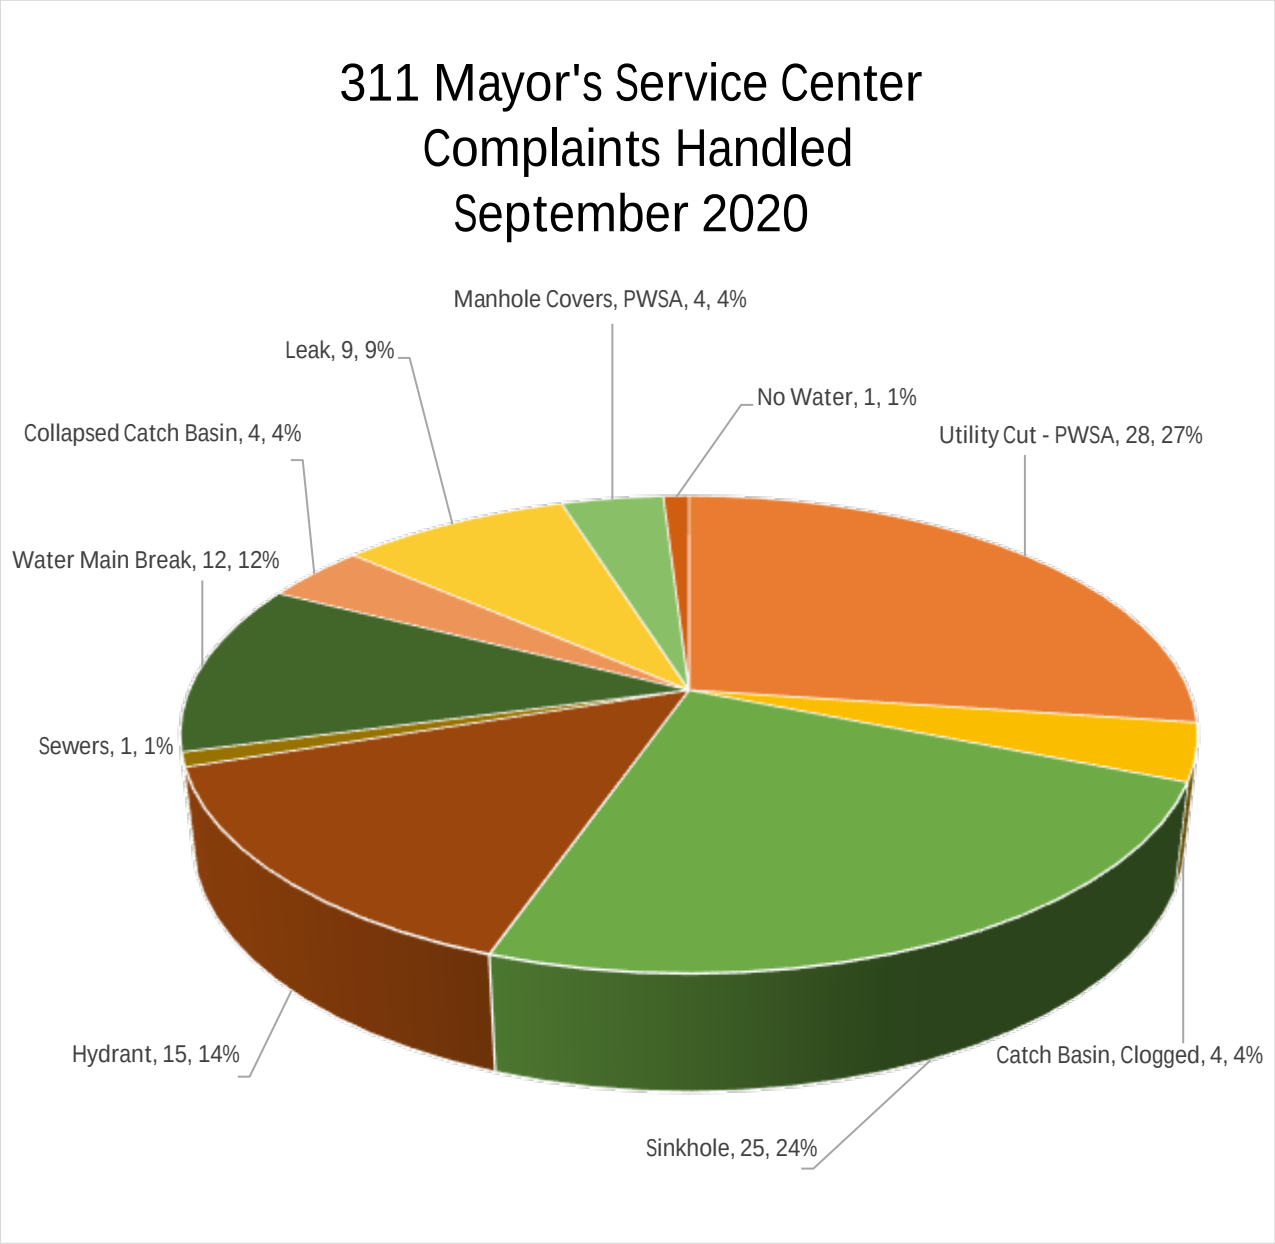
DISPATCH – SEPTEMBER 2020

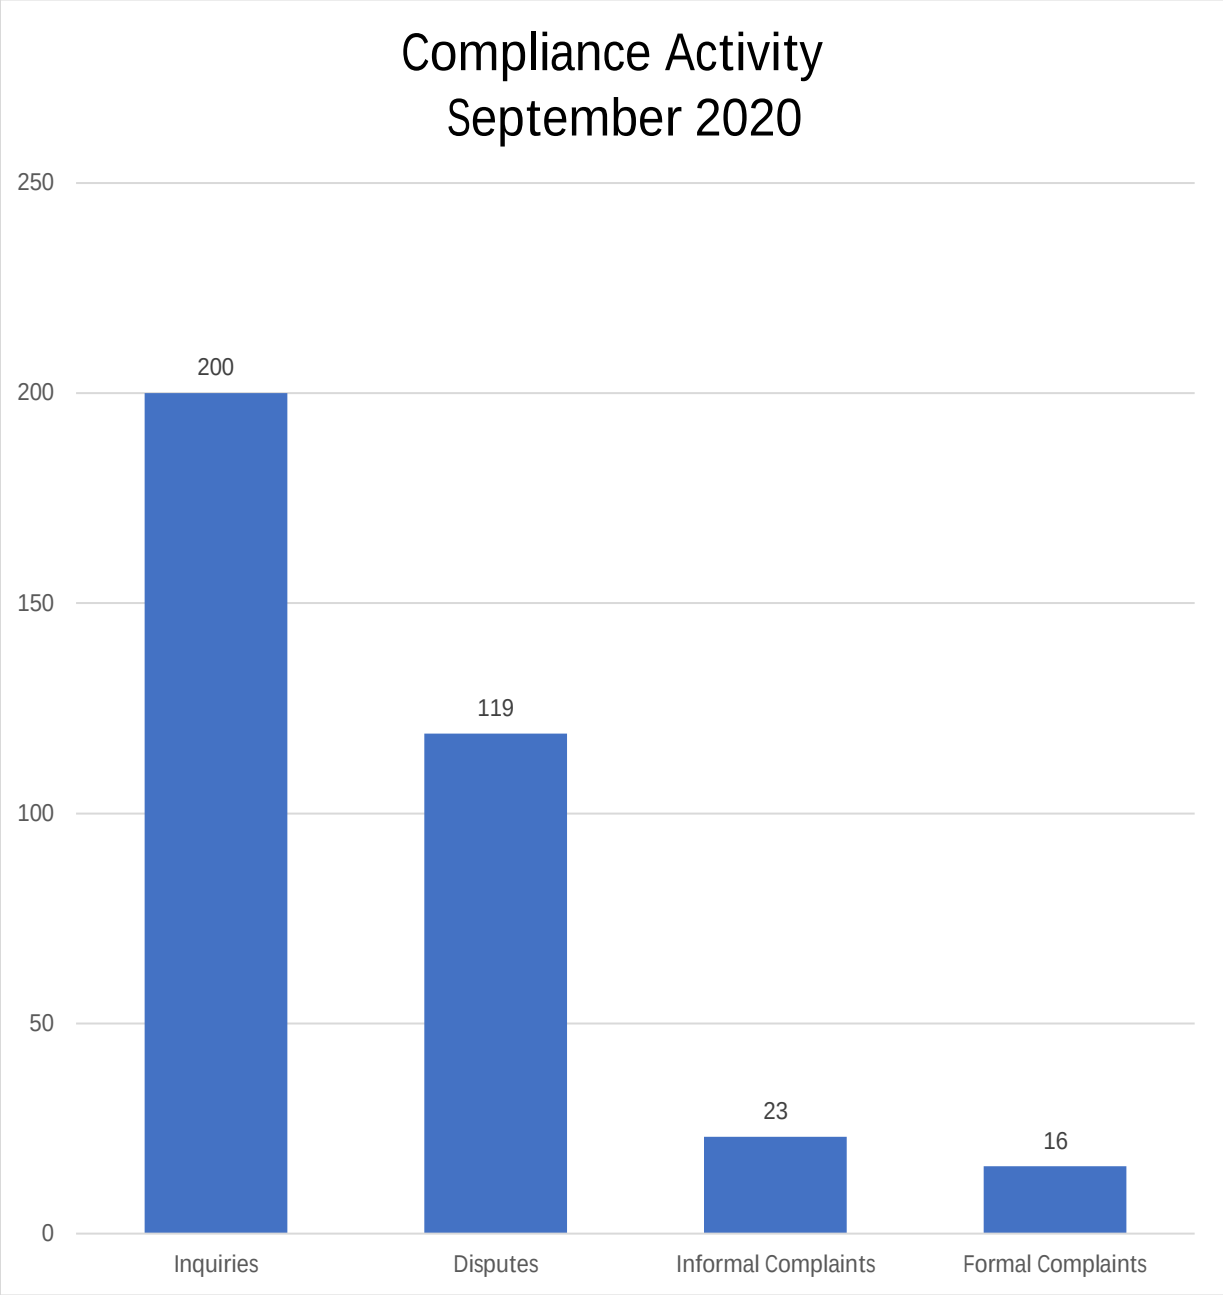
Dispatch responded to 2,394 calls for emergency service in September 2020. In this month, the Dispatchers issued 125 Interruptions of Service and facilitated 129 dig requests to Pennsylvania One Call.



CUSTOMER SERVICE MONTHLY REPORT

PUC COMPLIANCE – SEPTEMBER 2020

The PUC Compliance team worked to resolve 200 Inquiries, 119 Disputes, 23 Informal Complaints, and 16 Formal Complaints in the month of September 2020.



CUSTOMER SERVICE MONTHLY REPORT

PERMITS – SEPTEMBER 2020

In September 2020, Permits issued 45 permits, as illustrated below, and processed 852 dye test certification requests.

Re: Lead Program Quarterly Progress Report
Pittsburgh Water and Sewer Authority

Dear Ms. Diehl:

Pursuant to Paragraph 3.f. of the Consent Order and Agreement (COA) dated November 17, 2017, Pittsburgh Water, and Sewer Authority (PWSA) is providing this Lead Program Quarterly Progress Report, every three (3) months following the date of the execution of the COA. This report will provide details on the progress and current status of each of the following:

Section 1:	Implementation of Corrosion Control Feasibility Study
Section 2:	Repeat Public Notice and Public Education Tasks
Section 3:	Consumer Tap Notices
Section 4:	72-hour Partial Line Replacement Sample Results
Section 5:	Partial Lead Service Line Replacements
Section 6:	Implementation of Community Environmental Project (CEP)
Section 7:	Identification of Lead Service Lines
Section 8:	Lead Service Line Replacements
Section 9:	Advisory Committee

Attachment A	Consumer Tap Notice: Certification and Example Letters
Attachment B	Post-Construction Sample Results
Attachment C	Partial Lead Service Line Replacements
Attachment D	Community Environmental Project Affidavit
Attachment E	PWSA Lead Service Line Replacements

Pittsburgh Water & Sewer Authority

Lead Program Quarterly Progress Report – August 15, 2020

Section 1 - Implementation of Corrosion Control Treatment Feasibility Study

Under paragraph 3.b.ii of the November 17, 2017 Consent Order & Agreement (COA), the Pittsburgh Water and Sewer Authority (PWSA) was required to submit an application for a permit to construct the corrosion control treatment facilities within ninety (90) days of the approval of the feasibility study. On April 27, 2018, PWSA received a letter from the Pennsylvania Department of Environmental Protection (PADEP) stating that the selection of orthophosphate as optimal corrosion control treatment for PWSA was approved.

PWSA completed design of the corrosion control chemical facilities and submitted a permit application to PADEP on May 10, 2018. Under paragraph 3.b.iii, PWSA was to complete construction of the modified corrosion control treatment facilities in accordance with the amended construction permit within 180 days of the PADEP issuing an amended construction permit. The PADEP issued the Construction Permit for the Orthophosphate Addition and Storage Project on September 24, 2018. PWSA received the Building Permit from the City of Pittsburgh's Department of Permits, Licenses, and Inspections (PLI) on January 17, 2019. A Letter Amendment to the COA provided for phased implementation of orthophosphate for corrosion control, and PWSA coordinated these start up dates with PADEP. PADEP inspected all three sites on March 26, 2019. The PADEP issued the amended Operation Permit for the corrosion control facilities on March 29, 2019.

PWSA began implementation of the modified corrosion control treatment facilities upon receipt of the amended Operation Permit from PADEP on March 29, 2019. PWSA introduced orthophosphate as approved in the amended permit, as follows:

- Bruecken Pump Station Application Point – Highland 2 Super System on April 1, 2019
- Aspinwall Pump Station Application point – Lanpher Reservoir Super System on April 15, 2019
- MFP site – Highland 1 Reservoir Super System on April 29, 2019

Parallel to the implementation of orthophosphate, PWSA continues with the implementation of the Distribution System Monitoring Plan associated with orthophosphate addition. This monitoring program consists of the following components:

- Regulatory monitoring
    - Lead and Copper Rule (LCR)
    - Water Quality Parameter (WQP)
    - Revised Total Coliform Rule (RTCR)

Pittsburgh PA 15222

DocuSign Envelope ID: FE7114DC-C5ED-4C34-84BA-A111544A8F19

Pittsburgh Water & Sewer Authority

  - Disinfection Requirements Rule (DRR)
  - Stage 2 Disinfectants and Disinfection Byproducts Rule (D/DBP)

- Supplemental Monitoring
  - Enhanced RTCR site monitoring
  - PRS monitoring stations
  - Lead service line profiles
  - Aspinwall Water Treatment Plant entry point
  - Orthophosphate dosage and optimization

The collected data indicates that the addition of orthophosphate continues to have a positive impact on corrosion. The monitoring stations appear to have established steady lead levels well below initial values and below the action level of 15 ppb. The residential lead profiles conducted at several locations throughout the City also indicate progress of lowering lead levels from the pre-orthophosphate addition. The program team is conducting a detailed investigation at some sites that exceeded action levels in the past to gain better understanding for their occurrence.

The LCR compliance sampling results for the January 2020 to June 2020 period indicate that the 90th percentile level of 5.1 ppb was below the action level. The 90th percentile level for the June 2019 to December 2019 was 10 ppb, also below the action level. PWSA has accordingly achieved two consecutive six-month rounds of compliance sampling that were below the 15 ppb action level.

Within 30 days of the end of the second period of follow-up tap monitoring, PWSA was required by paragraph 3.b.v of the COA to submit to PADEP a request for designation of optimal corrosion control treatment Water Quality Parameter (WQP) performance requirements. This request was submitted on July 30, 2020.

Section 2 - Repeat Public Notice and Public Education Tasks

In accordance with COA 3.g, PWSA provides Tier 2 public notice to its customers following each six-month lead sampling event that exceeds the action level of 15 ppb. The PWSA system did not exceed the action level during the most recent round of testing ending June 30, 2020.

Bill Inserts with the required language under 25 Pa. Code § 109.1104(a)(2)(i)(A) and (E) have continued to be included in all monthly bills (began in October 2016). Since two consecutive rounds of testing at or under the action level has been achieved these inserts will no longer be provided.

PWSA continues to maintain a dedicated lead webpage at lead.pgh2o.com, which contains information for our customers regarding lead in the water and lead service lines and attend community meetings to inform customers about lead in drinking water.

Pittsburgh Water & Sewer Authority

Although the other LCR public education requirements for action level exceedances do not currently apply, PWSA is continuing selected public education and public outreach activities on lead.

PWSA has met the requirement for compliance sampling at or below the action level for lead for two consecutive six-month rounds of sampling, therefore this section will not be reported in future quarterly progress reports unless PWSA exceeds the action level in the future.

Section 3 - Consumer Tap Notices

For each monitoring period (previously 6-month frequency, now required annually), PWSA's accredited contract lab, CWM Environmental, mails sample kits directly to customers at Tier 1 sites on the sampling plan. These kits include a one-liter sampling bottle, PADEP approved sampling instructions and return postage to the lab. Included in Attachment A is a copy of the signed Consumer Tap Notice for Lead Results Certification Form correlating to sample results from the January to June 2020 monitoring period.

Every customer who is served by water at sites that were sampled is mailed a sample results letter (See Attachment A) within 5 business days of PWSA receiving and conducting a Quality Assurance review of the results. If any result exceeds 15 ppb total lead, CWM Environmental informs PWSA via email and phone call within 1 hour. PWSA informs PADEP and ACHD within 1 hour of being notified by the lab of an exceedance. PWSA also reaches out to the customer with the exceedance via an available phone number. If the customer's phone number(s) on file are not valid, a letter is sent via US mail to request updated contact information from the customer. Additionally, PWSA continues to provide the results via US mail (see Attachment A) within 5 business days of PWSA receiving the results.

Upon receipt of a sample result that exceeds 15 ppb, the customer is mailed, at no cost to the customer, a water pitcher and 6-month supply of filter cartridges the same business day that PWSA receives the exceedance. Starting September 1, 2019, for any sample result that exceeds 10 ppb, the results letter includes a voucher code for the customer to redeem a complimentary water pitcher and 6-month supply of filter cartridges.

Section 4 - 72 Hour Partial Line Replacement Sample Results

25 Pa. Code § 109.1107(d)(4)(ii) states: *The system shall collect the partial lead service line replacement sample and report the results of the analysis to the owner and the residents served by the line within 3 business days of receiving the results*. Paragraph 3.a.iii and iv of the COA provide for follow up notice to residents who do not return samples and additional sampling and replacement cartridges for homes with partial replacements that exceed that lead action level of 15 ppb.

Pittsburgh Water & Sewer Authority

In accordance with 25 Pa. Code § 109.1107(d)(4)(ii), PWSA requests that property owners collect a water sample (post-construction sample) after every partial line replacement.

In addition, PWSA provides a sample kit to property owners to collect a water sample after full line replacements and private-only or public-only (non-lead on the private side) replacements.

For all sample locations (partial line or full line replacement) that exceed the lead action level of 15 ppb, the customer is contacted via phone or email, in addition to receiving a letter with their sample results. If PWSA needs to reach a tenant with no contact information, we will look up the owner in an attempt to contact them. Residents are reminded to continue to use the NSF-certified water filter pitcher provided at the completion of construction and are provided a test kit to collect another sample three months after lead line replacement. Additional water pitcher filter cartridges are provided at the time of delivery of the 3-month sample kit for partial line replacement locations.

If any post-construction sample comes back over 50 ppb (partial line or full line replacement), in addition to the above notifications, PWSA mobilizes to the property to assist with flushing the line. In these instances, the resident is given a sample kit and asked to collect a new water sample following the flush to ensure that the flushing was effective in reducing the post-construction lead levels.

If a resident did not return their water sample after any partial line replacement, the resident receives a second notice via door hanger reminder to return their sample kit.

Post-construction sample results (partial line and full line replacement) are provided in Attachment B. From July 1, 2016 through July 31, 2020, 7,504 public lead service lines have been replaced. Post-construction samples have been retuned from 3,391 of those locations. From May 1, 2020 through July 31, 2020 (this quarterly progress report reporting period) 577 public lead service lines were replaced, and 224 of those locations returned a post-construction sample.

The number of construction locations has been impacted by Governor Wolf's emergency order to cease non-life sustaining businesses and operations. Lead Service Line Replacement (LSLR) Construction activities resumed on May 18, 2020.

Section 5 - Partial Lead Service Line Replacements

25 Pa. Code § 109.1107(d)(4)(i) provides: *The system shall provide notice to residents of all buildings served by the line at least 45 days prior to commencing partial line replacement.* Paragraph 3.a.i. of the COA provides that PWSA *shall provide (via door hanger notification) an additional advance notification not more than five (5) days and not less than seventy-two (72) hours prior to the initiation of work.* Except for emergency lead service line replacements, PWSA provides the required notifications.

Pittsburgh Water & Sewer Authority

In accordance with paragraph 3.a.v. of the COA, PWSA provides PADEP a weekly report of all emergency partial lead service line replacements where a 45-day notification in accordance with 25 Pa. Code § 109.1107(d)(4)(i) was not possible. A complete list of lead service line replacements where a 45-day notice was not provided is included in Attachment C. After June 22, 2017, the only replacements not receiving the 45-day notification are those that were replaced due to an emergency such as a main break, service line break, or service line leak. All lead service line replacements, including partial replacements, are provided with information to flush the service line, a water pitcher and replacement filter cartridges, a post-construction water sample kit, and health information regarding lead service line replacement.

Locations where a partial replacement is performed are also given a door hanger reminder to return the post-construction water sample kit if PWSA has not received the water sample results six weeks after construction.

Section 6 - Implementation of Community Environmental Project (CEP)

At the October 2018 meeting of the PWSA Board of Directors, PWSA awarded construction contracts to perform replacement of privately-owned lead service lines under the CEP. The CEP is being conducted in accordance with the PADEP approval dated February 15, 2018 and subsequent revisions to the approval.

Execution of agreements and subsequent homeowner / contractor coordination meetings were started at CEP locations in early December 2018. These agreements were obtained to authorize work on the private side of the residential water service line; work on the private side of the residential service line is typically the homeowner's responsibility. Upon obtaining this signed agreement, a coordination meeting between the contractor and homeowner is scheduled. This meeting allows the contractor to describe the work to be completed, including restoration responsibilities, and to provide a general timeline for the work. The coordination meeting also provides the homeowner with the opportunity to directly ask questions regarding the scope and schedule of the service line replacement work.

Construction associated with the CEP portion of the Individual Lead Service Line Replacement (ILSLR) contract was initiated in mid-December 2018 and is currently ongoing. The contractors completing this work have submitted contractor payment applications (CPA) for work through June 30, 2020. Dollar Energy Fund has provided authorization for work completed through June 2020. Work applicable to these approved CPAs is summarized as follows:

PGH2O Pittsburgh Water & Sewer Authority

Category	Number		CEP Reimbursable Amount	
	CPAs Reviewed This Period *May 2020 to* June 2020	**Total** *(Through June 30, 2020)*	**This Period**	**Total**
CEP Work Locations	30	465	N/A	
CEP Locations where Private Only was Replaced[1]	14	85	$ 67,810.00	$ 408,365.00
CEP Locations where Public Only Was Replaced[2]	1	26	$0	
CEP Locations where both Public and Private were Replaced[3]	8	147	$ 36,920.00	$ 653,497.50
CEP locations that were all Non-lead	7	207	$0	

1. CEP Locations where Private only was Replaced includes those locations where the Public is verified non-lead line with a Private side tailpiece replaced
2. The CEP reimbursable amount is for the private-side replacement only at locations where both public and private were replaced
3. CEP Locations where both Public and Private were Replaced includes those locations where a Public lead line with Private side tailpiece was replaced

The contractor is currently completing CEP related service line replacement work as project sites are approved.

Paragraph 4.f. of the COA requires an affidavit of the official responsible for overseeing the CEP every ninety (90) days, beginning upon the approval by the PADEP of the PWSA's proposed CEP (February 15, 2018). An affidavit from PWSA and a letter from Dollar Energy Fund, which is administering the CEP, is included in Attachment D.

The number of construction locations has been impacted by Governor Wolf's emergency order to cease non-life sustaining businesses and operations. CEP Construction activities were halted on March 20, 2020 and resumed on May 18, 2020.

Section 7 - Identification of Lead Service Lines

The 2017 Curb Box Inspection (CBI) Contract inspected 5,419 curb boxes and identified 830 lead service lines on the public side. The 2018 CBI Contract inspected 15,008 curb boxes and identified

Pittsburgh Water & Sewer Authority

1,329 public lead lines. Only curb boxes where either there is no historical record, or the historical record indicates the presence of lead on the public side are being inspected. All others are presumed to be non-lead based on historic record.

PWSA met with PADEP and presented a Revised Service Line Material Inventory Approach on July 31, 2019, which was approved on June 26, 2020. This revised approach will include multiple sources of information, including a predictive machine-learning model and refined CBI Program, to complete the inventory of service line materials required under Paragraph 1. C. iii of the COA.

PWSA approved the 2020 CBI Program at the January 2020 Board of Directors meeting. CBI inspection activities were halted on March 20, 2020 and resumed on May 5, 2020. As of July 31, 2020 the 2020 CBI contract inspected 2,144 curb boxes and identified 107 public lead lines.

Section 8 - Lead Service Line Replacements

PWSA began recording lead service line replacements in February 2016. A table of all lead service line replacements since July 1, 2016 is included in Attachment E.

Public Replacements

PWSA is offering full service line replacement during the 2019 PENNVEST LSLR and 2020 Small Diameter Water Main Replacement (SDWMR) contracts when the public side is verified lead. The 2019 LSLR Program commenced in late March 2019 and will extend until October 2020. The program is being conducted in the same general manner as the 2018 program, which was described in detail in the June 29, 2018 Lead Service Line Replacement Report to PADEP. The funding provides for the replacement of around 4,000 public lead side service lines (in addition to about 3,400 private side lead or galvanized iron service lines). The SDWMR Contracts commenced in June 2020 and will provide for the replacement of about 2,100 public side service lines (all public sides being replaced new) and 830 private side lead or galvanized iron service lines.

In addition, PWSA is providing public lead service line replacement, where necessary, under the CEP (discussed below, and in Section 6).

From July 1, 2016 through July 31, 2020, 7,504 public lead service lines have been replaced. The table in Attachment E shows if the public side was replaced by PWSA or a PWSA contractor, designated by work order.

The table below summarizes the lead service line replacements required by the COA, by reporting period.

COA Reporting Period	Required Public Replacements	Actual Public Replacements *(through June 30, 2020)*
July 1, 2016 – June 30, 2018	1,341	1,378
July 1, 2018 – June 30, 2019	1,710[1]	2,561[2]
July 1, 2019 – June 30, 2020	855	3,362[3]

1. Includes 855 public side replacements required by December 31, 2018 and an additional 855 public side replacements due by June 30, 2019
2. Public side replacement requirement of 855 by December 31, 2018 met in October 2018
3. Public side replacement requirement of 855 by June 30, 2020 met in September 2019

Private Replacements

From July 1, 2016 through July 31, 2020, 4,784 private service lines have been replaced by PWSA or a PWSA contractor.

The PWSA Board approved a lead service line replacement policy (included in the February 15, 2018 quarterly report) that, if there is lead on the public side service line, allows PWSA and PWSA contractors to replace the private side of the service line, with homeowner authorization, if lead or galvanized iron has been confirmed. This Policy was updated by the PWSA Board at the July 26, 2019 meeting to continue to offer no-cost private side lead or galvanized iron service line replacements when PWSA replaces the public side, as well as expand the program of offering an income-based reimbursement program to customers who want to replace their private side lead or galvanized iron service lines when PWSA is not replacing the public side .

Private side replacement will continue at no expense to the homeowner in the following instances:

- PWSA Backlog and Operations Urgent Replacement

  Emergency LSLR contracts address replacement of private lead service lines when PWSA operations crews replace a public lead service line as a result of emergency line breaks or leaks. This is to prevent partial lead service line replacement caused by urgent replacement and the private side replacement is completed at no cost to the customer. At the October 2018 meeting of the PWSA Board of Directors, PWSA awarded construction contracts to perform replacement of privately-owned lead service lines when PWSA Operations performs urgent replacements, and work began in early December 2018. This contract also covers addressing the backlog of replacements of the private side service lines at locations where partial replacements occurred as part of water main relays or operations replacement between February 1, 2016 (previously July 1, 2016) and December 31, 2018.

PGH2O Pittsburgh Water & Sewer Authority

PWSA coordinates with customers that have a private side lead service line to replace the lead service line during urgent replacements. If the homeowner does not sign an agreement to allow PWSA to replace their private side service line, they will be subject to partial lead service line replacement. When possible, PWSA Operations will provide temporary water service from the new public side service line until the private service line can be replaced to avoid a partial lead service line replacement. PWSA provides PADEP a weekly update of all emergency partial lead service line replacements.

- Lead Service Line Replacement Contracts

Properties included in the 2018 and 2019 LSLR contract work orders are set up on a neighborhood basis, and each work order has been prioritized by prevalence of children under 6 years of age and incidences of high blood lead levels in the area based on data provided to PWSA by the ACHD.

In locations where there is lead on the public side, PWSA will coordinate with customers that have a private side lead (or galvanized iron) service line to replace the full-service line during construction. This full service line replacement is at no cost to the customer. If the homeowner does not sign an agreement to allow PWSA to replace their private side service line, PWSA will not perform work at the address in order to prevent a partial lead service line replacement. All properties have been provided with a 45-day notice of line replacement.

The 2019 LSLR contracts are funded through PENNVEST; contracts were awarded in January 2019, with construction starting March 2019.

- Small Diameter Water Main Replacement Contracts

As the 2019 LSLR contracts come to a close, PWSA is transitioning its service line replacement efforts to include replacing small diameter water mains. Three construction contracts were awarded by PWSA in April 2020, and construction to replace 15 miles of water main and about 2,200 service lines started in June 2020. The service line aspects of this project will be similar to the LSLR program, with the difference being that all public service lines will be replaced, not only lead public service lines. Private lead and galvanized iron service lines will continue to be replaced at no direct cost to PWSA customers. The streets where the mains will be replaced include some priority lead areas and other locations with problematic mains.

- PADEP Community Environmental Project (CEP)

The PADEP CEP was developed for homeowners that meet the income requirements as specified in the proposal submitted to PADEP that was approved February 15, 2018. Replacements performed under this contract will be identified by customer requests that qualify financially; the financial qualification is administered by a third party, Dollar Energy Fund. At the October 2018 meeting of the PWSA Board of Directors, PWSA awarded construction contracts to perform replacement of privately-owned lead service lines under the CEP.

PWSA has met the requirement for compliance sampling at or below the action level for lead for two consecutive six-month rounds of sampling, therefore this section may be revised in future quarterly progress reports unless PWSA exceeds the action level in the future.

Section 9 - Advisory Committee

PWSA formed a Community Lead Response Advisory Committee (CLRAC) consisting of interested parties to the Pennsylvania Utilities Commission (PUC) rate filing, representatives of local community groups and a public health expert, based on a tariff settlement with the PUC. The CLRAC has met regularly and is working with PWSA to evaluate and advise PWSA on recommended modifications to the LSLR Program. The primary purposes of the CLRAC are to provide consultation and feedback on PWSA's LSLR Program and lead remediation efforts. CLRAC members are providing input and advice regarding community outreach including enhancements to encourage greater participation in PWSA's customer requested sampling program, advising on the costs of our LSLR Program, advising on post-replacement procedures and outreach, prioritizing the order in which the 2019 LSLR program will be completed and providing input on additional neighborhoods that may be added to the 2019 LSLR Program and future small diameter water main replacement programs. All minutes of the CLRAC meetings are posted on the PWSA website. http://lead.pgh2o.com/resources/clrac/

In the PUC tariff settlement, PWSA agreed to several enhancements to the LSLR Program, including:

1. limiting the circumstances where partial LSLRs can be completed;
2. agreeing to maintain current practices, including making service line information available on our website and updating that information on a monthly basis, continuation of post-replacement sampling and filter distribution for all locations (instead of just where partial replacements are completed as required by the COA); and,
3. providing NSF-certified filters and replacement cartridges to households that qualify for an existing PWSA customer assistance program free of charge until two rounds of system-wide compliance sampling are below the action level of 15 ppb.

RE: Lead Test Kit Results

Dear «Name»,

Thank you for participating in the Pittsburgh Water and Sewer Authority's (PWSA) Lead and Copper Compliance program. Your test kit is helping inform you and PWSA about the quality of our drinking water.

The results of the sample taken from your home on **«Date_Collected»** indicate a lead level of **«Lead_Result_ppb»** parts per billion (ppb). Your result is above the lead EPA action level of 15 ppb.

To reduce the risks associated with exposure to lead in water, you should have received a complimentary water filter pitcher and replacement filters that are certified to remove lead. If you have not received these please call us at 800-674-7961.

Completing a lead test is a good first step in understanding your water quality. To check further for sources of lead, you can test your household plumbing for lead using swabs, (which you can find at most home improvement stores). You can also check our online map at www.pgh2o.com/leadmap to see if your home has historical data on file indicating that lead pipe was used to build your service line.

Funds are available for qualified customers for a no cost lead line replacement; however, funding is limited. Please contact **Dollar Energy Fund** today at **866-762-2348** to see if you qualify to have your water line replaced through this Community Environmental Program (CEP). Funds for this program are available from a settlement of an enforcement action between the PWSA and the Pennsylvania Department of Environmental Protection.

What is the lead action level?

The lead action level is an EPA drinking water standard that requires water service providers to take additional steps to control lead levels when they reach or exceed 15 ppb. We ask residents from our service area to submit samples to help us determine if our treatment methods are effective at reducing corrosion from lead pipes. If more than ten percent of the samples we collect exceed the lead action level of 15 ppb, we must take certain actions like replace lead service lines and explore alternative water treatment methods. It is important to remember that this is not a safety standard because there is no safe level of lead.

Pittsburgh Water & Sewer Authority

What are the health effects of lead?

According to EPA, "Lead can cause serious health problems if too much enters your body from drinking water or other sources. It can cause damage to the brain and kidneys and can interfere with the production of red blood cells that carry oxygen to all parts of your body. The greatest risk of lead exposure is to infants, young children, and pregnant women. Scientists have linked the effects of lead on the brain with lowered IQ in children. Adults with kidney problems and high blood pressure can be affected by low levels of lead more than healthy adults. Lead is stored in the bones, and it can be released later in life. During pregnancy, the child receives lead from the mother's bones, which may affect brain development."

How does lead exposure happen?

Most exposure to lead happens by ingesting paint chips or lead-contaminated dust. There can also be lead in soil and drinking water. Lead enters drinking water through corrosion in lead pipes or plumbing materials. The primary source of lead in PWSA's system are the old water service lines that connect homes to the water main in the street. Our water mains are not made of lead, and there is no lead in our water when it leaves the water treatment facilities.

What can I do to reduce exposure to lead in drinking water?

If you know or suspect that you have lead service lines or plumbing, there are ways to reduce your exposure to lead in your drinking water:

- Run your water to flush out lead. If you haven't used your water for several hours, run your cold tap for one minute before using your water for cooking or drinking. If your home has a longer lead line, this may require flushing for a longer period of time. Using toilets, washing clothes, showering, or doing dishes before you drink from your tap are all ways that you can flush your water lines without wasting water.
- Use cold water for cooking and preparing baby formula. Lead dissolves more easily in hot water. Do not drink, cook with, or make baby formula using hot water.
- Do not boil water to remove lead. Boiling water does not remove or reduce lead exposure.
- Look for alternative sources or treatment of water. Purchase a NSF Water Filter that is certified to remove lead from your water. Customers can also choose to drink bottled water.
- Identify if your plumbing fixtures contain lead. Lead check swabs are available at hardware stores to help you detect lead on plumbing surfaces, such as solder and pipes. Consider replacing pipes and fixtures that contain lead.
- Contact us if you decide to replace your lead service line. Depending on your income, you may be eligible to have your lead water service line replaced at no cost.
- Get your child's blood tested. If you think that your child may have been exposed to lead, talk to your doctor about testing your child. Allegheny County requires all children to be tested for lead exposure at approximately 9-12 months and again at 24 months.

What is being done?

We are identifying and replacing lead service lines across our service area. As we identify the location of lead service lines, we will make this information available to the public on our webpage at http://lead.pgh2o.com. Customers who want to replace their lead service lines on their own should contact our Lead Help Desk for more information about coordinating efforts.

Where can I get more information?

For more information, visit the PWSA lead website at http://lead.pgh2o.com or call 412.255.8987.

Sincerely,

William Pickering

RE: Lead Test Kit Results and Voucher Code For Free Water Pitcher and Filters

Dear «Name»,

Thank you for participating in the Pittsburgh Water and Sewer Authority's (PWSA) Lead and Copper Compliance program. Your test kit is helping inform you and PWSA about the quality of our drinking water.

The results of the sample taken from your home on **«Date_Collected»** indicate a lead level of **«Lead_Result_ppb»** parts per billion (ppb). The lead EPA action level is 15 ppb. Your sample result is below the EPA action level, however lead was detected at or above 10 ppb.

To reduce the risks associated with exposure to lead in water, we are offering you a complimentary water filter pitcher and replacement filters that are certified to remove lead. To redeem this offer, please call **120 Water Audit** at 800-674-7961 or visit PWSA.120WaterAudit.com and provide the following voucher #: **«GIS_ID»**.

Completing a lead test is a good first step in understanding your water quality. To check further for sources of lead, you can test your household plumbing for lead using swabs, (which you can find at most home improvement stores). You can also check our online map at www.pgh2o.com/leadmap to see if your home has historical data on file indicating that lead pipe was used to build your service line.

Funds are available for qualified customers for a no cost lead line replacement; however, funding is limited. Please contact **Dollar Energy Fund** today at **866-762-2348** to see if you qualify to have your water line replaced through this Community Environmental Program (CEP). Funds for this program are available from a settlement of an enforcement action between the PWSA and the Pennsylvania Department of Environmental Protection.

What is the lead action level?

The lead action level is an EPA drinking water standard that requires water service providers to take additional steps to control lead levels when they reach or exceed 15 ppb. We ask residents from our service area to submit samples to help us determine if our treatment methods are effective at reducing corrosion from lead pipes. If more than ten percent of the samples we collect exceed the lead action level of 15 ppb, we must take certain actions like replace lead service lines and explore alternative water treatment methods. It is important to remember that this is not a safety standard because there is no safe level of lead.

What are the health effects of lead?

According to EPA, "Lead can cause serious health problems if too much enters your body from drinking water or other sources. It can cause damage to the brain and kidneys and can interfere with the production of red blood cells that carry oxygen to all parts of your body. The greatest risk of lead exposure is to infants, young children, and pregnant women. Scientists have linked the effects of lead on the brain with lowered IQ in children. Adults with kidney problems and high blood pressure can be affected by low levels of lead more than healthy adults. Lead is stored in the bones, and it can be released later in life. During pregnancy, the child receives lead from the mother's bones, which may affect brain development."

How does lead exposure happen?

Most exposure to lead happens by ingesting paint chips or lead-contaminated dust. There can also be lead in soil and drinking water. Lead enters drinking water through corrosion in lead pipes or plumbing materials. The primary source of lead in PWSA's system are the old water service lines that connect homes to the water main in the street. Our water mains are not made of lead, and there is no lead in our water when it leaves the water treatment facilities.

What can I do to reduce exposure to lead in drinking water?

If you know or suspect that you have lead service lines or plumbing, there are ways to reduce your exposure to lead in your drinking water:

- Run your water to flush out lead. If you haven't used your water for several hours, run your cold tap for one minute before using your water for cooking or drinking. If your home has a longer lead line, this may require flushing for a longer period of time. Using toilets, washing clothes, showering, or doing dishes before you drink from your tap are all ways that you can flush your water lines without wasting water.
- Use cold water for cooking and preparing baby formula. Lead dissolves more easily in hot water. Do not drink, cook with, or make baby formula using hot water.
- Do not boil water to remove lead. Boiling water does not remove or reduce lead exposure.
- Look for alternative sources or treatment of water. Purchase a NSF Water Filter that is certified to remove lead from your water. Customers can also choose to drink bottled water.
- Identify if your plumbing fixtures contain lead. Lead check swabs are available at hardware stores to help you detect lead on plumbing surfaces, such as solder and pipes. Consider replacing pipes and fixtures that contain lead.
- Contact us if you decide to replace your lead service line. Depending on your income, you may be eligible to have your lead water service line replaced at no cost.
- Get your child's blood tested. If you think that your child may have been exposed to lead, talk to your doctor about testing your child. Allegheny County requires all children to be tested for lead exposure at approximately 9-12 months and again at 24 months.

What is being done?

We are identifying and replacing lead service lines across our service area. As we identify the location of lead service lines, we will make this information available to the public on our webpage at http://lead.pgh2o.com. Customers who want to replace their lead service lines on their own should contact our Lead Help Desk for more information about coordinating efforts.

Where can I get more information?

For more information, visit the PWSA lead website at http://lead.pgh2o.com or call 412.255.8987.

Sincerely,

William Pickering

RE: Lead Test Kit Results

Dear «Name»,

Thank you for participating in the Pittsburgh Water and Sewer Authority's (PWSA) Lead and Copper Compliance Program. Your test kit is helping inform you and PWSA about the quality of our drinking water.

The results of the sample taken from your home on «COLLECTED_ON» indicate a lead level of **«LEAD_RESULT»** parts per billion (ppb). Your result is below the lead EPA action level of 15 ppb.

Completing a lead test is a good first step in understanding your water quality. To check further for sources of lead, you can test your household plumbing for lead using swabs, (which you can find at most home improvement stores).

What is the lead action level?

The lead action level is an EPA drinking water standard that requires water service providers to take additional steps to control lead levels when they reach or exceed 15 ppb. We ask residents from our service area to submit samples to help us determine if our treatment methods are effective at reducing corrosion from lead pipes. If more than ten percent of the samples we collect exceed the lead action level of 15 ppb, we must take certain actions like replace lead service lines and explore alternative water treatment methods. It is important to remember that this is not a safety standard because there is no safe level of lead.

What are the health effects of lead?

According to EPA, "Lead can cause serious health problems if too much enters your body from drinking water or other sources. It can cause damage to the brain and kidneys and can interfere with the production of red blood cells that carry oxygen to all parts of your body. The greatest risk of lead exposure is to infants, young children, and pregnant women. Scientists have linked the effects of lead on the brain with lowered IQ in children. Adults with kidney problems and high blood pressure can be affected by low levels of lead more than healthy adults. Lead is stored in the bones, and it can be released later in life. During pregnancy, the child receives lead from the mother's bones, which may affect brain development."

ATTACHMENT D
COMMUNITY ENVIRONMENTAL PROJECT AFFIDAVIT

AFFIDAVIT

COMMONWEALTH OF PENNSYLVANIA)
) SS:
COUNTY OF ALLEGHENY)

I, William J. Pickering, being duly sworn, depose and say:

1. I am the Executive Director of the Pittsburgh Water and Sewer Authority ("PWSA") and, as such, am authorized to make this Affidavit on its behalf;

2. I am submitting this Affidavit in accordance with paragraph 4.f. of the Consent Order and Agreement dated November 17, 2017;

3. PWSA is currently engaged in construction activities for the Community Environmental Project; and

4. PWSA has paid $104,730.00 from the amount allocated for the Community Environmental Project for work completed May through June 2020. The locations and amounts per location are included in the attached letter(s) from Dollar Energy Fund.

[Signature] William J. Pickering, Executive Director

Sworn to and subscribed before me,

in and for the Commonwealth of Pennsylvania,

this 13th day of August, 2020.

Vera Mohamed
Notary Public
