NiSource Inc

Fireside Chat: Tweaking ests as co projects into '21 and beyond

Maintain Rating: NEUTRAL | PO: 27.00 USD | Price: 23.83 USD

Reducing estimates slightly: Lag & rate case timing

Following our fireside chat last week with mgmt., we adjust our ests to reflect expanded COVID impacts into '21, cont'd lag into '22 based on rate case timing (i.e. a protracted period of underearning) and a jump in '24 when NIPSCO BOT renewables are brought into ratebase fully. NI continued to provide a 0-10c range of impacts for '20 and '21, as uncertainties still lie in sales and what exactly economic recovery will look like. Without a '20 guide, we specifically drop our '21 est to $1.35/sh, which assumes NI is subject to the midpoint of its anticipated '21 impact (i.e. -5c) off of an initially predicted $1.40/sh (the top end of the co's $1.36-1.40/sh guidance floor that was put into effect after the CMA sale was announced). Even though this is a downward adjustment of -1c from our prior est, we see NI as one of the first to share foresight into '21 impacts, and we expect more peers to follow suit in the coming months. We also tweak down '22 ests -1c to account for anticipated lag. Our estimates are now towards the low end of the previously updated 5-7% EPS CAGR guidance off '21 earnings (we'd expect this means off the $1.36-1.40/sh floor) for '22, but then start to recover towards the high end in '23 as NIPSCO renewables are completed by mid-year '23 and fully reflected in rates in '24. Our '24 est peaks at high end of EPS CAGR targets as such. We MtM the peer mult to 17.3x gas / 16.9x electric (17.8x / 17.2x before) driving $27/sh PO. Reiterate Neutral after earlier downgrade (here). *We see NI as among the first companies to formalize views on '21 & has both wider range and raises more concern on under-earnings.*

Indiana: Balancing rate casing timing with renewables

Our ests fully bake in what portion of the NIPSCO RFPs we expect NI can own via BOT, and the dilution we anticipate NI will need to endure for equity financing. We expect NI and partners are awarded half of the RFPs, and that tax equity would own 50% of wind projects (30% of solar) until flips at year 7-10. This means in '23, we'd expect NI to own 276MW wind and 805MW solar with '24 having the first full yr of impact. Net income would be based on a 50% equity ratio and 9.75% ROE, and equity financing needing ~21 incremental shares. While NI will likely encounter costs from COVID and bad debt, we still expect the rate case isn't filed until YE23 when the BOT projects are brought in.

Company Sector

Natural Gas-Local Distribution Companies

Company Description

NiSource Inc. (NI) is a fully-regulated utility company serving approximately 3.5mn natural gas customers and 500,000 electric customers across seven states through its local Columbia Gas and NIPSCO brands. NI generates substantially all of its operating income through these rate-regulated businesses.

Investment Rationale

NI's positives include 5-7% earnings/dividend growth via $30bn of infrastructure investments over the next 20+ years and fully regulated subsidiaries. We have factored in resolution of overhang from the MA incident as the company will likely sell 3Q. However, NI has C&I demand risk from COVID, which will be difficult to offset with O&M cuts due to promises already around cost cuts to balance CMA sale. We see shares valued appropriately and rate Neutral.

Stock Data

Average Daily Volume	3,480,172

Quarterly Earnings Estimates

	2019	2020
Q1	0.82A	0.74E
Q2	0.05A	0.79E
Q3	0A	0.01E
Q4	0.45A	-0.12E

Rate case timing

We focused on rate case updates in key states of OH, IN, and PA since these jurisdictions represent 80% of the gas biz and 100% of the electric biz (i.e. in NIPSCO). As anticipated, NiSource will have to will have to come in for an Ohio case next year, and in PA, the company is roughly in nearly every year. This leaves Indiana as key, where NIPSCO will likely time its rate case with electric – important as the company will have expanded rate base through its two request for proposals (RFPs) to replace retiring coal. These projects will likely commission between end of '22 to mid-year '23, and as such, we'd expect an Indiana rate proceeding by the end of '23.

Particularly with Indiana, we'd expect Covid pressures leave the company subject to some underearning from now through a potential rate case filed in '23. As such, we'd expect these pressures to normalized out over time with future rate cases. We adjust our anticipated earned ROEs and estimates to reflect this, as seen in the ROE table below. *The question is can mgmt continue to see improving earned ROE trends in '22, or will both '22 & '23 prove pronounced without a rate case in NIPSCo. We perceive downside bias to both years in our ests.*

Improving trends in earned ROEs is likely to feature prominently in any re-based overall EPS CAGR on its outlook.

Table 1: BofA estimated earned ROEs

Source: BofA Global Research estimates, company report

RFP 2: Tweaking our assumptions

We include our build own transfer (BOT) assumptions for NI below, factoring in both RFPs 1 and 2. Recall NI has two wind projects already approved from the first RFO (100MW Rosewater and 302MW Crossroads). In the second 2.6GW round (with 300MW slated to be wind and 1.3GW solar), we assume NI and partners will win half through BOTs and the other half through power purchase agreements (PPAs). The purchase of the projects will happen upon completion ('22-'23) with a rate case likely thereafter – meaning that in '24, NI would see the full impact of rates in place.

On the call, mgmt. noted that for wind, funding level for BOT projects will be 50% from NI and 50% from a tax equity partner. However, for solar, this would be 70% from NI and 30% tax equity. For the equity to debt break down for the project investment, we assume a leverage multiple of 6.7x. Finally, we'd anticipate NI's implied net income off of the project would correspond with its NIPSCO equity layer and ROE.

We adjust below based off these assumptions, but note that clarity around true ownership potential will come out this summer – around when we expect the first series of CPCNs (certificates of public convenience and necessity) to be filed for some for the projects. A fuller view on long-term capex and rate case plans through '24 will likely be updated on the 3Q call.

Table 2: NIPSCO Renewables rate Base

More details on '21 outlook updated

While mgmt had already announced mitigation efforts to offset the loss of the MA biz largely, the company updated its drivers for the year noting up to 10c Covid-related impacts, offset by incremental cost savings. We continue to expect that NI load recovery is well under way and seemingly ahead of earlier plan. The 10c impact of Covid impacts appear half from load degradation (permanent/long ramp in C&I) as well as incremental expenses (reconnection fees, Covid-related mitigation costs). We see the mitigation efforts as not entirely different from the existing mitigation efforts already under way to offset loss of earnings from MA biz sale (principally dis-synergies from allocated SG&A). The critical point is that Covid pressures are entirely under-earning related and should normalize out over time with future rate cases (this is not any reduction in '21 capex for instance after a slight earlier tweak to '20).

We note this is the first '21 update across the sector to provide an update on load expectations and cost reductions. We also expect this load update on '21 to kickstart further moderation of EPS ests into next year across the sector. We expect companies to continue to talk up the ongoing recovery in load in forthcoming meetings. As for 2020, NI has still not provided EPS guidance (Recall they pulled it when MASS Sale to ES Was announced).

Estimates

Below we tweak our estimates to reflect updates made to underearning expectations at NIPSCO until a rate case filing is made as well as the updates made to the renewables ownership potential that largely kicks in in '24. While the company sees clear pressure in the next two to three years, we expect in the long-run it returns to its 5-7% EPS CAGR.

Table 3: BofA NI EPS Estimates: below Street on both '21 and '22 with some risk s to both still in our view as load appears to be cautious still

Valuation

Below, we find the same PO of $27/sh and we maintain our Neutral rating. Note this reflects the latest peer multiple of 17.3x for gas and 16.9x for electric. Our premiums awarded stay the same per subsidiary. Total return is at 17% using current multiples as it would appear Street has lost confidence in mgmt's ability to temper Covid impacts. We appreciate the series of rate cases in OH & PA, but much more critically uncertainty on timeline to resolve lag and/or level of leg in '22 (or even depth of under-earning possible) as enabling outsized discount vs peers. We perceive better upside than downside at current valuation levels although degree of uncertainty holds us back.

Table 4: NI SOTP Valuation

Price objective basis & risk

NiSource Inc (NI)
Our $27 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2022 forward P/E multiples of 17.8x for gas utilities and 17.2x for electric utilities with an inline mult for gas utilities with just weather normalization, a 0.5x prem for gas utes with revenue normalization (prev 0x), and a 1.0x premium for the electric utility's strong growth rates (we factor in BOT in '24 EPS) but acknowledgement of industrial risk (prev 2x). We note that electric / gas peer P/E multiples are grossed up by 5% / 5.1% to reflect capital appreciation across the sector. We strip value from Columbia Gas of MA given the pending sale to close in 3Q20. We subtract the value of excess holding company debt at the parent not supporting the utility opcos. We believe NI's 5-7% EPS/dividend growth outlook, attractive regulated earnings profile and constructive legislation across NI's service territories are under-estimated given its discounted multiple versus peers.

Downside risks to our PO are a sustained period of economic weakness pressuring customer growth, interest rate increases, high natural gas prices, financing plan updates, unforeseen costs associated with the MA incident, and challenging steel production economics in Indiana.

* Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

***INCOME RATINGS*, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend.** *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.
Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including,

among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

UK Readers: The protections provided by the U.K. regulatory regime, including the Financial Services Scheme, do not apply in general to business coordinated by BofA Securities entities located outside of the United Kingdom.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

NISOURCE

(NI US Equity – $23.32 – Outperform)

Thinkin' of a master plan

- **Planning to mitigate COVID impact, CMA dis-synergies.** We hosted several members of NI's mgmt. team, including CEO Joe Hamrock and CFO Donald Brown, for a virtual meeting today. The punchline was that mgmt. is hopeful to offset impacts from COVID and dis-synergies from the CMA sale when looking out to 2021, with the goal of crafting a plan to still meet the $1.36-1.40 range that was pointed to on the YE19 call. This was encouraging to hear given commentary on the Q1 call less than a month ago where NI was noncommittal on expectations for 2021, which will be the basis for its 5-7% growth thereafter. Our 2021E is at the bottom of that range ($1.36), which assumes some spillover of COVID pressures/dis-synergies that aren't fully offset. We remain Outperform rated with a $26 PT as LT fundamentals remain solid and the plan post-CMA should be a lot easier to execute on.

- **Base scenario = ($0.00-0.10) EPS impact on 2021.** The base scenario that was outlined for 2021 assumes modest customer attrition/load declines, resulting in ($0-25M) of estimated margin reduction. Other potential impacts include incremental bad debts and financing expenses as well as the timing of regulatory activities. Mitigation efforts are underway, namely permanent structural changes and cost reductions catalyzed by the CMA sale. Importantly, lingering impacts stemming from COVID next year will be trued up through rate cases ultimately to where NI should get back on track LT.

- **Signs that sales are beginning to recover.** April sales data showed gas down (4%) and electric down (26%)! NI has started to see improvement off April-lows as C&I customers for both gas/electric (who are most impacted by the autos) have started to ramp back up. On the B/S, NI feels it is in good shape for 2020 as its $100M capex deferral was done largely to buffer cash.

- **Generation strategy.** NI's generation strategy in Indiana will start to piece together this summer as CPCN filings are made at the IURC, with a full update targeted for Q3. All capex will be incremental and result in a step-up in EPS growth in the 2022/2023 timeframe. Financing is TBD but will include equity that could come via a forward or hybrids to minimize any dilutive impacts until the capex is rolled into rates.

- **CMA sale on track.** NI still expects the CMA sale to close in Q3.

Company description

NiSource, headquartered in Merrillville, Indiana, operates two separate business lines: electric utility and gas distribution LDCs. The electric utility serves just under 500,000 customers in northern Indiana and owns 3,300 MW of generation. The gas LDC serves 3.5 million customers in Indiana, Ohio, Pennsylvania, Kentucky, Virginia, Maryland and Massachusetts.

Investment Thesis

We see above-average rate base and earnings growth potential for NiSource relative to other electric and natural gas distribution utilities. NI has a $30B backlog of capital investment with recovery largely through trackers in mostly constructive regulatory environments. We see NI as a de-risking story in 2020 with an upward bias on rate base / EPS growth due to renewable investment opportunities at NIPSCO electric.

Valuation

Our $26 price target is derived using a P/E multiple of 17.5x on our 2022E. This reflects a full-turn premium for NI's electric utility and an average for its gas LDCs. Risks for NiSource are 1) bad regulatory outcomes and 2) pipeline safety incidents. Upsides are 1) additional growth projects and 2) customer growth

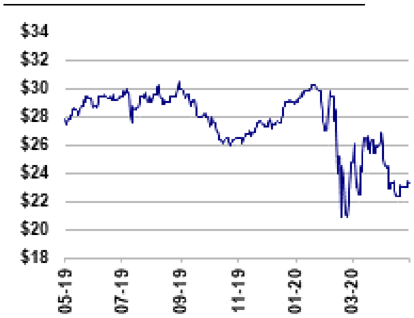
Exhibit 4. Performance Chart



Source: FactSet

Investment Conclusion

We are Outperform rated on NiSource. The company's $30B capital investment backlog should drive its 5-7% annual earnings target over the long term. Most of the NI's annual capex (~80%) is recovered with minimal lag via tracking mechanisms and the company has built a constructive track record with most of its state regulators. Post the CMA sale, we believe the company's plan is a lot easier to execute on. Incremental capex is on the horizon from renewable opportunities in Indiana, which will provide a step-up in EPS growth in the 2022/2023 timeframe. NI's generation strategy in Indiana should start to come together over the summer, with a full update targeted for its 3Q20 call. The dramatic shift toward renewables and fact that NI will be coal-free by 2028 is also helpful from an ESG perspective. We see exiting MA as a turning point that should allow NI to re-rate closer to its historic 5-10% premium over time as it proves out its ability to execute going forward.

Quick thoughts from Wells Fargo Securities, LLC Utility & Infrastructure Team:

Utilities

NiSource Inc. (NI/Overweight) (Akers) – Since COVID-19 fears hit the US market, shares of NI have underperformed Gas Utility peers by nearly 7% and lagged the S&P Utilities by 3% (from 2/21/20 close). Most recently, shares reacted to the lack of affirmative guidance on the Q1 call and, subsequently, disclosures this week outlining a potential net impact from COVID of ($0.00-0.10) in each 2020 and 2021. Based on our conversation with NI mgmt. yesterday (5/27), we feel incrementally better about the story. Mgmt. highlighted opportunities to drive both structural cost savings and general process improvements; the company also expects more temporary cost reductions in 2020. O&M is likely to go down in 2021 on account of the sale of MA and trend flat or better off that base. The biggest determinant as to where the company lands in the ($0.00-0.10) COVID impact range is sales. The company currently expects gas/electric sales to be down 2.5%/4%, respectively, in 2020 with a margin impact of $30-40mm ($8mm of which was experienced in April), or $0.06-0.08 per share after-tax, and $0-20mm, or $0.00-0.04 in 2021. Within the industrial customer base, exposure to the auto supply chain and steel industry has weighed on volumes. That said, mgmt. is starting to see a recovery and noted that industrial customers continue to pay their bills. The commercial recovery remains murky as states are in the process of phased re-openings.

Regarding the growth rate, the 5-7% appears intact off of a normalized 2021 base as any lingering COVID impacts in 2021 would eventually be reconciled through a natural rebound and/or rate cases. Further, the 5-7% is supported by annual capex of ~$1.8B with renewable opportunities at NIPSCO offering potential upside to those levels in 2022 and 2023. The company outlined a 1,300-1,400 MW generation need in 2023 (three wind projects representing ~800 MW already announced). NI would look to procure half of the needs through power purchase agreements (PPA) and own the other half, which would be financed with the help of tax equity and likely require incremental equity beyond the ATM and ongoing programs. Reiterate Overweight.

American Electric Power (AEP/Overweight) (Kalton) – It's a go. On 5/27, the Louisiana Public Service Commission (LPSC) approved SWEPCO-LA's portion of North Central Wind, a 1,485 MW regulated wind project located in OK. The LPSC also approved a flex-up option in the event the Public Utility Commission of Texas (PUCT) does not approve the SWEPCO-TX allocation. As a result of the LPSC approval plus prior approvals in AR (including flex-up) and OK, AEP has secured approvals sufficient to proceed with the entire project regardless of the PUCT's final decision. Our EPS outlook already incorporates the $2B North Central Wind project with a full year contribution beginning in '22. Upon completion, we estimate North Central will add ~$0.10 to annual EPS power assuming a 9.0-9.5% ROE, 45-50% equity ratio and $1.0-1.3B of new equity in '21, which is consistent with AEP's guidance of 50-66% equity financing for the project. Our 20-24E EPS

Please see page 3 for rating definitions, important disclosures and required analyst certifications.
All estimates/forecasts are as of 05/28/20 unless otherwise stated. 05/28/20 05:30:42 ET

remain $4.30, $4.70, $5.10, $5.40 & $5.70, which results in a 7% CAGR off the original mid-point of '19 guidance ($4.10). Our take: not a surprise, but an incremental positive nonetheless and increases our confidence in AEP's ability to achieve a '20-24 EPS CAGR in the upper half of the 5-7% guidance range.

American Electric Power Company, Inc. (AEP)/Overweight
Price as of 5/27/2020: $81.44
FY 20 EPS: $4.30
FY 21 EPS: $4.70
Shares Out.: 494.8 MM
Market Cap.: $40,296.51 MM

NiSource Inc. (NI)/Overweight
Price as of 5/27/2020: $23.32
FY 20 EPS: $1.26
FY 21 EPS: $1.37
Shares Out.: 382.2 MM
Market Cap.: $8,912.9 MM

Rating Basis Information:
AEP Thesis: We are attracted to AEP's strong EPS and dividend growth prospects, organic investment opportunities and regulatory diversity.

NI Thesis: We rate shares Overweight. We are attracted to NI's robust long-term infrastructure growth opportunities and supportive regulatory treatment.

Important Disclosure for U.S. Clients
This report was prepared by Wells Fargo Securities Global Research Department ("WFS Research") personnel associated with Wells Fargo Securities and Structured Asset Investors, LLC ("SAI"), an investment adviser subsidiary of Wells Fargo & Co. If you are paying directly for this research, it is being provided by SAI. For all other recipients in the U.S. this report is being provided by Wells Fargo Securities.

Important Disclosure for International Clients
EEA - The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the EEA, this report is distributed by Wells Fargo Securities International Limited ("WFSIL"). WFSIL is a U.K. incorporated investment firm authorized and regulated by the Financial Conduct Authority. For the purposes of Section 21 of the UK Financial Services and Markets Act 2000 ("the Act"), the content of this report has been approved by WFSIL, an authorized person under the Act. WFSIL does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). The FCA rules made under the Financial Services and Markets Act 2000 for the protection of retail clients will therefore not apply, nor will the Financial Services Compensation Scheme be available. This report is not intended for, and should not be relied upon by, retail clients.

Australia - Wells Fargo Securities, LLC, Wells Fargo Securities International Limited and Wells Fargo Securities Asia Limited are exempt from the requirements to hold an Australian financial services license in respect of the financial services they provide to wholesale clients in Australia. Wells Fargo Securities, LLC is regulated under the laws of the United States, Wells Fargo Securities International Limited is regulated under laws of the United Kingdom, and Wells Fargo Securities Asia Limited is regulated under the laws of Hong Kong. All such laws differ from Australian laws. Any offer or documentation provided to Australian recipients by Wells Fargo Securities, LLC, Wells Fargo Securities International Limited or Wells Fargo Securities Asia Limited in the course of providing the financial services will be prepared in accordance with the laws of the United States, United Kingdom or Hong Kong and not Australian laws.

Canada - This report is distributed in Canada by Wells Fargo Securities Canada, Ltd., a registered investment dealer in Canada and member of the Investment Industry Regulatory Organization of Canada (IIROC) and Canadian Investor Protection Fund (CIPF). Wells Fargo Securities, LLC's research analysts may participate in company events such as site visits but are generally prohibited from accepting payment or reimbursement by the subject companies for associated expenses unless pre-authorized by members of Research Management.

Hong Kong - This report is issued and distributed in Hong Kong by Wells Fargo Securities Asia Limited ("WFSAL"), a Hong Kong incorporated investment firm licensed and regulated by the Securities and Futures Commission to carry on types 1, 4, 6 and 9 regulated activities (as defined in the Securities and Futures Ordinance (Cap. 571 The Laws of Hong Kong), "the SFO"). This report is not intended for, and should not be relied on by, any person other than professional investors (as defined in the SFO). Any securities and related financial instruments described herein are not intended for sale, nor will be sold, to any person other than professional investors (as defined in the SFO). The author or authors of this report is or are not licensed by the Securities and Futures Commission. Professional investors who receive this report should direct any queries regarding its contents to Kelly Chiang and Mandy Wan at WFSAL (email: wfsalresearch@wellsfargo.com).

Japan - This report is distributed in Japan by Wells Fargo Securities (Japan) Co., Ltd, registered with the Kanto Local Finance Bureau to conduct broking and dealing of type 1 and type 2 financial instruments and agency or intermediary service for entry into investment advisory or discretionary investment contracts. This report is intended for distribution only to professional investors (Tokutei Toushika) and is not intended for, and should not be relied upon by, ordinary customers (Ippan Toushika).

The ratings stated on the document are not provided by rating agencies registered with the Financial Services Agency of Japan (JFSA) but by group companies of JFSA-registered rating agencies. These group companies may include Moody's Investors Services Inc., Standard & Poor's Rating Services and/or Fitch Ratings. Any decisions to invest in securities or transactions should be made after reviewing policies and methodologies used for assigning credit ratings and assumptions, significance and limitations of the credit ratings stated on the respective rating agencies' websites.

About Wells Fargo Securities
Wells Fargo Securities is the trade name for the capital markets and investment banking services of Wells Fargo & Company and its subsidiaries, including but not limited to Wells Fargo Securities, LLC, a U.S. broker-dealer registered with the U.S. Securities and Exchange Commission and a member of NYSE, FINRA, NFA and SIPC, Wells Fargo Prime Services, LLC, a member of FINRA, NFA and SIPC, Wells Fargo Securities Canada, Ltd., a member of IIROC and CIPF, Wells Fargo Bank, N.A. and Wells Fargo Securities International Limited, authorized and regulated by the Financial Conduct Authority.

Key Takeaways

Earlier today, we hosted a Virtual Investor Update Meeting with NiSource's CEO Joe Hamrock and CFO Donald Brown. NI published its expected impact from COVID-19 (click here) and some were surprised with $0.00-$0.10 per share negative impact on 2021 EPS. Management clarified that they tried to be conservative and that they see a recovery in margin from April lows and they expect full recovery by the end of the year. 2021 EPS will be a base year for future 5-7% long term growth and NI plans to provide 2021 EPS guidance on the 3Q20 earnings call together with an update on the long-term outlook. Management remains focused on cost reduction to mitigate the impact of COVID-19 on revenues and highlighted that they look at traditional cost management but also some structural changes could by under way and they could be more long term in nature.

Other Tidbits

Despite strong liquidity post recent debt issuance and planned asset sale, management sees a need for issuance on ATM to get to targeted FFO/Debt metrics. NI maintained its previously provided $200-$300MM range of ATM equity issuance in 2020. Sale of Columbia Gas of MA remains on track, with close expected by the end of 3Q20. Management doesn't see a risk to 2021 capex due to COVID-19 at this time. An increase in bad debt has not been material so far.

Regulatory Update

Earlier in May, NIPSCO filed for a deferral of COVID-19 expenses and NI plans to file for deferral in OH. Despite the lockdown, NI filed rate cases in Pennsylvania and Maryland with new rates expected in 2021. NI requested a $100.4MM rate increase in PA (based on ROE of 10.95% and equity/capital structure of 54.19%) and a $6.5MM rate increase in Maryland (based on ROE of 10.95% and equity/capital structure of 52.63%).

Valuation Method and Risk Statement

Risks include, but are not limited to, the following: changes to the regulatory environment, ability to achieve favorable returns on investment projects, and ability to continue to reinvest in the business for growth. We use comparable company multiples in our sum-of-the-parts EV/EBITDA and P/E valuations. Our price target is derived using an average of sum-of-the-parts EV/EBITDA and P/E valuations and DDM.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 28 May 2020 08:19 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	48%	32%
Neutral	FSR is between -6% and 6% of the MRA.	40%	28%
Sell	FSR is > 6% below the MRA.	13%	20%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 March 2020.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor’s individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse

Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the [European Central Bank (ECB)] and regulated by the BaFin and the ECB. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Securities France S.A. UBS Securities France S.A. is regulated by the ACPR (Autorité de Contrôle Prudentiel et de Résolution) and the Autorité des Marchés Financiers (AMF). Clients of UBS Securities Australia Ltd: Distributed by UBS Securities Australia Ltd (ABN 62 008 586 481 and holder of Australian Financial Services License No. 231098). This Document contains general information and/or general advice only and does not constitute personal financial product advice. As such, the Information in this document has been prepared without taking into account any investor's objectives, financial situation or needs, and investors should, before acting on the Information, consider the appropriateness of the Information, having regard to their objectives, financial situation and needs. If the Information contained in this document relates to the acquisition, or potential acquisition of a particular financial product by a 'Retail' client as defined by section 761G of the Corporations Act 2001 where a Product Disclosure Statement would be required, the retail client should obtain and consider the Product Disclosure Statement relating to the product before making any decision about whether to acquire the product. The UBS Securities Australia Limited Financial Services Guide is available at: www.ubs.com/ecs-research-fsg. **New Zealand:** Distributed by UBS New Zealand Ltd. UBS New Zealand Ltd is not a registered bank in New Zealand. You are being provided with this UBS publication or material because you have indicated to UBS that you are a "wholesale client" within the meaning of section 5C of the Financial Advisers Act 2008 of New Zealand (Permitted Client). This publication or material is not intended for clients who are not Permitted Clients (non-permitted Clients). If you are a non-permitted Client you must not rely on this publication or material. If despite this warning you nevertheless rely on this publication or material, you hereby (i) acknowledge that you may not rely on the content of this publication or material and that any recommendations or opinions in such this publication or material are not made or provided to you, and (ii) to the maximum extent permitted by law (a) indemnify UBS and its associates or related entities (and their respective Directors, officers, agents and Advisors) (each a 'Relevant Person') for any loss, damage, liability or claim any of them may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material and (b) waive any rights or remedies you may have against any Relevant Person for (or in respect of) any loss, damage, liability or claim you may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material. **Korea:** Distributed in Korea by UBS Securities Pte. Ltd., Seoul Branch. This report may have been edited or contributed to from time to time by affiliates of UBS Securities Pte. Ltd., Seoul Branch. This material is intended for professional/ institutional clients only and not for distribution to any retail clients. **Malaysia:** This material is authorized to be distributed in Malaysia by UBS Securities Malaysia Sdn. Bhd (Capital Markets Services License No.: CMSL/A0063/2007). This material is intended for professional/institutional clients only and not for distribution to any retail clients. **India:** Distributed by UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. It provides brokerage services bearing SEBI Registration Number: INZ000259830; merchant banking services bearing SEBI Registration Number: INM000010809 and Research Analyst services bearing SEBI Registration Number: INH000001204. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: http://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html **Taiwan:** Except as otherwise specified herein, this material may not be distributed in Taiwan. Information and material on securities/instruments that are traded in a Taiwan organized exchange is deemed to be issued and distributed by UBS Securities Pte. LTD., Taipei Branch, which is licensed and regulated by Taiwan Financial Supervisory Commission. Save for securities/instruments that are traded in a Taiwan organized exchange, this material should not constitute "recommendation" to clients or recipients in Taiwan for the covered companies or any companies mentioned in this document. No portion of the document may be reproduced or quoted by the press or any other person without authorisation from UBS. **Indonesia:** This report is being distributed by PT UBS Sekuritas Indonesia and is delivered by its licensed employee(s), including marketing/sales person, to its client. PT UBS Sekuritas Indonesia, having its registered office at Wisma GKBI, 22nd floor, JL. Jend. Sudirman, kav.28, Jakarta 10210, Indonesia, is a subsidiary company of UBS AG and licensed under Capital Market Law no. 8 year 1995, a holder of broker-dealer and underwriter licenses issued by the Capital Market and Financial Institution Supervisory Agency (now Otoritas Jasa Keuangan/OJK). PT UBS Sekuritas Indonesia is also a member of Indonesia Stock Exchange and supervised by Otoritas Jasa Keuangan (OJK). Neither this report nor any copy hereof may be distributed in Indonesia or to any Indonesian citizens except in compliance with applicable Indonesian capital market laws and regulations. This report is not an offer of securities in Indonesia and may not be distributed within the territory of the Republic of Indonesia or to Indonesian citizens in circumstance which constitutes an offering within the meaning of Indonesian capital market laws and regulations.

The disclosures contained in research documents produced by UBS AG, London Branch or UBS Europe SE shall be governed by and construed in accordance with English law.

Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates ("UBS") with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and Research) and among

its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

Goldman Sachs & Co. LLC

We reiterate our Buy rating on NiSource (NI) after our virtual meeting with senior management. While we recognize concerns related to a lack of clarity on 2021 earnings power (guidance expected with 3Q20 results), we view current valuations somewhat accounting for a potentially bearish scenario and believe normalizing demand and robust investment pipeline support a relatively unchanged 2022 earnings profile. Our 2020-2022 EPS estimates of $1.27/$1.38/$1.49 remain unchanged, which already incorporate our forecasted -$0.09 and -$0.05 net impact (2020/2021) from COVID-19 that fall within the company's guidance impact range.

Below are the key takeaways from our virtual meeting:

- **Cost mitigation includes sustainable efficiencies.** While some cost controls (especially in 2020) reflect more short-term timing of various expenses, management noted that a bulk of the items stem from items planned prior to the 2018 gas incident, including corporate function consolidation and ongoing cost structure adjustments. NI's 2021 mitigation plan of $0.05-$0.10 accounts for certain delays in 2020 expenses.
- **NI expects a constructive outcome on COVID cost deferral proposals.** With Pennsylvania, Virginia, and Maryland already having approved incremental bad debt deferral and/or other COVID related costs, management looks to receive a similar decision in the proposal for Indiana and Ohio. In the $0.00 to -$0.10 net EPS impact guidance, they assume constructive outcomes at both jurisdictions.
- **While NI did not provide formal 2020/2021 guidance, prior management commentary serves as a guide.** On the 4Q19 earnings call, management pulled their 2020 EPS guidance range of $1.36-$1.40 given the announced sale of its MA gas utility, but commented that 2021 earnings could be at or above the prior 2020 guidance range. They still view this as a fair base to assess the ultimate COVID-19 impact and hope to provide formal 2021 guidance with 3Q20 earnings.
- **No bulk equity needed until renewable financing.** NI's financing plans through 2021 do not incorporate any assumed recovery of the $300mn in property insurance associated with the MA gas incident. They also do not expect a need to issue bulk equity unless to finance the purchase of owned renewables, either from the recent Indiana RFP or the 50% future ownership of the Rosewood (100 MW) and Crossroads (300 MW) wind plants (expected in 2023).

They continue to view RFP-based generation ownership potential as incremental upside, consisting of up to 50% of the 1.6 GW capacity opportunity. We note NI would need to file a base rate case to add any generation into rate base.

Our $28 12-month price target (unchanged) embeds 20x our 2021 EPS estimate of $1.38. Our target reflects a 24% total return, with the stock currently trading at a 1.0x P/E discount to smid-cap peers. Key risks include (1) legal and regulatory risks, (2) earnings/cash impact due to COVID-19, (3) higher than expected O&M, (4) electricity demand and customer growth, and (5) financing.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Financial advisory disclosure

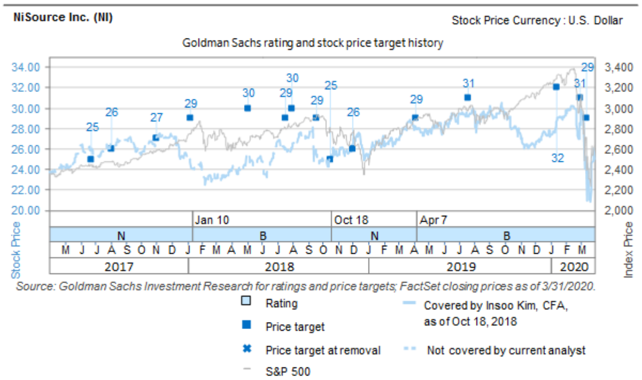
	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	46%	39%	15%	65%	57%	52%

As of April 9, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,023 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage Universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian

Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Further information on the covered companies referred to in this research may be obtained from Goldman Sachs (Singapore) Pte. (Company Number: 198602165W). **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Ouvidoria Goldman Sachs Brasil: 0800 727 5764 e/ou ouvidoriagoldmansachs@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by either Goldman Sachs Canada Inc. or Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

NiSource

NI-NYSE	Rating	Price: May-22	Target	Total Rtn
	Outperform	$23.09	$27.00	21%

Incrementally Incremental

Bottom Line: NiSource released an investor update including management's current forecast for the net impact to 2020 and 2021 earnings from the COVID-19 pandemic.

Overall, we believe the update will be viewed as modestly disappointing and will likely raise incremental questions on what the company is seeing regarding the lingering COVID-19 and cost impacts embedded in the company's 2021 impact. That said, we believe the stock's nearly 500 bps under-performance (since 4/29) and current multiple (3% discount) largely reflects these uncertainties.

We reiterate our Outperform rating and $27 target price.

Key Points

In front of investor meetings this week, NiSource released an incremental COVID-19 update including a base case that calls for roughly a $30-40mm margin reduction in 2020 and $0-25mm margin reduction in 2021. Including other COVID-19 costs, total unmitigated non-GAAP costs are estimated to range from ($0.15-0.20)/share in 2020 and ($0-0.10)/share in 2021.

Management believes it can mitigate up to $0.10-0.15/share in 2020 and $0.05-0.10/share in 2021 through cost control, regulatory mechanisms and organizational repositioning efforts.

Although the net impact could suggest only an incremental $0.05 of potential EPS drag, management seems to be striking a more cautious stance suggesting a $0.0-0.10/share impact for both 2020 and 2021 and a recovery that extends into at least the first half of 2021. We believe the company's range likely includes some flexibility regarding the potential timing of regulatory recovery as well as financing costs associated with bridging lower operating cash flows.

We are reducing our 2020-22 EPS estimates to $1.30, $1.33 and $1.45, respectively, to reflect a more conservative sales outlook and a slightly longer time frame to execute its organizational repositioning efforts post the upcoming sale of Columbia Gas Massachusetts (CGM) in 3Q20.

Acknowledging the near-term uncertainties, we continue to find NI share attractive relative to the company's above-average 5-7% long-term EPS CAGR. In addition, the company has several positive catalysts upcoming in the Fall, including the completion of its sale of CGM to Eversource in 3Q20 as well as the company re-initiating its 2021 EPS guidance, which will serve as a base for its 5-7% above-average EPS CAGR.

Key Changes

Estimates	2020E	2021E
EPS	$1.30	$1.33
Previous	*$1.35*	*$1.40*
EBIT	$1,087	$1,155
Previous	*$1,113*	*$1,188*

Scenarios

Valuation

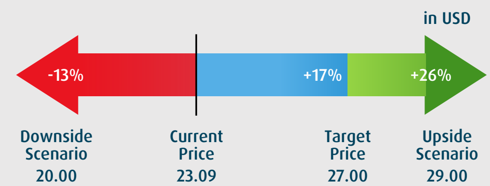
Our $27 target price is the product of a P/E-based sum of the parts. We utilize a regulated average multiple using 2022E EPS as base valuation and then make specific adjustments to reflect our current view of the fundamental outlook. For NI, we have removed EPS for its MA gas business from our P/E valuation and instead include only the asset value (1x equity rate base) in our SOTP framework.

Upside Scenario 29.00

Our upside scenario reflects continued multiple expansion associated with the company's premium and above-average earnings and dividend growth profile.

Downside Scenario 20.00

Our downside scenario reflects a tightening monetary policy and a deceleration of the company's rate base growth.



Key Catalysts

Initial indicative pricing in its second renewable RFP in IN. Completing the sale of Columbia Gas of Massachusetts to Eversource. Potentially, capital spending and growth rate update in 2H20 given clarity in the aforementioned RFP and recent rate orders in MA and IN.

Company Description

NiSource, Inc. is a regulated utility holding company, serving approximately 3.5 million natural gas customers and 500,000 electric customers across seven states. Through its Columbia Gas and NIPSCO brands, it provides natural gas, electricity, and other products and services. The company was founded in 1987 and is headquartered in Merrillville, Indiana.

NI-NYSE Research

Glossary

Company Models

Take 2… "Action"

In front of investor meetings this week, NiSource released an investor update including management's current forecast for the net impact to 2020 and 2021 earnings from the COVID-19 pandemic.

Overall, we believe the update will be viewed as modestly disappointing and will likely raise incremental questions on what the company is seeing regarding the lingering COVID-19 and cost impacts embedded in the company's 2021 impact report. That said, we believe the stock's nearly 500 bps underperformance (since 4/29) and current multiple (3% discount) largely reflects these uncertainties and investors will now likely look to management for incremental details behind the company's additional disclosures for comfort.

For the month of April (which could prove to be the worst for the year), management estimates a net impact of $8.1 million pre-tax or just under 2c/share with gas distribution sales down 4% reflecting decoupling (0.3% annualized) and electric operation sales down 26% (2.3% annualized).

Although management indicated volumes had begun to recover by mid- to late-May off April lows, assuming a non-specified gradual recovery that extends into 1H21 and an assumption of favorable regulatory treatment on COVID-19 related costs (primarily at NIPSCO), **management's base case calls for roughly a $30-40 million margin reduction in 2020 and $0-25 million margin reduction in 2021**. When including other COVID-19 costs including bad debt, lost late payment fees and other operational expenses, total unmitigated non-GAAP costs are estimated to range from ($0.15-0.20)/share in 2020 and ($0-0.10)/share in 2021.

Partially offsetting these impacts and in an effort to mitigate the unallocated costs associated with the company's pending sale of Columbia Gas Massachusetts (CGM) to Eversource, **management believes it can mitigate up to $0.10-0.15/share in 2020 and $0.05-0.10/share in 2021 through cost control**, regulatory mechanisms and organizational repositioning efforts.

Although the net impacts above would suggest only an incremental $0.05 of potential EPS drag relative to its previous, pre-COVID-19 expectation that 2021 would be "at or above" 2020's initial $1.36-1.40/share guidance (issued on 3Q19 call but withdrawn with its 4Q19 release) **management seems to be striking a more cautious stance suggesting a $0.0-0.10/share** impact in both years and a recovery that extends into at least the first half of 2021. We believe the company's range likely includes some flexibility regarding the potential timing of regulatory recovery as well as financing costs associated with bridging lower operating cash flows.

We would hope to get more clarity on the cadence and magnitude of the demand recovery embedded in the company's current outlook as well as a better sense of the incremental costs and recovery assumptions, especially at NIPSCO. While not precise, we see bad debt and other costs ranging from $40-55 million in 2020 to $0-$22 million in 2021, which would imply a full-year sales reduction at NIPSCO in the lower-single-digit range (Exhibit 1).

BMO Capital Markets

Exhibit 1: Net Margin & Cost Impacts for 2020 & 2021

	2020		2021	
	Low	High	Low	High
COVID Base Case EPS Impact	**($0.15)**	**($0.20)**	**$0.00**	**($0.10)**
Pre/Tax Revenue	($70)	($94)	$0	($47)
Base-Case Margin Impact	($30)	($40)	$0	($25)
Implied Bad-Debt & Other Costs	($40)	($54)	$0	($22)
Mitigation Efforts	**$0.10**	**$0.15**	**$0.05**	**$0.10**
Net Impacts	**($0.05)**	**($0.10)**	**($0.05)**	**($0.10)**

* Assumes primary impact at NIPSCO

Source: BMO Capital Markets

The company filed a petition with the Indiana commission (IURC) in early May for the ability to defer lost revenue and costs and the establishment of a bad debt tracker. Management has asked for the commission to respond by July 15th.

We are reducing our 2020-22 EPS estimates to $1.30, $1.33 and $1.45, respectively, to reflect a more conservative sales outlook and a slightly longer time frame to execute its organizational repositioning efforts post the sale of CGM.

We Reiterate Our Outperform Rating and $27 Target Price

Acknowledging the near-term uncertainties, we continue to find NI shares attractive relative to the company's above-average 5-7% long-term EPS CAGR, which is supported by a visible $30 billion investment backlog at both its natural gas and electric operations with minimal regulatory lag (75-80% converted to earnings within 12-18 months).

The company has several positive catalysts upcoming in the Fall, including the completion of its sale of Columbia Gas Massachusetts to Eversource in 3Q20 as well as the company re-initiating its 2021 EPS guidance, which will serve as a base for its 5-7% EPS CAGR.

We also see a bias to the upper end of this 5-7% growth range as the company finalizes its renewable RFPs to replace its retiring coal fleet at NIPSCO as well as other capex opportunities including grid modernization spending. Management should have visibility on both these opportunities in the Fall also and as such, we would look for the company to extend its 5-7% growth through 2024 (from 2022) to incorporate these new growth drivers.

IMPORTANT DISCLOSURES

Analyst's Certification

I, James M. Thalacker, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosures

Disclosure 9B: BMO Capital Markets makes a market in NiSource Inc in United States.

Methodology and Risks to Target Price/Valuation for NiSource Inc (NI-NYSE)

Methodology: Our $27 target price is the product of a P/E-based sum-of-the-parts (SOTP) analysis of the company's primary regulated operating companies. We utilize a regulated group-average multiple based on 2022E EPS as our initial basis for valuation and then make adjustments specific to each jurisdiction to reflect our current view of the fundamental outlook.

Risks: NI's regulated profile exposes the company to business risk including but not limited to federal and state regulatory risk, federal and state political risk, environmental policy, interest rate risk, access to capital markets, construction risk, changes in customer demand trends, changes in customer affordability, extreme weather, natural disaster, and equipment failure.

~ As of April 1, 2019.

Ratings Key (as of October 2016)

We use the following ratings system definitions:
OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis;
Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis;
Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis;
(S) = Speculative investment;
Spd = Suspended - Coverage and rating suspended until coverage is reinstated;
NR = No Rated - No rating at this time; and
R = Restricted - Dissemination of research is currently restricted.

The total return potential, target price and the associated time horizon is 12 months unless otherwise stated in each report. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small Cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

General Disclaimer

"BMO Capital Markets" is a trade name used by BMO Financial Group for the wholesale banking businesses of Bank of Montreal, BMO Harris Bank N.A. (member FDIC), Bank of Montreal Europe p.l.c, and Bank of Montreal (China) Co. Ltd, the institutional broker dealer business of BMO Capital Markets Corp. (Member FINRA and SIPC) and the agency broker dealer business of Clearpool Execution Services, LLC (Member FINRA and SIPC) in the U.S., and the institutional broker dealer businesses of BMO Nesbitt Burns Inc. (Member Investment Industry Regulatory Organization of Canada and Member Canadian Investor Protection Fund) in Canada and Asia, Bank of Montreal Europe p.l.c. (authorised and regulated by the Central Bank of Ireland) in Europe and BMO Capital Markets Limited (authorised and regulated by the Financial Conduct Authority) in the UK and Australia. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. Nothing herein constitutes any investment, legal, tax or other advice nor is it to be relied on in any investment or decision. If you are in doubt about any of the contents of this document, the reader should obtain independent professional advice. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

This report is directed only at entities or persons in jurisdictions or countries where access to and use of the information is not contrary to local laws or regulations. Its contents have not been reviewed by any regulatory authority. BMO Capital Markets does not represent that this report may be lawfully distributed or that any financial products may be lawfully offered or dealt with, in compliance with regulatory requirements in other jurisdictions, or pursuant to an exemption available thereunder.

To Australian residents: BMO Capital Markets Limited is exempt from the requirement to hold an Australian financial services licence under the Corporations Act and is regulated by the UK Financial Conduct Authority under UK laws, which differ from Australian laws. This document is only intended for wholesale clients (as defined in the Corporations Act 2001) and Eligible Counterparties or Professional Clients (as defined in Annex II to MiFID II).

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Colin Hamilton, Alexander Pearce, Raj Ray, David Round or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and distributed by BMO Capital Markets Limited or Bank of Montreal Europe Plc and is subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom and the Central Bank of Ireland (CBI) in Ireland. FCA and CBI regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore each of BMO Capital Markets Limited and Bank of Montreal Europe Plc will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To E.U. Residents: In an E.U. Member State this document is issued and distributed by Bank of Montreal Europe plc which is authorised and regulated in Ireland and operates in the E.U. on a passported basis. This document is only intended for Eligible Counterparties or Professional Clients, as defined in Annex II to "Markets in Financial Instruments Directive" 2014/65/EU ("MiFID II").

Singapore: This disclaimer applies to research reports distributed by the Private Banking unit of Bank of Montreal, Singapore Branch ("BMO SG"), an exempt financial adviser under the Financial Advisers Act (Cap. 110) of Singapore ("FAA") only. This research report is prepared by BMO Capital Markets and distributed by BMO SG pursuant to an arrangement under regulation 32C of the Financial Advisers Regulations of Singapore. This research report is distributed by BMO SG solely to persons who qualify as accredited investors as defined in the FAA only, and is not intended for and may not be circulated to the general public. This report and any information contained in this report shall not be disclosed to any other person. If you are not an accredited investor, please disregard this report. BMO SG does not accept legal responsibility for the contents of the report. Recipients should contact BMO SG at 65-6535 2323 for matters arising from, or in connection with the report.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

To Israeli residents: BMO Capital Markets is not licensed under the Israeli Law for the Regulation of Investment Advice, Investment Marketing and Portfolio Management of 1995 (the "Advice Law") nor does it carry insurance as required thereunder. This document is to be distributed solely to persons that are qualified clients (as defined under the Advice Law) and qualified investors under the Israeli Securities Law of 1968. This document represents the analysis of the analyst but there is no assurance that any assumption or estimation will materialize.

These documents are provided to you on the express understanding that they must be held in complete confidence and not republished, retransmitted, distributed, disclosed, or otherwise made available, in whole or in part, directly or indirectly, in hard or soft copy, through any means, to any person, except with the prior written consent of BMO Capital Markets.

Americas Utilities: Recent CMA transaction settlement details multi-year rate plan for ES

Insoo Kim, CFA
+1(212)902-0459 | insoo.kim@gs.com
Goldman Sachs & Co. LLC

Goldman Sachs & Co. LLC

Rebecca Yuan
+1(212)357-4977 |
rebecca.yuan@gs.com
Goldman Sachs & Co. LLC

On July 2, NiSource (NI, Buy) and Eversource (ES, Neutral), along with several state agencies including the MA Attorney General's Office and MA Department of Energy Resources, filed a settlement agreement regarding the proposed NI sale of Columbia Gas of Massachusetts (CMA) to ES for $1.1bn. The signatories have requested that the MA Department of Public Utilities (DPU) issue its final decision by September 30.

For NI, the agreement calls for the company to pay $56mn (in lieu of penalties) to finalize all remaining issues related to the 2018 Merrimack incident, with any current/future lawsuits, claims, and other proceedings considered resolved and terminated.

For ES, the agreement includes a multi-year rate plan (Docket #20-59) for its proposed ownership of CMA, with the following key items:

- **8-year rate case stay-out** ending 10/31/2028.
- **Rate base (at close of transaction):** $995mn after a downward adjustment from the $1.13bn rate base calculated on 12/31/2019 test year.
- **Cost of capital:** 9.7% ROE and 53.25% equity ratio, consistent with settlement terms filed in CMA's 2018 rate case (subsequently withdrawn); earnings sharing at above 12% earned ROE.
- **Capital spend:** ~$3bn from 2021-2030 - representing ~10% CAGR - with around 2/3 eligible for recovery through Gas System Enhancement Program (GSEP) rider.
- **Rate base true-up:** Once on 11/1/2024 and the other on 11/1/2027, to include into rate base non-GSEP capital while inserting GSEP assets into base rates.

Our $28 12-month price target for NI embeds 20x our 2021 EPS estimate of $1.38. Our target reflects a 24% total return, with the stock currently trading at a 1.0x P/E discount to smid-cap peers. Key risks include (1) legal and regulatory risks, (2) earnings/cash impact due to COVID-19, (3) higher than expected O&M, (4) electricity demand and customer growth, and (5) financing.

Our $88 12-month price target for ES is based on a 22.5x P/E applied to our 2021 EPS. Key upside risks include improved offshore wind return forecasts, reduced permitting/construction hurdles, indications of additional rate base investments. Key downside risks include ineffective cost management, slowing rate base growth, dilutive acquisitions, and delays/cost overruns in ES's offshore wind investments.

Disclosure Appendix

Reg AC

I, Insoo Kim, CFA, hereby certify that all of the views expressed in this report accurately reflect my personal views about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Financial advisory disclosure

Goldman Sachs and/or one of its affiliates is acting as a financial advisor in connection with an announced strategic matter involving the following company or one of its affiliates: Eversource Energy, Nisource Inc.

The rating(s) for Eversource Energy and NiSource Inc. is/are relative to the other companies in its/their coverage universe:

Ameren Corp., American Electric Power, American Water Works, Atmos Energy Corp., Avangrid Inc., CMS Energy Corp., Centerpoint Energy Inc., Clearway Energy Inc., Consolidated Edison Inc., DTE Energy Co., Dominion Energy Inc., Duke Energy Corp., Edison International, Entergy Corp., Essential Utilities Inc., Evergy Inc., Eversource Energy, Exelon Corp., FirstEnergy Corp., NRG Energy Inc., NextEra Energy Inc., NextEra Energy Partners, NiSource Inc., OGE Energy Corp., PG&E Corp., PPL Corp., Pinnacle West Capital Corp., Portland General Electric Co., Public Service Enterprise Group, Sempra Energy, Southern Co., WEC Energy Group, Xcel Energy Inc.

Goldman Sachs is a specialist in the relevant securities and will at any given time have an inventory position, "long" or "short," and may be on the opposite side of orders executed on the relevant exchange: Eversource Energy ($84.57)

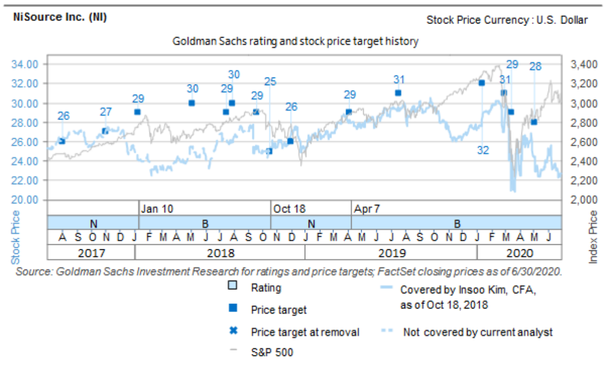
Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

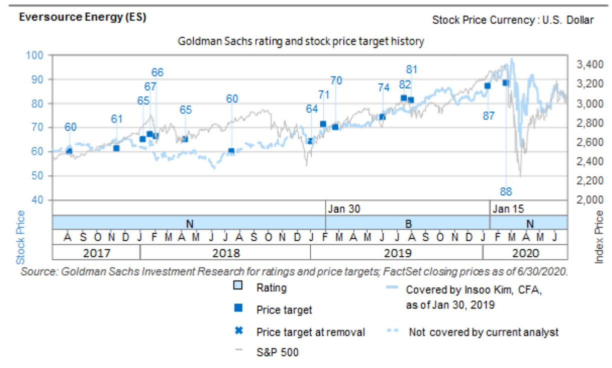
	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	47%	36%	17%	65%	58%	54%

As of July 1, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,015 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure

information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Further information on the covered companies referred to in this research may be obtained from Goldman Sachs (Singapore) Pte. (Company Number: 198602165W). **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Ouvidoria Goldman Sachs Brasil: 0800 727 5764 e/ou ouvidoriagoldmansachs@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by either Goldman Sachs Canada Inc. or Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

NI: Opportunity for Earnings Acceleration

Stock Rating/Industry View: Equal Weight/Positive
Price Target: USD 24.00
Price (04-Aug-2020): USD 24.15
Potential Upside/Downside: -1%
Tickers: NI

NI provided Q2 results, set 2021 guidance, and provided insight into LT earnings trajectory on the call. We reiterate our Equal Weight rating and $24 price target as the company looks to finalize the Columbia Gas of MA sale and reignite long-term growth with a slate of renewable investments.

- **Q2 adj EPS of $0.13 (vs consensus and Barclays $0.07).**

- **Management set 2021 adj EPS guidance of $1.28 to $1.36.** While this figure is lower than previously pulled FY20 guidance of $1.36-$1.40, the new FY21 guidance includes a base case ~-$0.05 impact from COVID-19, based on the assumption that a gradual recovery will continue into 1H 2021.

- **COVID-19 impact in Q2 was -$0.06**, or $30 million, with most of the demand impact in April. This headwind was completely offset by non-SMS related O&M reductions in the quarter. Management states

Projected rate base growth better than expected

Projected ratebase CAGR of +10-12% through ’24 inclusive of renewables (off ’21 base) was provided by the company for the first time, as a preview into newly announced September Investor Day. Overall ratebase appears better than expected to the tune of ~$0.7 Bn by ’24 (and ratably higher in interim years). For instance, ’22 ratebase is ~$0.4Bn higher than what we were modeling. While the $1.8-1.9bn annual capex range is maintained and extended (admittedly is without CMA and hence implicitly a tad higher), the company expects incremental an $1.8-2.0bn primarily in 2022 and 2023 related to electric generation strategy replacing coal with renewables (expect 50% ownership of replacement capacity). This incremental renewable capex is higher than our estimate of roughly $1.5bn. In turn, we note the guidance stresses that the EPS CAGR is now in excess of the previously articulated +5-7% (off 2019 this would have implied *better than* $1.87 vs our est of $1.74 by ‘24). We estimate with additional renewables that EPS would be closer to high end, but not necessarily above (~$1.80-1.85 range). Look for further details on call. Maintain Neutral as we see execution challenges against higher guidance. Balanced risk/reward. Expect positive reaction.

Initiated ’21 EPS guidance is a bit weaker

NI initiated 2021 adj. EPS guidance of $1.28-1.36 (vs our / consensus $1.35 / $1.36) implying 2% negative revisions (-4c) to consensus at the mid-point. We note the ’21 guidance range is below the company’s ’21 guidance floor of $1.36-1.40 put into effect following the CMA sale announcement pre-COVID. Mgmt. highlights the new ’21 guidance includes its COVID base case scenario (-5c net EPS impact in ’21) outlined in its last investor presentation. This ’21 guidance comes earlier than expected as NI previously disclosed it would likely wait to announce ’21 guidance until the 3Q update or shortly thereafter. Despite the higher ratebase projections, ongoing lag from COVID remains an overhang on the shares and we see risks to ’22 EPS given lower than anticipated ’21 EPS guidance. However, the new LT EPS growth range above its previous commitment of +5-7% EPS growth should help quell these concerns on near-term execution. Ultimately, pressure on '21 and '22 will see earned ROE pressures but are transient in nature, in our view. '23 into '24 should see a full year of new rates with step-up of ratebase.

Financing remains the focus; don’t expect blocks until ‘23

Mgmt. anticipates providing a more explicit update by 9/29 Analyst Day, at which point the company will publish commercial deals on almost all committed renewables. We note mgmt. does not anticipate more block equity issuance but for a potential convert prior to the ’23 capex uplift to pay for additional renewables. Overall, reason for uplift to this total amount of presumed award for ownership under NI renewable deal is higher than previously contemplated. Recall, NI previously noted that new wind build-own-transfer (BOT) JVs would include 50% tax equity partner while Solar BOT JVs would include a 30% tax equity partner: the latest update suggests that the tax equity would only be ~33% of total capital structure, a key part of the reason behind positive ratebase revisions (without knowing wind/solar balance yet).

Price objective basis & risk

NiSource Inc (NI)

Our $25 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2022 forward P/E multiples of 15.5x for gas utilities and 16.9x for electric utilities with an inline mult for gas utilities with just weather normalization, a 0.5x prem for gas utes with revenue normalization (prev 0x), and a 1.0x premium for the electric utility's strong growth rates (we factor in BOT in '24 EPS) but acknowledgement of industrial risk (prev 2x). We note that electric / gas peer P/E multiples are grossed up by 5% / 5.1% to reflect capital appreciation across the sector. We strip value from Columbia Gas of MA given the pending sale to close in 3Q20. We subtract the value of excess holding company debt at the parent not supporting the utility opcos. We believe NI's 5-7% EPS/dividend growth outlook, attractive regulated earnings profile and constructive legislation across NI's service territories are under-estimated given its discounted multiple versus peers.

Downside risks to our PO are a sustained period of economic weakness pressuring customer growth, interest rate increases, high natural gas prices, financing plan updates, unforeseen costs associated with the MA incident, and challenging steel production economics in Indiana.

Equity Investment Rating Distribution: Global Group (as of 30 Jun 2020)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	1632	52.21%	Buy	1031	63.17%
Hold	711	22.74%	Hold	444	62.45%
Sell	783	25.05%	Sell	407	51.98%

* Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

***INCOME RATINGS*, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend.** *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

General Investment Related Disclosures:
Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.
This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.
Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including,

among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

UK Readers: The protections provided by the U.K. regulatory regime, including the Financial Services Scheme, do not apply in general to business coordinated by BofA Securities entities located outside of the United Kingdom.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

Copyright and General Information:

Materials prepared by BofA Global Research personnel are based on public information. Facts and views presented in this material have not been reviewed by, and may not reflect information known to, professionals in other business areas of BofA Securities, including investment banking personnel. BofA Securities has established information barriers between BofA Global Research and certain business groups. As a result, BofA Securities does not disclose certain client relationships with, or compensation received from, such issuers. To the extent this material discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this material. BofA Global Research personnel's knowledge of legal proceedings in which any BofA Securities entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this material is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Securities in connection with the legal proceedings or matters relevant to such proceedings.

This information has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of BofAS any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Securities and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This information may contain links to third-party websites. BofA Securities is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this information and is not incorporated by reference. The inclusion of a link does not imply any endorsement by or any affiliation with BofA Securities. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.

CREDIT SUISSE

NiSource Inc.

NI

2Q20 Beat, 2021 Guidance Initiated

Target price (12M, US$)
26.00
Outperform

Natural Gas | Research Bulletin

- **NI reported a 2Q20 adj. EPS Beat at $0.13** vs. cons $0.08, CS $0.05, and 2Q19 $0.05 driven by cost mitigation efforts and partially offset by financial impacts of COVID19. The company also projects $0.10-$0.15 cost savings this year to offset COVID19 effects (not as front loaded).
- **2021 Guidance Initiated at $1.28-$1.36** (CS $1.33 vs consensus $1.36) that includes the positive impact of new electric generation in Indiana and a (~$0.05) drag from COVID19, and drag from temporary overhead remaining from Columbia Gas of Mass).
- **Columbia Gas of Massachusetts sale remains on track.** On July 2, NI announced that it will pay $56M to settle and resolve the state's investigation into the 2018 Greater Lawrence incident.
- **Cost management and regulatory solutions offset COVID's impact to customer class (~$0.06) in Q2.** Gas margin impact by customer class saw a $0.7M increase in residential and a $4.7M decrease in industrial (vs 2Q19). Electric margin impacts saw a $9.2M and $3.9M decreases to industrial and commercial load respectively, partially offset with a $6.2M increase in residential vs 2Q19. COVID's impact are trending with the company's base case scenario.
- **Base rate filing at Columbia Gas of PA** on 4/24/2020 to support continued replacement of aging pipelines as well as adoption of safety upgrades. The filing includes a $100.4M total annual revenue increase. An order is expected with new rates effective in Jan or Feb 2021. This filing was not a surprise as there was none in 2019 despite typically an annual schedule in PA.
- **Base rate filing at Columbia Gas of MD** filed on May 15th requesting a $6.3M total annual revenue increase ($5M net of infrastructure trackers) in response to replacing aging pipelines and upgrade safety measures. An order is expected on 4Q20 with new rates effective in Dec 2020.
- **2020 Capex Plan Reaffirmed at $1.7B-$1.8B**. Recall the company previously reduced its capital investment plan by $100M to $1.7-$1.8B for 2020 to conserve cash in order to maintain liquidity.
- **No block equity needed in 2020, nor any going forward,** with unchanged plans for $200-$300M annual ATM and $35-$60M employee plan equity (no plans for use of convertible or hybrid financing). Estimated incremental long-term debt for 2020 is $1B-$1.2B. NI continues to target FFO/Debt ~14%-15%.
- **Liquidity Update.** NI's net liquidity available is ~$2B as of June 30th, with ~$2.2B of committed facilities in place which include a ~$1.9B revolving credit facility and ~$0.3B accounts receivable securitization facilities. Debt level is ~$10B as of June 30th and includes ~$8.7B of long-term debt with a weighted average maturity of ~16 years and interest rate of 4.31%. Total debt/total capitalization stands at 63.8% in Q2 vs 61.7% in

** Asterisk signifies initiation or assumption of coverage.*

As of December 10, 2012 Analysts' stock rating are defined as follows:

Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.
Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.
Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.

**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*

Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.
Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.
Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:
Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.
Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.
Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	50%	(32% banking clients)
Neutral/Hold*	37%	(27% banking clients)
Underperform/Sell*	12%	(21% banking clients)
Restricted	1%	

For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource Inc. (NI.N)

Method: We arrive at our $26 target price for NI by applying a 1.5x premium to the gas segment peer 2021 P/E to reflect the constructive regulatory environments with capex trackers in place in the jurisdictions that NI operates. We also apply a 1.5x premium to the average peer electric utility 2021 P/E multiple for NIPSCO Electric utility in Indiana to reflect the favorable ratebase growth profile and regulatory environment in the state. Our OUTPERFORM rating reflects a forecasted total return that is equal the group average.

Risk: Risks to our $26 target price and OUTPERFORM rating are: 1) ROE risk related to the ongoing ratecases 2) continued approvals relating to infrastructure replacement/grid modernization programs 3) commodity risk, 4) interest rate risk, 5) derivative risk, 6) load growth risk particulary in the non-decoupled jurisdictions, 7) weather risk, and 8) environmental and climate change risk, 9) physical infrastructure and cybersecurity risk, 10) continued improvement to gas system operations safety after the 2018 explosion incident in Mass. 11) COVID19 load reductions

Please refer to the firm's disclosure website at https://rave.credit-suisse.com/disclosures/view/selectArchive for the definitions of abbreviations typically used in the target price method and risk sections.

Goldman Sachs & Co. LLC

Rebecca Yuan
+1(212)357-4977 |
rebecca.yuan@gs.com
Goldman Sachs & Co. LLC

NiSource (NI, Buy) reported 2Q20 operating EPS of $0.13, above both GS/FactSet consensus at $0.07/$0.08, driven largely by better cost management. The company also initiated 2021 guidance in the range of $1.28-$1.36 (midpoint $1.32), below GS/FactSet consensus at $1.38/$1.36. From this new base, NI expects 10-12% rate base CAGR through 2024 and EPS CAGR exceeding the previous 5-7% forecast boosted by incremental $1.8-$2bn renewable investments, although we note the company moved away from an annual EPS growth guidance given timing of the bulky generation projects.

Key takeaways: We find the 2021 guidance somewhat disappointing, given prior commentary that implied a range closer to the now-removed 2020 guidance range of $1.36-$1.40. That said, the incremental renewable investment levels are higher than our initial expectations. We expect management clarity on trajectory of EPS growth, as well as equity financing thoughts through 2023.

Key takeaways from NI's release include:

- **The company reiterated its capital investment plan of $1.7-$1.8bn for 2020** and introduced expectation of $1.8-$1.9bn in capital spending for 2021. NI also anticipates incremental capital investment opportunities related to its renewable generation strategy of approximately $1.8 to $2.0 billion, primarily in 2022 and 2023, which represents around 50% ownership of planned replacement for retiring coal capacity.
- **NI reaffirmed its expectations to complete the Columbia Gas of Massachussets (CMA) sale by end of 3Q2020.**
- **NI launched a multi-year initiative** to improve costs and efficiencies of its businesses, with initial expected savings embedded into the company's 2021 guidance.
- **2Q20 performance beat driven largely by cost management which offset COVID-19 related impact**, which totaled -$0.06 for the quarter. The electric segment (Indiana), which makes up ~1/3 of the consolidated company earnings, recorded residential/commercial/industrial load of 13.8%/-6.6%/-32% YoY for 2Q20, or a -$0.01 to -$0.02 EPS impact. NI cited lower late payment/reconnection fees and increased bad debt expenses making up the

other total related costs.

Key topics to monitor on NI's earnings call include (1) additional details on the potential magnitude of electric demand impact by customer class, (2) additional color on the $1.8-$2bn planned renewable investments in Indiana, (3) O&M growth expectations in 2020 and beyond, and (4) trajectory of EPS growth expectations through 2024.

We derive our 12-month target price of $28 which embeds 20.0x blended P/E multiple on 2021E EPS estimate of $1.38. Key risks include (1) legal and regulatory risks, (2) earnings/cash impact due to COVID-19, (3) higher than expected O&M, (4) electricity demand and customer growth, and (5) financing.

Disclosure Appendix

Reg AC

I, Insoo Kim, CFA, hereby certify that all of the views expressed in this report accurately reflect my personal views about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Financial advisory disclosure

Goldman Sachs and/or one of its affiliates is acting as a financial advisor in connection with an announced strategic matter involving the following company or one of its affiliates: NiSource Inc.

The rating(s) for NiSource Inc. is/are relative to the other companies in its/their coverage universe:

Ameren Corp., American Electric Power, American Water Works, Atmos Energy Corp., Avangrid Inc., CMS Energy Corp., Centerpoint Energy Inc., Clearway Energy Inc., Consolidated Edison Inc., DTE Energy Co., Dominion Energy Inc., Duke Energy Corp., Edison International, Entergy Corp., Essential Utilities Inc., Evergy Inc., Eversource Energy, Exelon Corp., FirstEnergy Corp., NRG Energy Inc., NextEra Energy Inc., NextEra Energy Partners, NiSource Inc., OGE Energy Corp., PG&E Corp., PPL Corp., Pinnacle West Capital Corp., Portland General Electric Co., Public Service Enterprise Group, Sempra Energy, Southern Co., WEC Energy Group, Xcel Energy Inc.

Company-specific regulatory disclosures

The following disclosures relate to relationships between The Goldman Sachs Group, Inc. (with its affiliates, "Goldman Sachs") and companies covered by the Global Investment Research Division of Goldman Sachs and referred to in this research.

Goldman Sachs is acting as a manager or co-manager of a pending underwriting: NiSource Inc. ($24.15)

Goldman Sachs has received compensation for investment banking services in the past 12 months: NiSource Inc. ($24.15)

Goldman Sachs expects to receive or intends to seek compensation for investment banking services in the next 3 months: NiSource Inc. ($24.15)

Goldman Sachs had an investment banking services client relationship during the past 12 months with: NiSource Inc. ($24.15)

Goldman Sachs had a non-securities services client relationship during the past 12 months with: NiSource Inc. ($24.15)

Goldman Sachs makes a market in the securities or derivatives thereof: NiSource Inc. ($24.15)

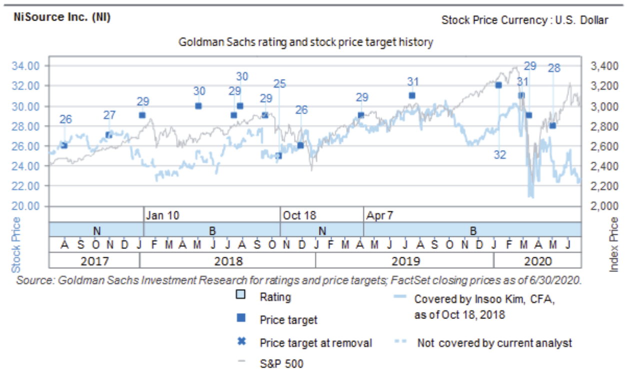
Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	47%	36%	17%	65%	58%	54%

As of July 1, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,015 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian

Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Further information on the covered companies referred to in this research may be obtained from Goldman Sachs (Singapore) Pte. (Company Number: 198602165W). **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Ouvidoria Goldman Sachs Brasil: 0800 727 5764 e/ou ouvidoriagoldmansachs@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by either Goldman Sachs Canada Inc. or Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

Jefferies

EQUITY RESEARCH
NiSource Inc. (NI)

NiSource Inc.
Cost Control Propels 2Q, Eyes on Sept. Investor Day

August 5, 2020

Key Takeaway

NI adj 2Q EPS of 13¢ handedly exceeded our 6¢ forecast & the 8¢ Street mean est.; the beat vs. JEFe touched all divisions & was primarily fueled by sharp opex reductions. NI affirmed its $1.7-$1.8B 2020 capex guidance, announced a virtual Investor Day for Sept. 29th, and initiated $1.28-$1.36 2021 non-GAAP EPS guidance (vs. $1.36 Street mean), which includes an estimated 5¢ COVID-related headwind. The sale of Bay State Gas remains on-track for a 3Q/4Q close.

2Q results. Respective 2Q adj. EPS & EBITDA of 13¢ and $369mm surpassed our 6¢ and $325mm forecasts due primarily to sharp reductions in operating expense; Gas opex declined ~7% y/y while Electric opex dropped ~16% to its lowest quarterly level since 4Q11. Mgmt estimates 6¢ of COVID-related headwinds were absorbed in the period, but offset by non-safety related expense reductions. OCF of $338mm exceeded JEFe by ~ $80mm, due in part to a larger WC benefit (+$40mm), while capex fell short of our forecast ($367mm vs. $460mm JEFe). 2Q Gas segment volumes rose 0.8% y/y (+24% y/y among residential customers), while Electric segment load compressed ~17% y/y (+14% among residential, down ~32% with industrial customers); we believe these are the best high-level representations of COVID's demand impacts across NI's portfolio.

Sept. 29 Virtual Investor Day. Mgmt will host a virtual meeting to detail its business strategy and LT outlook. A preview of the agenda includes 1) the transition from coal to renewable power will deliver a ~90% reduction in NI's GHG emissions (2005-30) and $1.8-$2.0B of incremental 2021-23 renewable investment opportunities remain under evaluation; 2) capex plans will underpin a 10-12% 2021-24 rate base CAGR; 3) 2021 non-GAAP EPS guidance of $1.28-$1.36, including 5¢ of COVID impacts, and a 2021-24 EPS CAGR 'in excess of' its previous 5-7% rate; and 4) updates on its SMS and strategic realignment initiatives.

Regulatory updates. CG of PA's $100.3mm rate case, filed in April, remains before the PA PUC and new rates are expected in Feb. 2021. In May, CG of MD filed for a $6.3mm revenue increase, including $1.3mm of current tracker revenue; new rates are expected in Dec. In July, the IURC approved a 6-year extension of NIPSCO's $950mm gas infrastructure modernization program, with semi-annual TDSIC recovery, and NI secured tax equity financing with WFC for the Rosewater project. Separately, the Bay State sale remains on-track to receive regulatory approval by quarter end and is expected to close shortly thereafter; in lieu of penalties, NI has agreed to pay $56mm into an Energy Relief Fund to settle & resolve all pending matters.

Financing & Liquidity. NI affirmed its $1.7-$1.8B 2020 capital program and expects to use Bay State sale proceeds to repay its $850mm term loan, which expires in March 2021. It ended 2Q with ~$2.0B of liquidity and a total debt/capital ratio of 61.5%; while a goodwill test was performed in 2Q, it did not result in any impairments. Mgmt still anticipates $235-$360mm of 2020 equity through its ATM, ESPP, and 401K programs, implying $227-$352mm to be raised in 2H, and continues to target LT AFFO/Debt of 14-15%.

Exhibit 1 offers greater detail on 2Q performance.

Company Description

NiSource Inc.

NiSource, Inc. (NYSE: NI) is a diversified energy holding company whose subsidiaries provide natural gas, electricity, and other energy products & services to nearly 4mm US customers. The Company operates two business segments: Gas Distribution and Electric. The Gas Distribution operations provide natural gas service and transportation to ~3.5mm residential, commercial and industrial customers in Ohio, Pennsylvania, Virginia, Kentucky, Maryland, Indiana and Massachusetts. The Electric Operations segment provides electric service to ~472,000 customers across 20 counties in the northern part of Indiana. NiSource was founded in 1987, is incorporated under the laws of the state of Delaware, and is headquartered in Merrillville, IN.

Company Valuation/Risks

NiSource Inc.

Our $26 PT and Hold recommendation are derived via Target P/E, Target Yield, DCF, and DDM approaches. Unexpected regulatory outcomes, deviations in customer growth, and project execution present risks to our estimates & PT.

Analyst Certification:

I, Christopher Sighinolfi, CFA, certify that all of the views expressed in this research report accurately reflect my personal views about the subject security(ies) and subject company(ies). I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this research report.

I, Vikram Bagri, certify that all of the views expressed in this research report accurately reflect my personal views about the subject security(ies) and subject company(ies). I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this research report.

I, Ryan Conlin, certify that all of the views expressed in this research report accurately reflect my personal views about the subject security(ies) and subject company(ies). I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this research report.

As is the case with all Jefferies employees, the analyst(s) responsible for the coverage of the financial instruments discussed in this report receives compensation based in part on the overall performance of the firm, including investment banking income. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgement.

Investment Recommendation Record

(Article 3(1)e and Article 7 of MAR)

Recommendation Published	August 5, 2020 , 11:27 ET.
Recommendation Distributed	August 5, 2020 , 11:27 ET.

Explanation of Jefferies Ratings

Buy - Describes securities that we expect to provide a total return (price appreciation plus yield) of 15% or more within a 12-month period.

Hold - Describes securities that we expect to provide a total return (price appreciation plus yield) of plus 15% or minus 10% within a 12-month period.

Underperform - Describes securities that we expect to provide a total return (price appreciation plus yield) of minus 10% or less within a 12-month period.

The expected total return (price appreciation plus yield) for Buy rated securities with an average security price consistently below $10 is 20% or more within a 12-month period as these companies are typically more volatile than the overall stock market. For Hold rated securities with an average security price consistently below $10, the expected total return (price appreciation plus yield) is plus or minus 20% within a 12-month period. For Underperform rated securities with an average security price consistently below $10, the expected total return (price appreciation plus yield) is minus 20% or less within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Jefferies policies.

CS - Coverage Suspended. Jefferies has suspended coverage of this company.

NC - Not covered. Jefferies does not cover this company.

Restricted - Describes issuers where, in conjunction with Jefferies engagement in certain transactions, company policy or applicable securities regulations prohibit certain types of communications, including investment recommendations.
Monitor - Describes securities whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Valuation Methodology

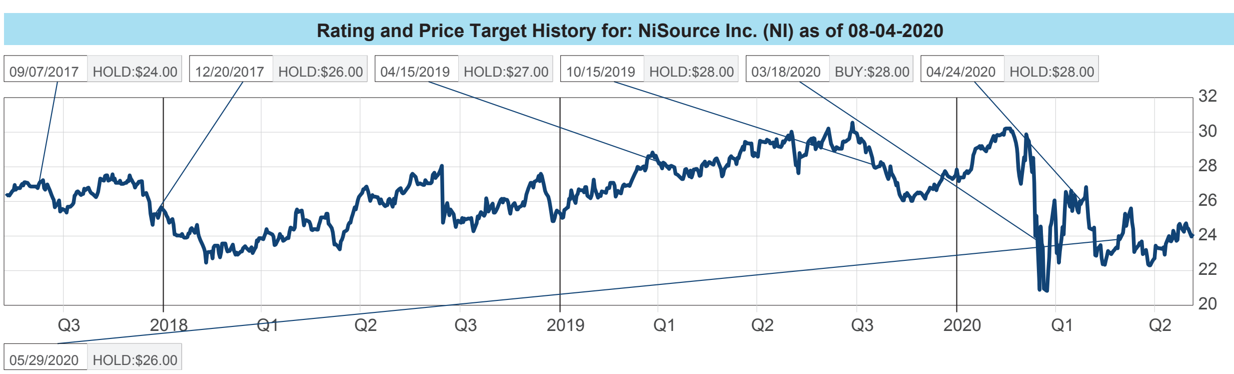
Jefferies' methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Jefferies Franchise Picks

Jefferies Franchise Picks include stock selections from among the best stock ideas from our equity analysts over a 12 month period. Stock selection is based on fundamental analysis and may take into account other factors such as analyst conviction, differentiated analysis, a favorable risk/reward ratio and investment themes that Jefferies analysts are recommending. Jefferies Franchise Picks will include only Buy rated stocks and the number can vary depending on analyst recommendations for inclusion. Stocks will be added as new opportunities arise and removed when the reason for inclusion changes, the stock has met its desired return, if it is no longer rated Buy and/or if it triggers a stop loss. Stocks having 120 day volatility in the bottom quartile of S&P stocks will continue to have a 15% stop loss, and the remainder will have a 20% stop. Franchise Picks are not intended to represent a recommended portfolio of stocks and is not sector based, but we may note where we believe a Pick falls within an investment style such as growth or value.

Risks which may impede the achievement of our Price Target

This report was prepared for general circulation and does not provide investment recommendations specific to individual investors. As such, the financial instruments discussed in this report may not be suitable for all investors and investors must make their own investment decisions based upon their specific investment objectives and financial situation utilizing their own financial advisors as they deem necessary. Past performance of the financial instruments recommended in this report should not be taken as an indication or guarantee of future results. The price, value of, and income from, any of the financial instruments mentioned in this report can rise as well as fall and may be affected by changes in economic, financial and political factors. If a financial instrument is denominated in a currency other than the investor's home currency, a change in exchange rates may adversely affect the price of, value of, or income derived from the financial instrument described in this report. In addition, investors in securities such as ADRs, whose values are affected by the currency of the underlying security, effectively assume currency risk.



Notes: Each box in the Rating and Price Target History chart above represents actions over the past three years in which an analyst initiated on a company, made a change to a rating or price target of a company or discontinued coverage of a company.
Legend:

Other Important Disclosures

Jefferies does business and seeks to do business with companies covered in its research reports, and expects to receive or intends to seek compensation for investment banking services among other activities from such companies. As a result, investors should be aware that Jefferies may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Jefferies Equity Research refers to research reports produced by analysts employed by one of the following Jefferies Group LLC ("Jefferies") group companies:

United States: Jefferies LLC which is an SEC registered broker-dealer and a member of FINRA (and distributed by Jefferies Research Services, LLC, an SEC registered Investment Adviser, to clients paying separately for such research).

United Kingdom: Jefferies International Limited, which is authorized and regulated by the Financial Conduct Authority; registered in England and Wales No. 1978621; registered office: 100 Bishopsgate, London EC2N 4JL; telephone +44 (0)20 7029 8000; facsimile +44 (0)20 7029 8010.

Hong Kong: Jefferies Hong Kong Limited, which is licensed by the Securities and Futures Commission of Hong Kong with CE number ATS546; located at Suite 2201, 22nd Floor, Cheung Kong Center, 2 Queen's Road Central, Hong Kong.

Singapore: Jefferies Singapore Limited, which is licensed by the Monetary Authority of Singapore; located at 80 Raffles Place #15-20, UOB Plaza 2, Singapore 048624, telephone: +65 6551 3950.

Japan: Jefferies (Japan) Limited, Tokyo Branch, which is a securities company registered by the Financial Services Agency of Japan and is a member of the Japan Securities Dealers Association; located at Tokyo Midtown Hibiya 30F Hibiya Mitsui Tower, 1-1-2 Yurakucho, Chiyoda-ku, Tokyo 100-0006; telephone +813 5251 6100; facsimile +813 5251 6101.

India: Jefferies India Private Limited (CIN - U74140MH2007PTC200509), licensed by the Securities and Exchange Board of India for: Stock Broker (NSE & BSE) INZ000243033, Research Analyst INH000000701 and Merchant Banker INM000011443, located at 42/43, 2 North Avenue, Maker Maxity, Bandra-Kurla Complex, Bandra (East), Mumbai 400 051, India; Tel +91 22 4356 6000.

Australia: Jefferies (Australia) Securities Pty Limited (ACN 610 977 074), which holds an Australian financial services license (AFSL 487263) and is located at Level 22, 60 Martin Place, Sydney NSW 2000; telephone +61 2 9364 2800.

This report was prepared by personnel who are associated with Jefferies (Jefferies International Limited, Jefferies Hong Kong Limited, Jefferies Singapore Limited, Jefferies (Japan) Limited, Tokyo Branch, Jefferies India Private Limited), Jefferies (Australia) Pty Ltd; or by personnel who are associated with both Jefferies LLC and Jefferies Research Services LLC ("JRS"). Jefferies LLC is a US registered broker-dealer and is affiliated with JRS, which is a US registered investment adviser. JRS does not create tailored or personalized research and all research provided by JRS is impersonal. If you are paying separately for this research, it is being provided to you by JRS. Otherwise, it is being provided by Jefferies LLC. Jefferies LLC, JRS, and their affiliates are collectively referred to below as "Jefferies". Jefferies may seek to do business with companies covered in this research report. As a result, investors should be aware that Jefferies may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only one of many factors in making their investment decisions. Specific conflict of interest and other disclosures that are required by FINRA and other rules are set forth in this disclosure section.

* * *

If you are receiving this report from a non-US Jefferies entity, please note the following: Unless prohibited by the provisions of Regulation S of the U.S. Securities Act of 1933, as amended, this material is distributed in the United States by Jefferies LLC, which accepts responsibility for its contents in accordance with the provisions of Rule 15a-6 under the US Securities Exchange Act of 1934, as amended. Transactions by or on behalf of any US person may only be effected through Jefferies LLC. In the United Kingdom and European Economic Area this report is issued and/or approved for distribution by Jefferies International Limited ("JIL") and is intended for use only by persons who have, or have been assessed as having, suitable professional experience and expertise, or by persons to whom it can be otherwise lawfully distributed.

JIL allows its analysts to undertake private consultancy work. JIL's conflicts management policy sets out the arrangements JIL employs to manage any potential conflicts of interest that may arise as a result of such consultancy work. Jefferies LLC, JIL and their affiliates, may make a market or provide liquidity in the financial instruments referred to in this report; and where they do make a market, such activity is disclosed specifically in this report under "company specific disclosures".

For Canadian investors, this material is intended for use only by professional or institutional investors. None of the investments or investment services mentioned or described herein is available to other persons or to anyone in Canada who is not a "Designated

Institution" as defined by the Securities Act (Ontario). In Singapore, Jefferies Singapore Limited ("JSL") is regulated by the Monetary Authority of Singapore. For investors in the Republic of Singapore, this material is provided by JSL pursuant to Regulation 32C of the Financial Advisers Regulations. The material contained in this document is intended solely for accredited, expert or institutional investors, as defined under the Securities and Futures Act (Cap. 289 of Singapore). If there are any matters arising from, or in connection with this material, please contact JSL, located at 80 Raffles Place #15-20, UOB Plaza 2, Singapore 048624, telephone: +65 6551 3950. In Japan, this material is issued and distributed by Jefferies (Japan) Limited to institutional investors only. In Hong Kong, this report is issued and approved by Jefferies Hong Kong Limited and is intended for use only by professional investors as defined in the Hong Kong Securities and Futures Ordinance and its subsidiary legislation. In the Republic of China (Taiwan), this report should not be distributed. The research in relation to this report is conducted outside the People's Republic of China ("PRC"). This report does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC. PRC investors shall have the relevant qualifications to invest in such securities and shall be responsible for obtaining all relevant approvals, licenses, verifications and/or registrations from the relevant governmental authorities themselves. In India, this report is made available by Jefferies India Private Limited. In Australia, this report is issued and/or approved for distribution by, or on behalf of, Jefferies (Australia) Securities Pty Ltd. It is directed solely at wholesale clients within the meaning of the Corporations Act 2001 of Australia (the "Corporations Act"), in connection with their consideration of any investment or investment service that is the subject of this report. This report may contain general financial product advice. Where this report refers to a particular financial product, you should obtain a copy of the relevant product disclosure statement or offer document before making any decision in relation to the product. Recipients of this document in any other jurisdictions should inform themselves about and observe any applicable legal requirements in relation to the receipt of this document.

This report is not an offer or solicitation of an offer to buy or sell any security or derivative instrument, or to make any investment. Any opinion or estimate constitutes the preparer's best judgment as of the date of preparation, and is subject to change without notice. Jefferies assumes no obligation to maintain or update this report based on subsequent information and events. Jefferies, and their respective officers, directors, and employees, may have long or short positions in, or may buy or sell any of the securities, derivative instruments or other investments mentioned or described herein, either as agent or as principal for their own account. This material is provided solely for informational purposes and is not tailored to any recipient, and is not based on, and does not take into account, the particular investment objectives, portfolio holdings, strategy, financial situation, or needs of any recipient. As such, any advice or recommendation in this report may not be suitable for a particular recipient. Jefferies assumes recipients of this report are capable of evaluating the information contained herein and of exercising independent judgment. A recipient of this report should not make any investment decision without first considering whether any advice or recommendation in this report is suitable for the recipient based on the recipient's particular circumstances and, if appropriate or otherwise needed, seeking professional advice, including tax advice. Jefferies does not perform any suitability or other analysis to check whether an investment decision made by the recipient based on this report is consistent with a recipient's investment objectives, portfolio holdings, strategy, financial situation, or needs.

By providing this report, neither JRS nor any other Jefferies entity accepts any authority, discretion, or control over the management of the recipient's assets. Any action taken by the recipient of this report, based on the information in the report, is at the recipient's sole judgment and risk. The recipient must perform his or her own independent review of any prospective investment. If the recipient uses the services of Jefferies LLC (or other affiliated broker-dealers), in connection with a purchase or sale of a security that is a subject of these materials, such broker-dealer may act as principal for its own accounts or as agent for another person. Only JRS is registered with the SEC as an investment adviser; and therefore neither Jefferies LLC nor any other Jefferies affiliate has any fiduciary duty in connection with distribution of these reports.

The price and value of the investments referred to herein and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This report may contain forward looking statements that may be affected by inaccurate assumptions or by known or unknown risks, uncertainties, and other important factors. As a result, the actual results, events, performance or achievements of the financial product may be materially different from those expressed or implied in such statements.

This report has been prepared independently of any issuer of securities mentioned herein and not as agent of any issuer of securities. No Equity Research personnel have authority whatsoever to make any representations or warranty on behalf of the issuer(s). Any comments or statements made herein are those of the Jefferies entity producing this report and may differ from the views of other Jefferies entities.

This report may contain information obtained from third parties, including ratings from credit ratings agencies such as Standard & Poor's. Reproduction and distribution of third party content in any form is prohibited except with the prior written permission of the related third party. Jefferies does not guarantee the accuracy, completeness, timeliness or availability of any information, including ratings, and is not responsible for any errors or omissions (negligent or otherwise), regardless of the cause, or for the results obtained from the use of such content. Third-party content providers give no express or implied warranties, including, but not limited to, any warranties of merchantability or fitness for a particular purpose or use. Neither Jefferies nor any third-party content provider shall be liable for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including lost income or profits and opportunity costs) in connection with any use of their content, including ratings. Credit ratings are statements of opinions and are not statements of fact or recommendations to purchase, hold or sell securities. They do not address the suitability of securities or the suitability of securities for investment purposes, and should not be relied on as investment advice.

Jefferies research reports are disseminated and available electronically, and, in some cases, also in printed form. Electronic research is simultaneously made available to all clients. This report or any portion hereof may not be reprinted, sold or redistributed without the written consent of Jefferies. Neither Jefferies nor any of its respective directors, officers or employees, is responsible for guaranteeing the financial success of any investment, or accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this report or its contents. Nothing herein shall be construed to waive any liability Jefferies has under applicable U.S. federal or state securities laws.

J.P. Morgan Securities LLC

- **2Q20 EPS beats estimates on COVID offsets.** NI's 2Q20 operating EPS of $0.13 exceeded JPMe/Street median estimates of $0.08/$0.07, respectively. O&M savings and new rates from infrastructure replacement programs & Columbia of Ohio's CEP more than offset 2Q20 combined electric and gas COVID-19 impacts totaling -6c. NI's corporate segment also includes a benefit from unrealized gains on the cash surrender value of COLI investments.

- **2021 Operating EPS guide introduced.** NI introduced 2021 operating EPS guidance in the range of $1.28-1.36, inclusive of -5c of COVID-19 impacts, below JPMe $1.41 but comparable at the high end ex COVID vs our estimate. This range establishes a base for NI's LT growth. We remain positive on NI's long-term earnings growth outlook and await the full plan refresh at the company's planned Sept Investor Day.

- **Sept Investor Day previewed with $1.8-2.0bn renewables investments.** NI highlighted several updates in advance of the company's Sept 29 Investor Day, including 1) 2021 capital spending expected to return to the $1.8-1.9bn range, 2) incremental renewables investments through 2023 totaling $1.8-2.0bn, 3) a targeted 10-12% rate base CAGR through 2024, and 4) plan supportive of annual EPS growth expected to exceed 5-7%. NI will discuss these updates and the company's financial outlook through 2024 at its Sept 29 Investor Day. The investor day preview largely focuses on plans to retire 80% of NIPSCO's coal-fired generation by 2023, and the $1.8-2.0bn incremental investment opportunity outlined by NI represents ~50% ownership of renewable replacement capacity in the form of JV's with tax equity partners.

- **Conference call details.** NI will host a conference call to discuss 2Q20 results on Wednesday, August 5 at 9:00 AM EDT.

Table 1: NI 2Q20 Results

Income Statement:	Actual 2Q19	Actual 2Q20	JPM 2Q20E	% Chg Y/Y	% Chg vs JPMe	YoY Drivers
Operating Earnings	131	165	151	26%	9%	New rates from infrastructure replacement programs and Columbia of Ohio's CEP.
Net Income	19	50	30	163%	66%	O&M savings offsetting COVID impacts.
Share Count	374	384	385	3%	0%	
Operating EPS	**$0.05**	**$0.13**	**$0.08**	**156%**	**67%**

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, www.jpmorganmarkets.com.

Coverage Universe: Sunderland III, Richard W: AES Corp. (AES), Algonquin Power & Utilities Corp. (AQN.TO), Allete Inc. (ALE), American Water Works Company, Inc. (AWK), Avangrid, Inc (AGR), Emera Inc. (EMA.TO), Fortis Inc. (FTS.TO), NiSource Inc. (NI), PG&E Corp. (PCG), SJW Group (SJW), South Jersey Industries (SJI), Southwest Gas Holdings Inc. (SWX), Spire Inc (SR)

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2020

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage	46%	39%	15%
IB clients*	53%	49%	38%
JPMS Equity Research Coverage	43%	42%	15%
IB clients*	75%	70%	58%

*Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months. Please note that the percentages might not add to 100% because of rounding.
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Country and Region Specific Disclosures

U.K. and European Economic Area (EEA): Unless specified to the contrary, issued and approved for distribution in the U.K. and the EEA by JPMS plc. Investment research issued by JPMS plc has been prepared in accordance with JPMS plc's policies for managing conflicts of interest arising as a result of publication and distribution of investment research. Many European regulators require a firm to establish, implement and maintain such a policy. Further information about J.P. Morgan's conflict of interest policy and a description of the effective internal organisations and administrative arrangements set up for the prevention and avoidance of conflicts of interest is set out at the following link https://www.jpmorgan.com/jpmpdf/1320742677360.pdf. This report has been issued in the U.K. only to persons of a kind described in Article 19 (5), 38, 47 and 49 of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (all such persons being referred to as "relevant persons"). This document must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is only available to relevant persons and will be engaged in only with relevant persons. In other EEA countries, the report has been issued to persons regarded as professional investors (or equivalent) in their home jurisdiction. **Australia:** This material is issued and distributed by JPMSAL in Australia to "wholesale clients" only. This material does not take into account the specific investment objectives, financial situation or particular needs of the recipient. The recipient of this material must not distribute it to any third party or outside Australia without the prior written consent of JPMSAL. For the purposes of this paragraph the term "wholesale client" has the meaning given in section 761G of the Corporations Act 2001. J.P. Morgan's research coverage universe spans listed securities across the ASX All Ordinaries index, securities listed on offshore markets, unlisted issuers and investment products which Research management deem to be relevant to the investor base from time to time. J.P. Morgan seeks to cover companies of relevance to the domestic and international investor base across all GIC sectors, as well as across a range of market capitalisation sizes. **Germany:** This material is distributed in Germany by J.P. Morgan Securities plc, Frankfurt Branch which is regulated by the Bundesanstalt für Finanzdienstleistungsaufsicht. **Korea:** This report may have been edited or contributed to from time to time by affiliates of J.P. Morgan Securities (Far East) Limited, Seoul Branch. **Singapore:** As at the date of this report, JPMSS is a designated market maker for certain structured warrants listed on the Singapore Exchange where the underlying securities may be the securities discussed in this report. Arising from its role as designated market maker for such structured warrants, JPMSS may conduct hedging activities in respect of such underlying securities and hold or have an interest in such underlying securities as a result. The updated list of structured warrants for which JPMSS acts as designated market maker may be found on the website of the Singapore Exchange Limited: http://www.sgx.com. In addition, JPMSS and/or its affiliates may also have an interest or holding in any of the securities discussed in this report – please see the Important Disclosures section above. For securities where the holding is 1% or greater, the holding may be found in the Important Disclosures section above. For all other securities mentioned in this report, JPMSS and/or its affiliates may have a holding of less than 1% in such securities and may trade them in ways different from those discussed in this report. Employees of JPMSS and/or its affiliates not involved in the preparation of this report may have investments in the securities (or derivatives of such securities) mentioned in this report and may trade them in ways different from those discussed in this report. **Taiwan**: Research relating to equity securities is issued and distributed in Taiwan by J.P. Morgan Securities (Taiwan) Limited, subject to the license scope and the applicable laws and the regulations in Taiwan. According to Paragraph 2, Article 7-1 of Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers (as amended or supplemented) and/or other applicable laws or regulations, please note that the recipient of this material is not permitted to engage in any activities in connection with the material which may give rise to conflicts of interests, unless otherwise disclosed in the "Important Disclosures" in this material. **India:** For private circulation only, not for sale. **Pakistan:** For private circulation only, not for sale. **New Zealand:** This material is issued and distributed by JPMSAL in New Zealand only to "wholesale clients" (as defined in the Financial Advisers Act 2008). The recipient of this material must not distribute it to any third party or outside New Zealand without the prior written consent of JPMSAL. **Canada:** This report is distributed in Canada by or on behalf of J.P.Morgan Securities Canada Inc. The information contained herein is not, and under no circumstances is to be construed as an offer to sell securities described herein, or solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. The information contained herein is under no circumstances to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. **Dubai:** This report has been distributed to persons regarded as professional clients or market counterparties as defined under the DFSA rules. **Brazil:** Ombudsman J.P. Morgan: 0800-7700847 / ouvidoria.jp.morgan@jpmorgan.com.

General: Additional information is available upon request. Information has been obtained from sources believed to be reliable but JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) do not warrant its completeness or accuracy except with respect to any disclosures relative to JPMS and/or its affiliates and the analyst's involvement with the issuer that is the subject of the research. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. First Read

NiSource Inc.
Renewable Generation Capex Above UBSe

NI Provided 2021 Guidance and Long Term Rate Base Growth

NI reported strong 2Q despite the pandemic driven by lower O&M (see details below). Management provided 2021 EPS guidance of $1.28-$1.36, with midpoint at $1.32 vs UBSe/Cons of $1.37; however, it includes $0.05/share impact from COVID. At this stage we don't include impact from COVID and we will look for more colour during the call today on the pace of recovery from the pandemic and lockdowns. Notably, NI provided $1.8-$2B capex related to renewable investments in 2022-2023 above UBSe of $1B-$1.5B and noted additional investments through 2028. The new investments to transition from coal to renewables will reduce GHG emissions by 90% by 2030 (from 2005). Additionally, management revised higher rate base growth to 10-12% up from 9% and noted that strong rate base growth will drive EPS CAGR in excess of prior long term guidance of 5-7% (vs. UBSe of '21-'24 EPS CAGR of 7.2%). Management plans to provide more details on investments and growth through 2024 during the virtual Analyst Day scheduled for Sept 29th. We expect investors will react positively to strong quarter and long term positive outlook despite modestly disappointing 2021 EPS outlook.

Results: 2Q20 EPS Above UBSe/Consensus

NI reported 2Q20 adj. EPS of $0.13 above Consensus of $0.08 and UBSe of $0.05. The beat was driven by lower O&M and higher net margin from Gas Distribution segment. Electric segment operating income was roughly inline with UBSe. NI received deferral orders to recover increases in bad debt due to the COVID in following states: IN, PA, VA, MD and OH.

Adjusting Estimates

To reflect 2Q20 results, we are increasing our 2020 EPS estimates by 7% to $1.32, while we are maintaining 2021 EPS estimates roughly unchanged. We also increased 2022-2023 capex to reflect higher than expected renewable investments of $1.8-$2B vs. UBSe of $1.0B-1.5B. We also increased 2024 EPS to reflect higher recovery from invested capital.

Valuation:

We maintain Neutral rating and $27 PT.

Forecast dividend yield	3.9%
Forecast stock return	+15.7%
Market return assumption	5.1%
Forecast excess return	+10.6%

Valuation Method and Risk Statement

Risks include, but are not limited to, the following: changes to the regulatory environment, ability to achieve favorable returns on investment projects, and ability to continue to reinvest in the business for growth. We use comparable company multiples in our sum-of-the-parts EV/EBITDA and P/E valuations. Our price target is derived using an average of sum-of-the-parts EV/EBITDA and P/E valuations and DDM.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 05 August 2020 12:27 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification: Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	49%	32%
Neutral	FSR is between -6% and 6% of the MRA.	39%	30%
Sell	FSR is > 6% below the MRA.	13%	20%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 June 2020.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES:UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Aga Zmigrodzka, CFA; Shneur Z. Gershuni, CFA; Brian Reynolds.

The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor’s individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. Ltd. [MCI (P) 079/08/2019 and Co. Reg. No.: 198500648C] or UBS AG, Singapore Branch. Please contact UBS Securities Pte. Ltd., an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110); or UBS AG, Singapore Branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or document. The recipients of this document represent and warrant that they are accredited and institutional investors as defined in the Securities and Futures Act (Cap. 289). **Japan:** Distributed by UBS Securities Japan Co., Ltd. to professional investors (except as otherwise permitted). Where this report has been prepared by UBS Securities Japan Co., Ltd., UBS Securities Japan Co., Ltd. is the author, publisher and distributor of the report. Distributed by UBS AG, Tokyo Branch to Professional Investors (except as otherwise permitted) in relation to foreign exchange and other banking businesses when relevant. **Australia:** Clients of UBS AG: Distributed by UBS AG (ABN 47 088 129 613 and holder of Australian Financial Services License No. 231087). Clients of UBS Securities Australia Ltd: Distributed by UBS Securities Australia Ltd (ABN 62 008 586 481 and holder of Australian Financial Services License No. 231098). This Document contains general information and/or general advice only and does not constitute personal financial product advice. As such, the Information in this document has been prepared without taking into account any investor's objectives, financial situation or needs, and investors should, before acting on the Information, consider the appropriateness of the Information, having regard to their objectives, financial situation and needs. If the Information contained in this document relates to the acquisition, or potential acquisition of a particular financial product by a 'Retail' client as defined by section 761G of the Corporations Act 2001 where a Product Disclosure Statement would be required, the retail client should obtain and consider the Product Disclosure Statement relating to the product before making any decision about whether to acquire the product. The UBS Securities Australia Limited Financial Services Guide is available at: www.ubs.com/ecs-research-fsg. **New Zealand:** Distributed by UBS New Zealand Ltd. UBS New Zealand Ltd is not a registered bank in New Zealand. You are being provided with this UBS publication or material because you have indicated to UBS that you are a "wholesale client" within the meaning of section 5C of the Financial Advisers Act 2008 of New Zealand (Permitted Client). This publication or material is not intended for clients who are not Permitted Clients (non-permitted Clients). If you are a non-permitted Client you must not rely on this publication or material. If despite this warning you nevertheless rely on this publication or material, you hereby (i) acknowledge that you may not rely on the content of this publication or material and that any recommendations or opinions in such this publication or material are not made or provided to you, and (ii) to the maximum extent permitted by law (a) indemnify UBS and its associates or related entities (and their respective Directors, officers, agents and Advisors) (each a 'Relevant Person') for any loss, damage, liability or claim any of them may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material and (b) waive any rights or remedies you may have against any Relevant Person for (or in respect of) any loss, damage, liability or claim you may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material. **Korea:** Distributed in Korea by UBS Securities Pte. Ltd., Seoul Branch. This report may have been edited or contributed to from time to time by affiliates of UBS Securities Pte. Ltd., Seoul Branch. This material is intended for professional/institutional clients only and not for distribution to any retail clients. **Malaysia:** This material is authorized to be distributed in Malaysia by UBS Securities Malaysia Sdn. Bhd (Capital Markets Services License No.: CMSL/A0063/2007). This material is intended for professional/institutional clients only and not for distribution to any retail clients. **India:** Distributed by UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. It provides brokerage services bearing SEBI Registration Number: INZ000259830; merchant banking services bearing SEBI Registration Number: INM000010809 and Research Analyst services bearing SEBI Registration Number: INH000001204. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: http://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html**Taiwan:** Except as otherwise specified herein, this material may not be distributed in Taiwan. Information and material on securities/instruments that are traded in a Taiwan organized exchange is deemed to be issued and distributed by UBS Securities Pte. LTD., Taipei Branch, which is licensed and regulated by Taiwan Financial Supervisory Commission. Save for securities/instruments that are traded in a Taiwan organized exchange, this material should not constitute "recommendation" to clients or recipients in Taiwan for the covered companies or any companies mentioned in this document. No portion of the document may be reproduced or quoted by the press or any other person without authorisation from UBS. **Indonesia:** This report is being distributed by PT UBS Sekuritas Indonesia and is delivered by its licensed employee(s), including marketing/sales person, to its client. PT UBS Sekuritas Indonesia, having its registered office at Wisma GKBI, 22nd floor, JL. Jend. Sudirman, kav.28, Jakarta 10210, Indonesia, is a subsidiary company of UBS AG and licensed under Capital Market Law no. 8 year 1995, a holder of broker-dealer and underwriter licenses issued by the Capital Market and Financial Institution Supervisory Agency (now Otoritas Jasa Keuangan/OJK). PT UBS Sekuritas Indonesia is also a member of Indonesia Stock Exchange and supervised by Otoritas Jasa Keuangan (OJK). Neither this report nor any copy hereof may be distributed in Indonesia or to any Indonesian citizens except in compliance with applicable Indonesian capital market laws and regulations. This report is not an offer of securities in Indonesia and may not be distributed within the territory of the Republic of Indonesia or to Indonesian citizens in circumstance which constitutes an offering within the meaning of Indonesian capital market laws and regulations.

The disclosures contained in research documents produced by UBS AG, London Branch or UBS Europe SE shall be governed by and construed in accordance with English law.

Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates ("UBS") with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliarios Ltda, UBS Asesores Mexico, S.A. de C.V., UBS Securities Japan Co., Ltd, UBS Wealth Management Israel Ltd and UBS Menkul Degerler AS are affiliates of UBS AG. UBS Financial Services Incorporated of Puerto Rico is a subsidiary of UBS Financial Services Inc. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain and does not undertake banking or investment business activities in Bahrain. Therefore, clients have no protection under local banking and investment services laws and regulations. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This research report is neither intended to be distributed to PRC investors nor to provide securities investment consultancy services within the territory of PRC. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Supervisory Authority. **France**: This publication is distributed by UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, 69, boulevard Haussmann F-75008 Paris, R.C.S. Paris B 421 255 670, to its clients and prospects. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code Monétaire et Financier", regulated by French banking and financial authorities as the "Autorité de Contrôle Prudentiel et de Résolution." **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Greece**: UBS Switzerland AG and its affiliates (UBS) are not licensed as a bank or financial institution under Greek legislation and do not provide banking and financial services in Greece. Consequently, UBS provides such services from branches outside of Greece, only. This document may not be considered as a public offering made or to be made to residents of Greece. **Hong Kong**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **Indonesia, Malaysia, Phillipines, Thailand**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **India**: UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. It provides brokerage services bearing SEBI Registration Number INZ000259830; merchant banking services bearing SEBI Registration Number: INM000010809 and Research Analyst services bearing SEBI Registration Number: INH000001204. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: http://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice and/or investment marketing and is not replacing any investment advice and/or investment marketing provided by the relevant licensee which is adjusted to each person needs. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its derivatives shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law, 1995.**Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch, with place of business at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS Europe SE, Luxembourg Branch is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Luxembourg supervisory authority (Commission de Surveillance du Secteur Financier), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Securities Market Law due to the relation with a Foreign Bank. UBS Asesores is a regulated entity and it is subject to the supervision of the Mexican Banking and Securities Commission ("CNBV"), which exclusively regulates UBS Asesores regarding the rendering of portfolio management, as well as on securities investment advisory services, analysis and issuance of individual investment recommendations, so that the CNBV has no surveillance faculties nor may have over any other service provided by UBS Asesores. UBS Asesores is registered before CNBV under Registry number 30060. You are being provided with this UBS publication or material because you have indicated to UBS Asesores that you are a Sophisticated Qualified Investor located in Mexico. 	Outperform	$24.36	$27.00	14%

NI 2Q20 - Initiates 2021 Guidance, Early Preview of September 29 Investor Day

Bottom Line: NI reported a nice 2Q20 beat of $0.13 vs. the street's $0.08 and our own $0.08. 2Q19 comp was $0.05. The primary drivers of the better results include the company's cost mitigation efforts which were only partially offset by 1H20 financing activity and demand/cost impacts of COVID19. For the full year management is targeting $0.10-$0.15 COVID-19 cost mitigation benefits.

Management moved forward the initiation of its 2021 guidance range of $1.28-1.36 which will be used as the new base year for its long-term growth rate.

Key Points

The midpoint of the $1.28-$1.36 range was in line with our own $1.33 estimate and just shy of the implied range the company had discussed in its May meetings. The guidance includes the midpoint of the $0-0.10/share estimated impact of COVID-19. **We are lowering our 2022 EPS to $1.38/share to reflect the slightly higher retention of TSA-related costs under the agreement to sell Columbia Gas Massachusetts, a more gradual path in cost mitigation activities and higher financing costs.**

Management gave an early preview of its upcoming analyst day scheduled for September 29th. Management provided year-by-year rate base guidance for the consolidated entity which shows a rate base CAGR of 10-12% for the four-year period of '20-24. **Although management did not disclose the discrete EPS growth rate associated with its rate base CAGR, it did suggest that over the four-year forecast period the EPS growth rate would exceed its current 5-7% LT growth rate (currently through 2022) through the new 2024 time-frame and then revert back to the initial 5-7% EPS CAGR.**

While the growth rate will be a function of the both the timing and financing vehicles utilized, its new cost management program and timely rate relief, we would expect the 18-20c of incremental earnings associated with its renewable investments would be additive to earnings in the 2H23 (concurrent with the retirement of the Schafer Plant) with a full year in 2024. **Our initial cut is the company's new growth rate ('21-24), albeit back-end loaded could be in the range of 8-9%.**

We'd expect the new investments will be financed with ~60% equity and with the bulk of spending to occur in late 2022 and 2023 we'd expect the company to likely synchronize its equity financing strategy with the cadence of the spending.

We reiterate our Outperform rating and $27 target price.

Scenarios

Valuation

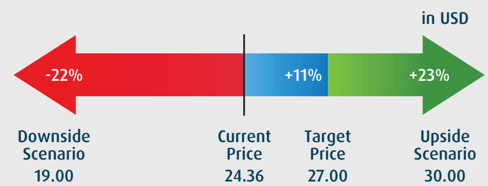
Our $27 target price is the product of a P/E-based sum of the parts. We utilize a regulated average multiple using 2022E EPS as base valuation and then make specific adjustments to reflect our current view of the fundamental outlook. For NI, we have removed EPS for its MA gas business from our P/E valuation and instead include only the asset value (1x equity rate base) in our SOTP framework.

Upside Scenario 30.00

Our upside scenario reflects continued multiple expansion associated with the company's premium and above-average earnings and dividend growth profile.

Downside Scenario 19.00

Our downside scenario reflects a tightening monetary policy and a deceleration of the company's rate base growth.



Key Catalysts

Initial indicative pricing in its second renewable RFP in IN. Completing the sale of Columbia Gas of Massachusetts to Eversource. Potentially, capital spending and growth rate update in 2H20 given clarity in the aforementioned RFP and recent rate orders in MA and IN.

Company Description

NiSource, Inc. is a regulated utility holding company, serving approximately 3.5 million natural gas customers and 500,000 electric customers across seven states. Through its Columbia Gas and NIPSCO brands, it provides natural gas, electricity, and other products and services. The company was founded in 1987 and is headquartered in Merrillville, Indiana.

BMO Capital Markets

2Q20 Results

NI reported a nice 2Q20 beat of $0.13 vs. the street's $0.08 and our own $0.08. 2Q19 comp was $0.05. The primary drivers of the better results include the company's cost mitigation efforts which were only partially offset by 1H20 financing activity and demand/cost impacts of COVID19. For the full year management is targeting $0.10-$0.15 COVID-19 cost mitigation benefits.

Management move forward the initiation of its 2021 guidance range which will be used as the new base year for its long-term growth rate. The midpoint of the $1.28-$1.36 range was in line with our own $1.33 estimate and just shy of the implied range the company had discussed in its May meetings. The guidance includes the midpoint of the $0-0.10/share estimated impact of COVID-19, a roughly a $0.05 drag from retained TSA costs associated with the sale of Columbia Gas Massachusetts, and the positive impact of investment at NIPSCO.

We are lowering our 2022 EPS to $1.38/share to reflect the slightly higher retention of TSA-related costs under the agreement to sell Columbia Gas Massachusetts, a more gradual path in cost mitigation activities and higher financing costs. Our 2023 number remains unchanged for now as we plan to update this as the company rolls out its multi-year financing plan at its September Analyst Day and updates investors on the cost and capital efficiencies that come out of its strategic initiative program. We also intend to roll out our 2024 estimate at that time which should include a full year impact from coal plant replacement investments in renewable supply.

Analyst Day Sneak Peak

Management gave an early preview of its upcoming analyst day scheduled for September 29th. Management provided year-by-year rate base guidance for the consolidated entity which shows a rate base CAGR of 10-12% for the four-year period of '20-24. Consistent with scope and cost savings in its 2018 IRP, managements rate base forecast includes an estimated range of $1,800-2,000mm for its share of renewable investment to replace the retirement of coal plants through 2023. The company will file an IRP in 2021 to outline the replacement of the its final coal plant (Michigan City plant) in 2028.

Although management did not disclose the discrete EPS growth rate associated with its rate base CAGR, it did suggest that over the four-year forecast period the EPS growth rate would exceed its current 5-7% LT growth rate (currently through 2022) through the new 2024 timeframe and then revert back to the initial 5-7% EPS CAGR. While the growth rate will be a function of the both the timing and financing vehicles utilized, its new cost management program and timely rate relief, we would expect the 18-20c of incremental earnings associated with its renewable investments would be additive to earnings in the 2H23 (concurrent with the retirement of the Schafer Plant) with a full year in 2024. Our initial cut is the company's new growth rate ('21-24), albeit back-end loaded could be in the range of 8-9%.

We expect the new investments will be financed with 60% equity content and will likely include both common equity as well as the use of an equity unit product. **With the bulk of spending to occur in late 2022 and 2023 we would expect the company to likely synchronize its equity financing strategy with the cadence of the spending**. However, we would not rule out an earlier deployment of equity units given the current market environment. Finally, the company has targeted an FFO/adjusted Debt target of 14-15% which we think it will aim to managed though the 2022-2023 construction schedule through its recently announced strategic initiative program which targets both O&M and capital efficiencies.

BMO Capital Markets

Other Updates

Columbia Gas of Massachusetts sale remains on track with a settlement filed by Eversource on July 2nd, and a concurrent announcement from NiSource that it will pay $56M to settle the state's investigation into the 2018 Greater Lawrence incident. Hearings are scheduled for August 25th and 27th and the transaction is still on target to close at the end of September. We assume the $1,100mm cash proceeds will be used to retire any short-term debt and fund general corporate purposes.

Columbia Gas - PA Rate: The company filed for new base rates on 4/24 for the continued replacement of aging pipelines as well as adoption of safety upgrades. The $100mm revenue request if approved would allow new rates effective early 2021

Columbia Gas - MD Rate: The company filed for new base rates on 5/15 requesting a $6.3mm revenue increase with new rates effective in Dec 2020

Outlook

With the 2021 outlook and renewable development de-risked, we think the risk return going into the September 29th analyst day is favorable and **we reiterate our Outperform rating and $27 target price.**

Company Specific Disclosures

Disclosure 9B: BMO Capital Markets makes a market in NiSource Inc in United States.

Methodology and Risks to Target Price/Valuation for NiSource Inc (NI-NYSE)

Methodology: Our $27 target price is the product of a P/E-based sum-of-the-parts (SOTP) analysis of the company's primary regulated operating companies. We utilize a regulated group-average multiple based on 2022E EPS as our initial basis for valuation and then make adjustments specific to each jurisdiction to reflect our current view of the fundamental outlook.

Risks: NI's regulated profile exposes the company to business risk including but not limited to federal and state regulatory risk, federal and state political risk, environmental policy, interest rate risk, access to capital markets, construction risk, changes in customer demand trends, changes in customer affordability, extreme weather, natural disaster, and equipment failure.

Ratings Key (as of October 2016)

We use the following ratings system definitions:
OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis;
Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis;
Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis;
(S) = Speculative investment;
Spd = Suspended - Coverage and rating suspended until coverage is reinstated;
NR = No Rated - No rating at this time; and
R = Restricted - Dissemination of research is currently restricted.

The total return potential, target price and the associated time horizon is 12 months unless otherwise stated in each report. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small Cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

Other Important Disclosures

For Important Disclosures on the stocks discussed in this report, please go to https://researchglobal0.bmocapitalmarkets.com/public-disclosure/ or write to Editorial Department, BMO Capital Markets, 3 Times Square, New York, NY 10036 or Editorial Department, BMO Capital Markets, 1 First Canadian Place, Toronto, Ontario, M5X 1H3.

Dissemination of Research

Dissemination of fundamental BMO Capital Markets Equity Research is available via our website https://researchglobal0.bmocapitalmarkets.com/. Institutional clients may also simultaneously receive our fundamental research via email and/or via services such as Refinitiv, Bloomberg, FactSet, Visible Alpha, and S&P Capital IQ.

BMO Capital Markets issues a variety of research products in addition to fundamental research. Institutional clients may request notification when additional research content is made available on our website. BMO Capital Markets may use proprietary models in the preparation of reports. Material information about such models may be obtained by contacting the research analyst directly. There is no planned frequency of model updates.

The analyst(s) named in this report may discuss trading strategies that reference a catalyst or event that may have a near or long term impact on the market price of the equity securities discussed. In some cases, the impact may directionally counter the analyst's published 12 month target price and rating. Any such trading or alternative strategies can be based on differing time horizons, methodologies, or otherwise and are distinct from and do not affect the analysts' fundamental equity rating in the report.

Research coverage of licensed cannabis producers and other cannabis-related companies is made available only to eligible approved North American, Australian, and EU-based BMO Nesbitt Burns Inc., BMO Capital Markets Limited, Bank of Montreal Europe Plc and BMO Capital Markets Corp. clients via email, our website and select third party platforms.

~ Research distribution and approval times are provided on the cover of each report. Times are approximations as system and distribution processes are not exact and can vary based on the sender and recipients' services. Unless otherwise noted, times are Eastern Standard and when two times are provided, the approval time precedes the distribution time.

For recommendations disseminated during the preceding 12-month period, please visit: https://researchglobal0.bmocapitalmarkets.com/public-disclosure/.

General Disclaimer

"BMO Capital Markets" is a trade name used by BMO Financial Group for the wholesale banking businesses of Bank of Montreal, BMO Harris Bank N.A. (member FDIC), Bank of Montreal Europe p.l.c, and Bank of Montreal (China) Co. Ltd, the institutional broker dealer business of BMO Capital Markets Corp. (Member FINRA and SIPC) and the agency broker dealer business of Clearpool Execution Services, LLC (Member FINRA and SIPC) in the U.S., and the institutional broker dealer businesses of BMO Nesbitt Burns Inc. (Member Investment Industry Regulatory Organization of Canada and Member Canadian Investor Protection Fund) in Canada and Asia, Bank of Montreal Europe p.l.c. (authorised and regulated by the Central Bank of Ireland) in Europe and BMO Capital Markets Limited (authorised and regulated by the Financial Conduct Authority) in the UK and Australia. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. Nothing herein constitutes any investment, legal, tax or other advice nor is it to be relied on in any investment or decision. If you are in doubt about any of the contents of this document, the reader should obtain independent professional advice. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

This report is directed only at entities or persons in jurisdictions or countries where access to and use of the information is not contrary to local laws or regulations. Its contents have not been reviewed by any regulatory authority. BMO Capital Markets does not represent that this report may be lawfully distributed or that any financial products may be lawfully offered or dealt with, in compliance with regulatory requirements in other jurisdictions, or pursuant to an exemption available thereunder.

To Australian residents: BMO Capital Markets Limited is exempt from the requirement to hold an Australian financial services licence under the Corporations Act and is regulated by the UK Financial Conduct Authority under UK laws, which differ from Australian laws. This document is only intended for wholesale clients (as defined in the Corporations Act 2001) and Eligible Counterparties or Professional Clients (as defined in Annex II to MiFID II).

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Colin Hamilton, Alexander Pearce, Raj Ray, David Round or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and distributed by BMO Capital Markets Limited or Bank of Montreal Europe Plc and is subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom and the Central Bank of Ireland (CBI) in Ireland. FCA and CBI regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore each of BMO Capital Markets Limited and Bank of Montreal Europe Plc will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To E.U. Residents: In an E.U. Member State this document is issued and distributed by Bank of Montreal Europe plc which is authorised and regulated in Ireland and operates in the E.U. on a passported basis. This document is only intended for Eligible Counterparties or Professional Clients, as defined in Annex II to "Markets in Financial Instruments Directive" 2014/65/EU ("MiFID II").

Singapore: This disclaimer applies to research reports distributed by the Private Banking unit of Bank of Montreal, Singapore Branch ("BMO SG"), an exempt financial adviser under the Financial Advisers Act (Cap. 110) of Singapore ("FAA") only. This research report is prepared by BMO Capital Markets and distributed by BMO SG pursuant to an arrangement under regulation 32C of the Financial Advisers Regulations of Singapore. This research report is distributed by BMO SG solely to persons who qualify as accredited investors as defined in the FAA only, and is not intended for and may not be circulated to the general public. This report and any information contained in this report shall not be disclosed to any other person. If you are not an accredited investor, please disregard this report. BMO SG does not accept legal responsibility for the contents of the report. Recipients should contact BMO SG at 65-6535 2323 for matters arising from, or in connection with the report.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

To Israeli residents: BMO Capital Markets is not licensed under the Israeli Law for the Regulation of Investment Advice, Investment Marketing and Portfolio Management of 1995 (the "Advice Law") nor does it carry insurance as required thereunder. This document is to be distributed solely to persons that are qualified clients (as defined under the Advice Law) and qualified investors under the Israeli Securities Law of 1968. This document represents the analysis of the analyst but there is no assurance that any assumption or estimation will materialize.

These documents are provided to you on the express understanding that they must be held in complete confidence and not republished, retransmitted, distributed, disclosed, or otherwise made available, in whole or in part, directly or indirectly, in hard or soft copy, through any means, to any person, except with the prior written consent of BMO Capital Markets.

NI – 2Q Earnings Beat; Investor Day Preview Brings with It Incremental Capex, Upside to Previous Growth Rate

Key Message: NiSource reported 2Q20 earnings, beating Guggenheim and consensus estimates. Mgmt. initiated FY21 earnings guidance, removing some uncertainty from the picture. Renewable generation spending related to the 2018 IRP was defined and was higher than previous estimates, driving top-tier rate base growth over the forecast period. Mgmt. noted rate base growth and improved cost structure will lead to top-quartile EPS growth, and we will have more specifics during the investor day in Sep. FY20 financing and capital plan remain on track.

Key takeaways: NI reported 2Q20 adj. EPS of $0.13 vs Guggenheim at $0.07 and Street at $0.08 driven mainly by lower employee and administrative expenses YoY. **Mgmt., with more clarity around the CMA sale and COVID-19 impacts, initiated FY21 guidance of $1.28 to $1.36 – consistent with our prior thoughts that it could come in slightly lower than prior 2020 guide, which is better than some of the more draconian bear arguments we heard. We still believe 2021 could prove conservative.** The range is the starting point for mgmt.'s expected 10-12% rate base growth driven by renewable generation spending of between $1.8B to $2.0B through 2024, a significant increase from mgmt.'s initial estimates. Customer bills will not be impacted significantly as NI retires O&M intensive coal and replaces it with O&M light renewables. **Mgmt. expects rate base growth and improved cost structure to drive EPS growth in excess of 5-7%.** We await further detail on the long-term forecast of the business during the investor day in late Sep. The CMA settlement was filed early last month and is on track for regulatory approval in 3Q and closure shortly after. ATM equity financing is still expected by mgmt. to be between $200M-$300M for 2020. Liquidity and balance sheet remain strong. Updates on the regulatory side include deferral of COVID-related bad debt in IN, PA, VA, MD, and OH and NIPSCO Gas System Modernization Program extension.

A preview of what's to come… mgmt. lays the groundwork for a robust update on the capital plan and growth trajectory during its investor day in Sep. Mgmt. previewed its investor day by giving specifics on expected capital spending on renewables, estimated rate base CAGR, and expected earnings growth through 2024. Spending on renewables is estimated to be in the range of $1.8B-$2.0B through the forecast period, an increase from mgmt.'s initial estimates of $1.0B-$1.5B. NI will own ~50% of the new generation capacity, which is in line with the 2018 IRP. The renewables spending paired with continued investment in safety and reliability will drive rate base growth of 10-12% from 2021-2024. As of today, NI has $0.4B in approved projects with $1.4B-$1.6B in projects still in negotiations. The tax equity investment totals ~$1.0B and will be additive to rate base over time as the tax equity partners farm out the benefits. The earnings associated with the increased investment will be back-end loaded as projects are completed and added to rates. Customer bill impact is targeted in the low single digits supported by the retirement of O&M intensive coal. **2021 IRP could potentially support an extended runway of renewable generation spending.** The upcoming 2021 IRP could support additional renewable spending in years outside of the forecast as NI moves to retire its remaining coal capacity by 2028. Mgmt. also highlighted its goal to decrease GHG emissions by 90% from 2005 levels by 2030.

Earnings guidance for 2021 initiated, removing some angst from the picture. Mgmt. initiated FY21 EPS guidance of $1.28-$1.36 with more clarity on the CMA sale and the impact of COVID-19. **The range is consistent with our previous thoughts that 2021 guidance could come in lower than the original 2020 guidance and it is better than some of the more draconian bear arguments we heard… we still believe 2021 could prove conservative.** As a reminder, mgmt. removed FY20 guidance of $1.36-$1.40 when the CMA sale was announced. The loss of CMA earnings is offset by eliminating the need for block equity and cost restructuring. Mgmt. forecasts a conservative ~($0.05) impact from

See pages 4 - 5 for analyst certification and important disclosures.

COVID-19 in 2021. 2021 will be the base year and the starting point for the new long-term plan.

Managing the COVID-19 impact through cost cutting and regulatory support. The impacts of COVID-19 in 2Q were in line with mgmt.'s expectations. YoY for the second quarter, residential, commercial, and industrial gas margins were $0.7M, flat, and ($4.7M) while residential, commercial, and industrial electric margins were $6.2M, ($3.9M), and ($9.2M). The impact of COVID-19 on 2Q20 EPS was ~($0.06), offset with cost cutting and regulatory support. Mgmt. still expects a gradual recovery of the economy into 2021. NI has received orders to defer COVID-related bad debt in IN, PA, VA, MD, and OH. MD, OH, and VA also allow for deferral of other COVID-related costs.

NI still expects to issue $200M-$300M in ATM equity in 2020. Incremental long-term debt financing for FY20 stands at $1.0B-$1.2B. NI's net available liquidity position as of Jun. 30, 2020 was ~$2.0B. Mgmt. reiterated its commitment to an IG credit rating and long-term FFO/Debt target of ~14-15%.

NI reported 2Q20 adj. EPS of $0.13 vs $0.05 in 2Q19. Gas segment operating earnings were up ~$27M YoY driven by lower employee and administrative expenses and higher revenue from safety and modernization investments slightly offset by a reduction in C&I demand, increased bad debt, and reduced late payment and reconnect fees. Electric segment operating earnings were up ~$4M driven by lower employee and administrative expenses, lower generation maintenance expense, and higher resi demand offset partially by lower C&I demand, increased bad debt expense, and reduced late payment and reconnect fees.

We are lowering our 2021 EPS estimate to account for the initiated guidance and greater impact to the electric segment and slightly raising our 2022 and 2023 EPS estimates to account for increased capital spending.

Source: Company Filings, Guggenheim Securities, LLC estimates

Valuation

We apply a 19x multiple (from 18x) on the electric utility to account for upside to the capital plan and 21x multiple on the gas LDCs. We arrive at our valuation utilizing a sum-of-the parts analysis, based on: (1) ~$10/share for the regulated electric utility; (2) ~$20/share value for the regulated gas segment given the limited spread from LDCs after recent market volatility; and (3) (~$-3)/share for other adjustments for Corp and Other. We use this sum of the parts to arrive at our $27 valuation.

Risk

The primary risks on the regulated utility encompass the traditional risk factors inherent with all utilities including: (1) rate case risk, (2) lower capex outlook, and (3) interest rate changes above what we account for in our regression model.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from NiSource Inc. in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: NiSource Inc. (NI) as of 08-04-2020

Created by: BlueMatrix

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

NISOURCE

(NI US Equity – $24.36 – Outperform)

Does ESG have room for an LDC?

- **2021 guidance light, but L-T EPS CAGR now above 5-7%.** NI initiated 2021 guidance of $1.28-1.36 which missed prior consensus of $1.36 (prev. WRe $1.34), but nonetheless removed a key overhang for the stock. The range includes dilution from the CMA sale/dis-synergies which are largely expected to be offset by NI's cost restructuring program. The bogey between consensus and the midpoint is ~$0.05 of COVID related headwinds as NI's base case assumes modest impacts through the 1H of 2021. NI also gave a preview of L-T growth opportunities which will be discussed in detail at its Sept. 29th Analyst Day – $1.8-2.0B of incremental renewable capex, which will drive rate base growth of 10-12% and an EPS CAGR in excess of 5-7% through 2024 (off 2021). NI outperformed the UTY index by 220bps on the day.

- **New EPS growth likely lumpy, financing considerations.** The renewable investments will take place primarily in 2022 & 2023. But timing and financing costs will ultimately determine how much regulatory lag NI faces as the projects are build transfer (i.e., no AFUDC) and are not expected to be rolled into rates until mid-2023. Our sense is that NI will work to minimize lag in 2022, targeting projects for in-service near the tail end of the year. For financing, NI plans to use equity content consistent with its targeted consolidated cap structure (60% equity); NI might look to use a forward, hybrids or converts (likely a mix). NI will work to smooth the growth trajectory by leveraging O&M through its cost restructuring program.

- **Model update**. We have refreshed our model, making several assumptions around the timing of capex deployment, financings and when NIPSCO will have new rates. We assume 1/3 of the $1.9B is deployed in late-2022, with the remaining staggered in the 1H of 2023. As of now, we are financing with $1.1B of common equity which is deployed in-sync with the investments. We target new rates in place at NIPSCO in the July/August timeframe of 2023. Our new 2022-23E imply 9% and 5% EPS growth, respectively – see a summary of our changes in the table on the right. We see 2024 EPS of $1.70, which implies a ~8.5% CAGR once the renewables are fully reflected

- **PT to $27; Outperform.** We raise our PT by $1 to $27 due to higher utility multiples. We stay Outperform rated and like the direction NI is headed via its renewables program; post-CMA, the ability to execute should be a lot easier.

Source: Wolfe Utilities & Power Research

Company description

NiSource, headquartered in Merrillville, Indiana, operates two separate business lines: electric utility and gas distribution LDCs. The electric utility serves just under 500,000 customers in northern Indiana and owns 3,300 MW of generation. The gas LDC serves 3.5 million customers in Indiana, Ohio, Pennsylvania, Kentucky, Virginia, Maryland and Massachusetts.

Investment Thesis

We see above-average rate base and earnings growth potential for NiSource relative to other electric and natural gas distribution utilities. NI has a $30B backlog of capital investment with recovery largely through trackers in mostly constructive regulatory environments. We see NI as a de-risking story in 2020 with solid growth prospects through its base capex program and renewable investment opportunities at NIPSCO.

Valuation

Our $27 price target is derived using a P/E multiple of 18x on NI's electric earnings and 18.5x on its gas LDC earnings – both averages. Risks for NiSource are 1) bad regulatory outcomes; 2) pipeline safety incidents. Upsides are 1) additional growth projects and 2) customer and sales growth

WOLFE RESEARCH

August 5, 2020

Investment Conclusion

We are Outperform rated on NiSource. Most of the NI's annual capex (~80%) is recovered with minimal lag via tracking mechanisms and the company has built a constructive track record with most of its state regulators. Post the sale of Columbia Gas of Massachusetts, we believe the company's plan will be a lot easier to execute on. Further, $1.8-2.0B of incremental renewable capex has now been identified for deployment across 2022 and 2023, which will help drive rate base growth of 10-12% and EPS growth in excess of 5-7%, on average, through 2024 (off 2021 base year). The dramatic shift toward renewables and fact that NI will be coal-free by 2028 is also helpful from an ESG perspective. We ultimately see exiting Massachusetts as a turning point for the company that should allow NI to re-rate closer to its historic 5-10% premium over time as it proves out the ability to execute.

Renewable light at the end of the tunnel

Reiterate Rating: NEUTRAL | PO: 26.00 USD | Price: 24.36 USD

06 August 2020

Equity

New LT rate base growth CAGR better than expected...

Alongside reporting a 2Q beat, NI initiated '21 EPS guidance of $1.28-1.36 (vs consensus of $1.36) and a '21-'24 LT rate base growth CAGR of +10-12%, inclusive of the company's renewable strategy (50% BOT JVs funded with ~33% tax equity) adding an incremental $1.8-2.0bn of capex in '22 and '23 (vs our prior assumption of $1.5bn). Mgmt. further highlighted the new rate base CAGR translates into LT EPS growth '21-'24 in *excess* of the company's previous +5-7% EPS CAGR (using the new '21 guidance as the base yr). On our new estimates, the new rate base CAGR does imply an impressive +11.6% EPS CAGR '21-'24, but we stress that this is shorter than the typical 5-yr CAGR. While much more detail is expected on the company's renewable strategy at the 9/29 investor day with most renewable commercial deals will be completed by then, we highlight NI likely uses equity linked hybrids to finance part of the deal (we assume $500mn in converts issued in '22 and converted in '25) in addition to common equity to support NI's '22 and '23 incremental renewable capex. Critically, we expect an explicit EPS growth CAGR to be disclosed at the investor day with potential outlook beyond '24.

...but partially offset by lower '21 guide & '22 implications

While we applaud NI for providing further clarity into '21 by establishing new '21 guidance, we stress the new guidance implied negative EPS revisions to '21 and '22 even with base case COVID impact of (-$0.05) baked into the guide. Assuming this negative impact rolls off completely in '22, the guidance also suggests '22 consensus is likely too high. Although the rate base CAGR guidance along with EPS growth >5-7% '21-'24 are both positive for NI, we perceive the implied negative revisions to EPS for the next two years mostly offsets this as the majority of the uptick in forecasted rate base and EPS occurs outside of most investors' valuation window (typically 2022). Hence, we lower our '20 / '21 / '22 EPS estimates by about 4 cents/yr, while raising '23/ '24 EPS by 3 / 6 cents to account for higher than previously contemplated BOT renewables where we expect NI to earn a full yr of earnings starting in '24 (~14c per year vs prior 10c). Reit Neutral given NT uncertainty and revision risk & raise PO to $26 (from $25) as mtm and raise premiums in SOTP for both gas and electric.

Company Sector

Natural Gas-Local Distribution Companies

Company Description

NiSource Inc. (NI) is a fully-regulated utility company serving approximately 3.5mn natural gas customers and 500,000 electric customers across seven states through its local Columbia Gas and NIPSCO brands. NI generates substantially all of its operating income through these rate-regulated businesses.

Investment Rationale

NI's positives include 5-7% dividend growth and >5-7% EPS growth via $30bn of infrastructure investments over the next 20+ years and fully regulated subsidiaries. We have factored in resolution of overhang from the MA incident as the company will likely sell 3Q. However, NI has C&I demand risk from COVID, which will be difficult to offset with O&M cuts due to promises already around cost cuts to balance CMA sale. We see shares valued appropriately and rate Neutral.

Reconciling new LT rate base and EPS growth

NiSource announced an impressive LT rate base growth CAGR of +10-12% for 2021-2024 as the company provided more details around its evolving renewable strategy. The increase in the rate base CAGR is attributed to NiSource's renewable strategy where it plans to spend an incremental $1.8-2.0bn of capex on build-own-transfer renewable JVs in '22 and '23, and additional opportunities through 2028. This compares to our previous assumption for incremental renewable capex added to rate base of $1.5bn in '22 and '23. The higher capex assumption in the out years equates to higher EPS from renewables in '24 where we now model about $0.14/year of EPS generated by renewables in '24 and beyond. Note we estimate '24 is the first full year of renewable earnings. Note NI expects the BOT JV ownership to be composed of roughly 33% tax equity investment or ~$1bn of tax equity investment compared to NI's $1.8-2.0bn investment – a lower percentage tax equity than anticipated driving RB estimates higher. This also implies the remaining renewable RFPs awarded are likely Solar given the capital structure solar has a lower proportion owned by tax equity (30%) vs wind at 50%.

We forecast that the higher rate base CAGR of +10-12% through 2024 will translate to similar EPS growth of +11.3% over the same time period. Excluding the BOT renewable capex, we estimate an EPS CAGR '21-'23 of about 8.4%, about 300bps below the former. As of today, consensus is only reflecting 6.8% LT EPS growth as some of the street likely have yet to incorporate the incremental renewable capex. See the table below for comparison. Also, see estimate section below to compare rate base growth vs EPS growth compared to guidance.

Table 1: EPS estimates and CAGR including Renewables vs excluding renewables vs consensus

	2020	2021	2022	2023	2024	2025
Incremental EPS from Renewables RFPs	$0.00	$0.00	($0.01)	$0.06	$0.14	$0.14
EPS - Including Renewables BOT from RFP 1 & 2	$1.24	$1.31	$1.42	$1.63	$1.80	$1.84
EPS - Excluding Renewables BOT from RFP 1 & 2	$1.24	$1.31	$1.44	$1.58	$1.67	$1.70
EPS CAGR - Including Renewables RFPs - 2021-2024					*11.3%*	
EPS CAGR - Excluding Renewables - 2021-2024					*8.4%*	
Consensus EPS CAGR - 2021-2024					6.8%	

Source: BofA Global Research estimates, company report, Bloomberg

Estimates: Lower EPS in near term, but raise in long term

We lower our EPS estimates in '20 / '21 / '22 given the newly initiated lower than expected '21 guidance, but raise our EPS in '23 and '24 to account for incremental renewable capex (~$1.8-2.0bn) added to electric rate base that is higher than our previous assumption of roughly $1.5bn. After adjusting our estimates, our implied '21-'24 EPS CAGR comes out to 11.3%, which is well in excess of NI's previously articulated 5-7% EPS CAGR. We do emphasize that this 11.3% is a shorter 3-yr CAGR and we do not foresee this as a sustainable rate over the long term as the company will benefit from a significant uptick in EPS from the renewable program beginning in 2024 off of a lower base coming out of COVID. With the 5c negative COVID impact added back to the midpoint of the new '21 EPS guidance and assuming our 2024 EPS estimate of 1.80, this equates to a 9.6% EPS CAGR from '21-'24 – still strong, but again padded by the one-time uptick of $1.8-2.0bn of renewable capex in '22/'23 translating to EPS in '24.

In the EPS estimates table below, we include a number of LT EPS CAGRs below to compare the LT growth off different base years. We would highlight that '19-'23 and '19-'24 still fall within NI's previous LT EPS growth CAGR of +5-7%, albeit the latter CAGR is towards the high end. With these CAGRs below off the '19 base still consistent with the previous EPS CAGR guidance of +5-7%, we question why NI chose to re-base.

Valuation

We raise our PO to $26 (from $25) as we mark to market our SOTP valuation with peer multiples of 15.8x (from 15.5x) for gas and 16.9x (unchanged) for electric. We also raise our electric premium by 1x to 2x to account for incremental renewable earnings growth long-term, and now capitalize all of NI's gas subsidiaries at a 1x premium to account for mitigated COVID concern with improved visibility into '21. We do note that under our SOTP valuation, which capitalizes '22 EPS across the subsidiaries, NiSource's incremental renewable capex and EPS currently lands *outside* of the valuation window.

Clear uncertainty remains in the near term with 2020 EPS guidance suspended, and lack of clarity on '21 lag (with subsequent gyrations around '22) as keeping premiums to peers relatively modest. We perceive a positive backdrop for shares into the coming months update, with '24 EPS the key metric (even '23 will be partially impacted by lag and remains relatively opaque). Expect more explicit guidance of what this '24 outlook will be (once benefitting from FY run-rate of EPS uplift with renewable investment and next rate case to earn ROE once more).

Meanwhile, given the large investments and backdrop of recent larger rate case, expect bill headroom and pressure to remain a relevant factor to consider in execution of proposed plan.

We raise our PO to $26 (from $25) and maintain our Neutral rating. We perceive a clear positive backdrop, but with our ests still below Street on '21/'22 and with ambiguity on '23 don't expect a re-rating to the 'next' ESG stock. Perceive consistency in execution on O&M plan to limit future EPS revisions is key (after numerous quarters of consecutive gyrations in expectations).

Price objective basis & risk

NiSource Inc (NI)

Our $26 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2022 forward P/E multiples of 15.8x for gas utilities and 16.9x for electric utilities with a 1x premium for gas utilities given partially mitigated COVID impact and visibility into '21, and a 2.0x premium for the electric utility's strong growth rates and increamental renewable buildout with capex beginning in '22, but acknowledgendustrial risk (prev 1x). We note that electric / gas peer P/E multiples are grossed up by 5% / 5.1% to reflect capital appreciation across the sector. We strip value from Columbia Gas of MA given the pending sale to close in 3Q20. We subtract the value of excess holding company debt at the parent not supporting the utility opcos. We believe NI's 5-7% EPS/dividend growth outlook, attractive regulated earnings profile and constructive legislation across NI's service territories are under-estimated given its discounted multiple versus peers.

Downside risks to our PO are a sustained period of economic weakness pressuring customer growth, interest rate increases, high natural gas prices, financing plan updates, unforeseen costs associated with the MA incident, and challenging steel production economics in Indiana.

For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

***INCOME RATINGS*, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend.** *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price charts for the securities referenced in this research report are available at https://pricecharts.baml.com, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: NiSource Inc.
BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: NiSource Inc.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: NiSource Inc.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: NiSource Inc.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: NiSource Inc.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: NiSource Inc.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: NiSource Inc.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of

the report: NiSource Inc.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: NiSource Inc.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: NiSource Inc.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for the purpose of any recommendation in relation to: (i) an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report; or (ii) a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

UK Readers: The protections provided by the U.K. regulatory regime, including the Financial Services Scheme, do not apply in general to business coordinated by BofA Securities entities located outside of the United Kingdom.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

NiSource Inc (NI)

Ahead of Columbia Deal Closing and Analyst Day, New '21 Guidance and Renewable Spending Plan Revealed

- **Analyst Day Preview:** Unexpectedly, NiSource previewed its 10-12% rate base and 5-7% EPS growth guidance for the next planning period. Formal Virtual Analyst Day is in late September and likely after the Columbia sale is expected to close.

- **2021 EPS Guidance Announced Ahead of Schedule:** Into the release, we were expecting NiSource to highlight different sensitivities around 2021 EPS but not provide a formal 2021 guidance until the virtual analyst day in September. We along with the Street were expecting ~$1.37/share guide, but investor feedback was the Street was too high into the announcement. On the release, management guided 2021 EPS of $1.28 to $1.36 (or $1.33 to $1.41 adjusted for COVID-19) which establishes a new bar. In our view, this is a positive development as it reduces investor uncertainty even though the EPS range was below our and Street's expectations largely on the very conservative COVID-19 assumption.

- **New Renewable Investments Plan:** NiSource announced a 50/50 ownership / PPA plan for renewables, which includes a planned NiSource $1.8-2.0B renewable investment plan ($2.8-$3.0B with tax equity). Of this plan, ~$0.4B is already approved by regulators and an addition $1.4-1.6B in the regulatory filings but hasn't been formally approved yet.

- **Financing Plan:** NiSource indicated that they have strong liquidity for the next 1-2 years, but a formal financing plan will be announced at analyst day in September.

- **Q2 Result:** EPS of $0.13 modestly beat Citi's $0.11 as COVID-19 impacts of ~$0.06 were largely offset by cost management and regulatory solutions in Q2.

- **Estimate Revisions:** We updated our estimates for Q2 actuals, guidance, and current business outlook.

NiSource Inc

Company description

NiSource Inc (NI) is primarily a regulated utility with an integrated network of gas distribution in the Northeast, Mid-Atlantic, and Midwest. NiSource also operates an electric utility in Northern Indiana. The company serves around 4 million customers across seven states through its two main business segments, including: 1) Gas Distribution, which delivers natural gas in several states; 2) Electric Operations, which consist of NiSource's regulated electric utility, Northern Indiana Public Service Company (NIPSCO).

Investment strategy

We rate the shares of NiSource (NI) Neutral (2). We believe NI's long-term earnings are relatively stable due to diverse operations areas and constructive regulatory jurisdictions. Our estimates do not include: 1) Substantial industrial load growth at the utilities; 2) Colder-than-normal weather and faster than average customer growth; or 3) Slower than typical timeline in regulatory filing and approval process for new infrastructure projects and cost recovery mechanisms.

Valuation

We average multiple valuation methodologies to derive our $24 target price. Our NAV yields a value of $21. We value regulated assets at a multiple of 1.3x rate base. These values are partially offset by the company's net debt. Our DDM, which incorporates our rate base growth assumptions, values the company at $30 per share. Our P/E and EV/EBITDA analyses yield values of $23 per share.

Risks

The key risks to our investment thesis are: (1) Rate Cases – We estimate the company will receive rate relief at several of its utilities. Under- or over-estimation of relief could materially impact our estimates. (2) Weather – Changes in weather impact the stability of earnings. (3) Capital Investment Recovery — NI spends a substantial amount of capital to maintain and expand its distribution system. NI depends on rate increases from public utility commission to earn a fair return on this expansion. (4) Capital Markets — Access to cheap capital markets could be limited due to the size of the company. If the impact on the company from any of these factors proves to be greater/less than we anticipate, it may prevent the stock from achieving our target price or could cause the stock price to materially under/outperform our target. (5) There is a risk that there will be negative political, financial, and regulatory backlash from the recent events in New England.

Appendix A-1

Analyst Certification

The research analysts primarily responsible for the preparation and content of this research report are either (i) designated by "AC" in the author block or (ii) listed in bold alongside content which is attributable to that analyst. If multiple AC analysts are designated in the author block, each analyst is certifying with respect to the entire research report other than (a) content attributable to another AC certifying analyst listed in bold alongside the content and (b) views expressed solely with respect to a specific issuer which are attributable to another AC certifying analyst identified in the price charts or rating history tables for that issuer shown below. Each of these analysts certify, with respect to the sections of the report for which they are responsible: (1) that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc. and its affiliates; and (2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this report.

Disclosure for investors in the Republic of Turkey: Under Capital Markets Law of Turkey (Law No: 6362), the investment information, comments and recommendations stated here, are not within the scope of investment advisory activity. Investment advisory service is provided in accordance with a contract of engagement on investment advisory concluded between brokerage houses, portfolio management companies, non-deposit banks and clients. Comments and recommendations stated here rely on the individual opinions of the ones providing these comments and recommendations. These opinions may not fit to your financial status, risk and return preferences. For this reason, to make an investment decision by relying solely to this information stated here may not bring about outcomes that fit your expectations. Furthermore, Citi Research is a division of Citigroup Global Markets Inc. (the "Firm"), which does and seeks to do business with companies and/or trades on securities covered in this research reports. As a result, investors should be aware that the Firm may have a

conflict of interest that could affect the objectivity of this report, however investors should also note that the Firm has in place organisational and administrative arrangements to manage potential conflicts of interest of this nature.

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For securities recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in the issuers' financial instruments and may act as principal in connection with such transactions. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

The Firm is a market maker in the publicly traded equity securities of NiSource Inc.

Unless stated otherwise neither the Research Analyst nor any member of their team has viewed the material operations of the Companies for which an investment view has been provided within the past 12 months.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 30th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Pursuant to the Market Abuse Regulation a history of all Citi Research recommendations published during the preceding 12-month period can be accessed via Citi Velocity (https://www.citivelocity.com/cv2) or your standard distribution portal. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

	12 Month Rating			*Catalyst Watch*		
Data current as of 30 Jun 2020	**Buy**	**Hold**	**Sell**	**Buy**	**Hold**	**Sell**
Citi Research Global Fundamental Coverage	54%	34%	11%	20%	71%	9%
% of companies in each rating category that are investment banking clients	66%	64%	60%	70%	63%	66%

Guide to Citi Research Fundamental Research Investment Ratings:
Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.
Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.
Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The target price is based on a 12 month time horizon. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Analysts may place covered stocks "Under Review" in response to exceptional circumstances (e.g. lack of information critical to the analyst's thesis) affecting the company and / or trading in the company's securities (e.g. trading suspension). As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. To satisfy regulatory requirements, we correspond Under Review and Neutral to Hold in our ratings distribution table for our 12-month fundamental rating system. However, we reiterate that we do not consider Under Review to be a recommendation. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At other times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations from specified ranges will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Catalyst Watch Upside/Downside calls:
Citi Research may also include a Catalyst Watch Upside or Downside call to highlight specific near-term catalysts or events impacting the company or the market that are expected to influence the share price over a specified period of 30 or 90 days. A Catalyst Watch Upside (Downside) call indicates that the analyst expects the share price to rise (fall) in absolute terms over the specified period. A Catalyst Watch Upside/Downside call will automatically expire at the end of the specified 30/90 day period; the analyst may also close a Catalyst Watch call prior to the end of the specified period in a published research note. A Catalyst Watch Upside or Downside call may be different from and does not affect a stock's fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of FINRA ratings-distribution-disclosure rules, a Catalyst Watch Upside call corresponds to a buy recommendation and a Catalyst Watch Downside call corresponds to a sell recommendation. Any stock not assigned to a Catalyst Watch Upside or Catalyst Watch Downside call is considered Catalyst Watch Non-Rated (CWNR). For purposes of FINRA ratings-distribution-disclosure rules, we correspond CWNR to Hold in our ratings distribution table for our Catalyst Watch Upside/Downside rating system. However, we reiterate that we do not consider CWNR to be a recommendation. For all Catalyst Watch Upside/Downside calls, risk exists that the catalyst(s) and associated share-price movement will not materialize as expected.

NON-US RESEARCH ANALYST DISCLOSURES
Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and

trading securities held by a research analyst account. The legal entities employing the authors of this report are listed below (and their regulators are listed further herein):

Citigroup Global Markets Inc	Ryan Levine; Timm Schneider; Willard A Grainger

OTHER DISCLOSURES

Any price(s) of instruments mentioned in recommendations are as of the prior day's market close on the primary market for the instrument, unless otherwise stated.

The completion and first dissemination of any recommendations made within this research report are as of the Eastern date-time displayed at the top of the Product. If the Product references views of other analysts then please refer to the price chart or rating history table for the date/time of completion and first dissemination with respect to that view.

Regulations in various jurisdictions require that where a recommendation differs from any of the author's previous recommendations concerning the same financial instrument or issuer that has been published during the preceding 12-month period that the change(s) and the date of that previous recommendation are indicated. For fundamental coverage please refer to the price chart or rating change history within this disclosure appendix or the issuer disclosure summary at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

European regulations require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. The policy applicable to Citi Research's Products can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

The proportion of all Citi Research research recommendations that were the equivalent to "Buy","Hold","Sell" at the end of each quarter over the prior 12 months (with the % of these that had received investment firm services from Citi in the prior 12 months shown in brackets) is as follows: Q2 2020 Buy 33% (68%), Hold 43% (62%), Sell 24% (60%), RV 0.7% (88%); Q1 2020 Buy 33% (68%), Hold 43% (60%), Sell 24% (57%), RV 0.6% (85%); Q4 2019 Buy 32% (68%), Hold 44% (61%), Sell 24% (56%), RV 0.8% (90%); Q3 2019 Buy 33% (72%), Hold 43% (65%), Sell 24% (57%), RV 0.6% (88%). For the purposes of disclosing recommendations other than for equity or high yield recommendations (whose definitions can be found in their corresponding disclosure sections), "Buy" means a positive directional trade idea; "Sell" means a negative directional trade idea; and "Relative Value" means any trade idea which does not have a clear direction to the investment strategy.

European regulations require a 5 year price history when past performance of a security is referenced. CitiVelocity's Charting Tool (https://www.citivelocity.com/cv2/#go/CHARTING_3_Equities) provides the facility to create customisable price charts including a five year option. This tool can be found in the Data & Analytics section under any of the asset class menus in CitiVelocity (https://www.citivelocity.com/). For further information contact CitiVelocity support (https://www.citivelocity.com/cv2/go/CLIENT_SUPPORT). The source for all referenced prices, unless otherwise stated, is DataCentral, which sources price information from Thomson Reuters. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance.

Investors should always consider the investment objectives, risks, and charges and expenses of an ETF carefully before investing. The applicable prospectus and key investor information document (as applicable) for an ETF should contain this and other information about such ETF. It is important to read carefully any such prospectus before investing. Clients may obtain prospectuses and key investor information documents for ETFs from the applicable distributor or authorized participant, the exchange upon which an ETF is listed and/or from the applicable website of the applicable ETF issuer. The value of the investments and any accruing income may fall or rise. Any past performance, prediction or forecast is not indicative of future or likely performance. Any information on ETFs contained herein is provided strictly for illustrative purposes and should not be deemed an offer to sell or a solicitation of an offer to purchase units of any ETF either explicitly or implicitly. The opinions expressed are those of the authors and do not necessarily reflect the views of ETF issuers, any of their agents or their affiliates.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

This communication is directed at persons who are "Eligible Clients" as such term is defined in the Israeli Regulation of Investment Advice, Investment Marketing and Investment Portfolio Management law, 1995 (the "Advisory Law"). Within Israel, this communication is not intended for retail clients and Citi will not make such products or transactions available to retail clients. The presenter is not licensed as investment advisor or marketer by the Israeli Securities Authority ("ISA") and this communication does not constitute investment or marketing advice. The information contained herein may relate to matters that are not regulated by the ISA. Any securities which are the subject of this communication may not be offered or sold to any Israeli person except pursuant to an exemption from the Israeli public offering rules, including according to the Israeli Securities Law.

Citi Research generally disseminates its research to the Firm's global institutional and retail clients via both proprietary (e.g., Citi Velocity and Citi Personal Wealth Management) and non-proprietary electronic distribution platforms. Certain research may be disseminated only via the Firm's proprietary distribution platforms; however such research will not contain changes to earnings forecasts, target price, investment or risk rating or investment thesis or be otherwise inconsistent with the author's previously published research. Certain research is made available only to institutional investors to satisfy regulatory requirements. Individual Citi Research analysts may also opt to circulate published research to one or more clients by email; such email distribution is discretionary and is done only after the research has been disseminated. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Rule 598 and ASIC Regulatory Guide 264, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Where a component of a published trade idea is subject to a restriction, the trade idea will be removed from any list of open trade ideas included in the Product. Upon the lifting of the restriction, the trade idea will either be re-instated in the open trade ideas list if the analyst continues to support it or it will be officially closed. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

Bulls Say

- We expect annual dividend growth to accelerate to about 7% after the impact of COVID-19 fades and earnings increase from renewable energy and gas pipeline investment.
- We believe the separation of Columbia Pipeline Group from NiSource was good shareholder stewardship, as the market valued the individual businesses more highly at the time of the separation.
- New legislation has improved the regulatory framework in Indiana for NiSource's electric and natural gas distribution utilities.

Bears Say

- Industrial customers account for over half of NiSource's electric sales, higher than most utilities. Industrial sales are more sensitive to the economy than residential and commercial sales.
- NiSource's electric and natural gas distribution businesses have substantial commercial and industrial customer exposure, increasing the impact of the COVID-19 pandemic.
- NiSource issued almost $2 billion of common and preferred shares in 2018 and 2019. The additional shares will be a headwind to EPS growth.

NiSource Plans to Increase Renewable Energy Investment by $2 Billion

Business Strategy and Outlook

Charles Fishman, CFA, Eq. Analyst, 06 August 2020

NiSource completed its separation from Columbia Pipeline Group in 2015 and now derives all of its operating revenue from its regulated electric and natural gas distribution utilities. About 60% of operating income comes from its six natural gas distribution utilities. The remaining 40% comes from its electric utility business in Indiana.

NiSource's utilities have regulatory frameworks that include automatic rate tracker mechanisms, with almost 80% of planned capital expenditures, providing recovery of investments in less than 18 months. As a result of the favorable regulation, we expect NiSource to step up its capital expenditures to almost $2 billion per year over the next five years. This is an investment level almost double the previous five years.

Over the next 20 years, NiSource plans to invest about $30 billion in infrastructure improvements. Over 50% of these investments are modernization programs for replacing steel and cast-iron pipe with plastic at its natural gas distribution utilities. Almost all of these investments receive rate tracker treatment. This allows NiSource to earn returns on these investments near allowed returns and consistently above its cost of capital.

In September 2018, a natural gas explosion killed one person north of Boston on NiSource's Columbia Gas of Massachusetts system. Insurance should cover roughly one half of the almost $2 billion of claims, penalties and other expenses, but the event was a public relations nightmare. On Feb. 27, 2020, NiSource announced the sale of the Massachusetts utility for $1.1 billion. The transaction will avoid a planned $500 million of equity issuances.

Although the economic impact from the COVID-19 pandemic will pressure earnings in 2020 due in large part to NiSource's high share of commercial and industrial customers, we expect a rebound in average annual earnings per share growth of 7.3% from 2021 to 2024, in line with management's target. We estimate dividend growth accelerating to 7% per year in 2023 and 2024 after the economic impact of COVID-19 dissipates and investments in renewables and safety-related capital investments are incorporated into rates.

Analyst Note

Charles Fishman, CFA, Eq. Analyst, 06 August 2020

We are increasing our fair value estimate to $27 per share from $26 after NiSource reported 2020 second-quarter operating earnings per share of $0.13 versus $0.05 last year, initiated 2021 earnings guidance, and announced plans to invest an additional $1.8 billion-$2 billion in renewable energy through 2023.

The results were solid in what is normally a weak quarter for a utility that derives over 60% of its operating earnings from natural gas distribution.

We increased our five-year capital expenditure forecast by $2.9 billion, to $12.1 billion, based in large part on NiSource's projecting that its combined gas and electric rate base will increase to $20.7 billion by 2024 from $13.9 billion at the end of this year. We are a little more conservative than management and estimate a 2024 year-end rate base of $19.9 billion, but this would still represent an impressive average annual growth rate of 9.4% over the four-year period.

NiSource management had previously announced it would close its last Indiana coal-fired power plant in 2028, but the almost $2 billion investment in renewable energy through 2024 was more than we had anticipated. We had assumed the majority of the needed generating capacity to replace the retiring coal units would come from purchased power agreements. However, NiSource plans to have joint venture ownership in 50% of the additional renewable capacity, requiring the larger investment and driving rate base growth.

NiSource initiated a 2021 EPS guidance range of $1.28-$1.36, with a midpoint higher than our estimate of $1.30. We increased our 2021 EPS estimate to $1.32, the midpoint of the range, and also increased our 2022-24 estimates by $0.02-$0.09 per share. The increase in our

earnings estimates were due to the higher rate base projections and was the primary driver of our higher fair value estimate.

Economic Moat

Charles Fishman, Eq. Analyst, 06 August 2020

Service territory monopolies and efficient scale advantages are the primary moat sources for NiSource's regulated utilities. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their infrastructure. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow NiSource's regulated utilities to achieve at least their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

NiSource derives roughly 60% of its operating earnings from the regulated distribution of natural gas. For natural gas distribution service, regulators set distribution rates and the commodity price for customers purchasing natural gas from NiSource. NiSource recovers its costs for natural gas that it sells with a pass-through charge to customers. Thus, NiSource has no commodity price risk that could weaken its moat. Customers may elect to purchase natural gas from independent retail energy suppliers and use and pay for distribution services only. NiSource exited the no-moat retail energy supply business in 2010.

Electricity generation, which contributes about 40% of operating earnings, is from operations in Indiana and is also regulated. The rates for this service are combined with regulated customer rates for transmission and distribution service. In exchange for its monopoly position, state and federal regulators set NiSource's electric rates.

Fair Value & Profit Drivers

Charles Fishman, Eq. Analyst, 06 August 2020

We increased our fair value estimate to $27 per share from $26 after NiSource reported second-quarter operating earnings per share of $0.13 versus $0.05 last year, initiated 2021 earnings guidance, and announced plans to invest an additional $1.8 billion-$2 billion in renewable energy through 2023.

We increased our five-year capital expenditure forecast by $2.9 billion, to $12.1 billion, based in large part on NiSource projecting that its combined gas and electric rate base will increase to $20.7 billion by 2024 from $13.9 billion at the end of this year. We are a little more conservative than management and estimate a 2024 year-end rate base of $19.9 billion, but this would still represent an impressive average annual growth rate of 9.4% over the four-year period.

NiSource had previously announced it would close its last Indiana coal-fired power plant in 2028, but the almost $2 billion investment in renewable energy through 2024 was more than we had anticipated. We had assumed the majority of the needed generating capacity to replace the retiring coal units would come from purchased power agreements. However, NiSource plans to have joint venture ownership in 50% of the additional renewable capacity, requiring the larger investment and driving rate base growth.

NiSource initiated a 2021 EPS guidance range of $1.28-$1.36, with a midpoint higher than our estimate of $1.30. We increased our 2021 earnings estimate to $1.32 per share, the midpoint of the range, and also increased our 2022-24 estimates by $0.02-$0.09 per share.

We use a 6% cost of capital in our discounted cash flow valuation, which incorporates a 7.5% cost of equity. Our cost of equity is lower than the 9% rate of return we expect investors will demand of a diversified equity portfolio. We believe our cost of equity reflects the risk associated with regulated electric and natural gas distribution utilities operating in states that have average to above-average regulatory frameworks.

Our pretax cost of debt assumption is 5.8%, as we incorporate a normalized long-term real rate environment and normalized credit spreads. A 2.25% long-term

NiSource Inc NI (XNYS)

Morningstar Rating	Last Price	Fair Value Estimate	Price/Fair Value	Trailing Dividend Yield %	Forward Dividend Yield %	Market Cap (Bil)	Industry	Stewardship
★★★★	23.96 USD	27.00 USD	0.89	3.41	3.45	9.33	Utilities - Regulated Gas	Standard

inflation outlook underpins our capital cost assumptions.

Our fair value estimate implies a 20.5 times multiple on 2021 earnings. This is a modest discount to peer electric and gas distribution utilities trading at price/earnings ratios of about 22 times in early August.

Risk & Uncertainty

Charles Fishman, Eq. Analyst, 06 August 2020

Regulatory risk remains the key uncertainty; however, NiSource's regulatory exposure is diversified, owing to operations in seven states and its federal-regulated electric transmission system. NiSource has reduced some of the regulatory uncertainty related to its planned natural gas distribution and electric utilities investments by securing preapprovals and favorable rate mechanisms that provide for automatic rate increases as infrastructure investments are made.

In 2018, NiSource announced it would eliminate all coal-fired generation from its power plant fleet within 10 years. This transition will require signing power purchase agreements for renewable energy, building new solar and wind farms, and making modifications to its electric grid. There is a modest amount of execution risk to this dramatic transition from coal.

Stewardship

Charles Fishman, Eq. Analyst, 06 August 2020

We assign NiSource a Standard stewardship rating. We think management's decision to form Columbia Pipeline Partners and execute Columbia Pipeline Group's tax-free separation exhibited Exemplary stewardship of shareholder capital. However, the CEO who probably drove those decisions left NiSource to go with CPG before he retired.

The National Transportation Safety Board found NiSource responsible for the gas explosion north of Boston. The incident had a negative effect on shareholder value and has been a public relations nightmare. The good news is that management found a buyer for the utility at an attractive purchase price. We believe this was good stewardship of shareholder capital following a tragic accident. We expect the transaction to close in late 2020.

Joe Hamrock became CEO following the separation. He has been with NiSource since 2012 and previously ran the natural gas distribution business. Before joining NiSource, he was with American Electric Power. CFO Donald Brown joined NiSource in April 2015. Previously, he was with UGI Utilities and Constellation Energy. These individuals have significant utility experience, and we believe they will not stray from the strategy that has benefited shareholders.

Most of the members of NiSource's board of directors were involved in the separation of CPG and oversight of investment decisions. Given this, we are confident that the solid stewardship of shareholder capital is likely to continue.

Analyst Notes Archive

We Like NiSource's Decision to Sell Columbia Gas of Massachusetts

Charles Fishman, Eq. Analyst, 28 February 2020

We are reaffirming our $27.50 per share fair value estimate after narrow-moat NiSource reported solid 2019 operating EPS, announced the sale of Columbia Gas of Massachusetts, and pulled its 2020 earnings guidance. Eversource Energy is acquiring the Massachusetts gas distribution utility for $1.1 billion, a price we estimate is roughly 24 times normalized earnings and in line with recent natural gas distribution transactions.

However, we doubt the utility has come anywhere near this level of earnings contribution following the tragic natural gas explosion that killed one person north of Boston in September 2018. The incident has resulted in close to $2 billion of claims, penalties and other expenses (roughly one-half of the costs should be covered by insurance) and has been a significant distraction for management and a public relations nightmare.

In our opinion, the decision to sell the Massachusetts utility was good stewardship of shareholder capital as regulatory, political and customer relationships would likely be strained for years. The roughly $1 billion of proceeds will allow NiSource to forgo a $500 million block equity issuance that had been planned for later this year.

Although pulling earnings guidance, management was confident that the company could return to its long-term target of 5%-7% EPS growth, off a new 2021 earnings base, following the completion of the transaction. Our revised earnings estimates result in approximately 6% EPS growth from 2021-2024.

On January 31, NiSource increased its dividend by 5% and we expect increases in line with EPS growth for the foreseeable future. In our opinion, the dividend is secure and provides a yield of approximately 3% at the February 27 market closing price.

COVID-19 Could Slow Utilities' Near-Term Growth but Long-Term Outlook Still Bright

Travis Miller, Strategist, 26 March 2020

After assessing COVID-19 data and commentary from utilities this week, we still believe the sector offers buying opportunities for defensive, income-seeking investors. U.S. utilities trade at a median 10% discount to our fair value estimates and 3.5% yield even after rallying 23% on March 24-26.

Although some utilities reaffirmed their outlooks this week, we think 2020 earnings for many utilities will be at the low end or below management guidance ranges due to COVID-19 issues. We expect near-term lower commercial and industrial energy demand, tighter financing, growth project delays, and higher expenses. We are reaffirming our moat and moat trend ratings.

Utilities with a large share of C&I customers, usage-based rates, and less-adaptive ratemaking have the most near-term risk. Among these are Southern Company, Entergy, American Electric Power, Duke Energy, Evergy, and Ameren. Utilities with non-utility businesses such as DTE Energy, CenterPoint, and OGE also could face weaker near-term earnings. Our updates led to 2%-5% fair value estimate cuts.

Utilities with more residential customers, usage-decoupled rates, and forward-looking rate structures are less at risk. These include Edison International, Eversource Energy, NextEra Energy, and American Water Works.

We expect most utilities to shift 5%-10% of their 2020 growth investments into 2021-22 due to tight capital and labor markets. In general, this shift has little or no impact on our fair value estimates or long-term outlooks. We don't believe COVID-19 will impact utilities' policy-based investments in safety, clean energy, and grid modernization that support our long-term growth outlooks.

COVID-19 shutdowns might reduce U.S. C&I electricity demand more than the record 5.5% drop in mid-2009. In China, government data suggests electricity demand is down more than 8% year to date. European countries reported 2%-7% drops in electricity use last week. C&I demand is about 60% of total U.S. electricity use.

Trouble For U.S. Gas Utilities Has Been Simmering; New York Just Made it Worse

Travis Miller, Strategist, 29 March 2020

Policymakers--not COVID-19 or global energy markets--are becoming the biggest threat for gas distribution utilities.

Earlier this month, New York regulators asked the state's

NiSource Inc NI (XNYS)

Morningstar Rating	Last Price	Fair Value Estimate	Price/Fair Value	Trailing Dividend Yield %	Forward Dividend Yield %	Market Cap (Bil)	Industry	Stewardship
★★★★ 06 Aug 2020 15:59, UTC	23.96 USD 06 Aug 2020	27.00 USD 06 Aug 2020 15:53, UTC	0.89	3.41 06 Aug 2020	3.45 06 Aug 2020	9.33 06 Aug 2020	Utilities - Regulated Gas	Standard

utilities to review ways to reduce or eliminate gas infrastructure. Areas of California have banned new gas service. If anti-gas policies like these spread, it could hurt the industry's long-term growth.

Total returns for U.S. utilities with sizable gas operations are down 19% during the last six months, compared with 14% down for the Morningstar U.S. utilities index. New Jersey Resources, CenterPoint Energy, Atmos Energy, NiSource, and DTE Energy recently traded well below our fair value estimates.

We think states with aggressive clean energy policies are most likely to push customers away from gas. Sixteen states have 100% clean energy targets. We expect renewable energy to grow 8% annually during the next decade.

We believe New Jersey Resources faces the most risk since the bulk of its earnings come from residential gas service in a state with aggressive clean energy policy. New Jersey policymakers support gas use for now, but we anticipate that could change in the next decade. We recently cut our long-term growth rate assumption for NJR to 3% from 4%, lowering our fair value estimate to $37 per share from $39.

New York City's Consolidated Edison and California utilities Sempra Energy and PG&E also face risk but have larger electric distribution businesses that could benefit from electric growth. We think there is less risk for gas utilities in the Southeast and Midwest where Republicans in five states have proposed legislation that would prohibit gas bans.

Acquisition premiums that had inflated gas utilities' valuations also have faded. Eversource Energy recently paid 24 times earnings for Columbia Gas. This is still rich but below deal values for Piedmont (30 P/E), Peoples Gas (30 P/E), and WGL (26 P/E). M&A premiums don't affect our fair value estimates.

NISource's Heavy C&I Customer Exposure Increases Impact Of COVID-19

Charles Fishman, Eq. Analyst, 30 March 2020

We are reducing our fair value estimate to $27 per share from $27.50 for NiSource due to the impact of COVID-19 on earnings and capital investment. On Feb. 28, NiSource pulled earnings guidance following the agreement to sell its troubled Columbia Gas of Massachusetts unit. However, management expressed confidence it could achieve 5%-7% EPS growth off a new 2021 base when guidance was reestablished.

We expect earnings growth to rebound to near the top end of guidance from 2022-2024. However, COVID-19 changes our estimate of the 2021 EPS base, which we lowered by $0.08, to $1.35.

Supply chain disruptions and staffing issues will make it difficult for NiSource to fully execute our five-year, $10 billion capital expenditures estimate and we reduced it by 5%, or $500 million. Less investment translates into lower-rate base growth and earnings.

Northern Indiana Public Service Company, contributing about 40% of earnings and heavily dependent on commercial and industrial, or C&I, customers, will experience significantly reduced sales following Indiana's stay-at-home order. In 2019, C&I customers represented about 78% of retail electric sales.

NiSource's gas utilities, about 60% of earnings, will also be affected by stay-at-home orders in Ohio, Pennsylvania, and Indiana. In 2019, C&I sales represented about 70% of sales and transportation volumes.

Bad debt/uncollectible expense will also pressure near-term earnings. On March 19, the Edison Electric Institute announced that all members have suspended electricity disconnections. NiSource is a member of EEI.

Operating expenses will increase as safety measures are instituted. Maintaining minimum staffing levels could be challenging and the increase in overtime costs. We expect most, but not necessarily all, expenses related to COVID-19 to eventually be recovered in rates. If COVID-19 costs become significant, regulators might allow cost-recovery deferrals or securitization, similar to large weather-related expenses.

Coronavirus and Utilities: Listening For Answers

Andrew Bischof, Sr. Eq. Analyst, 22 April 2020

Utilities' first-quarter earnings rarely offer much excitement, but this year will be different. We expect lively coronavirus commentary from utilities starting this week. We are maintaining our fair value estimates, moats, and moat trends.

NiSource Inc NI (XNYS)

Morningstar Rating	Last Price	Fair Value Estimate	Price/Fair Value	Trailing Dividend Yield %	Forward Dividend Yield %	Market Cap (Bil)	Industry	Stewardship
★★★★	23.96 USD	27.00 USD	0.89	3.41	3.45	9.33	Utilities - Regulated Gas	Standard
06 Aug 2020 15:59, UTC	06 Aug 2020	06 Aug 2020 15:53, UTC		06 Aug 2020	06 Aug 2020	06 Aug 2020		

We expect to hear commentary from management teams on numerous COVID-19 concerns. Utilities with large commercial-industrial customers could see record-breaking demand drops. Rate structures are critical, and we expect earnings cuts for utilities with usage-based rates. Utilities have issued a surge of debt in March, providing plenty of near-term liquidity, but investors will look to see if it is enough to get them through the year. Dividends appear secure throughout the sector and offer good income value relative to fixed-income alternatives. Capital programs are key drivers for utility growth amid stalled supply chains, workforce shortages, or financing. Renewable energy programs are the least at risk in our view. Finally, higher operating costs will likely affect utilities. The key will be which regulators adapt their natural disaster recovery programs for COVID-19 costs.

We highlight two lists of utilities that investors should watch this earnings season, value and quality. Atypical volatility among utilities stocks during the last month has created a wide spread between the overloved and the underloved. Value stocks could get an outsize lift if management commentary pushes the market toward our more positive outlook. We highlight AES, Edison International, Duke Energy, Vistra Energy, and First Solar as value stocks to watch.

We expect the most consistency from high-quality utilities; if the market were to turn down, like in mid-March, investors should be ready to pounce. We think high-quality Dominion Energy, NextEra Energy, Southern Co., and WEC Energy Group are the best positioned to weather COVID-19.

Safety-Related O&M, COVID-19, and Weak Industrial Demand Pressure NiSource's Earnings Growth

Charles Fishman, Eq. Analyst, 07 May 2020

We are reducing our fair value estimate to $26 per share from $27 after NiSource reported 2020 first-quarter operating EPS of $0.76 versus $0.82 last year, reduced its 2020 capital expenditure forecast by $100 million, and made comments less supportive of future earnings growth.

The weak results were due in large part to higher safety-related operating and maintenance costs, mild weather, and weaker industrial electricity demand. COVID-19-related costs were not material in the recently ended quarter.

In March, we reduced our five-year capital expenditure estimate by $500 million, approximately 5%, to $9.5 billion due to our assumption of the impact of COVID-19 on investment. Driven by the lower 2020 guidance and our assumption of the continuing impact of COVID-19, we reduced our five-year investment forecast by another $250 million, to approximately $9.25 billion.

Although NiSource had previously indicated earnings guidance would not be provided until after the closing of the Columbia of Massachusetts transaction later this year, it was disappointing that management declined to support previous comments that 2021 operating earnings would be at least equal to the lower end of the previous range for 2020, or $1.36 per share.

Driven by lower capital investment and our assumption that higher O&M and weak industrial electricity demand will drag into next year, we reduced our 2021 EPS estimate to $1.30 from $1.35. Management did reaffirm that when 2021 guidance is established later this year, it will be the base for long-term annual EPS growth of 5%-7%. We estimate annual EPS growth of 6% from our new 2021 estimate, in line with this guidance.

However, starting from a lower 2021 earnings base reduces our annual earnings growth for 2019-24 to 3.3% from our previous estimate of 4.8%. This lower earnings growth was the primary driver for our lower fair value estimate.

NiSource Plans to Increase Renewable Energy Investment by $2 Billion

Charles Fishman, Eq. Analyst, 06 August 2020

We are increasing our fair value estimate to $27 per share from $26 after NiSource reported 2020 second-quarter operating earnings per share of $0.13 versus $0.05 last year, initiated 2021 earnings guidance, and announced plans to invest an additional $1.8 billion-$2 billion in renewable energy through 2023.

The results were solid in what is normally a weak quarter for a utility that derives over 60% of its operating earnings from natural gas distribution.

We increased our five-year capital expenditure forecast

NiSource Inc NI (XNYS)

Company Profile

NiSource is one of the nation's largest natural gas distribution companies with approximately 3.5 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NiSource's electric utility transmits and distributes electricity in northern Indiana to about 500,000 customers. The regulated electric utility also owns more than 3,000 megawatts of generation capacity, most of which is now coal-fired but is being replaced by natural gas and renewables.

Research Methodology for Valuing Companies

Qualitative Equity Research Overview
At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group (“we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat
The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define excess economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

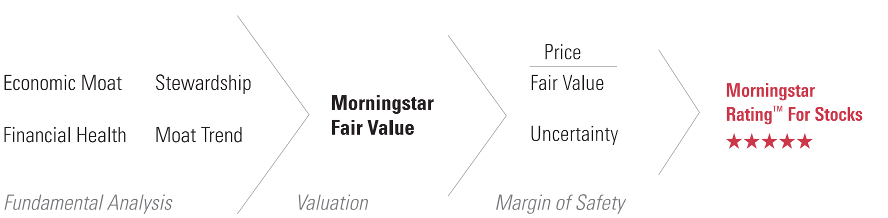
Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

To assess the direction of the underlying competitive advantages, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

All the moat and moat trend ratings undergo periodic review and any changes must be approved by the Morningstar Economic Moat Committee, comprised of senior members of Morningstar's equity research department.

2. Estimated Fair Value
Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Morningstar Research Methodology for Valuing Companies



Our model is divided into three distinct stages:

Stage I: Explicit Forecast
In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade
The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity
Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

Research Methodology for Valuing Companies

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the fair value estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

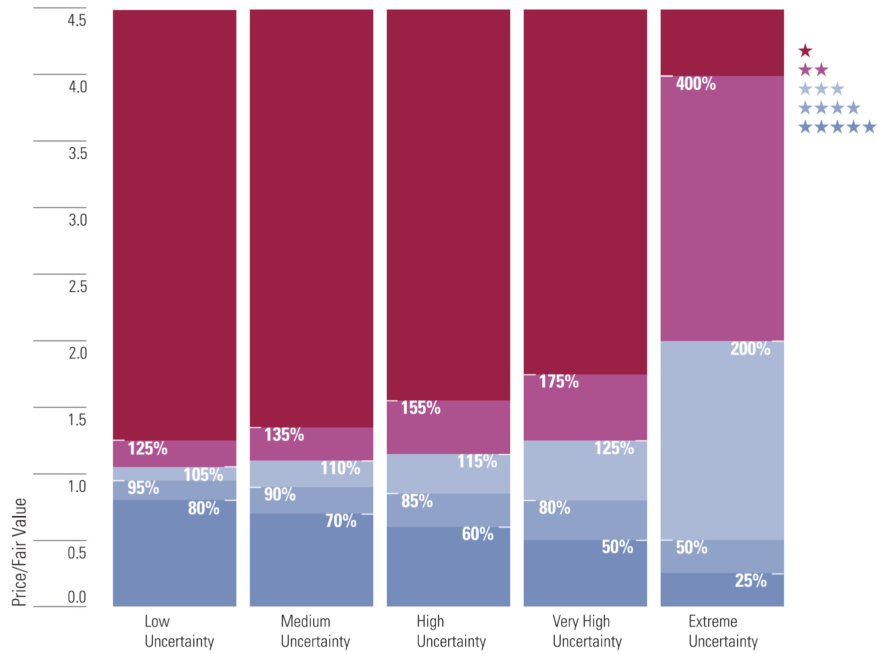
- ► Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- ► Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- ► High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- ► Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- ► Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Stewardship Rating: Represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- ► Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- ► Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- ► Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

Quantitative Equity Reports Overview

The quantitative report on equities consists of data, statistics and quantitative equity ratings on equity securities. Morningstar, Inc.'s quantitative equity ratings are forward looking and are generated by a statistical model that is based on Morningstar Inc.'s analyst-driven equity ratings and quantitative statistics. Given the nature of the quantitative report and the quantitative ratings, there is no one analyst in which a given report is attributed to; however, Mr. Lee Davidson, Head of Quantitative Research for Morningstar, Inc., is responsible for overseeing the methodology that supports the quantitative equity ratings used in this report. As an employee of Morningstar, Inc., Mr. Davidson is guided by Morningstar, Inc.'s Code of Ethics and Personal Securities Trading Policy in carrying out his responsibilities.

Quantitative Equity Ratings

Morningstar's quantitative equity ratings consist of:
(i) Quantitative Fair Value Estimate
(ii) Quantitative Star Rating
(iii) Quantitative Uncertainty
(iv) Quantitative Economic Moat
(v) Quantitative Financial Health
(collectively the "Quantitative Ratings").

The Quantitative Ratings are calculated daily and derived from the analyst-driven ratings of a company's peers as determined by statistical algorithms. Morningstar, Inc. ("“Morningstar," "we," "our") calculates Quantitative Ratings for companies whether it already provides analyst ratings and qualitative coverage. In some cases, the Quantitative Ratings may differ from the analyst ratings because a company's analyst-driven ratings can significantly differ from other companies in its peer group.

Quantitative Fair Value Estimate: Intended to represent Morningstar's estimate of the per share dollar amount that a company's equity is worth today. Morningstar calculates the quantitative fair value estimate using a statistical model derived from the fair value estimate Morningstar's equity analysts assign to companies. Please go to https://shareholders.morningstar.com for information about fair value estimates Morningstar's equity analysts assign to companies.

Quantitative Economic Moat: Intended to describe the strength of a firm's competitive position. It is calculated using an algorithm designed to predict the Economic Moat rating a Morningstar analyst would assign to the stock. The rating is expressed as Narrow, Wide, or None.

- ► Narrow: assigned when the probability of a stock receiving a "Wide Moat" rating by an analyst is greater than 70% but less than 99%.
- ► Wide: assigned when the probability of a stock receiving a "Wide Moat" rating by an analyst is greater than 99%.
- ► None: assigned when the probability of an analyst receiving a "Wide Moat" rating by an analyst is less than 70%.

Quantitative Star Rating: Intended to be the summary rating based on the combination of our Quantitative Fair Value Estimate, current market price, and the Quantitative Uncertainty Rating. The rating is expressed as 1-Star, 2-Star, 3-Star, 4-Star, and 5-Star.

★: the stock is overvalued with a reasonable margin of safety.
Log (Quant FVE/Price)<–1*Quantitative Uncertainty

★★: the stock is somewhat overvalued.
Log (Quant FVE/Price) between (–1*Quantitative Uncertainty, –0.5*Quantitative Uncertainty)

★★★: the stock is approximately fairly valued.
Log (Quant FVE/Price) between (–0.5*Quantitative Uncertainty, 0.5*Quantitative Uncertainty)

★★★★: the stock is somewhat undervalued.
Log (Quant FVE/Price) between (0.5*Quantitative Uncertainty, 1*Quantitative Uncertainty)

★★★★★: the stock is undervalued with a reasonable margin of safety. Log (Quant FVE/Price) >1*Quantitative Uncertainty

Quantitative Uncertainty: Intended to represent Morningstar's level of uncertainty about the accuracy of the quantitative fair value estimate. Generally, the lower the quantitative Uncertainty, the narrower the potential range of outcomes for that particular company. The rating is expressed as Low, Medium, High, Very High, and Extreme.

- ► Low: the interquartile range for possible fair values is less than 10%.
- ► Medium: the interquartile range for possible fair values is less than 15% but greater than 10%.
- ► High: the interquartile range for possible fair values is less than 35% but greater than 15%.
- ► Very High: the interquartile range for possible fair values is less than 80% but greater than 35%.
- ► Extreme: the interquartile range for possible fair values is greater than 80%.

Quantitative Financial Health: Intended to reflect the probability that a firm will face financial distress in the near future. The calculation uses a predictive model designed to anticipate when a company may default on its financial obligations. The rating is expressed as Weak, Moderate, and Strong.

- ► Weak: assigned when Quantitative Financial Health <0.2
- ► Moderate: assigned when Quantitative Financial Health is between 0.2 and 0.7
- ► Strong: assigned when Quantitative Financial Health >0.7

Research Methodology for Valuing Companies

Other Definitions

Last Close: Price of the stock as of the close of the market of the last trading day before date of the report.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

This Report has not been made available to the issuer of the security prior to publication.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report.

The quantitative equity ratings are not statements of fact. Morningstar does not guarantee the completeness or accuracy of the assumptions or models used in determining the quantitative equity ratings. In addition, there is the risk that the price target will not be met due to such things as unforeseen changes in demand for the company's products, changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, and tax rate. For investments in foreign markets there are further risks, generally based on exchange rate changes or changes in political and social conditions.

A change in the fundamental factors underlying the quantitative equity ratings can mean that the valuation is subsequently no longer accurate.

For more information about Morningstar's quantitative methodology, please visit http://global.morningstar.com/equitydisclosures.

The analysis within this report is prepared by the person (s) noted in their capacity as an analyst for Morningstar's equity research group. The equity research group consists of various Morningstar, Inc. subsidiaries ("Equity Research Group)". In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission.

The opinions expressed within the report are given in good faith, are as of the date of the report and are subject to change without notice. Neither the analyst nor Equity Research Group commits themselves in advance to whether and in which intervals updates to the report are expected to be made. The written analysis and Morningstar Star Rating for stocks are statements of opinions; they are not statements of fact.

The Equity Research Group believes its analysts make a reasonable effort to carefully research information contained in the analysis. The information on which the analysis is based has been obtained from sources believed to be reliable such as, for example, the company's financial statements filed with a regulator, company website, Bloomberg and any other the relevant press sources. Only the information obtained from such sources is made available to the issuer who is the subject of the analysis, which is necessary to properly reconcile with the facts. Should this sharing of information result in considerable changes, a statement of that fact will be noted within the report. While the Equity Research Group has obtained data, statistics and information from sources it believes to be reliable, neither the Equity Research Group nor Morningstar, Inc. performs an audit or seeks independent verification of any of the data, statistics, and information it receives.

General Quantitative Disclosure

The Quantitative Equity Report ("Report") is derived from data, statistics and information within Morningstar, Inc.'s database as of the date of the Report and is subject to change without notice. The Report is for informational purposes only, intended for financial professionals and/or sophisticated investors ("Users") and should not be the sole piece of information used by such Users or their clients in making an investment decision. The quantitative equity ratings noted the Report are provided in good faith, are as of the date of the Report and are subject to change. While Morningstar has obtained data, statistics and information from sources it believes to be reliable, Morningstar does not perform an audit or seeks independent verification of any of the data, statistics, and information it receives.

The quantitative equity ratings are not a market call, and do not replace the User or User's clients from conducting their own due-diligence on the security. The quantitative equity rating is not a suitability assessment; such assessments take into account may factors including a person's investment objective, personal and financial situation, and risk tolerance all of which are factors the quantitative equity rating statistical model does not and did not consider.

Prices noted with the Report are the closing prices on the last stock-market trading day before the publication date stated, unless another point in time is explicitly stated.

NI

Target price (12M, US$)
26.00
Outperform

- **2021 Guidance initiated at $1.28-$1.36** (CS $1.33 vs consensus $1.36) after NI reported a 2Q20 adj. EPS Beat at $0.13 vs CS/consensus $0.05/$0.08, driven by cost mitigation to offset the financial impact of COVID19**.** Our 2020 and 2021 estimates are unchanged but **we are reducing our 2022 estimate $0.07 (to $1.39) for expected drag from equity issuance and investment in Indiana renewables** that will not benefit from AFUDC nor receive a rate increase until 2024. We expect the company to attain at least the midpoint of a 5%-7% EPS CAGR (vs 2021) by 2024 once these projects are in service. Ratebase growth is also expected to grow at a 10%-12% CAGR from $13.9B in 2020 to $20.7B in 2024.
- **Investor day (virtual) planned for 9/29.** The plan is to review strategy and long-term outlook, an update on Safety Management System (SMS) progress, the transition from coal to renewables in Indiana, including $1.8-$2.0B of incremental investment in 2022/23 plus additional opportunities through 2028, an updated financial outlook and financing plans, and an ESG profile.
- **No block equity needed in 2020 and liquidity is ample for 2021, but we expect some equity in 2022 and 2023 for Indiana renewables.** Equity plans for 2020 remain $200-$300M annual ATM plus $35-$60M employee plans (no convertible or hybrid financing). We expect ~60% of $1.8-$2.0B of incremental Indiana plant investment in 2022/23 to be financed with equity, which will neither result in AFUDC (turnkey projects) nor earn a return until a forward test year ratecase is filed around early 2023 for rates effective 2024. Estimated incremental long-term debt for 2020 is $1B-$1.2B. NI continues to target FFO/Debt ~14%-15%. **2020 Capex reaffirmed at $1.7B-$1.8B**.
- **Valuation:** Our $26 TP is unchanged and based on peer 2021 P/E multiples within a SoTP. Our TP includes the value of $0.05 uplift in 2022 from the expected elimination of temporary COVID19/Columbia Gas disynergy impacts in 2021. Risks include regulatory, capital plan execution, interest rates.

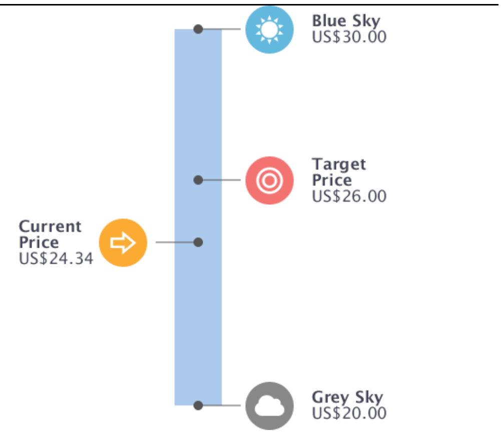
Company Background

NiSource Inc. is energy holding company whose subsidiaries provide natural gas, electricity & other products & services. It operates in 3 segments: Gas Distribution Operations; Gas Transmission & Storage Operations, & Electric Operations.

Blue/Grey Sky Scenario



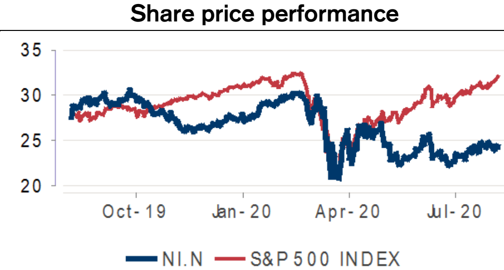
Our Blue Sky Scenario (US$) **(from 28.00) 30.00**

In our blue sky scenario we assume favorable regulatory outcomes across NI's jurisdictions, successful execution of their capital plan, and growth of infrastructure replacement program backlog. We assume that capex is at the high end of the $1.8-$1.9B and that NI is able to grow ratebase at the high end of their 8-10% range and grow earnings at the high end of their 5-7% range. We assume a 5.0x premium to the average peer 2021 P/E multiples.

Our Grey Sky Scenario (US$) **(from 21.00) 20.00**

In our grey sky scenario we assume unfavorable regulatory outcomes across NI's jurisdictions, only partial execution of their capital plan, and a decline in the infrastructure replacement program backlog. We assume that capex is at the low end of the $1.8-$1.9B and that NI is able to grow ratebase at the low end of their 8-10% range and grow earnings at the low end of their 5-7% range. We assume a -1.5x discount to the average peer 2021 P/E mult.

Share price performance



On 06-Aug-2020 the S&P 500 INDEX closed at 3349.16
Daily Aug08, 2019 - Aug06, 2020, 08/08/19 = US$28.8

- **See our recent reports:** 7/20 2Q20 Earnings Preview, 5/26 Left Behind but Holding Up Well, 5/11 Covid19 Adds Near-Term Uncertainty, but Long-Term Fundamentals Remain Strong, 5/5 1Q20 Earnings Preview, 2/28 Raise to Outperform on Sale of Mass, Elimination of Block Equity Plan, 1/17 2020 Earnings Preview, 2020 Outlook – Getting Meaner and Less Defensive, 11/14 EEI 2019 Financial Conference: Full Takeaways, 11/1 New Growth Trajectory after Equitizing, 10/30 3Q Miss with 2020 Guidance a Bit Light, 8/7 Downgrade to Neutral on Gas Operations Risk

- **NI reported a 2Q20 adj. EPS Beat at $0.13** vs. cons $0.08, CS $0.05, and 2Q19 $0.05 driven by cost mitigation efforts and partially offset by financial impacts of COVID19**.** The company also projects $0.10-$0.15 cost savings this year to offset COVID19 effects.

Figure 1: NI 2Q20 Earning Drivers

Gas Distribution Operations ($M)	2Q20	2Q19	Dif
Operating Revenues	606.2	608.5	-2.3
Operating Expenses	532.8	561.7	28.9

Operating Revenues	354.3	406.7	-52.4
Operating Expenses	264.9	320.9	56.0
Total Adj. Earnings	**89.4**	**85.8**	**3.6**

Source: Company data, Credit Suisse estimates

- **Cost management and regulatory solutions offset COVID's $30M (or ~$0.06) impact in Q2.** Gas margin impact by customer class saw a $0.7M increase in residential and a $4.7M decrease in industrial (vs 2Q19). Electric margin impacts saw a $9.2M and $3.9M decreases to industrial and commercial load respectively, partially offset with a $6.2M increase in residential vs 2Q19. COVID's impact are trending with the company's base case scenario.

Figure 2: COVID's Impact to NI in Q2

COVID impact to Gas Margin (2Q20 v 2Q19)	$(M)
Residential	0.7
Commercial	0.0
Industrial	-4.7

COVID impact to Electric Margin (2Q20 v 2Q19)	$(M)
Residential	6.2
Commercial	-3.9
Industrial	-9.2

Source: Company data, Credit Suisse estimates

- **COVID-19 annual impact to load**. Management expects lower sales volumes from commercial and industrial customers, partially offset by a potential increase in residential sales volume. Increased bad debt expenses (although recent orders in MD, VA allow for deferring the COVID-related expenses and bad debt), and sustained customer attrition. The company's sensitivity analysis continues to project that a +/- 1% change in annual sales volumes, will result in pre-tax operating earnings of $3.9M, $3.9M and $2.3M to residential, commercial and industrial on the electric side respectively, and $3.8M, $2.4M and $1.2M to residential, commercial and industrial on the Gas side respectively. The residential customer class represents 39% and 69% of the retail margins in electric and gas respectively, with commercial at 35% and 22% in electric and gas respectively.

Figure 3: COVID19 Impact to Nisource Load

Pre-tax Operating Earnings Sensitivity to +/- 1% CHG in annual sales volume	Electric	Retail Margins %
Residential	$3.9	59%
Commercial	$3.9	26%
Industrial	$2.3	15%
Total	**$10.1**	**100%**

Pre-tax Operating Earnings Sensitivity to +/- 1% CHG in annual sales volume	Gas	Retail Margins %
Residential	$3.8	69%
Commercial	$2.4	22%
Industrial	$1.2	9%
Total	**7.40**	**100%**

Source: Company data, Credit Suisse estimates

- **2020 Capex Plan Reaffirmed at $1.7B-$1.8B**. Recall the company previously reduced its capital investment plan by $100M to $1.7-$1.8B for 2020 to conserve cash in order to maintain liquidity. Recall the company lowered its capital investment plan by $100M to $1.7-$1.8B for 2020 in Q1, to conserve cash in order to maintain liquidity. Also recall that in 4Q19 management had guided annual infrastructure investment $1.8B-$1.9B for 2020 vs prior 2020 update of $1.7B-$1.8B provided in Q3. Capex for 2019 was ~$1.9B vs guided $1.7-$1.8B. Spending categories include gas pipeline transmission capital (Ohio) and higher spending for electric transmission in Indiana to support future renewables. Information Technology upgrades for grid modernization are also included. >75% of capex begins earnings in under 18 months.
- **Liquidity Update.** NI's net liquidity available is ~$2B as of June 30th, with ~$2.2B of committed facilities in place which include a ~$1.9B revolving credit facility and ~$0.3B accounts receivable securitization facilities. Debt level is ~$10B as of June 30th and includes ~$8.7B of long-term debt with a weighted average maturity of ~16 years and interest rate of 4.31%. Total debt/total capitalization stands at 63.8% in Q2 vs 61.7% in 2019.
- **COVID-related regulatory updates.** Orders received in Maryland (4/9/2020), in Virginia (4/29/2020), in Pennsylvania (5/13/2020), in Indiana (6/29/2020) and in Ohio (7/15/2020). Orders in MD, OH and VA allow deferral of COVID19 related expenses and bad debt for later recovery. Order in PA allows deferral of bad debt above amounts in base rates for later recovery, and order in IN allows deferral of suspended fees and bad debt for later recovery.
- **Columbia Gas of Massachusetts sale remains on track for regulatory approval in Q3.** On July 2, NI announced that it will pay $56M to settle and resolve the state's investigation into the 2018 Greater Lawrence incident.
  - **A federal guilty plea and the sale of Columbia Gas of Mass.** On Wednesday, 2/26, the US Department of Justice announced that NI will plead guilty to a criminal violation of the federal Natural Gas Pipeline Safety Act and pay a $53M fine in connection with the Sept 2018 gas explosion incident in Merrimack Valley, Massachusetts. NI has also agreed to sell its operations in Massachusetts to ES for $1.1B and will forfeit any profit earned from the sale (none expected, so retaining the whole $1.1B). The plea is on a corporate level; no individual officers or employees of the company were charged.
  - **Sale of Columbia Gas of Massachusetts to Eversource for $1.1B - with no gains allowed (or expected).** NI has also agreed to sell its operations in Massachusetts to ES and will forfeit any profit earned from the sale. We calculate that ES is purchasing at a 1.0x multiple of ratebase, or 19.7x 2021 P/E at the allowed 9.55% ROE – in line with the group average. However, the elimination of a previously

planned $500-$700M block equity issuance in 2020 brings the combined effect to about breakeven to a modest $0.01 accretion to 2021 expectations before accounting for -$0.05 corporate disynergies. Expect the transaction to close by the end of 3Q20. See our 7/31 ES 2Q earnings note for further detail.

- **Emphasis on safety. More updates expected at the 9/29 Investor Day.** The company continues to emphasize reducing the operational risk and enhancing gas systems safety through the implementation of the Safety Management System (SMS) and new safety system installations across all NI gas service territories. NI has rolled out a corrective action program with the hopes of providing a very clear process and technology for employees and more than 1,000 automatic shut-off devices have now been installed. NiSource is looking to advance safety new technologies, leakage sensing, smoke detectors, safety performance, and predictable models where human error could create risks.
- **Pension & OPEB. 97% funded in 2Q20** vs 94% in1Q20, and ~98% as of yearend 2019 with 52% of pension plan assets in equities (45% of OPEB assets). A 50 bps decline in the discount rate is expected to result in a $97.7M increase in projected pension obligation and a $31.8M increase in OPEB obligation, as well as a $2.6M increase in net plan expense. For a 50 bps decline in expected long-term rate of return on pension and OPEB plan assets, net expenses are expected to increase $10.1M
- **Decoupling.** Full decoupling in OH, MA, MD, VA. Weather normalization in KY, MD, VA, PA. **Bad debt handling.** Clauses for bad debt in KY, OH, MD, PA, VA, MA & IN.
- **Stimulus bill impacts:** management is still evaluating the potential benefits from NOLs and AMT credits.

Regulatory Updates

- **Gas Distribution Operations.** NI has identified ~$20B in Long-Term Infrastructure Investment Opportunities.
  - **Columbia Gas of MD** filed a new base rate case on 5/15 requesting $6.3M total revenue increase; $5M net of infrastructure trackers which supports continued replacement of aging pipelines and safety upgrades. The final order is expected in 4Q20 with new rates effective in Dec 2020.
  - **Columbia Gas of PA.** Filed a base rate case 4/24/2020 which supports continued replacement of aging pipelines as well as adoption of safety upgrades. Ratecase includes $100.4M total annual revenue increase. Order is expected in 1Q21 with new rates effective in Feb 2021.
  - **Columbia Gas of Ohio. Infrastructure Replacement Program (IRP) Annual Rider update.** Filed 2/28/2020 and order was received on 4/22/2020 and rates became effective in May. Order includes ~$234M in 2019 capital investments and IRP rider allows recovery of safety and infrastructure investments. Recall that a 2017 settlement allowing COH to continue the IRP tracker through 2022 was previously approved in Jan 2018. The IRP program covers the replacement of priority mainline pipes and targeted customer service lines.
  - **Columbia Gas of Ohio. Capital Expense Program (CEP) Annual rider update.** Filed 2/28/2020 and order is expected in 8/2020. Application includes ~185M in 2019 capital investments. The CEP rider allows recovery capital investments and deferred expenses that are related but not covered through IRP tracker. New rates expected to become effective 9/2020.
  - **NIPSCO Gas System Indiana.** Filed application on 12/31 with Indiana Utility Commission for 6-year extension to the company's long-term gas infrastructure modernization program. Proposal includes ~$950M in capex through 2025 to be recovered through semi-annual adjustments. Order is expected in July 2020.

- **Clarity from legislation in Indiana drives filing of a new gas TDSIC plan**. While the company continues to execute its approved TDSIC plans businesses through 2020 and 2022 for gas and electric, respectively, the passage of the H.B. 1470 provides clearer guidelines on items that can be included in a TDSIC plan. As result, management filed and received approval on Oct 16, 2019 for gas TDSIC10 covering $12.4M incremental capital between July 2018 and April 2019.

- **Electric Operations.** NI has identified ~10B in Long-Term Infrastructure Investment Opportunities and plans continued execution of a seven-year, ~$1.2B modernization program for electric system. New solar projects have been announced for coal replacement capacity and the company expects $1.8B-$2B incremental capital investment opportunities in 2022 and 2023.

  - **Settlement and order in Indiana ratecase for rates effective 1Q20.** A final order approving two settlements in NIPSCO's electric ratecase was issued on Dec 4, 2019, including a 9.75% authorized ROE on 47.86% equity for a $4.116B ratebase that resulted in a two-step revenue increase of $42.7M. The case was filed in Oct 2018 in conjunction with a new long-term Integrated Resource Plan (IRP). The settled portion of the case includes a revenue requirement and accelerated depreciation schedule related to early retirement of coal plants, including an agreement to reduce the book lives of $1.5B coal ratebase to match retirement plans at an average 2032 vs the prior 2030s-2040s. Non-protected accumulated deferred income tax passback amortization has also been agreed at a comfortable 10-year amortization period. It also includes a new rate structure for industrial customers that allows the utility to manage market purchases in order to keep track of capacity requirements (reduces risk of stranded assets).

  - **Renewable Generation Projects. Construction continues on Jordan Creek (400 MW) and Rosewater (100 MW) – expected to go in service by year-end**. Recall CPCN filings were made on Feb 1st, 2019 seeking approvals to develop 3 wind farms consistent with the IRP filed in the fall of 2018. Orders approving the PPAs on these filings were received on June 5, 2019 and the wind farms are expected to be built by yearend 2020. On Oct 22, 2019, a Build-Transfer Agreement BTA was filed for Indiana Crossroads (300MW) JV between NIPSCO and EDP Renewables (302 MW). FERC approved order on 2/19/2020 for sections 203 and 205 applications for Rosewater. BTA application was approved for Indiana Crossroads (300MW), a second joint venture between NIPSCO and EDP Renewables. Commercial terms reached on Brickyard Solar (200MW) and Greensboro Solar (100MW) + storage (30MW) PPAs filed. Latest RFP represents replacement ~1,400MW of coal capacity through 2023. **Tax equity partnership reached for Rosewater, Indiana Crossroads. Regulatory approval pending for Brickyard and Greensboro Solar. Altogether, the company expects about $1.0B of tax equity financing to help capitalize ~$2.8-$3.0B of JV renewable projects in Indiana from 2022-2023. The remaining $1.8-$2.0B of NI ratebase investment is expected to be financed with ~60% equity/40% debt.**

  - **Electric System Modernization** focused on electric transmission and distribution investments aimed at improving safety and reliability of system was filed 8/21/2019, final order was received on Dec 18th 2019 and rates became effective in Jan 2020. TDSIC 6 semi-annual tracker update covering $131.1M in investments from Dec 2018 – June 2019 now in rates. The program originally approved in 2016, contains ~$1.2 billion of electric infrastructure investments expected to be made through 2022. The company's latest tracker update request, covering $131.1 million in incremental capital investments made from December 2018 through June 2019 was approved by the IURC on 2/1 and rates became effective Jan 2020.

- **Integrated Resource Plan (IRP)** submitted in Oct 2018 called for 100% coal retirements by 2028 (vs. prior plan for 50% by 2023), replaced with renewables rather than natural gas. The IRP calls for retirement of 80% of the coal fleet by 2023 and 100% by 2028 (vs. prior plan 50% by 2023). The plan also points toward rapidly declining-cost renewables (wind, solar, batteries) rather than the gas-fired replacements that were planned within the last 2016 IRP. With much of the new generation in service in 2023 and beyond, the ratecase is less important as a near-term earnings driver. The rate filing also includes changes to the depreciation schedules for the IRP's planned early retirements of coal, along with rate design changes to provide more tariff flexibility to industrial customers. Discussions continue with select bidders in second round of RFPs. **Next IRP expected in 2021.**

Valuation

- **Valuation.** Our $26 TP is unchanged and based on peer 2021 P/E multiples within a SoTP. Our 2020 and 2021 estimates are unchanged but we are reducing our 2022 estimate $0.07 for expected drag from equity issuance and investment in Indiana renewables that will not benefit from AFUDC and will not receive a rate increase until 2024. We expect the company to attain at least the midpoint of a 5%-7% EPS CAGR (vs 2021) by 2024. Our TP includes the value of $0.05 uplift in 2022 from the expected elimination of temporary COVID19/Columbia Gas disynergy impacts in 2021. Risks include regulatory, capital plan execution, interest rates. We continue to apply a 1.5x premium to the gas utilities for favorable regulatory jurisdictions and lower operational risk since the explosive incident in Lawrence Mass in 2018. We continue to value the electric operation in Indiana at a 1.5x premium for excellent operations and supportive regulation. Risks include 1) ROE risk related to the ongoing ratecases, 2) continued approvals relating to infrastructure replacement/grid modernization programs, 3) commodity risk, 4) interest rate risk, 5) derivative risk, 6) load growth risk particularly in the non-decoupled jurisdictions, 7) weather risk, 8) environmental and climate change risk, 9) physical infrastructure and cybersecurity risk, 10) continued improvement to gas system operations safety, 11) COVID19 pandemic response load reduction, particularly at the electric utility.

** Asterisk signifies initiation or assumption of coverage.*

As of December 10, 2012 Analysts' stock rating are defined as follows:
Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.
Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.
Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.
**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*
Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.
Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.
Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:
Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.
Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.
Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.
**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	50%	(33% banking clients)
Neutral/Hold*	37%	(27% banking clients)
Underperform/Sell*	12%	(21% banking clients)
Restricted	2%	

**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource Inc. (NI.N)

Method: We arrive at our $26 target price for NI by applying a 1.5x premium to the gas segment peer 2021 P/E to reflect the constructive regulatory environments with capex trackers in place in the jurisdictions that NI operates. We also apply a 1.5x premium to the average peer electric utility 2021 P/E multiple for NIPSCO Electric utility in Indiana to reflect the favorable ratebase growth profile and regulatory environment in the state. Our OUTPERFORM rating reflects a forecasted total return that is equal the group average.

Risk: Risks to our $26 target price and OUTPERFORM rating are: 1) ROE risk related to the ongoing ratecases 2) continued approvals relating to infrastructure replacement/grid modernization programs 3) commodity risk, 4) interest rate risk, 5) derivative risk, 6) load growth risk particulary in the non-decoupled jurisdictions, 7) weather risk, and 8) environmental and climate change risk, 9) physical infrastructure and cybersecurity risk, 10) continued improvement to gas system operations safety after the 2018 explosion incident in Mass. 11) COVID19 load reductions

Please refer to the firm's disclosure website at https://rave.credit-suisse.com/disclosures/view/selectArchive for the definitions of abbreviations typically used in the target price method and risk sections.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. Australia: Credit Suisse Securities (Europe) Limited ("CSSEL") and Credit Suisse International ("CSI") are authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ("FCA") and the Prudential Regulation Authority under UK laws, which differ from Australian Laws. CSSEL and CSI do not hold an Australian Financial Services Licence ("AFSL") and are exempt from the requirement to hold an AFSL under the Corporations Act (Cth) 2001 ("Corporations Act") in respect of the financial services provided to Australian wholesale clients (within the meaning of section 761G of the Corporations Act) (hereinafter referred to as "Financial Services"). This material is not for distribution to retail clients and is directed exclusively at Credit Suisse's professional clients and eligible counterparties as defined by the FCA, and wholesale clients as defined under section 761G of the Corporations Act. Credit Suisse (Hong Kong) Limited ("CSHK") is licensed and regulated by the Securities and Futures Commission of Hong Kong under the laws of Hong Kong, which differ from Australian laws. CSHKL does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Investment banking services in the United States are provided by Credit Suisse Securities (USA) LLC, an affiliate of Credit Suisse Group. CSSU is regulated by the United States Securities and Exchange Commission under United States laws, which differ from Australian laws. CSSU does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Credit Suisse Asset Management LLC (CSAM) is authorised by the Securities and Exchange Commission under US laws, which differ from Australian laws. CSAM does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. This material is provided solely to Institutional Accounts (as defined in the FINRA rules) who are Eligible Contract Participants (as defined in the US Commodity Exchange Act). Credit Suisse Equities (Australia) Limited (ABN 35 068 232 708) ("CSEAL") is an AFSL holder in Australia (AFSL 237237).

Malaysia: Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020.

Singapore: This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore Branch to overseas investors (as defined under the Financial Advisers Regulations). Credit Suisse AG, Singapore Branch may distribute reports produced by its foreign entities or affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Singapore recipients should contact Credit Suisse AG, Singapore Branch at +65-6212-2000 for matters arising from, or in connection with, this report. By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore Branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore Branch may provide to you.

EU: This report has been produced by subsidiaries and affiliates of Credit Suisse operating under its Global Markets Division

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements.

This material is issued and distributed in the U.S. by CSSU, a member of NYSE, FINRA, SIPC and the NFA, and CSSU accepts responsibility for its contents. Clients should contact analysts and execute transactions through a Credit Suisse subsidiary or affiliate in their home jurisdiction unless governing law permits otherwise.

CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials,management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. No information or communication provided herein or otherwise is intended to be, or should be construed as, a recommendation within the meaning of the US Department of Labor's final regulation defining "investment advice" for purposes of the Employee Retirement Income Security Act of 1974, as amended and Section 4975 of the Internal Revenue Code of 1986, as amended, and the information provided herein is intended to be general information, and should not be construed as, providing investment advice (impartial or otherwise).

When you purchase non-listed Japanese fixed income securities (Japanese government bonds, Japanese municipal bonds, Japanese government guaranteed bonds, Japanese corporate bonds) from CS as a seller, you will be requested to pay the purchase price only.

Goldman Sachs & Co. LLC

We reiterate our Buy rating on NiSource (NI) after 2Q20 earnings, as we view favorably the company's renewable investment pipeline that could bolster above-average growth through 2024, albeit more back-weighted and with lower-than-expected 2021 earnings power. We remain cautiously optimistic on NI's ability to achieve consistent execution in the post-MA gas incident era, while awaiting additional details at the September virtual Analyst Day.

Robust capital from renewables to boost earnings growth…with some regulatory lag. Beyond the near 1 GW of wind projects currently planned via PPAs and JV ownership, NI expects to invest in over 2 GW of incremental renewable capacity (primarily solar) to replace the 2023 planned retirement of the 1,400 MW Schahfer coal plant, supporting an EPS CAGR above the 5-7% CAGR guided (using 2021 guidance mid-point of $1.32 as the base). Assuming 50% ownership, the company expects to spend another $1.4-$1.6bn through 2023 under this plant, or $0.15-$0.17 of EPS (~10% of 2022E EPS) assuming 9.5% ROE/48% equity ratio at NIPSCO Electric. However, we note the lack of a renewable rider mechanism combined with a potential equity/debt financing in 2022/2023 for the build/transfer projects could pressure earnings growth through mid-2023 until placed into rates via a general rate case. Our estimates currently do not embed any bulk equity in 2022 beyond the annual $250mn of ATM.

We revise our 2020-2022 EPS estimates to $1.28/$1.34/$1.43 from $1.27/$1.38/$1.49. Our changes reflect: 1) 2Q20 actuals, 2) moderate adjustments to electric demand recovery, 3) increased debt financing, and 3) timing of O&M management, reflecting ~0.7% CAGR through 2022. Finally, our model continues to include the MA gas utility operations coupled with $1bn of equity in 2020 (including $300mn of ATM), resulting in 14.0%/14.3% FFO/debt in 2021/2022, respectively (versus Moody's stated Baa2 threshold of 14%). We note that the company is in the process of selling its MA gas utility operations to Eversource.

Our $27, 12-month price target (from $28 prior) embeds 20x our revised 2021 EPS estimate of $1.34, reflecting a 13% total return versus 11% for Regulated Utilities. Our target reflects a 13% total return, with the stock currently trading at a 1x P/E (7%) discount to smid-cap peers. Key risks include (1) legal and regulatory risks, (2) earnings/cash impact due to COVID-19, (3) higher-than-expected O&M, (4) electricity demand and customer growth, and (5) financing.

Disclosure Appendix

Reg AC

I, Insoo Kim, CFA, hereby certify that all of the views expressed in this report accurately reflect my personal views about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Financial advisory disclosure

Goldman Sachs and/or one of its affiliates is acting as a financial advisor in connection with an announced strategic matter involving the following company or one of its affiliates: Nisource Inc.

The rating(s) for NiSource Inc. is/are relative to the other companies in its/their coverage universe:

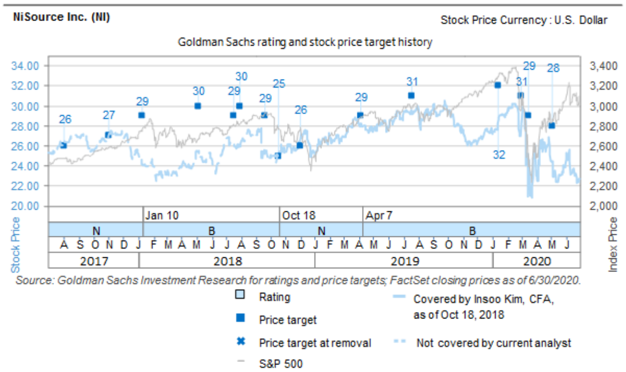
Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	47%	36%	17%	65%	58%	54%

As of July 1, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,015 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian

Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Further information on the covered companies referred to in this research may be obtained from Goldman Sachs (Singapore) Pte. (Company Number: 198602165W). **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Source: Company data and Wells Fargo Securities, LLC estimates

1= Overweight, 2 = Equal Weight, 3 = Underweight, V = Volatile
NA = Not Available, NC = No Change, NE = No Estimate, NM = Not Meaningful

- **Summary.** The Gas LDC earnings season wrapped up on 8/7 with three of our covered companies hosting conference calls including Equal Weight-rated NJR and Underweight-rated NWN and SWX. We provide details on each herein along with Overweight-rated NI (reported on 8/5). NJR, NWN and SWX affirmed 2020 EPS guidance with NJR and NWN suggesting results could come in toward the lower end of the ranges due to pipeline delays (NJR) and COVID (NWN). NI initiated 2021 EPS guidance and provided a bullish long-term growth outlook helped by renewable capex at the electric utility. We increase our price targets for NJR, NWN and SWX on higher peer group multiples and update our EPS outlooks (SWX higher, slightly lower near-term for NI, NJR and NWN).

- **NI.** NI initiated 2021 EPS guidance of $1.28-1.36, which includes ~$0.05 of lingering COVID-19 impacts. While this was light relative to our $1.34 estimate and consensus of $1.36, the "miss" was overshadowed by the unveiling of a ***10-12% rate base CAGR, which is expected to drive EPS growth in excess of the prior 5-7% target*** (off the '21 base through '24). The disclosures served as a preview to the company's Analyst Day planned for late September and represents a positive step in reshaping the narrative. Our '20E EPS remains $1.26 and we update our '21E & '22E to/from $1.32/1.34, $1.42/1.46; our EPS CAGR through '24E (off the '21E base) is 7.0% and we see upside to our earned ROE assumptions in the high 8% range. With shares trading in-line with blended gas/electric utility peers, we ***reiterate our Overweight rating*** and $28/sh price target (19.6X our '22E).

  NI provided more color on the renewable opportunity, which is premised on a 50% ownership approach (50% PPA) using JVs whereby NI's actual investment would be ~$1.8-2.0B in 2022-2023 (tax equity assumed to contribute another ~$1.0B). Of the $1.8-2.0B, approximately $0.4B is approved with another $1.4-1.6B under negotiations (stay tuned). We expect more details on how NI intends to finance the spending plans at the Analyst Day – we currently assume 2021-2024 equity issuances totaling ~$2B, though we expect NI would strongly consider preferred and convertible structures as well. ***(Comments continue on page 2...)***

(...NI continued) Nearer-term: (1) the CMA sale is nearing the finish line (approval expected in Q3); (2) the company has pending rate cases in PA (seeking $100.4mm) and MD ($6.3mm); (3) implementation of the Safety Management System (SMS) is ongoing with a more detailed update planned for September; and (4) NI is managing COVID-related headwinds. On the COVID front, the company saw a ($0.06) gross EPS impact in Q2, which was offset with cost management and regulatory mechanisms (deferral orders for bad debt expense in IN, PA, VA, MD and OH).

- **NJR.** The company continues to face a number of ***challenges related to pipeline approvals*** and gas marketing conditions. The latest pipeline issue resides at the utility (NJNG) where permits were suspended on the Southern Reliability Link (SRL) following inadvertent return incidents (drilling fluid spilled out of the surface). NJR has presented a risk mitigation strategy and awaits a decision from the NJ DEP. For context, over 75% of construction is complete on the $250-270mm project and the company targets a 2021 in-service date. Rounding out the pipeline projects are Adelphia Gateway, which is experiencing permitting delays at the PA DEP and still requires a Notice to Proceed from FERC (still target 2021 in-service date but capex shifted from ’20 to ’21) and PennEast, which awaits a FERC decision on the bifurcation request following a supportive EA; PennEast also has a pending appeal with SCOTUS (waiting to see if case is taken up), but that relates to the NJ phase, which we have removed from our model. As a result of the various delays, we are updating our ’20-22E to/from $2.06/2.10 (mgmt. pointed to lower end of $2.05-2.15 range), $2.22/2.25 & $2.40/2.40. We increase our price target to $35/sh (15.6X our ex-CEV ’22E EPS of $1.93 plus $4-6/sh for CEV) from $33/sh; remain Equal Weight.

  Other Updates: (1) <u>Utility</u> - Mgmt. expects to fall short of the targeted 9,800 customer additions this year due to COVID, but continues to expect robust service territory growth long-term. On the regulatory front, NJNG is preparing an energy efficiency proposal to be filed with the BPU in late September and we expect a rate case next year aligned with the in-service date of SRL. Lastly, ***COVID-related financial impacts have been immaterial*** to date. (2) <u>Energy Services</u> – NJR further revised the 2020 earnings contribution to (3)-(5)% from 0-(5)%. The company continues to take steps to reduce the risk profile and improve profitability, which should be helped by the seasonal spread opportunity into the winter months. (3) <u>CEV</u> – Mgmt. discussed the addition of three commercial solar projects representing 32 MW during fiscal Q3 including the acquisition of CEV’s first operational project (NJ Oak), which the company plans to upgrade/drive efficiencies. Finally, NJR disclosed a 48% SREC hedge position for fiscal 2023 at similar prices to ‘20/21 hedges in the high $190s.

- **NWN.** The company affirmed 2020 EPS guidance of $2.25-2.45 and continues to ***point to the lower end of the range considering COVID-related impacts.*** In Q2, the company experienced a $0.12 hit from COVID tied to lower commercial/industrial sales, lower fee revenue, higher bad debt expense and accelerated debt financings to improve liquidity. This contributed to a $0.17 loss in the quarter vs. EPS of $0.07 in Q2’19. Of note, NWN has pending applications for COVID-related cost deferrals. We lower our ‘20E EPS to $2.30 from $2.35 and maintain our ‘21E & ‘22E of $2.62 & $2.64, respectively. We are attracted to NWN’s modern gas distribution system and above-average customer growth; further, we consider the OR rate case settlement to be constructive (details below). Our Underweight rating solely reflects valuation considerations. We increase our price target to $57/sh from $54/sh on higher peer group multiples.

  Other updates: (1) **OR Rate Case** – On 7/31, parties filed a stipulation including a $45.8mm rate increase (vs. $71.4mm request), 50% equity ratio and 9.4% ROE. Assuming final approval, rates will go into effect 11/1/20. (2) **RNG** – OR finalized the rulemaking related to SB 98, which allows NWN to procure RNG on behalf of customers and sets voluntary targets for gas utilities (15% in 2030, 20% in 2035 and 30% in 2050); the law is inclusive of renewable hydrogen. The company is focused on pursuing the lowest cost projects, which could potentially include rate base opportunities. (3) **Water Strategy** – Mgmt. remains energized about the opportunity to roll-up water systems, but noted that M&A activity has slowed in the wake of COVID (appears related to travel restrictions and other temporary challenges).

- **SWX.** The company reported ***strong Q2 EPS of 0.68*** (vs. our $0.64 estimate) ***reflecting record Q2 earnings at Centuri (construction) and a $0.22 COLI gain*** (strong performance of underlying securities). Mgmt. affirmed 2020 EPS guidance of $3.75-4.00 along with most of the underlying assumptions – the only adjustments related to lower interest expense at Centuri ($10-11mm down from $12.5-13.5mm) and slightly higher capex of ~$700mm (from $650-700mm). We viewed the Q2 update favorably, particularly the strong results at Centuri given the challenging economic backdrop. We increase our '20-22E EPS to/from $3.92/3.85, $4.40/4.35 & $4.50/4.45. We also increase our price target to $76/sh (16.3X our '22E EPS blended with our SOTP) from $72/sh; remain Underweight on valuation considerations in concert with the construction exposure (25-30% of consolidated earnings) and below-average regulatory treatment vs. LDC peers.

  SWX's post-2020 earnings power is largely dependent on the outcome ***pending rate cases in AZ, NV*** and CA (in order of size), which are all expected to conclude by year-end. We consider the staff positions in AZ ($66.6mm vs. $90.6mm request) and NV ($21.5mm vs. $38.5mm) to be very reasonable. In CA, parties reached a settlement on 8/3 calling for a $6.4mm rate increase (vs. $12.8mm request).

Acronyms-
BPU – Board of Public Utilities
CEV – Clean Energy Ventures
CMA – Columbia Gas of Massachusetts
DEP – Department of Environmental Protection
EA – Environmental Assessment
FERC – Federal Energy Regulatory Commission
JV – Joint Venture
MW - Megawatt
NJNG – New Jersey Natural Gas
O&M – Operations and Maintenance
PPA – Power Purchase Agreement
RNG – Renewable Natural Gas
SB – Senate Bill
SREC – Solar Renewable Energy Credit

Rating Basis Information:

NI Thesis: We rate shares Overweight. We are attracted to NI's robust long-term infrastructure growth opportunities and supportive regulatory treatment.

NJR Thesis: We are attracted to NJR's high quality utility franchise and gas infrastructure growth opportunities. Our Equal Weight rating reflects valuation considerations in concert with non-utility risks.

NWN Thesis: We are attracted to NWN's conservative gas and water infrastructure strategy, growing service territory, and modern distribution system. Our Underweight rating solely reflects valuation considerations as shares trade at meaningful premiums to utility peers on 2020E & 2021E EPS with, at best, an in-line growth rate.

SWX Thesis: Our Underweight rating reflects valuation considerations in concert with both construction and regulatory risks. With 25-30% of consolidated earnings derived from the construction business, which we consider to be lower quality than gas utility operations, we believe a meaningful discount to gas and electric utility peers is warranted.

Price Target Information:

NI Basis and Risks: Our price target is based on a P/E multiple analysis (apply a 5-7% premium to the blended gas/electric peer group multiple of 18.5X on our '22E EPS). Risks include lower than expected sales growth, unfavorable regulatory developments, and unexpected cost pressures.

NJR Basis and Risks: Our price target is based on sum-of-the-parts analysis ($4-6/share for CEV and $33/share for the remaining segments based on an 15-20% discount to the LDC median of ~19X applied to our ex-CEV '22E of $1.93). Key risks include negative regulatory developments, risk of project delays/cancellations (PennEast and Adelphia Gateway), and competitive risks at the renewables and energy marketing segments including SREC price risk and counterparty risk.

NWN Basis and Risks: Our price target is based on our P/E multiple analysis (apply a 15% premium to the LDC peer group median of ~19X on our '22E EPS). Risks include onerous regulatory outcomes, Mist Expansion execution risks, exposure to unregulated storage operations, and inflationary cost pressures.

SWX Basis and Risks: Our price target is based on a combination of our P/E (apply a 13% discount to the '21E LDC median of ~19X on our '22E EPS) and SOTP (3-5% P/E discount to LDC peers for the regulated operations and 7.5% EV/EBITDA premium to construction comps for Centuri) analyses. Key risks include regulatory risk (rate cases in AZ, CA and NV), competitive and cyclical risks at Centuri, and risks related to high construction customer concentration.

- Wells Fargo Securities, LLC or its affiliates intends to seek or expects to receive compensation for investment banking services in the next three months from an affiliate of NiSource Inc., Northwest Natural Holding Co., New Jersey Resources Corporation, Southwest Gas Holdings, Inc.
- Wells Fargo Securities, LLC is acting as financial advisor to Leaf River Energy Center, LLC (Leaf River) in the announced deal where NJR Midstream, a business of New Jersey Resources (NYSE: NJR) has entered into an agreement to acquire Leaf River Energy Center, LLC (Leaf River) from Macquarie Infrastructure Partners, which operates within the Macquarie Infrastructure and Real Assets division of the Macquarie Group. This transaction is subject to regulatory approval.
- Wells Fargo Securities, LLC, or its affiliates, managed or co-managed a public offering of securities for NiSource Inc., New Jersey Resources Corporation within the past 12 months.
- Wells Fargo Securities, LLC or its affiliates managed or co managed a public offering of securities for an affiliate of NiSource Inc. within the past 12 months
- Wells Fargo Securities, LLC maintains a market in the common stock of NiSource Inc., Northwest Natural Holding Co., New Jersey Resources Corporation, Southwest Gas Holdings, Inc..
- New Jersey Resources Corporation currently is, or during the 12-month period preceding the date of distribution of the research report was, a client of Wells Fargo Securities, LLC. Wells Fargo Securities, LLC provided non-securities services to New Jersey Resources Corporation.
- Wells Fargo Securities, LLC received compensation for products or services other than investment banking services from NiSource Inc., Northwest Natural Holding Co., New Jersey Resources Corporation in the past 12 months.
- NiSource Inc., Northwest Natural Holding Co. currently is, or during the 12-month period preceding the date of distribution of the research report was, a client of Wells Fargo Securities, LLC. Wells Fargo Securities, LLC provided non-investment banking securities-related services to NiSource Inc., Northwest Natural Holding Co..
- Wells Fargo Securities, LLC or its affiliates has a significant financial interest in NiSource Inc., Northwest Natural Holding Co., New Jersey Resources Corporation, Southwest Gas Holdings, Inc..

NI: Risks include lower than expected sales growth, unfavorable regulatory developments, and unexpected cost pressures.
NJR: Key risks include negative regulatory developments, risk of project delays/cancellations (PennEast and Adelphia Gateway), and competitive risks at the renewables and energy marketing segments including SREC price risk and counterparty risk.
NWN: Risks include onerous regulatory outcomes, Mist Expansion execution risks, exposure to unregulated storage operations, and inflationary cost pressures.
SWX: Key risks include regulatory risk (rate cases in AZ, CA and NV), competitive and cyclical risks at Centuri, and risks related to high construction customer concentration.

Wells Fargo Securities, LLC does not compensate its research analysts based on specific investment banking transactions. Wells Fargo Securities, LLC's research analysts receive compensation that is based upon and impacted by the overall profitability and revenue of the firm, which includes, but is not limited to investment banking revenue.

STOCK RATING
1=Overweight: Total return on stock expected to be 10%+ over the next 12 months. BUY
2=Equal Weight: Total return on stock expected to be 0-10% over the next 12 months. HOLD
3=Underweight: Total return on stock expected to lag the Overweight- and Equal Weight-rated stocks within the analyst's coverage universe over the next 12 months. SELL

VOLATILITY RATING
V=A stock is defined as volatile if the stock price has fluctuated by +/-20% or greater in at least 8 of the past 24 months or if the analyst expects significant volatility. All IPO stocks are automatically rated volatile within the first 24 months of trading.

As of: August 9, 2020

51% of companies covered by Wells Fargo Securities, LLC Equity Research are rated Overweight.	Wells Fargo Securities, LLC has provided investment banking services for 47% of its Equity Research Overweight-rated companies.
38% of companies covered by Wells Fargo Securities, LLC Equity Research are rated Equal Weight.	Wells Fargo Securities, LLC has provided investment banking services for 34% of its Equity Research Equal Weight-rated companies.
11% of companies covered by Wells Fargo Securities, LLC Equity Research are rated Underweight.	Wells Fargo Securities, LLC has provided investment banking services for 32% of its Equity Research Underweight-rated companies.

Important Disclosure for U.S. Clients
This report was prepared by Wells Fargo Securities Global Research Department ("WFS Research") personnel associated with Wells Fargo Securities and Structured Asset Investors, LLC ("SAI"), an investment adviser subsidiary of Wells Fargo & Co. If you are paying directly for this research, it is being provided by SAI. For all other recipients in the U.S. this report is being provided by Wells Fargo Securities.

Important Disclosure for International Clients
EEA – The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the EEA, this report is distributed by Wells Fargo Securities International Limited ("WFSIL"). WFSIL is a U.K. incorporated investment firm authorized and regulated by the Financial Conduct Authority. For the purposes of Section 21 of the UK Financial Services and Markets Act 2000 ("the Act"), the content of this report has been approved by WFSIL, an authorized person under the Act. WFSIL does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). The FCA rules made under the Financial Services and Markets Act 2000 for the protection of retail clients will therefore not apply, nor will the Financial Services Compensation Scheme be available. This report is not intended for, and should not be relied upon by, retail clients.

Australia – Wells Fargo Securities, LLC, Wells Fargo Securities International Limited and Wells Fargo Securities Asia Limited are exempt from the requirements to hold an Australian financial services license in respect of the financial services they provide to wholesale clients in Australia. Wells Fargo Securities, LLC is regulated under the laws of the United States, Wells Fargo Securities International Limited is regulated under laws of the United Kingdom, and Wells Fargo Securities Asia Limited is regulated under the laws of Hong Kong. All such laws differ from Australian laws. Any offer or documentation provided to Australian recipients by Wells Fargo Securities, LLC, Wells Fargo Securities International Limited or Wells Fargo Securities Asia Limited in the course of providing the financial services will be prepared in accordance with the laws of the United States, United Kingdom or Hong Kong and not Australian laws.

Canada – This report is distributed in Canada by Wells Fargo Securities Canada, Ltd., a registered investment dealer in Canada and member of the Investment Industry Regulatory Organization of Canada (IIROC) and Canadian Investor Protection Fund (CIPF). Wells Fargo Securities, LLC's research analysts may participate in company events such as site visits but are generally prohibited from accepting payment or reimbursement by the subject companies for associated expenses unless pre-authorized by members of Research Management.

Hong Kong – This report is issued and distributed in Hong Kong by Wells Fargo Securities Asia Limited ("WFSAL"), a Hong Kong incorporated investment firm licensed and regulated by the Securities and Futures Commission to carry on types 1, 4, 6 and 9 regulated activities (as defined in the Securities and Futures Ordinance (Cap. 571 The Laws of Hong Kong), "the SFO"). This report is not intended for, and should not be relied on by, any person other than professional investors (as defined in the SFO). Any securities and related financial instruments described herein are not intended for sale, nor will be sold, to any person other than professional investors (as defined in the SFO). EQUITY RESEARCH
NiSource Inc. (NI)

NiSource Inc.
Poised for a Positive Pivot, Upgrade to Buy

September 23, 2020

Key Takeaway

NI will hold an Investor Day 9.29, its first since 2017, to discuss strategic initiatives, review operations, and profile guidance. With the TCJA, Greater Lawrence Incident, and COVID-19 providing recent challenges, we expect a future-focused pivot with discussion of system modernizations & renewable energy investments. In Aug., NI offered $1.28-$1.36 2021 EPS guidance & noted a 2021-24 CAGR above its prior 5-7% rate. With >17% TR, we upgrade to Buy, from Hold.

Event goals. We expect the Investor Day agenda includes exploring 1) NIPSCO's renewable transition as $1.8-$2.0B of incremental 2021-23 investment opportunities remain under evaluation and the conversion from coal will deliver an estimated ~90% reduction in NI's 2005-30 GHG emissions; 2) capex plans which underpin a 10-12% 2021-24 rate base CAGR; 3) its $1.28-$1.36 2021 non-GAAP EPS guidance, including COVID impacts, and the unveiling of a new 2021-24 EPS CAGR; and 4) updating its SMS & strategic realignment initiatives.

Moving past MA incident with sale to Eversource. In Sept. 2018, excessive pressure in gas lines owned by Columbia Gas of MA (CGMA) caused a series of explosions and fires in the Greater Lawrence Area which resulted in one fatality, a number of injuries, evacuations, and the interruption of service for ~7500 meters. NI replaced the cast iron & bare steel lines in the system and restored service to the region, pled guilty to violating the Natural Gas Pipeline Safety Act, recorded ~$1.73B in total incident-related costs to date, implemented a slew of safety-related changes, and, in Feb., agreed to sell CGMA to Eversource for $1.1B in cash. The deal is set to close soon and, we hope, will allow NI to move past the incident.

Differentiated renewable investment opportunities. In 2020, US gas utilities have been swept up in the anti-hydrocarbon sentiment which earlier infected upstream & midstream valuation dynamics, producing a swift compression in group multiples. Amid this backdrop, NI has an opportunity to shine by focusing on the significant renewable investments opportunity it has in transitioning NIPSCO's generation portfolio fully away from coal by 2028. With system & generation modernization, NI has identified ~$10B on LT infrastructure investment opportunities.

Updating growth forecasts, affirming the value proposition. While the combination of the Tax Cuts & Jobs Act (TJCA), Greater Lawrence Incident, and COVID-19 negatively impacted NI's growth profile, leaving 2018-21 EPS essentially flat at the 2021 outlook mid-point, the sale of CGMA & punctuated renewable spending opportunity allow investors to refocus on the future. Mgmt has noted its new 2021-24 EPS CAGR will accelerate from its prior 5-7% range, underpinned by a projected 10-12% rate base CAGR.

Upgrading to Buy. At current price, NI implies ~16.5x 2021 consensus EPS, an approx. 2 STD (3x) discount to its trailing 5-yr avg. and its ~3.8% dividend yield is ~2.5 STD above its 5-yr avg. despite the YTD crash in rates. With accelerating EPS growth through 2024 (~7.1% JEFe CAGR), the pending CGMA sale, significant renewable investment opportunities, and a BBB+ rated BS, we see an attractive entry & upgrade to Buy.

The Long View

Scenarios

Base Case

- Infrastructure modernization programs to generate steady growth & returns across all segments for several decades
- CGMA sale, NIPSCO renewable investments & a continuation of tracked infrastructure investments punctuated by rate case activity.
- ~5.8% dividend CAGR from 2019-24; ~4.7% EPS CAGR from 2019-24
- Combination of Target P/E, Target Yield, DDM, and DCF Analysis. 2022 Adj. EPS: $1.42; 2021 dividend: $0.88/share; PT $25

Upside Scenario

- Customer growth grows faster than projected ~0.5% per year assumption and alternative source of regulated revenues are secured
- NI spends above the high-end of its guidance range, growing rate base faster than anticipated
- Cash flow outperformance yields reduced debt load, generating interest cost savings
- Combination of Target P/E, Target Yield, DDM, and DCF Analysis. 2022 Adj. EPS: $1.50; 2021 dividend: $0.90/share; PT $30

Downside Scenario

- Customer growth is slower than projected ~0.5% per year assumption, or negative
- NI spends below the low-end of its guidance range, and rate base growth is slower than anticipated
- Cost overruns and rising debt loads weigh on EPS
- Adverse regulatory and rate case outcomes
- Combination of Target P/E, Target Yield, DDM, and DCF Analysis. 2022 Adj. EPS: $1.30; 2021 dividend: $0.45/share; PT $15

Investment Thesis / Where We Differ

- Infrastructure modernization programs to generate steady growth & returns across all segments for several decades
- CGMA sale, NIPSCO renewable investments & a continuation of tracked infrastructure investments punctuated by rate case activity.
- ~5.8% dividend CAGR from 2019-24; ~4.7% EPS CAGR from 2019-24
- Combination of Target P/E, Target Yield, DDM, and DCF Analysis. 2022 Adj. EPS: $1.42; 2021 dividend: $0.88/share; PT $25

Catalysts

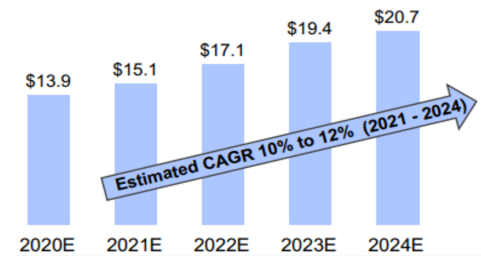
- 2020 Investor Day (Sept. 29th)
- Continued regulatory progress and reduction in regulatory lag could improve earnings growth
- Extension or expansion of modernization programs across any/all service territories
- Increased revenue-normalization efforts and reduction in volumetric sensitivities
- Sale of Columbia Gas of Mass. & removal of the overhang that comes with the Greater Lawrence Incident; NI remains liable for additional costs incurred
- Evidence of cost mitigation efforts in response to COVID-19 demand destruction in-line with guidance.

By the Numbers

With 2Q results, NI affirmed its $1.7-$1.8B 2020 capital program and plans to use Columbia Gas of MA sale proceeds to repay its $850mm term loan, expiring in March. As of June 30th, NI had ~$2.0B of net liquidity and a total debt/capital ratio of 63.8%; while a goodwill test was performed in 2Q, it did not result in any impairments. Management still anticipates $235-$360mm of 2020 equity through its ATM, ESPP, and 401K programs, implying $227-$352mm to be raised in 2H, and continues to target long-term AFFO/Debt of 14-15%.

NI expects to execute on an estimate $30B in total long-term regulated utility infrastructure investments and we expect a ramp-up in annual 2021-23 spending as NIPSCO renewable investments are pursued. Financing will be provided by operating cash flow (~$1.5-$1.7B/year JEFe), a combination of new debt and equity issuances, and project-level tax equity investments. Management estimates it will begin earning on >75% of its capital investments within 18 months and has historically identified $235-$360mm of annual common equity placement via its ATM, ESPP, DRIP, and 401K programs, to be opportunistically supplemented by common, preferred, or forward-sale equity placements, as needed. We flag NI's $1.25B issuance of 0.95% 5-year Senior Notes and $750mm placement of 1.70% 10-year Senior Notes last month as evidence of its open and attractively-priced access to credit capital markets. Excluding the sale of Columbia Gas of MA, NI expects its capital investments to drive an estimated 10-12% 2021-24 rate base CAGR, with projected 2024 rate base approaching $21B.

Chart 1 - NI Projected Rate Base ($B)



Source: NI reports; Note: Excludes CGMA given pending sale to Eversource

In August, management guided 2021 non-GAAP EPS of $1.28-$1.36, which includes 5¢ of anticipated COVID-related headwinds, and noted that its updated 2021-24 EPS CAGR, to be unveiled at the Investor Day, would exceed its previous 5-7%. We formally model 2021 EPS of $1.35 and a 2021-24 EPS CAGR of ~7.1%, with 2021-24 DPS of 6.4%, and $1.225B of aggregate 2021-24 equity issuance. Given a reduction in peer multiples and a continued rise in regressed beta, we trim our price target, derived via a combination of DCF, DDM, P/E, and Target Yield approaches, to $25, from $26; however, we upgrade shares to Buy, from Hold, as we see ~17% total return potential.

A Differentiated Renewable Investment Opportunity

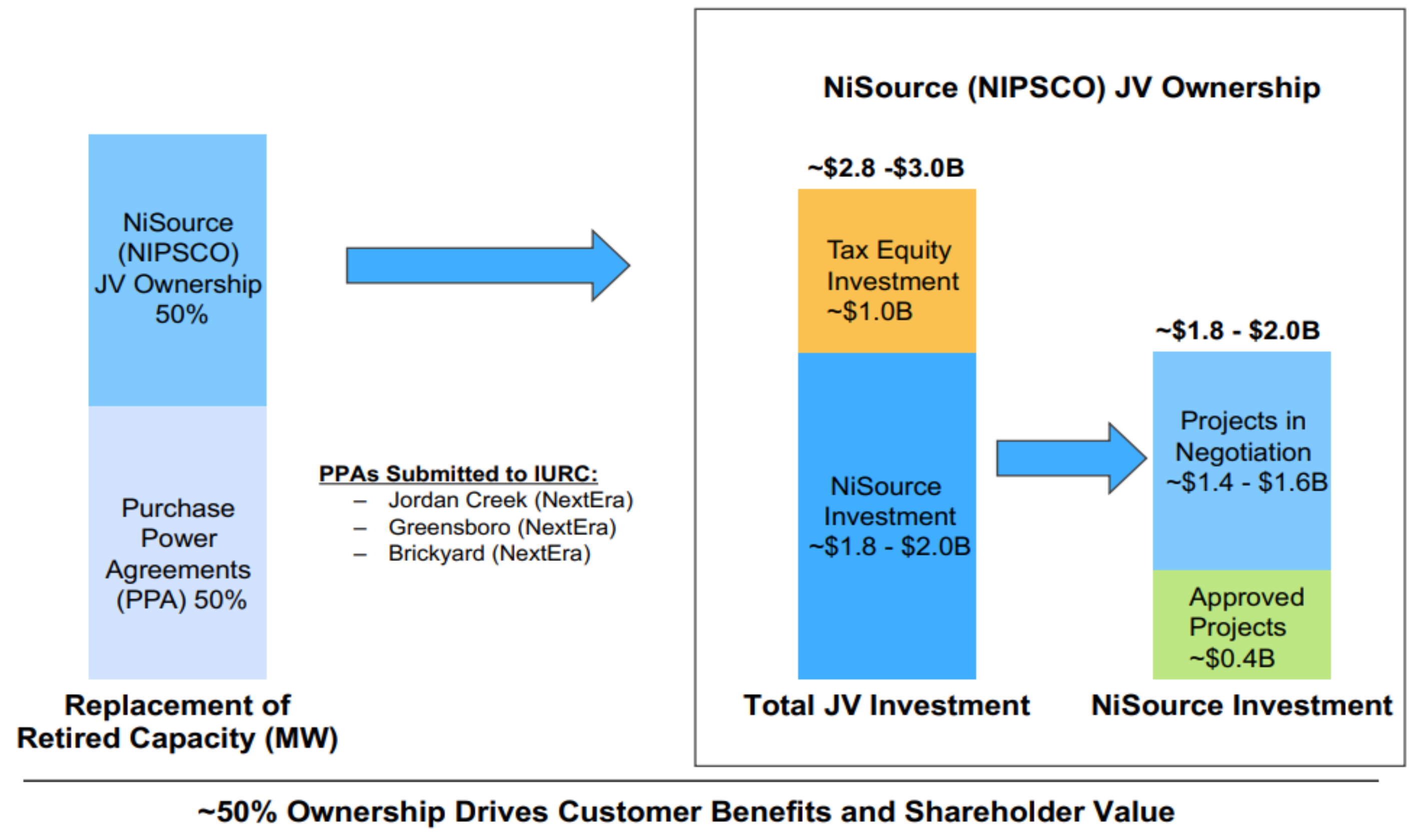
With its 2018 Integrated Resource Plan, NI outlined an initiative to retire NIPSCO's fleet of coal-fired electric generation facilities on an accelerated schedule, with its R.M. Schahfer Generation Station being retired by 2023 and its Michigan City Generating Station shuttered by 2028. In aggregate these units represent over 70% of NIPSCO's generation capacity and all of its remaining coal-fired output. During the second quarter, the Midcontinent Independent System Operator (MISO) approved NIPSCO's plan to retire the R.M. Schahfer units in 2023, which constitute 1.4 GW of capacity, creating the opportunity to deploy an incremental $1.8-$2.0B on replacement renewable generation, primarily in 2022-23.

NI has estimated the transition of NIPSCO's generation portfolio from coal to renewable sources will drive an industry-leading 90% reduction in greenhouse gas emission from 2005-2030. Management has outlined plans to tackle its replaced generation needs via a combination of Purchase Power Agreements (PPAs), in which it simply purchases power from 3rd-party owned facilities, and Build Transfer Agreements (BTAs), in which it constructs renewable assets via a JV with developers and tax equity investors, and then takes full ownership once the tax credits of the facility are fully monetized.

Thus far, NI has entered into the following capacity replacement agreements:

- PPAs:
    - **Jordan Creek:** 400 MW approved wind facility, under construction, with a YE20 targeted in-service.
    - **Brickyard:** 200 MW solar facility, filed July 2020, 2Q23 targeted in-service
    - **Greensboro:** 130 MW solar facility, filed July 2020, 2Q23 targeted in-service
- BTAs:
    - **Rosewater:** 100 MW approved wind facility with WFC as tax-equity partner, under construction, with a YE20 in-service target.
    - **Indiana Crossroads**: 300 MW approved wind facility with construction beginning 2H20 and in-service targeted for YE21.

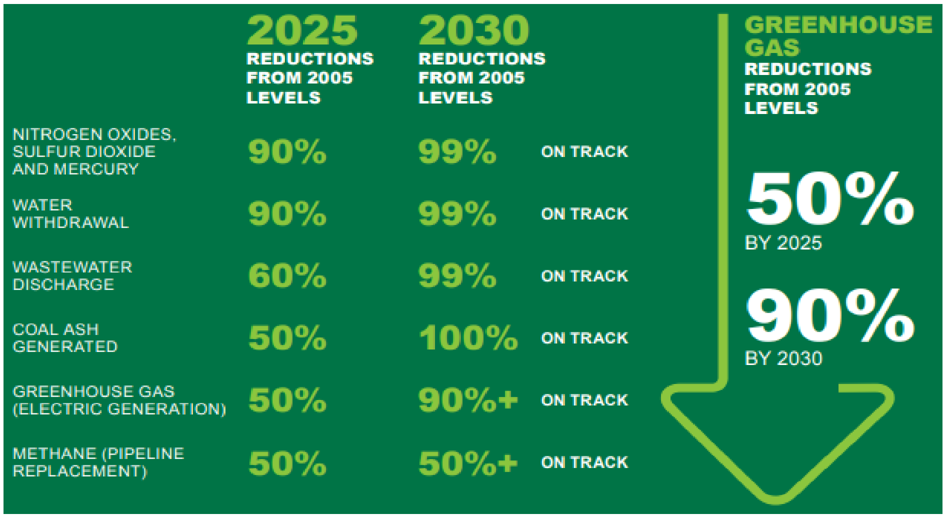
Exhibit 2 - NI Renewable Investment Opportunity



Source: Company presentations

Though shareholders would likely prefer NIPSCO's replacement generation needs all be met with BTAs, given the opportunity to eventually fully own the asset, management must be mindful of the cadence of its generation needs, its ability to finance large-scale and chucky renewable investments given other committed investments across its portfolio, and the impact on customer bills. We expect a detailed discussion of these dynamics, as well as its environmental impact targets, as management explores additional opportunities at next week's event.

Exhibit 3 - NI Environmental Impact Targets



Source: NI 2019 Annual Report

Finally, we expect a detailed discussion of how NI's Safety Management System (SMS) is evolving to reshape operational programs and better prioritize risks across its portfolio. If good ultimately comes from the Greater Lawrence Incident and management's efforts to rebuild stakeholder trust, we think it is most likely to appear in its enhanced risk modeling tools and more dynamic approach to infrastructure replacement than the traditional FIFO or materials-based approach. In 2019, NI formed a Quality Review Board, chaired by former Secretary of Transportation Ray LaHood, to provide oversight and governance of the company's SMS implementation; as next week's event is the first Investor Day in several years, it provides management an ideal forum to showcase the impact of the QRB on its SMS refresh.

LDC Headwinds: Rising Betas & Hydrocarbon Bucketing

For those of us who regularly update financial models, and assess the reasonableness of assumptions embedded in various valuation frameworks, including calculated capital costs, the significant jump in regressed betas (vs. the S&P 500) across the utility group in recent months has stood out. We suspect COVID-19 and the increasing market weight of technology and biotechnology stocks is largely to blame, as normal human activity has been severely upended during the pandemic, visibility regarding a return to 'normal' life remains elusive, and instead we are all stuck at home reliant on technology and thinking about potential pandemic-ending vaccines. As the WSJ flagged in a mid-July article, the average beta of the technology sector dropped from 1.37 to 1.10 over the spring while the beta of the NYSE Arca Pharmaceutical Index fell to 0.81, from 1.11, over the same period. Meanwhile, the average betas of the real estate and utilities sectors of the S&P 500 have risen to 1.16 and 1.05 this year, respectively, from 0.43 and 0.27 in 2019. For NI specifically, its adjusted regressed one-year beta of 1.11 vs. the S&P 500 is far higher than its five-year mark of 0.85.

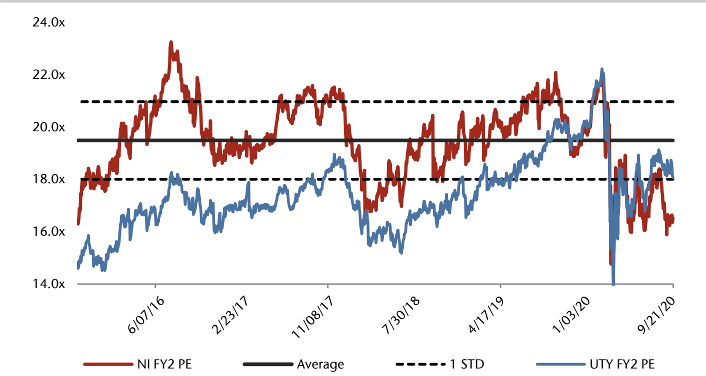
As elevated betas magnify the equity risk premium in a Capital Asset Pricing Model (CAPM), they raise the calculated costs of equity capital and weighted average costs of capital (WACC) for the utility names we cover, which in turn lowers discounted cash flow and dividend valuations. Many of our price target revisions for covered utilities YTD, including for NI, have been impacted by this dynamic. Add this to the litany of things which appear upside down in a COVID world: at least as represented by regressed betas, biotech stocks appear safe/defensive while regulated, IG-rated monopolistic utilities now appear risky.

In addition, US gas utilities have been swept up this year in the anti-hydrocarbon sentiment which earlier infected upstream & midstream valuation dynamics, producing a swift compression in group multiples. To some extent this is logical: if investors penalize E&P companies for producing hydrocarbons and midstream companies for enabling the E&Ps to do so, then why omit the penalty for utilities which distribute methane for end-use consumption? While gas utilities have several avenues to soften the anti-hydrocarbon rhetoric now stacking against them (renewable natural gas, clean hydrogen) the pathways are not seemingly straightforward or immediate. Hence, we believe NI has an opportunity to shine by focusing on the significant renewable investments opportunity it has in transitioning NIPSCO's generation portfolio fully away from coal by 2028. Though this focus on cleaner electric generation does nothing to diminish the hydrocarbon challenges of its gas franchise, it provides a more potent environmental talking point than its peers as the natural gas solutions materialize. With system and generation modernization, NI has identified ~$10B of LT infrastructure investment opportunities.

Current Valuation Indicates >2 STD Moves

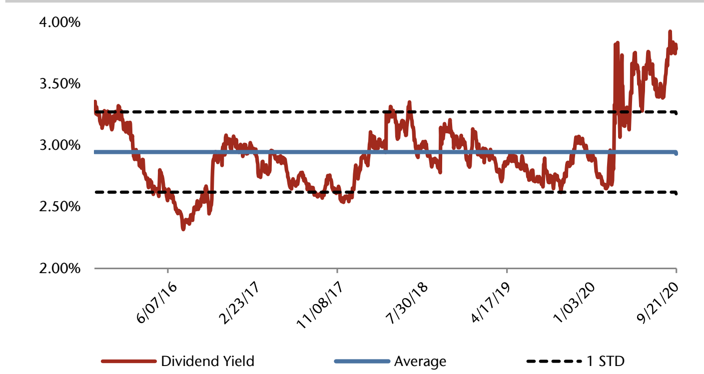
At current price, NI shares implies ~16.5x 2021 consensus EPS, an approximate 2 standard deviation (or 3x) discount to its trailing 5-year average and its ~3.8% dividend yield is ~2.5 standard deviations above its 5-year average despite the YTD crash in rates. With accelerating EPS growth through 2024 (~7.1% JEFe CAGR), the pending Columbia Gas of MA sale, significant renewable investment opportunities, a BBB+ rated balance sheet, a ~97% funded qualified pension, and Federal Reserve plans to leave rates low for the foreseeable future, we see an attractive entry point.

Chart 2 - NI FY2 PE vs. UTY FY2 PE (5-Years)



Source: FactSet

Chart 3 - NI Dividend Yield (5-Years)



Source: FactSet

COVID Update

Despite their defensive, rate-regulated business models, utilities are not fully insulated from COVID-19 related impacts. In May, NI provided an update on the operating climate, warning investors that weakness in commercial and industrial demand would be only partially offset by increased residential sales and that increased bad debt expense due to job loss and the moratorium on disconnects could further weigh on results. Fortunately, over the subsequent months, NI has received orders from regulators in MD, VA, PA, IN and OH allowing some form of COVID-related deferral for later recovery (COVID-related expenses, bad debt, suspended fees, etc.). That said, the COVID-related 2Q EPS impact was 6¢ as lower sales, reduced other revenues, such as late payment and reconnection fees, and increased expenses weighed on performance. In addition, with 2Q results, mgmt initiated 2021 EPS guidance at $1.28-1.36, including 5¢ related to COVID-19 (midpoint) as NI's base case continues to contemplate a gradual recovery in demand into 1H21. Separately, NI has seen minimal impact to its supply chain and/or modernization programs and does not expect the capital markets to present a problem given recent financing activity and proceeds from the Columbia Gas of MA transaction, though the potential for a slight delay to the Rosewater project was flagged.

NI's Gas & Electric Business Mix

NiSource derives substantially all of its revenues and earnings from its two rate-regulated businesses, NiSource Gas Distribution, a natural gas distribution holding company, and Northern Indiana Public Service Company (NIPSCO), a gas and electric company.

Exhibit 4 - NI Distribution Operations

Source: Company reports

NiSource Gas Distribution

NiSource Gas Distribution (NGD) provides supplies of domestic natural gas to more than 3.5 million residential, commercial, & industrial customers through ~60K miles of pipeline & related facilities. It owns various subsidiaries that operate independently within each state: Columbia Gas of Kentucky, Columbia Gas of Maryland, Columbia Gas of Ohio, Columbia Gas of Massachusetts, Columbia Gas of Pennsylvania, Columbia Gas of Virginia, and NIPSCO (Northern Indiana Public Service Co.). NIPSCO is an Indiana utility providing both natural gas and electricity distribution services to the northern part of the state. NiSource's

Gas Distribution segment is collectively one of the largest distributors in the US. As of YE19, more than 3.2 million of NGD's ~3.5 million customers were residential rate payers, though this group compromises only ~26% of total volume. In contrast, industrial users comprise only ~6K of NGD's customers, but represent more than 50% of total gas volumes sold. Commercial customers comprise the remaining ~280K customers and ~20% of sales. Of note, we have included statistics for Columbia Gas of Massachusetts as it is still formally part of the NiSource portfolio; however, earlier this year NiSource agreed to sell the business to Eversource for $1.1B in cash and the transaction is expected to close soon. Columbia Gas of MA represents ~9% of NGD's customer count and approximately 12% of its rate base.

Modernization Programs, Rate Cases, Normalization Mechanisms & More. NGD has a platform for sustainable earnings growth through a variety of infrastructure replacement programs across its seven jurisdictions.

- Indiana (~$1.7B rate base): Northern Indiana Public Supply's (NIPSCO) gas division has an estimated $1.7B rate base with a six-year, $950mm infrastructure replacement program extending through 2025. The latest replacement program was approved in July 2020 and allows for recovery through semi-annual adjustments to the existing TDSIC tracker, which has been in place since 2014. NIPSCO does not partake in any sort of revenue decoupling, including weather normalization.

- Kentucky (~$327mm rate base): Columbia Gas of Kentucky, headquartered in Lexington, provides services to 30 counties, has >135K customers and an estimated $327mm rate base. On Nov. 7th, 2019, CG of KY received approval from the Kentucky PSC to amend and expand its AMRP (now SMRP) to include for recovery of system safety investments, including low-pressure project spend; CG of KY's tracker program was approved in 2009 and any investments related to SMRP are reflected in rate base through an annual fixed monthly rate rider filed in Oct. Most recently, on Dec. 20th, 2019, CG of KY received an order covering $40.4mm for 2020 capital investments related to its SMRP; new rates are effective Jan. 2020 and CG of KY expects to invest $35-$40mm annually in its modernization program. Separately, CG of KY enjoys a weather normalization mechanism for its residential and commercial customers.

- Maryland (~$149mm rate base): Columbia Gas of Maryland, headquartered in Canonsburg, PA, has >33K customers, an estimated $149mm rate base and expects to invest $18-$25mm annually in its modernization program. CG of MD's 5-year STRIDE plan renewal for 2019-2023 is focused on replacing 1) existing cast iron and bare steel mains, 2) associated services and meters and 3) identified prone-to-failure vintage plastic piping. The STRIDE program became possible when the Governor of MD signed Senate Bill 8 into law on May 2nd, 2013, authorizing gas companies to accelerate recovery of eligible infrastructure replacement through an annual surcharge (IRIS) as approved by the MD PSC. On May 15th, 2020, CG of MD filed a base rate case requesting an additional $6.3mm in annual revenue, $5mm net of infrastructure trackers; the order is expected in 4Q20 and new rates would be effective Dec. 2020. Separately, CG of MD has a revenue normalization adjustment in place for residential customers and a weather normalization mechanism in place for residential and commercial customers.

- Massachusetts (~$1.1B rate base): Columbia Gas of Massachusetts, headquartered in Westborough, has ~320K customers, an estimated $1.1B rate base and expects to invest $75-$120mm annually in its modernization program; CG of MA has had the ability to leverage its tracker program (GSEP) since 2015. On Sept. 19th, 2018, CG of MA withdrew its most recent rate case filing, a $43.8mm rate base increase, to focus solely on the restoration efforts required after the Greater Lawrence incident; rate case activity has remained on hold since that time. Separately, CG of MA has enacted revenue decoupling across all customers, but has no weather normalization program in place.

  In February, NI announced a definitive agreement to sell Columbia Gas of MA to Eversource (ES) for $1.1B; mgmt noted the loss in CGMA earnings will be mostly offset by the elimination of its block equity issuance ($500-$700mm) with the possibility for some dilution as it de-consolidates the MA franchise. On July 2nd, 2020, NI and ES filed a joint petition with the MA DPU seeking approval for the transaction while also proposing a settlement with the Attorney General's Office and the Dept. of Energy Resources of all remaining state investigations related to the 2018 Greater Lawrence event; in lieu of penalties, NI has agreed to pay $56mm into an Energy Relief Fund to settle & resolve all pending matters. According to the transaction details, NI does remain liable for any fines imposed as part of criminal proceedings related to the Greater Lawrence incident and/or any civil claims made prior to the close of the transaction; in its most recent 10-Q, NI cited Pipeline Replacement & Restoration costs of $258mm, 3rd-Party Claims, Fines, Penalties & Settlements of $1.04-$1.055B, and Other Expenses of $445-$455mm. That said, as of 2Q earnings, the sale remains on-track to receive regulatory approval by quarter end and is expected to close thereafter; proceeds from the sale are expected to repay NI's $850mm term loan due March 21st, 2021.

- Ohio (~$3.2B rate base): Columbia Gas of Ohio, headquartered in Columbus, is NI's largest service territory with ~1.4mm customers, a ~$3.2B rate base and an estimated $435-$550mm in annual tracker program investments. CG of OH last received approval for its 5-year IRP plan on Jan. 31st, 2018, authorizing the program through 2022, while the CEP, which allows the company to recover capex and related deferred expenses not included in its IRP tracker, was first approved in late 2018. Annual rider updates for the IRP and CEP were filed on Feb 28th, 2020; the IRP received an order on April 22nd, covering ~$243mm in 2019 capex, while the CEP, which filed a ~$185mm application related to its 2019 capital investments, expected an order in Aug. CG of OH incorporates straight fixed variable rates for residential and small commercial customers, but does not use a weather normalization mechanism.

- Pennsylvania (~$1.9B rate base) – Columbia Gas of Pennsylvania, headquartered in Canonsburg, has ~436K customers, a ~$1.9B rate base and an estimated $250-$296mm in annual tracker program investments. CG of PA's DSIC was established on April 1st, 2013, is authorized to recover the cost of eligible capex associated with repair, replacement or improvement that was not previously reflected in rate base and has been placed in service during the applicable 3-month period, is updated quarterly and cannot exceed 5% of distribution revenues. Most recently, CG of PA had an outstanding rate case requesting an annual revenue increase of $100.4mm; the order is expected in 1Q21 and new rates effective Feb. 2021. Separately, CG of PA leverages weather normalization for residential customers but has no other revenue decoupling measures in place.

- Virginia (~$850mm rate base) - Columbia Gas of Virginia, headquartered in Chesterfield County, has >265K customers, a ~$850mm rate base and an estimated $46-$65mm in annual tracker program investments. CG of VA's current 5-year SAVE plan was approved by the VSCC in 2016, amended in 2017 for the years 2016-2020 and amended in 2019 for 2020; the SAVE modernization program has been in effect since 2010. Recent rate activity includes a unanimous settlement for $9.5mm in incremental annual revenue, $1.3mm net of infrastructure trackers, with rates effective July 2019. Separately, CG of VA has a revenue normalization adjustment in place for residential customers and a weather normalization mechanism in place for residential and commercial customers.

NiSource Electric Operations

The NiSource Electric Operations segment houses the electricity business of NIPSCO and serves ~476,000 customers across 20 counties in Northern Indiana. The segment's overall operations include power generation, transmission, and local distribution which are part of the Midcontinent Independent System Operator (MISO) transmission organization in the Midwestern portion of the United States. The supply assets incorporate traditional and renewable generation equipment, including natural gas, hydroelectric, CCGT, and coal generated supplies with a total system generation capability of 2,847 MW. Residential customers represent ~87% of NIPSCO's total electric customers, but account for only ~26% of total GWh volumes. Industrial customers comprise <1% of the customer base, but are responsible for ~46% of volumes. Commercial customers represent 12% of total customers but ~26% of total usage. Wholesale users comprise the remainder of both the customer base and transportation volumes.

Exhibit 5 - NIPSCO Service Territory

Source: NIPSCO website

Modernization & Tracker Programs. Similar to NIPSCO's gas distribution business, the electric operations also have long term infrastructure modernization and expense tracker programs:

- TDSIC: On April 30th, 2013, the Indiana Governor signed Senate Enrolled Act 560, known as the TDSIC statute, into law, allowing public utilities to recover costs outside of a base rate proceeding for new/replacement electric and gas transmission, distribution & storage projects that are intended for safety, reliability, system modernization or economic development. Revisions related to the TDSIC statute became effective July 1st, 2019, which, among other things, permits flexibility in TDSIC Plans between 5 & 7 years in length, requires the utility to file a base rate case at some point during the term of each TDSIC plan and provides that the 2% revenue cap applies to the aggregate of approved TDSIC Plans. NIPSCO electrics most recent semi-annual tracker update covered $131.1mm in capital investments from Dec. 2018 - June 2019; the order was received Dec. 18th, 2019 and rates went into effect Jan. 2020.

- ECRM: NIPSCO received approval from the IURC to recover certain environmental related costs, including 1) AFUDC and a return on the capital spent to implement environmental compliance plan projects and 2) related O&M and depreciation expense once the environmental facilities enter service.
- FMCA: Provides for the recovery of costs, outside of a base rate proceeding, for projected federally mandated costs, including a return on investment, mandated O&M expenses, depreciation and property taxes. Once a plan is approved by the IURC, 80% of eligible costs can be recovered using a periodic rate adjustment mechanism while the remaining 20% are deferred for future recovery in NIPSCO's next general rate case.

Source: NI reports, Jefferies estimates

Company Description

NiSource Inc.

NiSource, Inc. (NYSE: NI) is a diversified energy holding company whose subsidiaries provide natural gas, electricity, and other energy products & services to roughly 4mm US customers. The Company operates two business segments: Gas Distribution and Electric. The Gas Distribution operations provide natural gas service and transportation to ~3.5mm residential, commercial and industrial customers in Ohio, Pennsylvania, Virginia, Kentucky, Maryland, Indiana and Massachusetts; NI has agreed to sell its Massachusetts operations to Eversource for $1.1B, a transaction expected to close in 2H20. The Electric Operations segment provides electric service to ~480K customers across 20 counties in the northern part of Indiana. NiSource was founded in 1987, is incorporated under the laws of the state of Delaware, and is headquartered in Merrillville, IN.

Company Valuation/Risks

NiSource Inc.

Our $25 PT and Buy recommendation are derived via Target P/E, Target Yield, DCF, and DDM approaches. Unexpected regulatory outcomes, deviations in customer growth, and project execution present risks to our estimates & PT.

Analyst Certification:

I, Christopher Sighinolfi, CFA, certify that all of the views expressed in this research report accurately reflect my personal views about the subject security(ies) and subject company(ies). I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this research report.

I, Vikram Bagri, certify that all of the views expressed in this research report accurately reflect my personal views about the subject security(ies) and subject company(ies). I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this research report.

I, Ryan Conlin, certify that all of the views expressed in this research report accurately reflect my personal views about the subject security(ies) and subject company(ies). I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this research report.

As is the case with all Jefferies employees, the analyst(s) responsible for the coverage of the financial instruments discussed in this report receives compensation based in part on the overall performance of the firm, including investment banking income. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgement.

Investment Recommendation Record

(Article 3(1)e and Article 7 of MAR)

Recommendation Published	September 23, 2020 , 04:15 ET.
Recommendation Distributed	September 23, 2020 , 04:15 ET.

Explanation of Jefferies Ratings

Buy - Describes securities that we expect to provide a total return (price appreciation plus yield) of 15% or more within a 12-month period.

Hold - Describes securities that we expect to provide a total return (price appreciation plus yield) of plus 15% or minus 10% within a 12-month period.

Underperform - Describes securities that we expect to provide a total return (price appreciation plus yield) of minus 10% or less within a 12-month period.

The expected total return (price appreciation plus yield) for Buy rated securities with an average security price consistently below $10 is 20% or more within a 12-month period as these companies are typically more volatile than the overall stock market. For Hold rated securities with an average security price consistently below $10, the expected total return (price appreciation plus yield) is plus or minus 20% within a 12-month period. For Underperform rated securities with an average security price consistently below $10, the expected total return (price appreciation plus yield) is minus 20% or less within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Jefferies policies.

CS - Coverage Suspended. Jefferies has suspended coverage of this company.

NC - Not covered. Jefferies does not cover this company.
Restricted - Describes issuers where, in conjunction with Jefferies engagement in certain transactions, company policy or applicable securities regulations prohibit certain types of communications, including investment recommendations.
Monitor - Describes securities whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Valuation Methodology

Jefferies' methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Jefferies Franchise Picks

Jefferies Franchise Picks include stock selections from among the best stock ideas from our equity analysts over a 12 month period. Stock selection is based on fundamental analysis and may take into account other factors such as analyst conviction, differentiated analysis, a favorable risk/reward ratio and investment themes that Jefferies analysts are recommending. Jefferies Franchise Picks will include only Buy rated stocks and the number can vary depending on analyst recommendations for inclusion. Stocks will be added as new opportunities arise and removed when the reason for inclusion changes, the stock has met its desired return, if it is no longer rated Buy and/or if it triggers a stop loss. Stocks having 120 day volatility in the bottom quartile of S&P stocks will continue to have a 15% stop loss, and the remainder will have a 20% stop. Franchise Picks are not intended to represent a recommended portfolio of stocks and is not sector based, but we may note where we believe a Pick falls within an investment style such as growth or value.

Risks which may impede the achievement of our Price Target

This report was prepared for general circulation and does not provide investment recommendations specific to individual investors. As such, the financial instruments discussed in this report may not be suitable for all investors and investors must make their own investment decisions based upon their specific investment objectives and financial situation utilizing their own financial advisors as they deem necessary. Past performance of the financial instruments recommended in this report should not be taken as an indication or guarantee of future results. The price, value of, and income from, any of the financial instruments mentioned in this report can rise as well as fall and may be affected by changes in economic, financial and political factors. If a financial instrument is denominated in a currency other than the investor's home currency, a change in exchange rates may adversely affect the price of, value of, or income derived from the financial instrument described in this report. In addition, investors in securities such as ADRs, whose values are affected by the currency of the underlying security, effectively assume currency risk.

If you are receiving this report from a non-US Jefferies entity, please note the following: Unless prohibited by the provisions of Regulation S of the U.S. Securities Act of 1933, as amended, this material is distributed in the United States by Jefferies LLC, which accepts responsibility for its contents in accordance with the provisions of Rule 15a-6 under the US Securities Exchange Act of 1934, as amended. Transactions by or on behalf of any US person may only be effected through Jefferies LLC. In the United Kingdom and European Economic Area this report is issued and/or approved for distribution by Jefferies International Limited ("JIL") and is intended for use only by persons who have, or have been assessed as having, suitable professional experience and expertise, or by persons to whom it can be otherwise lawfully distributed.

JIL allows its analysts to undertake private consultancy work. JIL's conflicts management policy sets out the arrangements JIL employs to manage any potential conflicts of interest that may arise as a result of such consultancy work. Jefferies LLC, JIL and their affiliates, may make a market or provide liquidity in the financial instruments referred to in this report; and where they do make a market, such activity is disclosed specifically in this report under "company specific disclosures".

For Canadian investors, this material is intended for use only by professional or institutional investors. None of the investments or investment services mentioned or described herein is available to other persons or to anyone in Canada who is not a "Designated

Institution" as defined by the Securities Act (Ontario). In Singapore, Jefferies Singapore Limited ("JSL") is regulated by the Monetary Authority of Singapore. For investors in the Republic of Singapore, this material is provided by JSL pursuant to Regulation 32C of the Financial Advisers Regulations. The material contained in this document is intended solely for accredited, expert or institutional investors, as defined under the Securities and Futures Act (Cap. 289 of Singapore). If there are any matters arising from, or in connection with this material, please contact JSL, located at 80 Raffles Place #15-20, UOB Plaza 2, Singapore 048624, telephone: +65 6551 3950. In Japan, this material is issued and distributed by Jefferies (Japan) Limited to institutional investors only. In Hong Kong, this report is issued and approved by Jefferies Hong Kong Limited and is intended for use only by professional investors as defined in the Hong Kong Securities and Futures Ordinance and its subsidiary legislation. In the Republic of China (Taiwan), this report should not be distributed. The research in relation to this report is conducted outside the People's Republic of China ("PRC"). This report does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC. PRC investors shall have the relevant qualifications to invest in such securities and shall be responsible for obtaining all relevant approvals, licenses, verifications and/or registrations from the relevant governmental authorities themselves. In India, this report is made available by Jefferies India Private Limited. In Australia, this report is issued and/or approved for distribution by, or on behalf of, Jefferies (Australia) Securities Pty Ltd. It is directed solely at wholesale clients within the meaning of the Corporations Act 2001 of Australia (the "Corporations Act"), in connection with their consideration of any investment or investment service that is the subject of this report. This report may contain general financial product advice. Where this report refers to a particular financial product, you should obtain a copy of the relevant product disclosure statement or offer document before making any decision in relation to the product. Recipients of this document in any other jurisdictions should inform themselves about and observe any applicable legal requirements in relation to the receipt of this document.

This report is not an offer or solicitation of an offer to buy or sell any security or derivative instrument, or to make any investment. Any opinion or estimate constitutes the preparer's best judgment as of the date of preparation, and is subject to change without notice. Jefferies assumes no obligation to maintain or update this report based on subsequent information and events. Jefferies, and their respective officers, directors, and employees, may have long or short positions in, or may buy or sell any of the securities, derivative instruments or other investments mentioned or described herein, either as agent or as principal for their own account. This material is provided solely for informational purposes and is not tailored to any recipient, and is not based on, and does not take into account, the particular investment objectives, portfolio holdings, strategy, financial situation, or needs of any recipient. As such, any advice or recommendation in this report may not be suitable for a particular recipient. Jefferies assumes recipients of this report are capable of evaluating the information contained herein and of exercising independent judgment. A recipient of this report should not make any investment decision without first considering whether any advice or recommendation in this report is suitable for the recipient based on the recipient's particular circumstances and, if appropriate or otherwise needed, seeking professional advice, including tax advice. Jefferies does not perform any suitability or other analysis to check whether an investment decision made by the recipient based on this report is consistent with a recipient's investment objectives, portfolio holdings, strategy, financial situation, or needs.

By providing this report, neither JRS nor any other Jefferies entity accepts any authority, discretion, or control over the management of the recipient's assets. Any action taken by the recipient of this report, based on the information in the report, is at the recipient's sole judgment and risk. The recipient must perform his or her own independent review of any prospective investment. If the recipient uses the services of Jefferies LLC (or other affiliated broker-dealers), in connection with a purchase or sale of a security that is a subject of these materials, such broker-dealer may act as principal for its own accounts or as agent for another person. Only JRS is registered with the SEC as an investment adviser; and therefore neither Jefferies LLC nor any other Jefferies affiliate has any fiduciary duty in connection with distribution of these reports.

The price and value of the investments referred to herein and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This report may contain forward looking statements that may be affected by inaccurate assumptions or by known or unknown risks, uncertainties, and other important factors. As a result, the actual results, events, performance or achievements of the financial product may be materially different from those expressed or implied in such statements.

This report has been prepared independently of any issuer of securities mentioned herein and not as agent of any issuer of securities. No Equity Research personnel have authority whatsoever to make any representations or warranty on behalf of the issuer(s). Any comments or statements made herein are those of the Jefferies entity producing this report and may differ from the views of other Jefferies entities.

This report may contain information obtained from third parties, including ratings from credit ratings agencies such as Standard & Poor's. Reproduction and distribution of third party content in any form is prohibited except with the prior written permission of the related third party. Jefferies does not guarantee the accuracy, completeness, timeliness or availability of any information, including ratings, and is not responsible for any errors or omissions (negligent or otherwise), regardless of the cause, or for the results obtained from the use of such content. Third-party content providers give no express or implied warranties, including, but not limited to, any warranties of merchantability or fitness for a particular purpose or use. Neither Jefferies nor any third-party content provider shall be liable for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including lost income or profits and opportunity costs) in connection with any use of their content, including ratings. Credit ratings are statements of opinions and are not statements of fact or recommendations to purchase, hold or sell securities. They do not address the suitability of securities or the suitability of securities for investment purposes, and should not be relied on as investment advice.

Jefferies research reports are disseminated and available electronically, and, in some cases, also in printed form. Electronic research is simultaneously made available to all clients. This report or any portion hereof may not be reprinted, sold or redistributed without the written consent of Jefferies. Neither Jefferies nor any of its respective directors, officers or employees, is responsible for guaranteeing the financial success of any investment, or accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this report or its contents. Nothing herein shall be construed to waive any liability Jefferies has under applicable U.S. federal or state securities laws.

Summary Investment Thesis and Valuation

NiSource's heavy capital investment program drives rate base growth of at least ~7.5% over the next 3 years, with upside should the mid-or-high end of the capex guided ranges materialize. Declining O&M spending versus current elevated levels should improve earned ROE's at the utilities over coming quarters and additional cost discipline could further support growth. With an agreement in place to divest Bay State Gas, NI has reduced 2020 equity funding needs and will reestablish LT growth guidance post 2021. NiSource continues to offer top-tier rate base growth, which we see supporting long term earnings growth of 5-7% through 2022.

We base our December 2021 price target of $25/per share on a sum-of-the-parts analysis using our 2022 electric and gas segment EPS forecasts. We value the gas and electric segments using 15.4x and 19.5x P/E multiples, respectively.

NiSource continues to offer top-tier rate base growth, which we see supporting long term earnings growth of 5-7% through 2022.

Valuation

We introduce our December 2021 price target of $25/share. We base our price target on a sum-of-the-parts analysis using our 2022 electric and gas segment EPS forecasts. We value the gas and electric segments using 15.4x and 19.5x P/E multiples, respectively. The electric multiple is a slight premium to peers on account of NI's coal generation transition, incremental renewables investment, and above average growth as a result. The gas multiple is in line with LDC peers.

Risk to Rating and Price Target

- Regulated electric transmission and distribution earnings are vulnerable to mild weather, as regulated revenues are calculated based on energy volumes sold. Extreme or mild temperatures may cause future earnings to differ materially from our current forecasts.
- Achievement of NiSource's long-term rate base and EPS CAGR targets are heavily dependent on robust capital investments, regulatory support, and favorable ratemaking mechanism. Any deferral of spending could put the company at risk of falling short of the LT rate base and earnings growth CAGR in any one year.
- Regulated electric and gas utilities are subject to federal and state regulations, including determinations of allowed revenues. Positive or negative changes to the regulatory environments may cause future earnings potential to differ materially from current expectations.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, www.jpmorganmarkets.com.

Coverage Universe: Sunderland III, Richard W: AES Corp. (AES), Algonquin Power & Utilities Corp. (AQN.TO), Allete Inc. (ALE), American Water Works Company, Inc. (AWK), Avangrid, Inc (AGR), Emera Inc. (EMA.TO), Fortis Inc. (FTS.TO), NiSource Inc. (NI), PG&E Corp. (PCG), SJW Group (SJW), South Jersey Industries (SJI), Southwest Gas Holdings Inc. (SWX), Spire Inc (SR)

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2020

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage	46%	39%	15%
IB clients*	53%	49%	38%
JPMS Equity Research Coverage	43%	42%	15%
IB clients*	75%	70%	58%

*Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months. Please note that the percentages might not add to 100% because of rounding.
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

NiSource Inc

What is the Street really fearing at these levels?

Reiterate Rating: NEUTRAL | PO: 25.00 USD | Price: 22.59 USD

Stock U/P excessive vs revisions; revisit equity financing

Until yesterday, where NI outperformed (NI +4.2% vs gas LDCs +2.0%; XLU +3.1%), NI shares were -12.2% since its 2Q update on 8/5, considerably lagging gas LDCs (-6.7%) and XLU (-2.5%) over that timeframe. We acknowledge NI's new 2021 EPS guidance implied about 3% negative revisions to consensus at midpt and gas utility de-rating (gas now ~2x discount vs electrics), but the stock's underperformance still seems excessive relative to both revisions and gas peers. While we stress there has been no change to NI's messaging since the 2Q update, we conservatively revisit the assumptions in our model *given perceived risk of over-equitization vs expectations* or possibly earlier than expected equity financing for the renewables build out. Hence, we tweak the equity capital structure slightly higher for the $1.8-2.0bn of renewables financing to reflect about 60% equity/40% debt, lowering our EPS estimates by just ~1c in '23 and 2c in '24. This reflects a higher equity capital structure compared to what the broader company historically tracked given the different risk profile of renewables vs traditional electric and gas utilities. After mtm our SOTP with peers at 14.9x (from 16.2x) for gas and 16.8x (from 17.0x) for electric, our PO decreases to $25 (from $26). Despite 16.2% total return (incl. 4% div yield) implied by our SOTP, we reiterate Neutral given near-term uncertainty with regard to the equity overhang and light '22/'23 on an earned ROE basis.

Clarity coming via Sept 29 investor day; favorable Indiana

We expect the upcoming Investor day (9/29) to yield clarity around NI's renewables financing plan in Indiana as concerns around timing of equity and over-equitization linger. We still assume the timing of the equity issuance to be in line with our assumption of renewable capex deployment (40% in 2022 and 60% in 2023). Further, we expect NI likely uses equity-linked hybrids to finance part of the deal with $500mn in converts issued in '22 and converted in '25 in addition to common equity. Critically, we expect an explicit EPS growth CAGR to be disclosed at the investor day with potential outlook beyond '24. Lastly, we highlight our recent conversations with Indiana stakeholders indicate coal retirements and renewable RFPs in Indiana are largely intact for NI and even CNP. We note recent outperformance of CNP likely a positive read to NI.

Company Sector

Natural Gas-Local Distribution Companies

Company Description

NiSource Inc. (NI) is a fully-regulated utility company serving approximately 3.5mn natural gas customers and 500,000 electric customers across seven states through its local Columbia Gas and NIPSCO brands. NI generates substantially all of its operating income through these rate-regulated businesses.

Investment Rationale

NI's positives include 5-7% dividend growth and >5-7% EPS growth via $30bn of infrastructure investments over the next 20+ years and fully regulated subsidiaries. We have factored in resolution of overhang from the MA incident as the company will likely sell 3Q. However, NI has C&I demand risk from COVID, which will be difficult to offset with O&M cuts due to promises already around cost cuts to balance CMA sale. We see shares valued appropriately and rate Neutral.

Q3	0A	-0.02E
Q4	1.24A	-1.48E

Framing the debate from here…

Against the backdrop of a consistently cautious set of datapoints in recent months, and with concerns still lingering on interim years of its latest EPS CAGR (focus shifting from weakness on '21 to '22 and '23, prior to big uptick in '24 with new renewables), shares have underperformed. While investors remain fearful of yet another weak set of updates, we find it difficult for this to be the case. The higher equity than earlier contemplated is admittedly a bit cautious (but just a tad); timing of the equity could indeed prove another cautious element to these interim years ('22 & '23) as cash flow expectations could also drive a slightly accelerated need for equity as well. Looking through all of this, we find a positive skew to estimates and expectations with shares offering some of the best EPS growth cumulatively through '24 and trading with a slight discount today at current levels vs. hybrid electric/gas peer group. With sale of its Mass gas LDC biz poised to close imminently and updates on renewables, we find it difficult for shares to prove further discounted off already cautious investor expectations. We view challenges ahead as possible in Indiana, but with Centerpoint (CNP) already trading back up despite this more acute overhang (which more directly impacts their generation replacement strategy rather than NI), the read-through here remains appealing to us. Finally, we appreciate that recent under-performance represents more than just lower confidence on EPS and balance sheet, but rather a wider concern on mgmt. execution. On balance reiterate Neutral, reduce EPS and PO a tad, and see a positive setup into 9/29 Analyst Day.

EPS estimates: equity focus remains lingering question

We update by adjusting our assumption of the equity capital structure higher for the renewables financing to 60% equity and 40% debt, our EPS estimates were driven slightly lower in '23-'25. We see the 60% 'over-equitization' as potentially a bit akin to how AEP has framed its own equity needs for its similar large Build-own-transfer renewable project.

Since we assume the equity issuances take place at the end of '22 and '23, the EPS impact of incremental equity with higher equity capital structure flows through in '23 and '24. We continue to believe '21 EPS guidance of $1.28-1.36 is de-risked following the recent debt refinancing that was pulled forward as our '21 EPS estimate still lands at the midpoint.

On our updated EPS estimates, our implied '21-'24 EPS CAGR comes out to 10.5% (vs previous 11%), We emphasize that this 10.5% is a shorter 3-yr CAGR and we do not foresee this as a sustainable long term rate as the company benefits from a significant uptick in EPS from the renewable program beginning in 2024 off of a lower base coming out of COVID-19. With the 5c negative base case COVID-19 impact added back to the midpoint of the '21 EPS guidance announced alongside 2Q and assuming our 2024 EPS estimate of 1.77, this would equate to a 9.1% EPS CAGR from '21-'24 – still strong, but again padded by the one-time uptick of $1.8-2.0bn of renewable capex in '22/'23 translating to EPS in '24.

We look for more timing around the incoming renewable capex and associated earnings on the 9/29 investor day. We currently assume 40% of the capex hits in '22 and the remaining 60% is in '23. We estimate this renewable capex generates $0.06 of EPS in '23 and roughly $0.14 of EPS in '24. See our estimates below vs guidance and consensus. We also include a number of CAGRs to compare along with our rate base estimates vs guidance.

Source: BofA Global Research estimates, company report, Bloomberg

Valuation

Our PO is lowered to $25 (from $26) as we mark to market our SOTP valuation only slightly higher with peer multiples of 14.9x (from 16.2x) for gas and 16.8x (from 17.0x) for electric. We assign a 2x premium to our electric peers to account for incremental renewable earnings growth long-term. Also, we capitalize all of NI's gas subsidiaries at a 1x premium to account for mitigated COVID-19 concern with improved visibility into '21.

Note in our SOTP valuation, which capitalizes '22 EPS across all the subsidiaries, the company's incremental renewable capex and EPS currently lands outside of the valuation window. With '21 largely de-risked given refinancing '21 consensus EPS mostly reset with lower than expected guidance, '22 EPS is in focus and equity timing will be critical.

We see a positive backdrop for shares into the September 29th investor day update, with '24 EPS being the key metric (even '23 will be partially impacted by lag and remains relatively opaque). We still expect more explicit guidance of what this '24 outlook will be (benefitting from FY run-rate of EPS uplift with renewable investment and next rate case to earn ROE once more). Meanwhile, given the large investments and backdrop of recent larger rate case, we expect bill headroom and pressure to remain a relevant factor to consider in execution of proposed plan. We see an improving overall backdrop for NI, but with our estimates still slightly below Street on '21/'22 and with ambiguity on '23 with timing and size of equity, we still do not expect a re-rating to the 'next' ESG stock. We think the Analyst Day should prove constructive vs expectations, but still watch closely commentary on interim years reflected within the CAGR.

Table 2: NI SOTP Valuation: attractive into Analyst Day, but risks on '22/23 linger

Price objective basis & risk

NiSource Inc (NI)

Our $25 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2022 forward P/E multiples of 14.9x for gas utilities and 16.8x for electric utilities with a 1x premium for gas utilities given partially mitigated COVID impact and visibility into '21, and a 2.0x premium for the electric utility's strong growth rates and incremental renewable buildout with capex beginning in '22, but acknowledge industrial risk. We note that electric / gas peer P/E multiples are grossed up by 5% / 5.1% to reflect capital appreciation across the sector. We strip value from Columbia Gas of MA given the pending sale to close in 3Q20. We subtract the value of excess holding company debt at the parent not supporting the utility opcos. We believe NI's 5-7% EPS/dividend growth outlook, attractive regulated earnings profile and constructive legislation across NI's service territories are under-estimated given its discounted multiple versus peers.

Downside risks to our PO are a sustained period of economic weakness pressuring customer growth, interest rate increases, high natural gas prices, financing plan updates, unforeseen costs associated with the MA incident, and challenging steel production economics in Indiana.

Analyst Certification

iQmethod℠ is the set of BofA Global Research standard measures that serve to maintain global consistency under three broad headings: Business Performance, Quality of Earnings, and validations. The key features of iQmethod are: A consistently structured, detailed, and transparent methodology. Guidelines to maximize the effectiveness of the comparative valuation process, and to identify some common pitfalls.

iQdatabase® is our real-time global research database that is sourced directly from our equity analysts' earnings models and includes forecasted as well as historical data for income statements, balance sheets, and cash flow statements for companies covered by BofA Global Research.

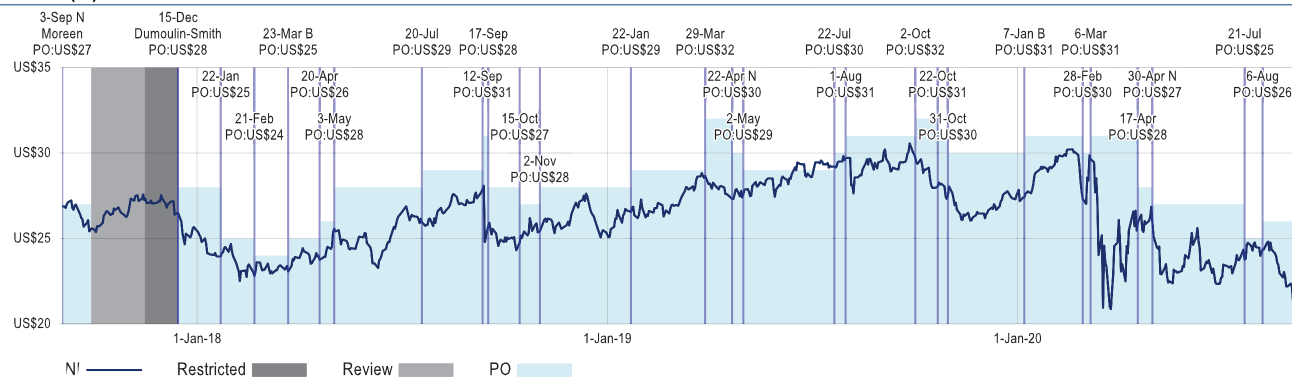
NiSource Inc (NI) Price Chart



B: Buy, N: Neutral, U: Underperform, PO: Price Objective, NA: No longer valid, NR: No Rating

The Investment Opinion System is contained at the end of the report under the heading "Fundamental Equity Opinion Key". Dark grey shading indicates the security is restricted with the opinion suspended. Medium grey shading indicates the security is under review with the opinion withdrawn. Light grey shading indicates the security is not covered. Chart is current as of a date no more than one trading day prior to the date of the report.

Equity Investment Rating Distribution: Energy Group (as of 30 Jun 2020)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	69	43.40%	Buy	52	75.36%
Hold	48	30.19%	Hold	34	70.83%
Sell	42	26.42%	Sell	24	57.14%

Equity Investment Rating Distribution: Utilities Group (as of 30 Jun 2020)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	76	51.01%	Buy	56	73.68%
Hold	33	22.15%	Hold	22	66.67%
Sell	40	26.85%	Sell	29	72.50%

Equity Investment Rating Distribution: Global Group (as of 30 Jun 2020)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	1632	52.21%	Buy	1031	63.17%
Hold	711	22.74%	Hold	444	62.45%
Sell	783	25.05%	Sell	407	51.98%

* Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

***INCOME RATINGS*, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend.** *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price charts for the securities referenced in this research report are available at https://pricecharts.baml.com, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: NiSource Inc.
BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: NiSource Inc.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: NiSource Inc.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: NiSource Inc.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: NiSource Inc.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: NiSource Inc.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: NiSource Inc.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of

the report: NiSource Inc.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: NiSource Inc.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: NiSource Inc.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for the purpose of any recommendation in relation to: (i) an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report; or (ii) a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
BofA Global Research policies relating to conflicts of interest are described at https://rsch.baml.com/coi

General Investment Related Disclosures:
Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.
This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.
Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including,

among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

UK Readers: The protections provided by the U.K. regulatory regime, including the Financial Services Scheme, do not apply in general to business coordinated by BofA Securities entities located outside of the United Kingdom.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

NiSource Inc

How Much Can a Debt Refi Clear the Path for the September Investor Day?

Reiterate Rating: NEUTRAL | PO: 26.00 USD | Price: 24.35 USD

Debt refinancing adds confidence in ’21 EPS outlook

NiSource (NI) announced cash tender offers for certain outstanding notes and a $2bn debt issuance ($1.25bn of 0.95% 2025 notes + $750mn 1.7% 2031 notes) where we estimate NI will use the newly issued debt to redeem about $1.6bn of certain notes outstanding at a roughly $200mn premium. This equates to about $1.8mn total use of proceeds for tender offers with a remaining $200mn used for general corporate purposes. The tender offer includes any and all of the total $1.164bn of more near term notes –2021 4.45% notes, 2.65% 2022 notes, and 2023 notes (3.85% and 3.65% notes). In addition, the tender also includes up to $150mn maximum aggregate repurchase of its outstanding 6.25% 2040 notes due 2040, 5.95% 2041 notes, 5.80% 2042 notes, 5.65% 2045 notes and 5.25% 2043 notes. Given the lower interest rates on the new debt, we estimate these transactions will generate roughly $35mn of annualized interest expense savings, which equates to around $0.07 of EPS next year without adjustments. We stress this refinancing was already baked into NI’s ’21 guidance and long term plan, but likely is a bit pulled forward in terms of timing, which helps cleanup the ’21 guide and puts focus on cost mitigation. We tweak our interest expense $35mn lower to reflect refinancing, and increase EPS slightly in ’20-’22. Despite estimates slightly higher and this announcement somewhat de-risking ’21 EPS guidance (and adds some ’22 clarity), we retain Neutral given near term uncertainty from COVID-19 and cost mitigation execution risk. PO stays at $26 after mtm with peers at 16.2x (from 15.8x) for gas and 17.0x (from 16.9x) for electric.

Removes refinancing risk thru the new gen planning cycle

We highlight that NI’s completion of this debt refinancing will be positive for the company to have in the rearview (tender offers expire 8/18 and 9/9). This removes refinancing risk ahead of the company’s upcoming new renewable financing planning cycle and leaves plenty of time for mgmt. to strategize ahead of the 9/29 renewables-focused investor day – expect an explicit LT EPS CAGR announced here (vs ambiguous of above 5-7% CAGR noted on 2Q call). Additionally, although this refinancing was included in the NI latest guidance, we perceive the sooner than later timing makes for a cleaner ’21 with all focus on cost mitigation and renewable strategy.

Company Sector

Natural Gas-Local Distribution Companies

Company Description

NiSource Inc. (NI) is a fully-regulated utility company serving approximately 3.5mn natural gas customers and 500,000 electric customers across seven states through its local Columbia Gas and NIPSCO brands. NI generates substantially all of its operating income through these rate-regulated businesses.

Investment Rationale

NI's positives include 5-7% dividend growth and >5-7% EPS growth via $30bn of infrastructure investments over the next 20+ years and fully regulated subsidiaries. We have factored in resolution of overhang from the MA incident as the company will likely sell 3Q. However, NI has C&I demand risk from COVID, which will be difficult to offset with O&M cuts due to promises already around cost cuts to balance CMA sale. We see shares valued appropriately and rate Neutral.

Stock Data

Average Daily Volume	2,908,509

Quarterly Earnings Estimates

	2019	2020
Q1	0.82A	0.76A
Q2	-0.75A	0.13A
Q3	0A	-0.02E
Q4	1.24A	-1.48E

Estimates: see a positive skew, but how much expected?

After adjusting our interest expense lower to account for the refinancing, our earned ROEs are driven slightly *higher* and our EPS estimates move slightly higher as we add a penny of EPS to each '20, '21, and '22 (likely *more*, but unclear how this jives with prior cost cutting efforts). Our 2021 EPS estimate now lands exactly at the mid-point of NI's recently initiated '21 EPS guidance of $1.28-1.36 as we perceive '21 EPS is incrementally de-risked with the debt refinancing pulled forward. Given our specific concerns on lag until new rates in '24, we see the refinancing of corporate debt (which is subsequently allocated down to utility subsidiaries given its financing structure) should enable a step-change in reduced lag. This is among the most critical EPS drivers into '21. Given the step-change from '20 onwards, we still anticipate the cadence from '21 into '22 and '23 (the further critical years with lag) will prove relatively *unchanged*.

As we update estimates, our implied '21-'24 EPS CAGR comes out to 11.0%, which continues to be well in excess of NI's previously articulated 5-7% EPS CAGR (although the new baseline is *critical* to keep in mind). We emphasize that this 11.0% is a shorter three-year CAGR and we do not foresee this as a sustainable rate over the long term as the company will benefit from a significant uptick in EPS from the renewable program beginning in 2024 off of a lower base coming out of COVID-19. With the 5c negative base case COVID-19 impact added back to the midpoint of the new '21 EPS guidance and assuming our 2024 EPS estimate of 1.80, this would equate to a 9.6% EPS CAGR from '21-'24 – still strong, but again padded by the one-time uptick of $1.8-2.0bn of renewable capex in '22/'23 translating to EPS in '24.

We look for more timing around the incoming renewable capex and associated earnings on the 9/29 investor day. We currently assume 40% of the capex hits in '22 and the remaining 60% is in '23. We estimate this renewable capex generates $0.06 of EPS in '23 and roughly $0.14 of EPS in '24.

See our estimates below vs guidance and consensus. We also include a number of CAGRs to compare along with our rate base estimates vs guidance.

Table 1: NiSource (NI) EPS Estimates: it's difficult to tell just how much of a tailwind this provides… but clearly is a big part of meeting the delta

Valuation

Our PO stays at $26 as we mark to market our SOTP valuation only slightly higher with peer multiples of 16.2x (from 15.8x) for gas and 17.0 x (from 16.9x) for electric. We assign a 2x premium to our electric peers to account for incremental renewable earnings growth long-term. Also, we capitalize all of NI's gas subsidiaries at a 1x premium to account for mitigated COVID-19 concern with improved visibility into '21. We do note that under our SOTP valuation, which capitalizes '22 EPS across the subsidiaries, NiSource's incremental renewable capex and EPS currently lands outside of the valuation window.

Clear uncertainty remains in the near term with 2020 EPS guidance suspended, but lack of clarity on '21 lag is somewhat improved with refinancing in place providing more support into '22. We perceive a positive backdrop for shares into the coming months update, with '24 EPS the key metric (even '23 will be partially impacted by lag and remains relatively opaque). Expect more explicit guidance of what this '24 outlook will be (once benefitting from FY run-rate of EPS uplift with renewable investment and next rate case to earn ROE once more).

Meanwhile, given the large investments and backdrop of recent larger rate case, we expect bill headroom and pressure to remain a relevant factor to consider in execution of proposed plan.

We perceive a clear positive backdrop, but with our estimates still below Street on '21/'22 and with ambiguity on '23, we do not expect a re-rating to the 'next' ESG stock. Additionally, we see consistency in execution on O&M plan to limit future EPS revisions as key (after numerous quarters of consecutive gyrations in expectations). We think the Analyst Day should prove constructive vs expectations, but watch closely commentary on *interim years reflected within the CAGR.*

Table 2: NI SOTP Valuation: attractive into Analyst Day, but risks on '22/23 linger

Price objective basis & risk

NiSource Inc (NI)

Our $26 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2022 forward P/E multiples of 16.2x for gas utilities and 17.0x for electric utilities with a 1x premium for gas utilities given partially mitigated COVID impact and visibility into '21, and a 2.0x premium for the electric utility's strong growth rates and increamental renewable buildout with capex beginning in '22, but acknowledgendustrial risk (prev 1x). We note that electric / gas peer P/E multiples are grossed up by 5% / 5.1% to reflect capital appreciation across the sector. We strip value from Columbia Gas of MA given the pending sale to close in 3Q20. We subtract the value of excess holding company debt at the parent not supporting the utility opcos. We believe NI's 5-7% EPS/dividend growth outlook, attractive regulated earnings profile and constructive legislation across NI's service territories are under-estimated given its discounted multiple versus peers.

Downside risks to our PO are a sustained period of economic weakness pressuring customer growth, interest rate increases, high natural gas prices, financing plan updates, unforeseen costs associated with the MA incident, and challenging steel production economics in Indiana.

iQmethod[SM] is the set of BofA Global Research standard measures that serve to maintain global consistency under three broad headings: Business Performance, Quality of Earnings, and validations. The key features of iQmethod are: A consistently structured, detailed, and transparent methodology. Guidelines to maximize the effectiveness of the comparative valuation process, and to identify some common pitfalls.

iQdatabase® is our real-time global research database that is sourced directly from our equity analysts' earnings models and includes forecasted as well as historical data for income statements, balance sheets, and cash flow statements for companies covered by BofA Global Research.

Buy	69	43.40%	Buy	52	75.36%
Hold	48	30.19%	Hold	34	70.83%
Sell	42	26.42%	Sell	24	57.14%

Equity Investment Rating Distribution: Utilities Group (as of 30 Jun 2020)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	76	51.01%	Buy	56	73.68%
Hold	33	22.15%	Hold	22	66.67%
Sell	40	26.85%	Sell	29	72.50%

Equity Investment Rating Distribution: Global Group (as of 30 Jun 2020)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	1632	52.21%	Buy	1031	63.17%
Hold	711	22.74%	Hold	444	62.45%
Sell	783	25.05%	Sell	407	51.98%

* Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

***INCOME RATINGS*, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend.** *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price charts for the securities referenced in this research report are available at https://pricecharts.baml.com, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: NiSource Inc.
BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: NiSource Inc.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: NiSource Inc.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: NiSource Inc.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: NiSource Inc.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: NiSource Inc.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: NiSource Inc.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of

the report: NiSource Inc.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: NiSource Inc.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: NiSource Inc.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for the purpose of any recommendation in relation to: (i) an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report; or (ii) a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
BofA Global Research policies relating to conflicts of interest are described at https://rsch.baml.com/coi
"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. "BofA Securities" is a global brand for BofA Global Research.

General Investment Related Disclosures:
Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.
This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.
Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including,

among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

UK Readers: The protections provided by the U.K. regulatory regime, including the Financial Services Scheme, do not apply in general to business coordinated by BofA Securities entities located outside of the United Kingdom.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

Copyright and General Information:

Materials prepared by BofA Global Research personnel are based on public information. Facts and views presented in this material have not been reviewed by, and may not reflect information known to, professionals in other business areas of BofA Securities, including investment banking personnel. BofA Securities has established information barriers between BofA Global Research and certain business groups. As a result, BofA Securities does not disclose certain client relationships with, or compensation received from, such issuers. To the extent this material discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this material. BofA Global Research personnel's knowledge of legal proceedings in which any BofA Securities entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this material is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Securities in connection with the legal proceedings or matters relevant to such proceedings.

This information has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of BofAS any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Securities and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This information may contain links to third-party websites. BofA Securities is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this information and is not incorporated by reference. The inclusion of a link does not imply any endorsement by or any affiliation with BofA Securities. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.

NiSource, Inc.

A Post-Investor Day Recap

At its Investor Day, NI rolled forward its capital plan and established guidance through 2024. Management established a 2021-2024 CAGR for adj EPS in the range of 7–9%, with interim targets in the range of 5–7% annual growth for 2021-2023. Under our new methodology, we give NI a 5% premium to the group average PE multiple to reflect our new expectations of above-average growth. We update our price target to $25 and reiterate our Equal Weight rating.

Our refreshed rate base math exercise now reflects a 7.6% 2021-2024 CAGR (vs. 7.1% under the previous iteration), before considering any incremental O&M flexibility, thus supporting management commentary. Updates include slight revisions to rate base guidance vs. the Q2 call (+$500m in 2024) and the expectation that financing for the $1.8-$2.0bn in renewables generation will have a 60% equity ratio (vs. 50% under the previous analysis).

Risks: Downside risks include federal policies to limit fracking that could inflate natural gas prices, tax reform that could impact customer bill headroom, a higher proportion of renewable generation through PPAs than anticipated, and higher-than-expected financing costs. Upside risks include cash from litigation of the pending property insurance claim that could offset equity needs, and the ability of NI to sustain an above-average growth trajectory in the long term.

NI: Quarterly and Annual EPS (USD)

Price (29-Sep-2020)	USD 21.96
Price Target	USD 25.00

Why Equal Weight? We view NI as a quality utility with a well-defined rate base growth strategy from gas and electric infrastructure modernization, which we see as relatively low risk. However, because of premium valuation we do not see material upside to our price target.

Upside case USD 27.00

Our upside case reflects a 10% premium to the 2022 utility group average P/E multiple applied to higher earnings driven by additional rate base growth and favorable rate case outcomes and reduced financing needs.

Downside case USD 20.00

Our downside case reflects a 15% discount to the 2022 utility group average P/E multiple applied to lower earnings driven by slower rate base growth, unfavorable rate case outcomes, and capital restrictions due to a lack of customer bill headroom.

Upside/Downside scenarios

Source: Company data, Bloomberg, Barclays Research
Note: FY End Dec

What We Learned

We summarize our key takeaways from the Investor Day in the following bullets:

- 7% to 9% adj EPS CAGR from 2021-2024; 10-12% rate base CAGR
  - 5% to 7% target for annual growth from 2021-2023
- Expected to finance renewables capex at a 60% equity / 40% debt split
- 8% O&M reduction in 2021 relative to 2020; "relatively flat" from 2021-2024
- $40 billion infrastructure investment opportunity set (up from previous $30bn)
- $9.9-$10.5 billion investment pipeline from 2021-2024 (20% renewables, 20% electric infrastructure mod, 60% gas infrastructure mod)
  - $1.9-$2.2 billion annual capex in growth, safety & modernization (75% gas, 25% electric) through 2024
  - Incremental $1.8-$2.0bn capex over 2021-2023 for renewables generation
- The NI Next initiative strives to achieve cost savings, efficiency and digitization, a flatter organization with more empowered middle management, annual run rate savings targets, and improved customer trust and interactions

Our Rate Base Math, Refreshed

Our previous exercise in rate base math, found last week's note "*A Preliminary Investor Day Analysis*" (9/24/20), resulted in a 7.1% CAGR from 2021-2024, before considering the impact of any incremental O&M flexibility. We refresh our math to account for the following changes to rate base guidance at the investor day vs the Q2 call:

FIGURE 1
Rate Base Guidance Refresh ($bn)

	2020	2021	2022	2023	2024
Q2 Earnings Call	13.9	15.1	17.1	19.4	20.7
9/29 Investor Day	13.9	15.2	17.0	19.8	21.2
Δ	0	0.1	(0.1)	0.4	0.5

Source: Barclays Research, Company Reports

After incorporating this update to rate base guidance *and* the expectation that financing will be done with 60% equity (vs. our previous 50% assumption), the same exercise in rate base math results in a 7.6% CAGR from 2021-2024. Thus, we have confidence NI can achieve an EPS CAGR within the stated 7-9% range, particularly when we consider additional cost contingencies available that were not included in this guidance. See our previously referenced note for more information regarding this analysis.

Valuation

We revise our methodology to incorporate a 5% premium to the group average P/E multiple in order to reflect our new expectations of above-average growth in the medium-term driven by rate base investments for RM Schahfer replacement power.

Our current $25 price target is premised upon a 5% premium to the group average P/E multiple of 17x applied to the Barclays 2022E EPS estimate of $1.42.

Our previous $24 price target is premised upon the group average P/E multiple of 17x applied to the Barclays 2022E EPS estimate of $1.42.

Future Focus

We highlight the following drivers for future focus:

- Financing – timing and methods
- RFP negotiations and approval
- Proportion of Build-Transfer Agreements vs. PPAs
- Information on cost savings following RM Schahfer retirement
- The impact to bill headroom from potential Biden Administration policies (e.g. higher corporate taxes and restrictions on fracking that could inflate natural gas prices)
- The appearance of legislation in Indiana that would prolong the life of coal generation
    - Alternatively, the appearance of policy in Indiana to increase the Renewable Portfolio Standard
- The extent to which renewables replacement power increases the opportunity for reliability or T&D spending

NI's Analyst Day Post View: Visible Growth at a Reasonable Price

Bottom Line:

NI held its virtual analyst day on September 29, which, as expected, included the extension of its financial outlook through 2024 to incorporate its renewable investment plan at NIPSCO. The company's outlook was mostly in line with expectations with a NOEPS CAGR of 5-7% from 2021 to 2023, rising to 7-9% including the full-year impact of its renewable investment in the rate base in 2024. Our base case 2021, 2022, and 2023 EPS estimates are $1.33, $1.38, and $1.52, respectively, and we introduce our 2024 estimate of $1.66, which suggests a comparable 7.7% CAGR.

Key Points

Growth and drivers in line with expectations. As discussed in our Preview, with its expected 2021-24 rate base outlook already previewed on the 2Q20 conference call (+10-12% CAGR), the primary drivers behind the company's long-term growth will be the cadence of capital additions, timing of rate relief, cost control (including that to facilitate new investment), and financing plan. **Management laid out its expectations for a NOEPS CAGR of 5-7% from 2021 to 2023 and a 7-9% NOEPS CAGR for 2021-24 including the full-year impact of renewable investments in the rate base in 2024.** This multi-year outlook was supported by a slightly higher baseline investment, 70%+ tracked investment recovery, periodic GRCs in PA, OH, and IN, a new cost control program, and a flexible financing program. Our estimates assume two-step rate increases at NIPSCO in 2023-24.

Baseline growth rate supported by higher spending. NI outlined a baseline capital program of ~$1.9-2.2bn underpinning its safety and asset modernization programs, up modestly from the $1.8-1.9bn trend seen in 2018-20, and supports the 5-7% base growth outlook through 2023 (guidance toward midpoint). Included in this annual outlook is roughly $400-600mm of spending at NIPSCO electric (nonrenewables) and ~ $1,400-1,700mm at gas infrastructure.

New cost control program to support growth. Management launched the NiSource Next initiative, which is expected to contribute to an approximately 8% reduction in O&M costs in 2021 and will offset future inflationary pressure to keep O&M costs relatively flat through 2024, enabling rate headroom.

Financing plan removes near-term fear and incorporates flexibility. Management expects to issue total equity of approximately $1.2bn from 2021 to 2024 to finance ~60% of the $1.8-2.0bn investment in renewables. Our base case now assumes $600mm in hybrids in 2021 and $300mm of block equity in 2022 and 2023.

We maintain our Outperform rating and $24 target price.

Scenarios

Valuation

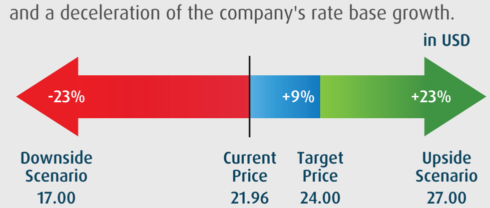
Our $24 target price is the product of a P/E-based sum of the parts. We utilize a regulated average multiple using 2022E EPS as base valuation and then make specific adjustments to reflect our current view of the fundamental outlook. For NI, we have removed EPS for its MA gas business from our P/E valuation and instead include only the asset value (1x equity rate base) in our SOTP framework.

Upside Scenario $27.00

Our upside scenario reflects continued multiple expansion associated with the company's premium and above-average earnings and dividend growth profile.

Downside Scenario $17.00

Our downside scenario reflects a tightening monetary policy and a deceleration of the company's rate base growth.



Key Catalysts

Initial indicative pricing in its second renewable RFP in IN. Completing the sale of Columbia Gas of Massachusetts to Eversource. Potentially, capital spending and growth rate update in 2H20 given clarity in the aforementioned RFP and recent rate orders in MA and IN.

Company Description

NiSource, Inc. is a regulated utility holding company, serving approximately 3.5 million natural gas customers and 500,000 electric customers across seven states. Through its Columbia Gas and NIPSCO brands, it provides natural gas, electricity, and other products and services. The company was founded in 1987 and is headquartered in Merrillville, Indiana.

BofA GLOBAL RESEARCH

BofA SECURITIES

NiSource Inc

Indeed, What We Expected On First Look: A Conservative EPS to Reset Their Cred

Maintain Rating: NEUTRAL | PO: 23.00 USD | Price: 21.85 USD

Analyst Day yields 7-9% EPS outlook with 5-7% interim

As expected from 2Q disclosures mgmt. guided to 7-9% EPS growth from '21-'24 with interim target of 5-7% in '22 and '23. While admittedly less than our bottoms up EPS forecast, we perceive this as largely tied to financing costs in the interim to achieve (previously stated) 11% ratebase growth CAGR. While not surprising as an outcome, we look to understand the pieces reconciling to this EPS outlook, particularly considering commitment to flat non-fuel O&M thru forecast period off '21 levels as well as 12% and 16% jumps in ratebase in '22 and '23, respectively. While we appreciate added lag from non-recovery of renewables at NISPCO electric until the subsequent rate case results in full-year benefit in '24, 5-7% commitment remains conservative in our view as *other* gas utilities appear to be able to & projected to earn their ROE. *Bottom line, it would appear a clearly conservative update as it would appear that even if you took the 5c impact from Covid, once could still hold the 7-9% EPS (our EPS of $1.76 in '24 implies 10.3% or even 9% without the -5c hit as baseline of $1.32 vs $1.37 for '21).* We see rebuild conservative mantra in EPS targets as behind the lower EPS outlook in near-term. Maintain our Neutral rating and $23 PO and would like more clarity on reconciling the 5-7% EPS outlook. Expect the stock to have a in-line reaction today on this news.

Equity is another key point of focus too in plan

Total equity disclosures were predictably on higher end given pressures otherwise with common equity block range of $500-700 Mn in '22/'23 time period along with $600Mn-$1Bn convertible raise in the 2021 period. While we had already reflected $800 Mn convert, the equity block is admittedly $200 Mn higher than anticipated (slight negative) but not unexpected given slightly lower EPS outlook than we had forecast as well. We also note this appears slightly more than Street expected as well. This all reconciles as well with the 14-15% FFO/debt note that the $600-$1Bn convertible placeholder could be preferred issuance such that equity dilution is not necessarily at he full mid-point of $1.4 Bn otherwise implied. *This would appear a key point of flexibility in the plan & a critical point for shares to inflect off of next year depending on financing approach taken for this issuance. Coupon, tenor, and equity treatment (whether convertible or preferred) remain of critical importance beyond just addressing capital market 'overhang' into '21.*

More definition of renewables coming too

While capex is unchanged on total renewable opportunity, mgmt. remains confident on total build. The specific projects appear on track be detailed in short order. We see continued execution on novel tax equity structure for renewables in ratebase as critical to industry development of solar at large: *as such a key point to watch for industry positioning on ratebase prospects.*

NiSource Inc (NI)

Our $23 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2022 forward P/E multiples (disc. back to '21) of 14.2x for gas utilities and 16.3x for electric utilities with a 2.0x premium for the electric utility's strong growth rates and incremental renewable buildout with capex beginning in '22, but acknowledge industrial risk. We note that electric / gas peer P/E multiples are grossed up by 5% / 5.1% to reflect capital appreciation across the sector. We strip value from Columbia Gas of MA given the pending sale to close in 3Q20. We subtract the value of excess holding company debt at the parent not supporting the utility opcos. We believe NI's 5-7% EPS/dividend growth outlook, attractive regulated earnings profile and constructive legislation across NI's service territories are under-estimated given its discounted multiple versus peers.

Downside risks to our PO are a sustained period of economic weakness pressuring customer growth, interest rate increases, high natural gas prices, financing plan updates, unforeseen costs associated with the MA incident, and challenging steel production economics in Indiana.

NiSource Inc (NI)

Signals Openness to LDC Sale at Virtual Analyst Day

- **Citi Take:** During the Virtual Analyst Day, NiSource reiterated its 10-12% rate base CAGR, 7-9% EPS CAGR for 2021-2024 (5-7% CAGR for 2021-2023), and 60-70% payout ratio. NI expects an 8% decline in O&M in 2021 (sale expected to close in October) and then relatively flat O&M costs through 2024. More importantly, NiSource provided details on its renewable investments plan and associated financing plan, and signaled an openness to monetizing LDC assets at the right price.

- **Strategic Alternatives Signaled:** NiSource made an effort to signal to the market that it is open to selling part of its LDC portfolio for the right price. This is a bullish signal for the electric utility industry and bearish for the LDC space given NiSource's unique portfolio (remember they sold pipeline business a few years ago).

- **Flexible Financing Plan:** The current financing plan is flexible around strategic alternative decision-making with $500-$700M of block equity as a placeholder and 7-9% EPS growth in base plan. At the midpoint, management expects $1.2B of total equity-linked financing for '22-23 to coincide with renewable capex and credit metrics.

- **New Renewable Investments Plan:** NiSource is targeting a $1.8-2.0B renewable investment plan for 2021-2023 with most capex weighted towards late 2022- early 2023 ($2.8-$3.0B with tax equity for the PPA JV ownership plan). $0.4B already has regulatory approval and an additional $1.4-$1.6B was filed but not yet formally approved. The project relies on ~$1.0B of tax equity at ~7% IRRs, which seems likely given sponsor, and consists of Rosewater's $94M, Crossroad's $250M and ~$700M for future solar JVs (~30% tax equity). Solar, storage, and wind projects are in late stage negotiations. NI plans a 2H23 GRC to recover renewable investment.

- **Capex Guidance:** NiSource is targeting $9.9-$10.5B of capex investments from 2021-2024. Aside from $1.8-$2.0B of renewable investments through 2023, NI guides $1.9-$2.2B of annual capex for planned safety & modernization investments. Management expects to start recovery of ~75% of investments within 18 months with customer bill impact of low to mid-single digits per year.

Equity				
Common Equity Block		$500 - $700 Total (2022E–2023E)		
Long-Term Debt				
Incremental Long-Term Debt		$500 - $700 Total (2022E–2023E)		
Other Financing				
Hybrids, Convertibles, etc.	$600 - $1,000 Total			

Current Financing Plan ...

- All financing is included on our long-term growth commitments
- Reflects our focus on maintaining current investment grade credit rating
- Targets renewable investment financing (60% Equity / 40% Debt)
- Doesn't include potential portfolio optimization opportunities

Financing strategy targets long-term Adj. FFO[2]/total debt of ~14%-15%

[1]Current financing plan may change based on business developments
[2]Adjusted funds from operations (FFO); represents Net Income adjusted for depreciation and amortization, loss on early extinguishment of debt and deferred taxes

Source: NI Presentation

NiSource Inc

Company description

NiSource Inc (NI) is primarily a regulated utility with an integrated network of gas distribution in the Northeast, Mid-Atlantic, and Midwest. NiSource also operates an electric utility in Northern Indiana. The company serves around 4 million customers across seven states through its two main business segments, including: 1) Gas Distribution, which delivers natural gas in several states; 2) Electric Operations, which consist of NiSource's regulated electric utility, Northern Indiana Public Service Company (NIPSCO).

Investment strategy

We rate the shares of NiSource (NI) Neutral (2). We believe NI's long-term earnings are relatively stable due to diverse operations areas and constructive regulatory jurisdictions. Our estimates do not include: 1) Substantial industrial load growth at the utilities; 2) Colder-than-normal weather and faster than average customer growth; or 3) Slower than typical timeline in regulatory filing and approval process for new infrastructure projects and cost recovery mechanisms.

Valuation

We average multiple valuation methodologies to derive our $24 target price. Our NAV yields a value of $21. We value regulated assets at a multiple of 1.3x rate base. These values are partially offset by the company's net debt. Our DDM, which incorporates our rate base growth assumptions, values the company at $30 per share. Our P/E and EV/EBITDA analyses yield values of $23 per share.

Risks

The key risks to our investment thesis are: (1) Rate Cases – We estimate the company will receive rate relief at several of its utilities. Under- or over-estimation of relief could materially impact our estimates. (2) Weather – Changes in weather impact the stability of earnings. (3) Capital Investment Recovery — NI spends a substantial amount of capital to maintain and expand its distribution system. NI depends on rate increases from public utility commission to earn a fair return on this expansion. (4) Capital Markets — Access to cheap capital markets could be limited due to the size of the company. If the impact on the company from any of these factors proves to be greater/less than we anticipate, it may prevent the stock from achieving our target price or could cause the stock price to materially under/outperform our target. (5) There is a risk that there will be negative political, financial, and regulatory backlash from the recent events in New England.

Appendix A-1

Analyst Certification

The research analysts primarily responsible for the preparation and content of this research report are either (i) designated by "AC" in the author block or (ii) listed in bold alongside content which is attributable to that analyst. If multiple AC analysts are designated in the author block, each analyst is certifying with respect to the entire research report other than (a) content attributable to another AC certifying analyst listed in bold alongside the content and (b) views expressed solely with respect to a specific issuer which are attributable to another AC certifying analyst identified in the price charts or rating history tables for that issuer shown below. Each of these analysts certify, with respect to the sections of the report for which they are responsible: (1) that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc. and its affiliates; and (2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this report.

Source: FactSet

The Eagle Has Landed

Maintaining Outperform rating and price target of $26/share.

Today's Investor Day update sets a solid foundation for higher than expected long term growth. NiSource announced $40 billion in infrastructure investment opportunities over the next 20 years, an increase of $10 billion over previous expectations. The company outlined a $9.9-10.5 billion capital plan in 2021 through 2024, which is expected to drive 10-12% rate base CAGR and a back-end loaded 7-9% EPS CAGR. Notably, the annual EPS growth is forecasted to be 5-7% in 2021 through 2023. The five-year EPS growth outlook was expected to be back-end loaded and greater than 5-7%, but the 7-9% CAGR announced today is higher than our expectations and materially above industry average projected EPS growth rate of 5%. NiSource continues to target long-term 14-15% FFO to debt, as expected. The company's newly disclosed financing plan includes $200-300 million of ATM equity annually in 2021-2023, $500-700 million of total block equity in 2022-2023, $600-1,000 million of hybrids/convertibles/other in 2021, plus employee equity programs and long-term debt (see inside for more detail). The planned $1.8-2.0 billion of renewables replacement power capex was reaffirmed today, and is expected to be financed with 60% equity, with recovery of investment sought through a 2023 rate case. The amount of equity in the financing plan to achieve its targeted credit metrics was largely to be expected given that we see NI trending towards 13% FFO to debt this year. NiSource said the financing plan does not include any potential "portfolio optimization" opportunities to enhance shareholder value or $300 million of potential property insurance from the Mass. incident. NiSource now projects an 8% reduction in O&M costs in 2021 from 2020 levels with subsequent O&M expected to be "relatively flat" in 2021 through 2024. The sustainable outlook for O&M savings is positive news given that some of the COVID mitigation measures for the near term are expected to be one-time in nature. NiSource anticipates moderate annual rate increases in the low-to-mid single digits thanks to the O&M management and a changing supply mix (i.e. renewables replacing coal). The company is targeting a 60-70% dividend pay-out ratio over the long term; we are at 68% this year. Lastly, the Columbia Gas of Massachusetts divestiture is on track to close in October this year.

We now see even more support for a compelling re-rate story. NI has struggled with EPS growth since the Massachusetts incident and EPS is expected to be essentially flat between 2018 and 2021. We expect the stock to re-rate with the Massachusetts divestiture soon behind NiSource and now that strong growth expectations have been reset off of a 2021 baseline. NI has historically traded at a premium (call it merger-related or gas LDC) and is now at a ~10% discount.

Risk / reward is palatable. We are maintaining our 2020-2022 EPS forecast of $1.26 / $1.34 / $1.41 and our price target of $26/share using our SOTP analysis inside. We believe the underperformance in the stock the last five months presents an attractive entry point with a total return profile of ~20% at our price target. Our bear case derives a $21 target (close to current trading price) while our bull case is $28/share.

2020 Investor Day Highlights

EPS growth and dividend forecast: NiSource now expects to deliver a back-end loaded 7-9% net operating EPS CAGR in 2021 through 2024. Notably, the annual EPS growth is forecasted to be 5-7% in 2021 through 2023. The company is targeting a long-term 60-70% dividend pay-out ratio.

Capital program and rate base growth: NiSource announced $40 billion in infrastructure investment opportunities over 20 years, an increase of $10 billion over prior expectations. The company outlined a $9.9-10.5 billion capital plan in 2021 through 2024, which is expected to drive a 10-12% rate base CAGR. Gas currently represents roughly 65% of rate base while electric is 35%, but the mix is expected to shift more towards electric over the coming years with $400-600 million of base electric investments and $1.8-2.0 billion of renewable generation opportunities primarily in 2022 and 2023. The capital forecast is comprised of 60% gas infrastructure & asset modernization, 20% renewable investments and 20% electric infrastructure & asset modernization. Specifically, NI's capex forecast for 2021-2024 is $2.0-2.3 / $2.4-2.7 / $3.3-3.6 / $1.9-2.2 billion, which has a meaningful increase in 2023 due to the renewable investments. Roughly $5.5-5.7 billion is expected to be recovered through tracker mechanisms in less than 18 months, $1.9-2.0 billion on maintenance/other to be recovered through periodic rate cases and $0.7-0.8 billion of growth investment to be recovered in less than 3 months. The renewables investment is expected to be recovered in a 2023 electric rate case with rates anticipate to be effective in 2H 2023.

O&M forecast: NiSource's "Next" initiative and the Columbia Gas of Massachusetts sale are projected to drive an 8% reduction in O&M costs in 2021 from 2020. Subsequently, O&M is expected to be "relatively flat" in 2021 through 2024. Cost initiatives under way include voluntary separation program savings and the following improvements identified: streamlined organization structure, evolved business services, work standardization, greater field mobility and connected customer experience. Modernization-driven fuel and cost reductions are also under way.

Rate increases: NiSource is targeting moderate annual rate increases in the low-to-mid single digit percentage thanks to O&M management and the changing generation mix (i.e. replacing coal with renewables).

Financing strategy: NiSource continues to target a long-term adjusted FFO to debt of 14-15% through a combination of block equity, ATM equity, employee equity, hybrid/convertibles and long-term debt in 2021-2024. The company is targeting renewable investment financing at 60% equity. There are no major debt maturities through the planning horizon in 2021-2024.

Source: NiSource Analyst Day 2020 Presentation, 9/29/20

Long-term supply mix: As outlined in the 2018 IRP, NiSource is targeting a replacement of 80% of coal capacity by 2023, primarily with renewables, and plans to retire all coal by 2028. The company's current generation mix includes 70% coal, 25% gas, 4% other (includes DSM) and 1% renewables. By 2023, NiSource plans to transform the mix to 15% coal, 25% gas, 7% other (includes DSM) and 53% renewables. By 2028, the mix is expected to be comprised of 0% coal, 24% gas and 12% other (includes DSM). The retirement of coal and the mix of renewable joint ventures and purchase power agreements are expected to drive $4 billion of customer savings over 30 years, including a $105 in average annual savings per household. Roughly $400 million of the $1.8-2.0 billion renewable investments planned through 2023 are approved projects with the remaining $1.4-1.6 billion under negotiation. Greenhouse gas emissions are anticipated to be reduced by 90% by 2030 when compared to a 2005 baseline.

Estimates and Price Target Derivation

Maintaining our 2020-2022 EPS estimates and price target: Our 2020-2022 EPS forecast remains $1.26 / $1.34 / $1.41. Recall that NiSource rescinded 2020 EPS guidance with the sale of Massachusetts and has not reissued it. Our 2021 EPS estimate is slightly above the midpoint of $1.28-1.36 guidance and our 2022 EPS forecast is within the 5-7% annual growth forecast through 2023. Specifically, we assume NIPSCO electric takes the brunt of the COVID impact and earns an 8.9% ROE this year, increasing to 9.4% next year before modestly under-earning its authorized 9.75% by 2022. For the gas segment, we assume the company modestly under-earns its blended ~10% ROE in 2020 through 2022.

Our price target of $26/share is unchanged. Our bear case derives a $21 target (close to current trading price) while our bull case is $28/share. Below is a summary of our base, bull and bear case scenarios. See Exhibit 2 on the next page.

- Our base case assumes 2022 EPS of $1.41/share. For the electric business, we assign a 10% premium to our anchor 2022 P/E target multiple of 17.5x. For the gas segment, we apply a 17.7x P/E multiple, an in line multiple current comparable LDC trading multiples. We apply a blended multiple for parent drag.
- Our bull case assumes 2022 EPS of $1.46/share, which is 7% growth over the high end of 2021 guidance. For the electric business, we continue to apply a 10% premium multiple to our anchor 2022 P/E target multiple of 17.5x. For the gas segment, we apply a 19.5x multiple, a 10% premium to current comparable LDC trading multiples. We apply a blended multiple for parent drag.
- Our bear case assumes 2022 EPS of $1.34/share, which is 5% growth over the low end of 2021 guidance. For the electric business, we apply an in line multiple to our anchor 2022 P/E target multiple of 17.5x. For the gas segment, we apply a 14.4x multiple, an in line multiple with a broader group of LDC trading multiples. We apply a blended multiple for parent drag.

Exhibit 2: SOTP Valuation: Base, Bull and Bear Cases

Base Case	'22 EPS	P/E	Val/Shr
Gas EPS	$1.16	17.7x	$20.55
Electric EPS	$0.59	19.3x	$11.37
Parent/Other	($0.34)	18.2x	($6.24)
Consolidated 2022 EPS	**$1.41**	18.2x	**$25.67**

Bull Case	'22 EPS	P/E	Val/Shr
Gas EPS	$1.19	19.5x	$23.21
Electric EPS	$0.61	19.3x	$11.67
Parent/Other	($0.34)	19.4x	($6.64)
Consolidated 2022 EPS	**$1.46**	19.4x	**$28.23**

Bear Case	'22 EPS	P/E	Val/Shr
Gas EPS	$1.12	14.4x	$16.07
Electric EPS	$0.57	17.5x	$9.96
Parent/Other	($0.34)	15.4x	($5.29)
Consolidated 2022 EPS	**$1.34**	15.4x	**$20.74**

Goldman Sachs & Co. LLC

NiSource (NI, Buy) released its Analyst Day presentation this morning ahead of the 11am event, with the company guiding to a 7%-9% adjusted EPS CAGR from 2021-2024. We view this as largely in-line with our expectations highlighted in our preview note.

We list below some key highlights from the slides:

- **EPS growth trajectory:** 5-7% CAGR from 2021-2023, 7-9% from 2021-2024. We note management had previously discussed growth through 2024 as relatively back-end loaded given the financing/regulatory lag associated with the incremental ~$1.4-$1.6bn of renewable investments.
- **Financing:** 2021: **$600mn-$1bn** of hybrids/convertibles; 2022-2023: **$500-$700mn** of block equity. Management targets 60% equity financing of future projects, with the financing plan included in the EPS growth forecast. We had anticipated equity in the ~$750mn range; we see NI's plan moderately higher from an "equity credit" perspective.
- **O&M growth:** Expect 8% lower O&M in 2021 vs 2020, and flat O&M CAGR from 2021-2024.
- **Annual capital investments:** 2021: $2.0-$2.3bn, 2022: $2.4-$2.7bn, 2023: $3.3-$3.6bn, 2024: $1.9-$2.2bn.
- **NIPSCO Indiana rate case preview:** Expects revenue requirement in the 2023 rate case to be flat or lower versus current rates, with increased rate base from renewables offset by lower fuel/variable costs and fixed costs.
- **Other items (reiterated from 2Q earnings):** 10-12% rate base CAGR, $1.4-$1.6bn of incremental renewable investments (excluding $400mn of approved projects),

We expect the discussion and Q&A to focus on EPS growth expectations in 2022, additional thoughts on mix of financing for the renewable investments, and long-term strategic thoughts on its gas utility businesses.

Our $27, 12-month price target embeds our industry base target P/E multiple of 20x to 2021 EPS estimate of $1.34. Key risks include (1) legal and regulatory risks, (2) earnings/cash impact due to COVID-19, (3) higher-than-expected O&M, (4) electricity demand and customer growth, and (5) financing.

Key Message: NiSource held an investor day building off of the second quarter announcement of the results of NIPSCO's RFP. The LT EPS CAGR guidance was updated and will now be top decile among peers as renewable investments are rolled into rates. The update to growth guidance should not be a surprise to many as mgmt. had previously provided rate base CAGR and forecasted investment allowing investors to extrapolate a range of growth figures. Mgmt. updated the capital plan to include the renewables dictated by the IRP as well as continued investments in the core business. Mgmt. also updated their financing plan, adding necessary issuances for renewables and the base spend. We remain BUY-rated ($27 PT) given robust earnings growth and favorable valuation. Though NI is trading at a ~1.5x premium to regulated gas peers, it is trading at a ~1x discount to regulated electric peers and an even larger discount to those with similar growth.

LT EPS CAGR guidance up to 7-9% – well within investors' expectations given the second quarter preview of rate base CAGR and capital spending on renewables pursuant to the goals outlined in the 2018 IRP. Though robust, the market was pricing in an increase in the growth rate of this magnitude, i.e., step function increase through the current trajectory (only outperforming UTY by 57bps). Mgmt. expects growth will remain at the pre-CMA sale rate of 5-7% from 2021-2023 but plans to file a rate case in 2022 to roll renewable investments into rates in 2023. They expect the new rates drive growth of 7-9% from 2021-2024. Mgmt. updated their 2021-2024 capital plan to include $1.8B-$2.0B in spending on wind, solar, and storage through 2023 and provided insight on LT capital spending opportunities, $40B over 20 years or ~3x current rate base. Eight to ten renewables projects are in advanced negotiations and a majority are 80-90% through the process. We expect an update on the negotiations on the third quarter call. Mgmt. plans to finance the renewables investment with 60% equity and 40% debt, equating to roughly $1.2B in equity through block issuance and equity-like issuances (i.e., convertible, hybrid, etc.). Though the plan does not include any assumptions on portfolio optimization, mgmt. continuously evaluates opportunities to create shareholder value, in our view, potentially through further LDC sales or non-core segment divestitures. Mgmt. announced "NiSource Next" initiatives that build on the SMS program adding focus on streamlined organizational structure and business services, operational work standardization, field mobility, and better leveraging scale. These initiatives coupled with fuel and maintenance cost savings from the retirement of Schahfer Generating Station drive mgmt.'s expectation of relatively flat O&M from 2021-2024.

Why the step change in growth rate after rolling forward to 2024? Two-stage growth driven by the need for a rate case to roll in robust investment in renewables. Mgmt. refreshed its capital plan that now totals ~$9.9B-$10.5B from 2021-2024 vs. our current live estimate of $6.8B from 2021-2023. Most of the $1.8B-$2.0B in spending on renewables will take place in late 2022 and early 2023 to prepare for Schahfer's retirement in mid-2023. Mgmt. expects to file a rate case in 2022 with a 2023 test year to include all of the spending on renewables in rates and pass O&M savings to customers. We do not expect the rate case to be contentious as NI receives regulatory approval for the projects through a CPCN prior to starting construction. Mgmt. targets customer bill increases in the low-to-mid single digits supported by cost structure improvements. **Mgmt. expects EPS CAGR from 2021-2023 and 2021-2024 will be in the range of 5-7% and 7-9%, respectively, with the step change driven by new rates.**

No new projects were announced during this update – eight to ten projects in advanced negotiations. NI has $0.4B in approved projects with $1.4B-$1.6B in projects still in negotiations. The tax equity investment totals ~$1.0B and will be additive to rate base over time as the tax equity partners farm out the benefits. Since the 2Q20 call,

See pages 3 - 4 for analyst certification and important disclosures.

Indiana Crossroads, the 300 MW build transfer wind project, has commenced construction. Rosewater and Jordan Creek are still under construction and mgmt. expects them to be in-service by the end of the year. Brickyard Solar, 200 MW PPA, and Greensboro Solar, 130 MW, are still awaiting regulatory approval. There are eight to ten projects in advanced negotiations, mostly solar, and NI is 80-90% through the process with a majority of them. We look forward to an update on additional projects during the 3Q20 call.

2021 IRP could potentially support an extended runway of renewable generation spending. The upcoming 2021 IRP could support additional renewable spending in years outside of the forecast as NI moves to retire its remaining coal capacity at Michigan City Generating Station by 2028. The IRP process will kick off in the spring of 2021 and mgmt. expects it will conclude in Oct. 2021. While mgmt. thought it premature to speculate on the content of the IRP, we believe that it is likely to include incremental renewables as the state advances its clean energy goals. Mgmt. forecasts a generation mix of 53% renewables, 25% natural gas, 15% coal, and 7% other by 2023 moving to 64% renewables, 24% natural gas, and 12% other by 2028. Mgmt. also highlighted its goal to decrease GHG emissions by 90% from 2005 levels by 2030 supported by the retirement of 80% of NIPSCO's coal by 2023 and the remaining 20% by 2028.

Base capital plan remains strong, with a majority of the investment recovered within 18 months. The updated capital plan includes spending on safety and modernization of $8.1B-$8.5B from 2021-2024, or $1.9B-$2.2B annually vs. our estimate of $1.8B. Over 75% of these investments start earning in less than 18 months due to favorable regulatory mechanisms in NI's service territories.

Financing plan put together with investment grade credit metrics in mind – flexibility built into plan. Mgmt. updated its financing plan, breaking down capital needs between core investments in safety and modernization and investments in renewables. Mgmt. assumes issuing $230M-$350M annually between 2021 and 2023 through ATM and ESPP/401K/Other and $500M-$700M in LT debt annually from 2022-2024 to support core capex. The renewables investments will be funded by $600M-$1,000M in hybrids, convertibles, etc. in 2021, block equity issuance of $500M-$700M total in 2022-2023, and LT debt of $500M-700M total in 2022-2023. Though the midpoints of the renewables equity stipulate $1.4B, mgmt. confirmed that they are targeting $1.2B, or ~60%. The capital structure of the issuances gives us some insight into what NI may ask for in the 2023 rate case. **Mgmt. stated they have flexibility in the financing plan to potentially look at a forward equity issuance to remove the pricing overhang.** LT adj. FFO/total debt target ~14-15% and investment grade credit metrics continue to be a focus for mgmt. Liquidity is sufficient and there are no significant refinancing needs over the plan.

What about portfolio optimization? Mgmt. continuously reviews its assets and would not be opposed to divesting additional LDCs if it is accretive for shareholders. Mgmt. does not assume any portfolio optimization in its financing plan but additional LDC and noncore asset sales could offset some financing needs. Mgmt. stated that any sale would have to be value-add to shareholders and, in our view, this may be a tall task given where LDCs trade at this time, however, certain players may be willing to pay up. If mgmt. were to divest any of its gas operations, they would essentially be swapping gas for electric which could be multiple accretive in this market. **CMA transaction to close "very soon," according to mgmt.** As a reminder, both companies targeted Oct. for the closing date.

Streamlining and optimizing operations while maintaining safety and reliability the focal point of NiSource Next. The Voluntary Separation Program and the CMA sale are the main drivers behind mgmt.'s expectation of an ~8% reduction in O&M costs in 2021. From 2021-2024, mgmt. forecasts relatively flat annual O&M driven by fuel and maintenance cost reductions from the retirement of the Schahfer Generating Station. Other initiatives build on the SMS program adding focus on streamlined organizational structure and business services, operational work standardization, field mobility, and better leveraging scale.

Additional opportunities for decarbonizing the gas segment? Mgmt. is keeping a close eye on hydrogen and RNG while focusing on more near-term efforts like leak mitigation. Mgmt. touched briefly on the opportunity for blending natural gas with RNG and hydrogen. They are expecting to learn a lot more about these opportunities in the coming years. In the meantime, mgmt. is continuing to focus on bare steel and cast iron pipe replacement, excess flow and automatic shutoff valves, pipeline over pressurization protection, inline pipeline inspections upgrades, and Picarro advanced leak detection. These efforts advance safety and sustainability, a core focus for mgmt.

ANALYST CERTIFICATION

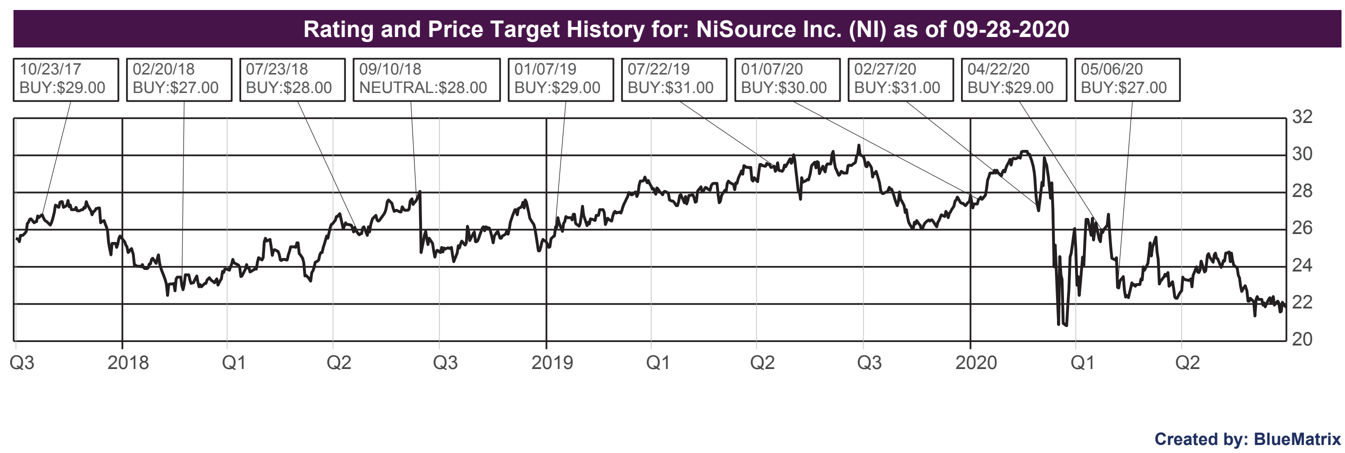
By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from NiSource Inc. in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.



RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

J.P. Morgan Securities LLC

Today, NiSource hosted its 2020 investor day, refreshing the company's 2021-2024 outlook for substantial new renewable generation investments and continued system safety & modernization upgrades initially previewed during 2Q earnings. Raised growth targets now include 7-9% annual NOEPS growth and a 10-12% rate base CAGR through 2024. Plan elements incorporate an implied back-end weighting to earnings under 5-7% near-term growth expectations and up to $1.2bn equity needs for renewables investments. Growth, however, remains attractive relative to peers and subject to manageable execution risk as NI seeks CPCNs for new renewables under its 2018 IRP. We remain constructive on NI's long-term outlook and relative positioning vs LDC peers and reiterate our OW rating.

- **Attractive growth outlook with manageable execution risk under NI's generation transition.** NI's new $9.9-10.5bn five year capital plan includes $1.8-2.0bn of renewables capex initially previewed during 2Q20 earnings. Targeted 7-9% annual NOEPS growth and 10-12% rate base CAGR stand at the high end of SMID peers and appear to bake in conservative funding outcomes across base capex and renewables-related equity. While work remains to secure NI's remaining $1.4-1.6bn of renewables subject to commercial negotiations and commission CPCNs for final investment, we see initial steps from the company's 2018 IRP and 2018 rate case boosting efforts and expect steady de-risking as individual projects progress through commercial and regulatory hurdles. We note that NI expects timing elements to limit near-term growth to 5-7% until the full benefit of targeted new renewables boosts earnings in 2023-2024.

- **Funding plan retains some flexibility despite significant equity for renewables, with portfolio optimization upside.** Plan equity includes $200-300mm annual ATM funding through 2023, $500-700mm block equity in 2022 or 2023, and a $600-1,000mm equity-like hybrids or converts issuance in 2021 to support targeted 14-15% FFO/debt. We see the company retaining adequate flexibility to complete associated financing before final 2023 rate base investment despite significant equity for targeted 60%/40% equity/debt funding of NI's renewables investment, or $1.2bn of equity at the top end of the $1.8-2.0bn opportunity. While management commentary indicated no active portfolio optimization efforts, potential opportunities could mitigate a significant amount of plan equity and further de-risk financing needs.

- **Overall positioning is unique with renewables-driven growth in 'LDC bucket'.** With renewables driving ~20% of the five-year capex plan, NI's 'green growth' stands unique among LDCs. We expect this dynamic to capture increased attention going forward should LDC weakness persist and electric vs gas multiples continue to diverge. Additionally, potential portfolio optimization efforts could accelerate a relative re-weighting toward NI's electric operations should the company divest a smaller LDC jurisdiction to fund renewables investment. This represents a powerful tool despite standing outside NI's current plan.

NI Sees Strong Growth with $40B of Investments Over the Next 20 years

NI published its long-term growth strategy and presentation ahead of the Investor Day call at 11am ET. NI expects '21-'24 EPS growth of 7-9% (roughly in line with UBSe of 7.7%) driven by 10-12% rate base growth. We expect investors will appreciate the higher growth rate (above historical growth profile of 5-7%) and it compares favorably to the EPS growth profile of its gas utility peer group at 5.7%. That said, we note that the EPS growth is back loaded with near-term EPS growth of 5-7% through 2023 and an acceleration in mid-2023/2024 as NI expects rate case to recover its renewable capex effective in mid-2023. Management also announced a $40B capex opportunity over the next 20 years, with $9.9-10.5B over 2021-2024 (above UBSe of $9.3B) fueling the view that growth can continue beyond the forecast period. That said, to fund the renewable capex NI is targeting 60% equity and an incremental $500-700MM of equity in 2022-2023 above the typical $200-300MM annual ATM program (roughly $550MM of annual equity in '22-'23 above UBSe of $450MM). NI also expects $600-1,000MM of hybrids/convertibles in '21. Notably, management announced NiSource Next initiatives to identify cost efficiency improvements and NI expects to reduce O&M costs by 8% in 2021 vs. 2020 and expects to keep costs roughly flat through 2024. Overall, we believe cost reductions will be well received by investors as, together with modernization & safety capex, they should drive near-term earnings growth and offset the dilution from funding of renewable capex before the earnings acceleration in 2023-2024.

What Do We Expect During the Call?

During the call at 11am ET, management will likely provide more details on the funding plan of the accelerated capex. Based on the slides, NI expects long-term adj FFO/debt of 14-15%. We also expect discussion on the cost savings and renewable generation transition (100% coal generation to be retired by 2028). Due to the pipeline replacement program, NI expects to reduce its methane emissions from natgas pipelines by 50% by 2025 vs 2005 base.

Forecast returns

Forecast price appreciation	+23.6%
Forecast dividend yield	4.3%
Forecast stock return	+27.8%
Market return assumption	5.1%
Forecast excess return	+22.7%

Valuation Method and Risk Statement

Risks include, but are not limited to, the following: changes to the regulatory environment, ability to achieve favorable returns on investment projects, and ability to continue to reinvest in the business for growth. We use comparable company multiples in our sum-of-the-parts EV/EBITDA and P/E valuations. Our price target is derived using an average of sum-of-the-parts EV/EBITDA and P/E valuations and DDM.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 29 September 2020 12:20 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	49%	32%
Neutral	FSR is between -6% and 6% of the MRA.	39%	30%
Sell	FSR is > 6% below the MRA.	13%	20%

Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 June 2020.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

NI: Investor Day Provides Roadmap For Growth

Overweight/$25

Natural Gas LDCs

Company Note

- **Summary.** NI rolled out a robust growth plan at the 9/29 Investor Day including the newly unveiled 7-9% EPS CAGR through '24E (off the '21E base). Despite the top decile growth rate, shares trade at 4% P/E discounts to blended gas/electric peers, which we think reflects a combination of execution risk and an equity overhang. We see a path to positive re-rating should management deliver on near-term financial targets and begin executing the financing plan. We reiterate our Overweight rating and $25/share price target (apply a 5% premium to the gas/electric '21 P/E of ~17.5X on our '22E). Our '20-22E EPS remain $1.26, $1.32 & $1.40; we increase our '23E & '24E EPS to/from $1.50/1.47 & $1.66/1.62.

- **Execution is Key.** NI's 7-9% EPS growth plan is well above the group average of ~6%. That said, we believe the company's recent track record has been disappointing as EPS has not grown since 2018 due, in large part, to costs stemming from the September 2018 Merrimack Valley incident. The new plan, which uses 2021 as the base year, looks to resume growth including a 5-7% annual trajectory through '23 with a meaningful step up in '24 resulting in a 7-9% CAGR overall. Management also commented that if the '21E guidance base of $1.28-1.36 was adjusted to exclude an anticipated ~$0.05 COVID hit, the company would still feel comfortable in the 7-9% range, which suggests a high degree of confidence. That sentiment is backed by the numbers, in our view, as we see a path to a nearly 10% CAGR (our '24E of $1.66 implies an earned ROE of 8.9% on a rate base that is $450mm shy of NI's forecast – could prove conservative).

- **Equity Overhang Persists.** NI provided details on baseline equity needs along with plans to fund the renewable investment, which are designed to maintain a 14-15% FFO/Debt ratio. Consistent with prior communications, the base plan includes $200-300mm annual ATM issuances along with $30-50mm/year via retirement and other plans. Further, the company intends to finance 60% of the $1.8-2.0B renewable spend with equity. That includes $600-1,000mm of hybrids/convertibles in 2021 (we assume $600mm of perpetual preferred equity and $300mm of convertibles) along with a $500-700mm common offering during the period 2022-2023 (we assume 2022; could also utilize a forward). By 2024, our model results in $1.2B of equity content tied to the renewables assuming full conversion and 50% equity content for the perpetual preferreds. Of note, the company specified that the financing plan does not include potential portfolio optimization opportunities, which we expect leaves the door open for small LDC sales. For context, the company's three smallest gas systems are MD, KY and VA (followed by MA, which is targeted to close in October).

- **Other Takeaways.** (1) Cost Controls – Following a projected 8% decline in O&M in '21E (helped by the sale of CMA), NI expects to keep O&M largely flat through '24. (2) Rate Increases – Mgmt. forecasts rate increases in the low to mid-single digits during the planning period. (3) Renewable Projects – NIPSO has already secured regulatory approval for two build-transfer projects representing ~$400mm of direct investment; the company is in advanced commercial negotiations for another $1.4-1.6B of investments along with PPA agreements – we expect announcements to commence in the near future. (4) Electric Rate Case – The company plans to file a 2023 test year rate case (aligns with both renewable projects and savings from R.M. Schahfer coal retirement) with new rates effective in 2H'23. (5) Post-2024 – NI will go through the IRP process again in 2021, which could shed light on replacement plans for the 2028 Michigan City coal retirement, which we expect will include another round of renewable projects. On that note, NI updated the company-wide 20-year investment opportunity to $40B, a $10B increase from the prior outlook.
- **Environmental Plan.** On the electric side (~40% of business), NI is on track to retire all coal assets by 2028 in support of a 90% reduction in GHGs by 2030 (from 2005 levels). On the gas side (~60%), the immediate focus is on lower leaks (50% reduction in methane from pipes by 2025 vs. 2005 levels) via pipe replacement/new equipment and advanced leak detection. Mgmt. indicated that the company is closely watching developments on new technologies and alternative gas streams, noting that there is a chapter beyond leak reduction including RNG and, possibly, hydrogen.

Acronyms
ATM – At-the-Meter
CMA – Columbia Gas of Massachusetts
GHG – Greenhouse Gas
FFO – Funds from Operations
IRP – Integrated Resource Plan
LDC – Local Distribution Company
PPA – Power Purchase Agreement
RNG – Renewable Natural Gas

Price Target

Price Target: $25 from NC

Our price target is based on a P/E multiple analysis (apply a 5% premium to the blended gas/electric peer group multiple of ~17.5X on our '22E EPS). Risks include lower than expected sales growth, unfavorable regulatory developments, and unexpected cost pressures.

Investment Thesis

We rate shares Overweight. We are attracted to NI's robust long-term infrastructure growth opportunities and supportive regulatory treatment.

Company Description

Based in Merrillville, Indiana, NiSource, Inc. is a holding company with regulated gas (64%) and electric (36%) utility operations across seven states. The company's Gas Distribution Operations serve 3.5 million customers in Indiana, Kentucky, Maryland, Massachusetts, Ohio, Pennsylvania, and Virginia. The Electric Operations consist of a vertically-integrated utility serving approximately 500 thousand customers in northern Indiana. On July 1, 2015, NiSource completed the separation of Columbia Pipeline Group (CPG) from NiSource via the distribution of one share of CPG common stock for every share of NI common stock.

NiSource

(NI US Equity – $21.96 – Outperform)

No debate on NI growth potential; Analyst Day takeaways

Analyst Day solid as expected; all about execution. The punchline of the AD was a more defined EPS CAGR of 7-9% through 2024 (off 2021), expectation for annual EPS growth of 5-7% in the interim (2021-23) and more color on financing plans for NIPSCO's renewable investments. The 7-9% EPS CAGR is underpinned by a 10-12% rate base CAGR, placing NI among the best growth stories in the sector. These updates were in-line with our expectation which we detailed in a preview note last week (here). From here, the ability for NI's stock to re-rate back toward a sector average or its historic premium is dependent on management's ability to execute under the new plan. We ultimately believe this is achievable over time as the path forward post-CMA is much lower risk – reiterate Outperform and $25 PT.

Likely some cushion in EPS target. We believe NI's 7-9% EPS CAGR is pretty doable using fairly conservative assumptions, which includes 30-40bps of lag across NI's businesses. We see 2024 EPS of $1.68, which implies a CAGR slightly above NI's midpoint. An important variable is the price/cost of financings for the renewables. While this could cut both ways, we would argue a bias toward their being potential upside to our numbers as NI is currently trading at a ~2x discount which is well below where it has traded historically. This of course is predicated on NI's ability to execute going forward.

More color on the renewables financing plan. NI is targeting ~60% equity financing for the $1.8-2.0B of renewables capex. The first tranche is expected in 2021 where NI plans to issue $600M-$1B of hybrids or converts. The second tranche is $500-700M of common equity through a block in 2022 or 2023. All the financing is baked into guidance under several scenarios and mgmt. noted that it remains flexible in terms of what shape it ultimately takes. We were encouraged to hear that mgmt. is also open to asset sales as a potential financing alternative; we believe swapping gas LDC rate base for renewables would be value enhancing in an ESG-focused world.

Rate impact from renewables build out will be modest. This was encouraging to hear given the importance of the 2023 rate case as fuel savings are expected to mostly offset the return on the renewable investments.

Tweaking estimates. A summary is listed in the table on the right. This comes after revising our capex and financing assumptions to match NI's update.

BofA SECURITIES

NiSource Inc

Could an inflection come in '21?

Reiterate Rating: NEUTRAL | PO: 23.00 USD | Price: 21.96 USD

Affirming higher EPS confidence at Analyst Day

Following an Investor Day update largely in line with expectations, NI closed +0.5% slightly outperforming XLU (flat) and Gas LDC peers (-0.1%). As we expected, NI guided to a +7-9% EPS CAGR ('21-'24) with near-term ('21-'23) EPS CAGR of +5-7%. This compares to its reiterated +10-12% rate base CAGR ('21-'24) – a 3% delta b/w EPS and rate base growth (in line vs history). We perceive these EPS CAGRs are explicitly conservative given the '21 base year has a -5c COVID impact baked into guidance, and '24 is buoyed by one-time EPS step up from renewables. Both of our comparable EPS CAGRs fall within the guidance ranges if the -5c COVID added back to '21, but above high-end when baked in (see inside for CAGR comparisons). Hence, we believe NI's rather conservative EPS outlook combined with an enhanced implementation of its Safety Management System is in attempt re-gain investor credibility; a prudent angle by mgmt. Critically, mgmt.'s ultimate decision on the type of equity-linked hybrid issuance next year to finance renewables (i.e. converts or perpetual preferreds) alongside completing the '21 Indiana legislative session (largely cautious headlines expected) will be key to de-risking outlook and may present inflection. Reiterate Neutral. We lower '22 / '23 EPS slightly as adjust capex /RB in line with guidance and increase parent drag on financing costs of converts. Added confidence to '24 EPS of $1.76 (way above guided range). After mtm SOTP with peers on '23 EPS (vs prior '22) at 13.2x for gas and 15.3x for electric, our PO remains at $23. We assign a +2x premium to the electric utility to account for renewable EPS growth outside the valuation window. Lastly, NI's 100% coal retirement by 2028 target will also create incremental renewable beyond 2024.

$1.2bn equity overhang, but have some flexibility

NI was clear the $1.8-2bn renewables strategy would be funded with 60% equity, which is a maximum of $1.2bn of equity with guided flexibility of $600-1,000mn of equity-linked hybrids and $500-700mn of traditional equity. We assume $700mn converts (issue/convert '21/'24) and $500mn traditional equity in 2023. If NI chooses converts over preferreds (both 50% equity treatment), this adds to eventual dilution, but presumably due to confidence on outlook. Tweaks EPS modestly.

Company Sector

Natural Gas-Local Distribution Companies

Company Description

NiSource Inc. (NI) is a fully-regulated utility company serving approximately 3.5mn natural gas customers and 500,000 electric customers across seven states through its local Columbia Gas and NIPSCO brands. NI generates substantially all of its operating income through these rate-regulated businesses.

Investment Rationale

NI's positives include 5-7% dividend growth and >5-7% EPS growth via $30bn of infrastructure investments over the next 20+ years and fully regulated subsidiaries. We have factored in resolution of overhang from the MA incident as the company will likely sell 3Q. However, NI has C&I demand risk from COVID, which will be difficult to offset with O&M cuts due to promises already around cost cuts to balance CMA sale. We see shares valued appropriately and rate Neutral.

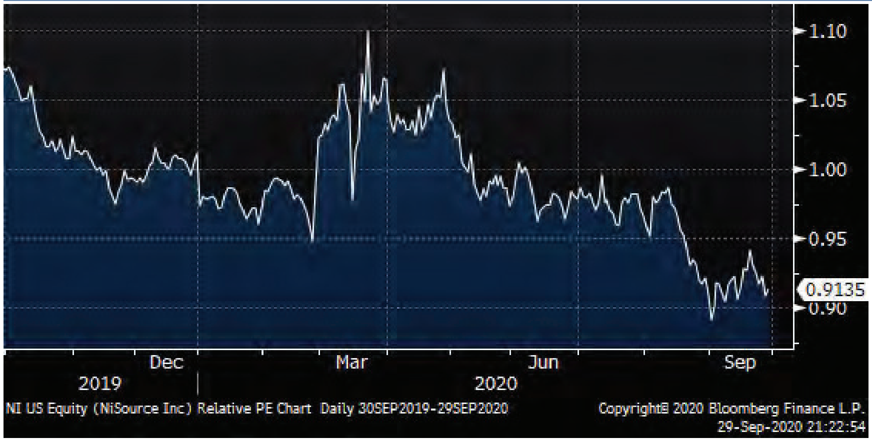
Q4	1.24A	-1.47E

Exhibit 1: NI FY1 P/E relative to IXU



Source: BofA Global Research, Bloomberg

On our '22 EPS, NI is currently trading roughly 1x higher than the average of its Gas LDC peer group, but about a 1x below the average electric utility group. With more clarity around financing its $1.8-2.0bn (plus $1bn of tax equity) renewable strategy through 2023, NI provided the path to becoming even more of a hybrid between a gas LDC and an electric utility, which is illustrated by its relative multiple. NI's current valuation is seemingly balanced given it is trading almost exactly between the two peer groups and considering its roughly 40%/60% mix of electric/gas earnings with the mix shifting more towards electric over time via renewables. Shares continue to trade at discount to the broader utility group (IXU) given the de-rating of gas utilities over the last six months, but we do see potential for NI to re-rate higher over time as NI grows its electric earnings mix, which can be capitalized at a higher multiple.

Could more divestments emerge too?

Meanwhile among the angles to fund growth raised (surprisingly) is further divestment of gas LDCs effectively to fund its growing electric biz. With an equity raise bordering on 30% of its market cap, we perceive any range of smaller LDCs as eligible to fit this spending program. Recall NI has smaller gas utilities (as measured in ratebase) in Kentucky (~$300 Mn), Virginia (~$700 Mn), and Maryland (~$100 MN). It remains unclear just what kind of a *premium* to RAB can be realized in any sale, seeing few gas LDCs transactions of late. A sale would accelerate upside & our perceptions of an inflection as this would seemingly immediately alleviate convertible/2021 financing needs. We presume the lack of definition around *just how* 2021 needs are funded ties back into this potential sale dynamic.

Awaiting the renewable details soon on the first batch

While we note NI has not announced any new renewable commercial deals since July, management highlighted the company is currently in advanced negotiations on about 8-10 solar projects. We question whether difficulty finding sufficient tax equity investors may be hurdle in closing these deals, but we believe NI will eventually complete this renewable procurement this year. We look for NI shares to potentially inflect next year pending the company's choice around its $600-1,000mn equity-linked hybrids (i.e. converts or perpetual preferreds) along with putting the (hopefully successful) '21 Indiana legislative session in the rearview. If mgmt. chooses converts over perpetual preferreds, we perceive this would be a positive read into mgmt.'s confidence in the earnings outlook such that it can offset the ultimate dilution in 2024.

But don't confuse the next round of procurement too coming up

Also, in the long term, NI will have incremental renewable generation opportunities in the queue to replace the retirement of its Michigan City coal plant. Look for another RFP in the coming year (by this time next year) presumably enabling another round of investment in the 2026-2028 period.

Another positive we would point out is NI's new '21-'24 capex excluding renewables strategy of $1.9-2.2bn actually added incremental capex vs NI's previous '21/'22 guidance of $1.7-2.0bn/yr, We viewed this as a constructive datapoint particularly after guiding down '20 capex in 1Q20. Bottom line, although we perceive the Investor Day update to be largely constructive, we remain on the sidelines at Neutral due to the equity overhang and limited total return at 8.8% (including 4% div yield.

Renewable opportunity after '24 & portfolio optimization

Under NI's current renewable strategy, the company will retire 80% of its coal capacity by 2023 (1,400 MW) and replace the lost capacity with the current renewable procurement for 3,500 MW (roughly 1,700 BOT Capacity; 33% tax equity owned) that is underway. By 2028, NiSource plans to retire 100% of the company's coal capacity through the retirement of its 469 MW Michigan City coal plant. Albeit a smaller amount of coal capacity to replace, NI does have line of sight to incremental renewable (rate base) opportunities beyond '24.

Also, we would emphasize management commentary around portfolio optimization. The company's current financing strategy does not include potential portfolio optimization opportunities, but any asset sale would intuitively replace a portion of the equity financing. Recall, NI has a track record of portfolio optimization such as the company's spin-off of its pipeline business in 2015 and the recent sale of Columbia Gas of Massachusetts to Eversource. Management stated it will always look to optimize the portfolio to enhance shareholder value. Note NI has a number of small non-core gas utilities such as Columbia Gas of VA, KY, and MD, which have current rate base values of about $850mn, $330mn, and $149mn, respectively. If NiSource were to sell one of these assets it would effectively be swapping gas for electric rate base. We believe a gas LDC asset sale would potentially pull forward an inflection in shares and help break through the current '21 equity overhang.

Estimates & Comparing EPS CAGRs

On our updated EPS estimates, when the -5c COVID impact backed into '21 guidance is added back to the base year, both our '21-'23 and '21-'24 EPS CAGRs land within the guidance ranges of 5-7% and 7-9%, respectively. However, when using the '21 EPS guidance midpoint as the base year, we derive a '21-'23 EPS CAGR of 8.3% and '21-'24 EPS CAGR of 10.3%. See all of the EPS CAGRs compared in the table below. We also lay out the implied EPS guidance by year on the new EPS CAGR guidance of +7-9%. This compares to NI's rate base CAGR guidance of 10-12% ('21-'24). Our rate base estimates are included below our earnings estimates table.

We would highlight that using the mid-point of the near-term 5-7% EPS CAGR ('21-'23) off of '21 guidance (base year) implies '23 EPS of only $1.48. This is far lighter than consensus / BofAe $1.54 / $1.55 as we perceive NI will be earning nearly at its authorized ROE across most of its gas utilities in '22 and '23 given the timing of its rate cases. We expect to see the most lag this year, slightly better in '21 (lag spread about evenly across the utilities with those lacking decoupling being hit slightly harder), and then lag should generally recover in 2022 where we expect NI to earn nearly at its authorized ROE aside from slight incremental parent interest drag from higher coupon rate on the assumed converts. Following regulatory lag plus some timing lag from renewables in '23 and a portion remaining in '24, we expect NIPSCO electric to recover earning close to the authorized beyond 2024.

We adjusted the timing of our capex estimates and rate base growth cadence to better align with company guidance. Additionally, we added incremental parent drag to account for incremental financing costs of the equity-linked hybrid issuance expected next year (we assume $700mn of converts). After these adjustments our EPS estimates are mostly unchanged aside from a 5c decrease in 2022 and 2023 *entirely from higher parent, which* *is more about a parent 'placeholder' of higher expense reconcile with their updated view rather than anything fundamentally concerned around utilities.* We now firmly see a positive bias to both near-term and longer-term EPS estimates, assuming execution at core utilities. We believe our '24 EPS offers the most indicative earnings power of the company and as such increasingly see greater validity for a premium valuation on '22/'23 EPS regardless of perceived credibility in execution relative to the group.

We stress clear upside to EPS estimates as we perceive management as capable of hitting (well above) its guidance range. While the Analyst Day could be perceived cautiously given the very low bar established, we reaffirm our underlying confidence on ultimate '24 EPS upon realization of full earnings potential from renewables (and no lag from delayed financing to address accelerated spend).

Table 1: NiSource EPS Estimates: tweaking lower '22 & '23 on higher parent 'placeholder': we're still above top end of guide… keeping '24 intact

Valuation: seeing more of a positive skew emerging

Our PO stays at $23 as we mark to market our SOTP valuation on peer '23 multiples (vs previous '22) of 13.2x for gas and 15.3x for electric. We assign a 2x premium to our electric peers to account for incremental renewable earnings growth long-term. In addition, we net out 50% the incremental assumed converts (and interest) associated with the renewables strategy by including it in the netting out of parent debt and interest expense in our SOTP below. Reiterate neutral as limited upside in our SOTP valuation of 8.8% (including a 4% dividend yield) and near term equity uncertainties offset the strong EPS growth through the forecast period via the renewable strategy.

Table 3: NiSource SOTP Analysis

Price objective basis & risk

NiSource Inc (NI)

Our $23 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2023 forward P/E multiples of 13.2x for gas utilities and 15.3x for electric utilities with a 2.0x premium for the electric utility's strong growth rates and incremental renewable buildout with capex beginning in '22, but acknowledge industrial risk. We note that electric / gas peer P/E multiples are grossed up by 5% / 5.1% to reflect capital appreciation across the sector. We strip value from Columbia Gas of MA given the pending sale to close in 3Q20. We subtract the value of excess holding company debt at the parent not supporting the utility opcos. We believe NI's 5-7% EPS/dividend growth outlook, attractive regulated earnings profile and constructive legislation across NI's service territories are under-estimated given its discounted multiple versus peers.

Downside risks to our PO are a sustained period of economic weakness pressuring customer growth, interest rate increases, high natural gas prices, financing plan updates, unforeseen costs associated with the MA incident, and challenging steel production economics in Indiana.

Investor Day Takeaways

Natural Gas | Company Update

NI

Target price (12M, US$)
26.00
Outperform

- **Investor day (virtual) takeaways.** NI hosted its investor day on Tuesday 9/29, which was mostly in-line with our previewed expectations. Among the biggest takeaways, the company reiterated 7%-9% EPS CAGR with a jump in 2024 (only 5%-7% through 2023) after Indiana renewables come in service (build-own-transfer so no AFUDC). The 2024 ratebase projection of $21.2B is $0.5B higher than the prior forecast. Equity: $500-$700M in 2022/23 for 60% of $1.8-$2.0B renewables capex (in line with CS). Flat annual O&M. FFO/D target unchanged at 14-15%. Broadly, the company discussed long-term growth strategy, cost structure refinements, equity needs, renewable generation including transition from coal to renewables, as well as updates to their Safety Management System (SMS) progress. We expect the company to attain at least the midpoint of a 5%-7% EPS CAGR (vs 2021) by 2024 after renewables are in service.
- **2021 Guidance Reaffirmed.** The company reaffirmed its 2021 NOEPS guidance of $1.28- $1.36 (CS $1.33 vs. consensus $1.34), which includes $0.00-$0.10 improvement from COVID-19 drag and Columbia Gas synergy impacts in 2020.
- **~$9.9B- $10.5B capital plan 2021-2024.** NI identified total expected investment opportunities of ~$9.9B- $10.5B from 2021-2024 of which ~20% is expected for renewables Investment, ~20% for electric infrastructure and asset modernization, and ~60% for gas infrastructure and asset modernization. This includes $1.9-$2.2B of growth, safety & modernization investments, with 75% of this covered by rates within 18 months. Longer-term, the company notes ~$40B incremental investment opportunity beyond 2024.
- **No block equity needed in 2020 and liquidity is ample for 2021, but equity is planned for 2022 and 2023 for Indiana renewables.** Equity plans for 2020 remain $200-$300M annual ATM plus $30-50M employee plans (no convertible or hybrid financing). Columbia Gas of Massachusetts sale to ES expected to close in October.
- **Valuation:** Our estimates and $26 TP are unchanged and based on peer 2022 P/E multiples within a SoTP. Our TP includes the discounted value of $0.19 uplift in 2024 (worth $3/sh) from expected earnings from Indiana renewables. Risks include regulatory, capital plan execution, interest rates.

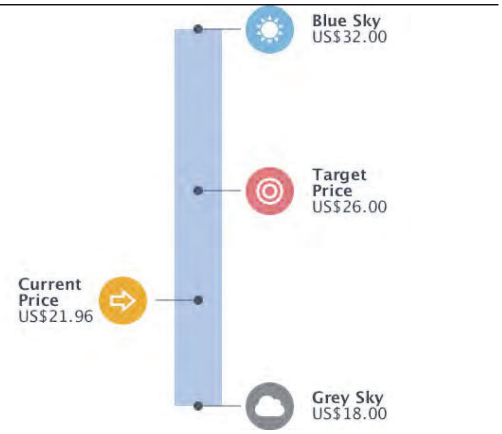
Company Background

NiSource Inc. is energy holding company whose subsidiaries provide natural gas, electricity & other products & services. It operates in 3 segments: Gas Distribution Operations; Gas Transmission & Storage Operations, & Electric Operations.

Blue/Grey Sky Scenario



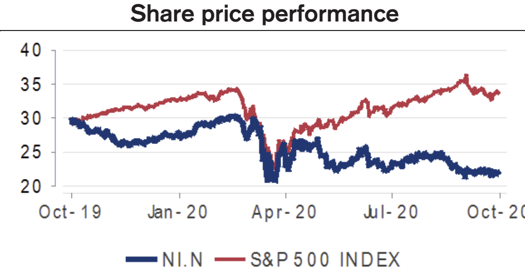
Our Blue Sky Scenario (US$) **32.00**

In our blue sky scenario we assume favorable regulatory outcomes across NI's jurisdictions, successful execution of their capital plan, and growth of infrastructure replacement program backlog. We assume that capex is at the high end of the $1.8-$1.9B and that NI is able to grow ratebase at the high end of their 8-10% range and grow earnings at the high end of their 5-7% range. We assume a 5.0x premium to the average peer 2021 P/E multiples.

Our Grey Sky Scenario (US$) **18.00**

In our grey sky scenario we assume unfavorable regulatory outcomes across NI's jurisdictions, only partial execution of their capital plan, and a decline in the infrastructure replacement program backlog. We assume that capex is at the low end of the $1.8-$1.9B and that NI is able to grow ratebase at the low end of their 8-10% range and grow earnings at the low end of their 5-7% range. We assume a -1.5x discount to the average peer 2021 P/E mult.

Share price performance



On 29-Sep-2020 the S&P 500 INDEX closed at 3335.47
Daily Sep30, 2019 - Sep29, 2020, 09/30/19 = US$29.92

Additional commentary

- **See our recent reports:** 9/27 Investor Day Preview, 8/7 Indiana Turning Green, 5/26 Left Behind but Holding Up Well, 5/11 COVID-19 Adds Near-Term Uncertainty, but Long-Term Fundamentals Remain Strong, 5/5 1Q20 Earnings Preview, 2/28 Raise to Outperform on Sale of Mass, Elimination of Block Equity Plan, 2020 Outlook – Getting Meaner and Less Defensive, 11/14 EEI 2019 Financial Conference: Full Takeaways,

- **Capital plan 2021-2024.** NI plans to deploy ~$9.9B- $10.5B from 2021-2024 in already identified capital investment opportunities, of which ~20% is expected for renewables Investment, ~20% for electric infrastructure and asset modernization, and ~60% for gas infrastructure and asset modernization. NI plans annual Growth, Safety & Modernization investments of $1.9B-$2.2B through 2024 (total $8.1B-$8.5B from 2021-2024) of which >75% of capex begins earnings in under 18 months. Renewable Generation investments of $1.8B -$2.0B occur in Indiana, primarily across 2022 and 2023. For the electric utility, NI plans $400M-$600M of annual capital investment in base electric system infrastructure and asset modernization programs through 2024.

- **Retiring coal and replacing with renewables.** NI is targeting to replacing 80% of coal capacity by 2023 with primarily renewable resources and retiring 100% of coal assets by 2028. The company targets to achieve 90% reduction in greenhouse gas emissions by 2030.

- **Rosewater and Jordan Creek to go in service by year-end.** Rosewater Wind (100 MW JV project) and Jordan Creek (400 MW JV project) are both expected to go in service by year-end. PPA projects Indiana Crossroads (300MW), Brickyard Solar (200MW) and Greensboro Solar (130) MW are expected to go in service by 2021, 2022 and 2022 respectively. Additionally, 8-10 additional projects in advanced commercial negotiations. Recall CPCN filings were made on 2/1/19 seeking approvals to develop the wind farm consistent with the IRP filed in the fall of 2018. Regulatory approvals were received in August 2019 and tax equity financing was closed in July 2020. NI expects ~$90M rate base investment (includes developer carry) to be paid in 2023 which will be recovered through base rate case.

- **Financing the renewables.** Equity plans for 2020 remain $200-$300M annual ATM plus $30-$50M employee plans (no convertible or hybrid financing). However, we expect ~60% of $1.8-$2.0B of incremental Indiana plant investment in 2022/23 to be financed with equity (we model half in 2022 and remaining half in 2023. However, this neither results in AFUDC (turnkey projects) nor earn a return until a forward test year ratecase is filed around early 2023 for rates effective 2024. Note that this only represents the utility's initial investment in the Indiana projects, with an additional $1.0B financed with tax equity for the benefit of utility customers. Of the $1.8-$2.0B to be financed by the utility, only $0.4B has been approved to date, with the remaining projects still in negotiation. On the debt side of the ledger, the company plans incremental long term debt of $500M-$700M annually from 2022-2024 for the Indiana renewable generation investments. NI also plans $600M-$1,000M in hybrids and convertibles financing in 2021. The current plan targets renewable investment financing (60% Equity / 40% Debt) and long-term Adj. FFO/total debt of ~14%-15%.

- **Rate base and NOEPS.** Ratebase growth is expected to grow at a 10%-12% CAGR from $13.9B in 2020 to $21.2B in 2024. The company reaffirmed 2021 NOEPS guidance of $1.28- $1.36 (CS $1.33 vs. consensus $1.34), which includes $0.00-$0.10 improvement from COVID-19 drag and Columbia Gas synergy impacts in 2020. NOEPS is expected to grow at 7% to 9% CAGR 2021–2024, with a near term annual growth of 5%-7% in 2021-2023. Further, the company expects long-term ~$40B investment opportunity to drive continued NOEPS growth beyond 2024.

Figure 1: Capital Plan and Rate base

Capex & Rate Base ($B)	2021	2022	2023	2024
Capex	2.0-2.3	2.4-2.7	3.3-3.6	1.9-2.2
Rate base	15.2	17.0	19.8	21.2

Source: Company data, Credit Suisse estimates

- **Liquidity update.** NI's net liquidity available is $1.5B-$1.6B as of Sep 30th (vs. ~$2B on June 30th). Total long term debt is $9.1B with a weighted average maturity of 15.5 years and a 3.68% interest rate as of September 30th vs the prior update in June which included a ~$10B debt level, with ~$8.7B of long-term debt, with a weighted average maturity of ~16 years and a 4.31% interest rate. Additionally, the company expects no significant refinancing needs through 2024.

- **Nisource Next initiative and Columbia Gas of Massachusetts sale to drive ~8% O&M reduction in 2021.** The company has undertaken various cost initiatives including voluntary separation program savings, operational processes improvements and modernization driven fuel and cost reductions. NI expects annual O&M for 2021-2024 to remain "relatively flat".

Previous Relevant Commentary

- **Our unchanged 2022 estimate of $1.39 includes about -$0.04 expected drag from equity issuance for investment in Indiana renewables** that will not benefit from AFUDC nor receive a rate increase until 2024. We expect the company to attain at least the midpoint of a 5%-7% EPS CAGR (vs 2021) by 2024 once these projects are in service. Ratebase growth is also expected to grow at a 10%-12% CAGR from $13.9B in 2020 to $20.7B in 2024. Recall that 2021 Guidance was initiated in August at $1.28-$1.36 (CS $1.33 vs. consensus $1.34), which includes $0.00-$0.10 improvement from COVID-19 drag and Columbia Gas disynergy impacts in 2020.

- **COVID-related regulatory updates.** Orders received in Maryland (4/9/2020), in Virginia (4/29/2020), in Pennsylvania (5/13/2020), in Indiana (6/29/2020) and in Ohio (7/15/2020). Orders in MD, OH and VA allow deferral of COVID-19 related expenses and bad debt for later recovery. Order in PA allows deferral of bad debt above amounts in base rates for later recovery, and order in IN allows deferral of suspended fees and bad debt for later recovery.

- **Columbia Gas of Massachusetts sale remains on track for regulatory approval in Q3.** On July 2, NI announced that it will pay $56M to settle and resolve the state's investigation into the 2018 Greater Lawrence incident.
    - **A federal guilty plea and the sale of Columbia Gas of Mass.** On Wednesday, 2/26, the US Department of Justice announced that NI will plead guilty to a criminal violation of the federal Natural Gas Pipeline Safety Act and pay a $53M fine in connection with the Sept 2018 gas explosion incident in Merrimack Valley, Massachusetts. NI has also agreed to sell its operations in Massachusetts to ES for $1.1B and will forfeit any profit earned from the sale (none expected, so retaining the whole $1.1B). The plea is on a corporate level; no individual officers or employees of the company were charged.
    - **Sale of Columbia Gas of Massachusetts to Eversource for $1.1B - with no gains allowed (or expected).** NI has also agreed to sell its operations in Massachusetts to ES and will forfeit any profit earned from the sale. We calculate that ES is purchasing at a 1.0x multiple of ratebase, or 19.7x 2021 P/E at the allowed 9.55% ROE – in line with the group average. However, the elimination of a previously planned $500-$700M block equity issuance in 2020 brings the combined effect to about breakeven to a modest $0.01 accretion to 2021 expectations before accounting for -$0.05 corporate disynergies. Expect the

transaction to close in October. See our 7/31 ES 2Q earnings note for further detail.

- **Emphasis on safety and leak reduction.** The company continues to emphasize reducing the operational risk and enhancing gas systems safety through the implementation of the Safety Management System (SMS) and new safety system installations across all NI gas service territories. NI has rolled out a corrective action program with the hopes of providing a very clear process and technology for employees and more than 1,000 automatic shut-off devices have now been installed. NiSource is looking to advance safety new technologies, leakage sensing, smoke detectors, safety performance, and predictable models where human error could create risks. The company is projecting a 50% reduction in methane emissions from natural gas pipelines by 2025.
- **Pension & OPEB. 97% funded in 2Q20** vs. 94% in1Q20, and ~98% as of year-end 2019 with 52% of pension plan assets in equities (45% of OPEB assets). A 50 bps decline in the discount rate is expected to result in a $97.7M increase in projected pension obligation and a $31.8M increase in OPEB obligation, as well as a $2.6M increase in net plan expense. For a 50 bps decline in expected long-term rate of return on pension and OPEB plan assets, net expenses are expected to increase $10.1M.
- **Decoupling.** Full decoupling in OH, MA, MD, VA. Weather normalization in KY, MD, VA, PA. **Bad debt handling.** Clauses for bad debt in KY, OH, MD, PA, VA, MA & IN.
- **Stimulus bill impacts:** management is still evaluating the potential benefits from NOLs and AMT credits.
- **Cost management and regulatory solutions offset COVID's $30M (or ~$0.06) impact in Q2.** Gas margin impact by customer class saw a $0.7M increase in residential and a $4.7M decrease in industrial (vs 2Q19). Electric margin impacts saw a $9.2M and $3.9M decreases to industrial and commercial load respectively, partially offset with a $6.2M increase in residential vs. 2Q19. COVID's impact are trending with the company's base case scenario.

Figure 2: COVID's Impact to NI in Q2

COVID impact to Gas Margin (2Q20 v 2Q19)	$(M)
Residential	0.7
Commercial	0.0
Industrial	-4.7

COVID impact to Electric Margin (2Q20 v 2Q19)	$(M)
Residential	6.2
Commercial	-3.9
Industrial	-9.2

Source: Company data, Credit Suisse estimates

- **COVID-19 annual impact to load**. Management expects lower sales volumes from commercial and industrial customers, partially offset by a potential increase in residential sales volume. Increased bad debt expenses (although recent orders in MD, VA allow for deferring the COVID-related expenses and bad debt), and sustained customer attrition. The company's sensitivity analysis continues to project that a +/- 1% change in annual sales volumes, will result in pre-tax operating earnings of $3.9M, $3.9M and $2.3M to residential, commercial and industrial on the electric side respectively, and $3.8M, $2.4M and $1.2M to residential, commercial and industrial on the Gas side respectively. The residential customer class represents 39% and 69% of the retail margins in electric and gas respectively, with commercial at 35% and 22% in electric and gas respectively.

Figure 3: COVID-19 Impact to Nisource Load

Pre-tax Operating Earnings Sensitivity to +/- 1% CHG in annual sales volume	Electric	Retail Margins %
Residential	$3.9	59%
Commercial	$3.9	26%
Industrial	$2.3	15%
Total	**$10.1**	**100%**

Pre-tax Operating Earnings Sensitivity to +/- 1% CHG in annual sales volume	Gas	Retail Margins %
Residential	$3.8	69%
Commercial	$2.4	22%
Industrial	$1.2	9%
Total	**7.40**	**100%**

Source: Company data, Credit Suisse estimates

Regulatory Updates

- **Gas Distribution Operations.**
  - **Columbia Gas of MD** filed a new base rate case on 5/15 requesting $6.3M total revenue increase; $5M net of infrastructure trackers which supports continued replacement of aging pipelines and safety upgrades. The final order is expected in 4Q20 with new rates effective in Dec 2020.
  - **Columbia Gas of PA.** Filed a base rate case 4/24/2020 which supports continued replacement of aging pipelines as well as adoption of safety upgrades. Ratecase includes $100.4M total annual revenue increase. Order is expected in 1Q21 with new rates effective in Feb 2021.
  - **Columbia Gas of Ohio. Infrastructure Replacement Program (IRP) Annual Rider update.** Filed 2/28/2020 and order was received on 4/22/2020 and rates became effective in May. Order includes ~$234M in 2019 capital investments and IRP rider allows recovery of safety and infrastructure investments. Recall that a 2017 settlement allowing COH to continue the IRP tracker through 2022 was previously approved in Jan 2018. The IRP program covers the replacement of priority mainline pipes and targeted customer service lines.
  - **Columbia Gas of Ohio. Capital Expense Program (CEP) Annual rider update.** Filed 2/28/2020 and order is expected in 8/2020. Application includes ~185M in 2019 capital investments. The CEP rider allows recovery capital investments and deferred expenses that are related but not covered through IRP tracker. New rates expected to become effective 9/2020.
  - **NIPSCO Gas System Indiana.** Filed application on 12/31 with Indiana Utility Commission for 6-year extension to the company's long-term gas infrastructure modernization program. Proposal includes ~$950M in capex through 2025 to be recovered through semi-annual adjustments. Order is expected in July 2020.
    - **Clarity from legislation in Indiana drives filing of a new gas TDSIC plan**. While the company continues to execute its approved TDSIC plans businesses through 2020 and 2022 for gas and electric, respectively, the passage of the H.B. 1470 provides clearer guidelines on items that can be included in a TDSIC plan. As result, management filed and received approval on Oct 16, 2019 for gas TDSIC10 covering $12.4M incremental capital between July 2018 and April 2019.
- **Electric Operations.** New solar projects have been announced for coal replacement capacity and the company expects $1.8B-$2B incremental capital investment opportunities in 2022 and 2023.

- **Settlement and order in Indiana ratecase for rates effective 1Q20.** A final order approving two settlements in NIPSCO's electric ratecase was issued on Dec 4, 2019, including a 9.75% authorized ROE on 47.86% equity for a $4.116B ratebase that resulted in a two-step revenue increase of $42.7M. The case was filed in Oct 2018 in conjunction with a new long-term Integrated Resource Plan (IRP). The settled portion of the case includes a revenue requirement and accelerated depreciation schedule related to early retirement of coal plants, including an agreement to reduce the book lives of $1.5B coal ratebase to match retirement plans at an average 2032 vs. the prior 2030s-2040s. Non-protected accumulated deferred income tax passback amortization has also been agreed at a comfortable 10-year amortization period. It also includes a new rate structure for industrial customers that allows the utility to manage market purchases in order to keep track of capacity requirements (reduces risk of stranded assets).

- **Renewable Generation Projects. Construction continues on Jordan Creek (400 MW) and Rosewater (100 MW) – expected to go in service by year-end**. Recall CPCN filings were made on Feb 1st, 2019 seeking approvals to develop 3 wind farms consistent with the IRP filed in the fall of 2018. Orders approving the PPAs on these filings were received on June 5, 2019 and the wind farms are expected to be built by yearend 2020. On Oct 22, 2019, a Build-Transfer Agreement BTA was filed for Indiana Crossroads (300MW) JV between NIPSCO and EDP Renewables (302 MW). FERC approved order on 2/19/2020 for sections 203 and 205 applications for Rosewater. BTA application was approved for Indiana Crossroads (300MW), a second joint venture between NIPSCO and EDP Renewables. Commercial terms reached on Brickyard Solar (200MW) and Greensboro Solar (100MW) + storage (30MW) PPAs filed. Latest RFP represents replacement ~1,400MW of coal capacity through 2023.

- **Tax equity partnership reached for Rosewater, Indiana Crossroads.** Regulatory approval pending for Brickyard and Greensboro Solar. Altogether, the company expects about $1.0B of tax equity financing to help capitalize ~$2.8-$3.0B of JV renewable projects in Indiana from 2022-2023. The remaining $1.8-$2.0B of NI ratebase investment is expected to be financed with ~60% equity/40% debt.

- **Electric System Modernization** focused on electric transmission and distribution investments aimed at improving safety and reliability of system was filed 8/21/2019, final order was received on Dec 18th 2019 and rates became effective in Jan 2020. TDSIC 6 semi-annual tracker update covering $131.1M in investments from Dec 2018 – June 2019 now in rates. The program originally approved in 2016, contains ~$1.2 billion of electric infrastructure investments expected to be made through 2022. The company's latest tracker update request, covering $131.1 million in incremental capital investments made from December 2018 through June 2019 was approved by the IURC on 2/1 and rates became effective Jan 2020.

- **Integrated Resource Plan (IRP)** submitted in Oct 2018 called for 100% coal retirements by 2028 (vs. prior plan for 50% by 2023), replaced with renewables rather than natural gas. The IRP calls for retirement of 80% of the coal fleet by 2023 and 100% by 2028 (vs. prior plan 50% by 2023). The plan also points toward rapidly declining-cost renewables (wind, solar, batteries) rather than the gas-fired replacements that were planned within the last 2016 IRP. With much of the new generation in service in 2023 and beyond, the ratecase is less important as a near-term earnings driver. The rate filing also includes changes to the depreciation schedules for the IRP's planned early retirements of coal, along with rate design changes to provide more tariff flexibility to industrial customers. Discussions continue with select bidders in second round of RFPs. **Next IRP expected in 2021.**

Valuation

- **Valuation.** Our $26 TP is unchanged and based on peer 2022 P/E multiples within a SoTP. Our TP includes the discounted value of $0.19 uplift in 2024 (worth $3/sh) from expected earnings from $1.8-$2.0B Indiana renewables that will not benefit from AFUDC and will not receive a rate increase until 2024. Meanwhile, our 2022 estimate includes -$0.04 drag from equity issued for these projects (~60% of the ratebase, with half issued in 2022 and half in 2023). We expect the company to attain at least the midpoint of a 5%-7% EPS CAGR (vs 2021) by 2024. We continue to apply a 2.0x premium to the gas utilities for favorable regulatory jurisdictions and lower operational risk since the explosive incident in Lawrence Mass in 2018. We continue to value the electric operation in Indiana at a 2.0x premium for excellent operations and supportive regulation. Risks include 1) ROE risk related to the ongoing ratecases, 2) continued approvals relating to infrastructure replacement/grid modernization programs, 3) commodity risk, 4) interest rate risk, 5) derivative risk, 6) load growth risk particularly in the non-decoupled jurisdictions, 7) weather risk, 8) environmental and climate change risk, 9) physical infrastructure and cybersecurity risk, 10) continued improvement to gas system operations safety, 11) COVID-19 pandemic response load reduction, particularly at the electric utility.

Valuation, Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource Inc. (NI.N)

Method: We arrive at our $26 target price for NI by applying a 2.0x premium to the gas segment peer 2021 P/E to reflect the constructive regulatory environments with capex trackers in place in the jurisdictions that NI operates. We also apply a 2.0x premium to the average peer electric utility 2021 P/E multiple for NIPSCO Electric utility in Indiana to reflect the favorable ratebase growth profile and regulatory environment in the state. Our OUTPERFORM rating reflects a forecasted total return that is equal the group average.

Risk: Risks to our $26 target price and OUTPERFORM rating are: 1) ROE risk related to the ongoing ratecases 2) continued approvals relating to infrastructure replacement/grid modernization programs 3) commodity risk, 4) interest rate risk, 5) derivative risk, 6) load growth risk particulary in the non-decoupled jurisdictions, 7) weather risk, and 8) environmental and climate change risk, 9) physical infrastructure and cybersecurity risk, 10) continued improvement to gas system operations safety after the 2018 explosion incident in Mass. 11) COVID19 load reductions

- **Reported a 3Q20 adj. EPS beat at $0.09 vs cons/CS** $0.02/$0.03 (and vs 3Q19 $0.00) driven by cost and regulatory mitigation which reduced COVID's impact.
- **2021 Guidance Reaffirmed $1.28-$1.36.** The company reaffirmed its 2021 NOEPS guidance of $1.28- $1.36 (CS $1.33 vs. consensus $1.34), which includes $0.00-$0.10 improvement from COVID-19 drag and Columbia Gas synergy impacts in 2020.
- **No change to equity plans: No block equity needed in 2020 and liquidity is ample for 2021, but equity is planned for 2022 and 2023 for Indiana renewables.** Equity plans for 2020 remain $200-$300M annual ATM plus $35-60M employee plans (no convertible or hybrid financing). For 2021, $600-$1,000M for hybrids/convertible are expected for planned renewable generation investments and $500-$700M common block equity in 2022/23 for 60% of $1.8-$2.0B renewables capex (in line with CS).
- **Investor day takeaways.** NI hosted its investor day on Tuesday 9/29, which was mostly in-line with our previewed expectations. Among the biggest takeaways, the **company reiterated 7%-9% EPS CAGR** with a jump in 2024 (only 5%-7% through 2023) after Indiana renewables come in service (build-own-transfer so no AFUDC). We expect the company to attain at least the midpoint of a 5%-7% EPS CAGR (vs 2021) by 2024 after renewables are in service.
- **Columbia Gas of Massachusetts sale to ES closed Oct 9.** Net proceeds of $1.1B will be used to pay down term loan and company's short term debt. Recall, on July 2, NI announced that it will pay $56M to settle and resolve the state's investigation into the 2018 Greater Lawrence incident.
- **2020 Capital reaffirmed at $1.7-$1.8B and its 5yr plan (2021-2024) left unchanged at ~$9.9B- $10.5B.** NI reaffirmed its 2020 expected capex at $1.7B-$1.8B and continues to identify total expected investment opportunities of ~$9.9B- $10.5B from 2021-2024 of which ~20% is expected for renewables Investment, ~20% for electric infrastructure and asset modernization, and ~60% for gas infrastructure and asset modernization.
- **Additional Renewable Generation.** NI executed Build-Transfer Agreements with NextEra (NEE) for three solar and storage projects in Indiana which represent $850M in NIPSCO capital investment.
- **Gas Regulatory Update:** Rate case settlement reached in Maryland which includes $3.3M total increase in annual revenue ($2M net of infrastructure trackers). Final order is expected in Nov with new rates becoming effective in Dec. Additionally, final orders are still expected for Pennsylvania, Kentucky, NIPSCO's modernization program and Virginia's Energy (SAVE) Annual Rider Update.
- **Rosewater and Indiana Crossroads remain on track** and they are expected to be in service YE2020 and YE2021 respectively. Jordan Creek is also on track and in service date remains YE2020.

- **Liquidity update.** NI's net liquidity available is ~\$1.6B as of Sep 30th (vs. ~\$2B on June 30th). Total long term debt is ~\$9.1B with a weighted average maturity of ~15 years and a 3.68% interest rate as of September 30th vs the prior update in June which included a ~\$10B debt level, with ~\$8.7B of long-term debt, with a weighted average maturity of ~16 years and a 4.31% interest rate. Additionally, the company expects no significant refinancing needs through 2024.
- **See our recent reports:** 10/15 Earnings Preview, 9/30 Investor Day Takeaways, 9/27 Investor Day Preview, 8/7 Indiana Turning Green, 5/26 Left Behind but Holding Up Well, 5/11 COVID-19 Adds Near-Term Uncertainty, but Long-Term Fundamentals Remain Strong, 5/5 1Q20 Earnings Preview, 2/28 Raise to Outperform on Sale of Mass, Elimination of Block Equity Plan, 2020 Outlook – Getting Meaner and Less Defensive,
- **Call Today at 11AM ET.**

Valuation, Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource Inc. (NI.N)

Method: We arrive at our $26 target price for NI by applying a 2.0x premium to the gas segment peer 2021 P/E to reflect the constructive regulatory environments with capex trackers in place in the jurisdictions that NI operates. We also apply a 2.0x premium to the average peer electric utility 2021 P/E multiple for NIPSCO Electric utility in Indiana to reflect the favorable ratebase growth profile and regulatory environment in the state. Our OUTPERFORM rating reflects a forecasted total return that is equal the group average.

Risk: Risks to our $26 target price and OUTPERFORM rating are: 1) ROE risk related to the ongoing ratecases 2) continued approvals relating to infrastructure replacement/grid modernization programs 3) commodity risk, 4) interest rate risk, 5) derivative risk, 6) load growth risk particulary in the non-decoupled jurisdictions, 7) weather risk, and 8) environmental and climate change risk, 9) physical infrastructure and cybersecurity risk, 10) continued improvement to gas system operations safety after the 2018 explosion incident in Mass. 11) COVID19 load reductions

** Asterisk signifies initiation or assumption of coverage.*

As of December 10, 2012 Analysts' stock rating are defined as follows:
Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.
Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.
Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.
**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*
Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.
Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.
Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:
Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.
Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.
Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.
**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	50%	(33% banking clients)
Neutral/Hold*	37%	(28% banking clients)
Underperform/Sell*	12%	(20% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.

**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

For valuation methodology and risks associated with any recommendation, price target, or rating referenced in this report, please refer to the disclosures section of the most recent report regarding the subject company.

This report is produced by subsidiaries and affiliates of Credit Suisse operating under its Global Markets Division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Goldman Sachs & Co. LLC

NiSource (NI, Buy) reported 3Q20 operating EPS of $0.09, above both GS/FactSet consensus at $0.00/$0.03, driven largely by cost and regulatory mitigation efforts at both gas and electric segments. The company also reiterated 2021 guidance in the range of $1.28-$1.36 (midpoint $1.32) versus GS/consensus of $1.33/$1.34. NI continues to expect EPS to grow 7 to 9% from 2021-2024 and 5 to 7% through 2023 as highlighted at its September investor day; our current estimates reflect a 7.1% CAGR from 2021-2024.

Key takeaways from NI's release and slides include:

- **EPS growth trajectory reaffirmed:** 5-7% CAGR from 2021-2023, 7-9% from 2021-2024. We note management had previously discussed growth through 2024 as relatively back-end loaded given the financing/regulatory lag associated with the ~$1.8-$2.0bn of renewable investments in Indiana. Our estimates reflect a 7.1% EPS CAGR from 2021-2024.
- **NI completed the sale of Columbia Gas of Massachusetts (CMS)** on October 9th, with the $1.1bn in proceeds utilized to pay down its term loan and other short-term debt.
- **NI in October announced 900 MW of additional renewable generation** in Indiana as part of the forecasted $1.8 to $2.0 billion renewable investment plan through 2023. This joint venture brings the total NI investmental to $1.25bn, with $0.6-$0.8bn in other projects currently in negotiation.
- **3Q20 performance beat was largely driven by cost management which offset COVID-19 related impact**, which totaled -$0.01 for the quarter and -$0.07 YTD.

Key topics to monitor on NI's earnings call include (1) strategic thoughts on one or more of its gas utility businesses, (2) updated thoughts on timing of hybrid/equity issuance, (3) additional color on O&M trajectory, and (4) update on potential for property insurance recovery related to the MA gas incident

Our $27, 12-month price target embeds our industry base target P/E multiple of 20x to 2021 EPS estimate of $1.34. Key risks include (1) legal and regulatory risks, (2) earnings/cash impact due to COVID-19, (3) higher-than-expected O&M, (4) electricity demand and customer growth, and (5) financing.

Reg AC

I, Insoo Kim, CFA, hereby certify that all of the views expressed in this report accurately reflect my personal views about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for NiSource Inc. is/are relative to the other companies in its/their coverage universe:

Ameren Corp., American Electric Power, American Water Works, Atmos Energy Corp., Avangrid Inc., CMS Energy Corp., Centerpoint Energy Inc., Clearway Energy Inc., Consolidated Edison Inc., DTE Energy Co., Dominion Energy Inc., Duke Energy Corp., Edison International, Entergy Corp., Essential Utilities Inc., Evergy Inc., Eversource Energy, Exelon Corp., FirstEnergy Corp., NRG Energy Inc., NextEra Energy Inc., NextEra Energy Partners, NiSource Inc., OGE Energy Corp., PG&E Corp., PPL Corp., Pinnacle West Capital Corp., Portland General Electric Co., Public Service Enterprise Group, Sempra Energy, Southern Co., WEC Energy Group, Xcel Energy Inc.

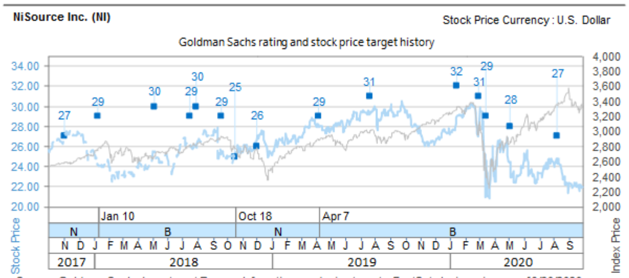
Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	49%	35%	16%	64%	57%	54%

As of October 1, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,122 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



Source: Goldman Sachs Investment Research for ratings and price targets; FactSet closing prices as of 9/30/2020.

The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Ouvidoria Goldman Sachs Brasil: 0800 727 5764 e/ou ouvidoriagoldmansachs@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by either Goldman Sachs Canada Inc. or Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

J.P. Morgan Securities LLC

- **3Q20 EPS well ahead of estimates on cost savings.** 3Q20 operating EPS of $0.09 beat JPMe/Street median estimates of $0.01/$0.03, respectively. COVID-19 impacts moderated to -1c from 2Q20's -6c, before cost savings, for a -7c YTD drag. Gas distribution operating earnings increased +$36.1mm and electric operating earnings decreased -$2.5mm. Drivers include new rates from infrastructure replacement programs and CEP (+$16.7mm), net cost savings (+$20.2mm), and COVID-19 impacts (-$2.4mm, including +$5.8mm increased residential usage benefit). NI also realized YoY benefits from the sale of emission reduction credits and a favorable insurance reserve adjustment.

- **Quiet release as expected following Sept Investor Day, Oct renewables project update.** NI reaffirmed its $1.7-1.8bn 2020 capex, $1.28-1.36 2021 NOEPS guidance, 7-9% 2021-24 EPS CAGR, and associated 10-12% average annual rate base growth, consistent with the company's Sept 29 Investor Day update. We also note NI's Oct 21 announcement of three finalized build transfer agreements to acquire the Dunns Bridge I Solar (265MW), Dunns Bridge II Solar (510MW) and Cavalry Solar (260MW) projects as part of planned $1.8-2.0bn renewables investments. The projects represent an $850mm NIPSCO investment and have 2022-23 expected in-service dates (subject to IURC approval; 4Q20 CPCN filing expected). NIPSCO has now executed total agreements of ~$1.25bn. Given the relatively quiet release, we expect attention on management commentary around post-CMA sale cost savings, NI's recently announced renewables investments, potential portfolio optimization efforts to offset equity financing needs, and anticipated 4Q20 COVID-19 impacts.

- **Outlook remains constructive.** We continue to see growth as attractive relative to peers and subject to manageable execution risk, with the potential to accelerate a re-weighting toward the company's electric operations through portfolio optimization representing a powerful tool despite standing outside NI's current plan.

- **Conference call details.** NI will host a conference call to discuss 3Q20 results on Monday, November 2, at 11:00 AM EST. Webcast link here.

Table 1: NI 3Q20 Results

Income Statement:	Actual 3Q19	Actual 3Q20	JPM 3Q20E	% Chg Y/Y	% Chg vs JPMe	YoY Drivers
Operating Earnings	108	148	120	38%	23%	Infra replacement programs new rates ($16.7mm), net cost savings ($20.2mm)
Net Income	(2)	36	5	N/A	661%	Higher Other Income (sale of emission reduction credits)
Share Count	374	384	386	3%	-1%

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, www.jpmorganmarkets.com.

Coverage Universe: Sunderland III, Richard W: AES Corp. (AES), Algonquin Power & Utilities Corp. (AQN.TO), Allete Inc. (ALE), American Water Works Company, Inc. (AWK), Avangrid, Inc (AGR), Emera Inc. (EMA.TO), Fortis Inc. (FTS.TO), NiSource Inc. (NI), PG&E Corp. (PCG), SJW Group (SJW), South Jersey Industries (SJI), Southwest Gas Holdings Inc. (SWX), Spire Inc (SR)

J.P. Morgan Equity Research Ratings Distribution, as of October 10, 2020

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage	47%	39%	14%
IB clients*	52%	49%	37%
JPMS Equity Research Coverage	46%	40%	14%
IB clients*	75%	70%	55%

*Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months. Please note that the percentages might not add to 100% because of rounding.
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. Any data discrepancies in this material could be the result of different calculations and/or adjustments. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material.

Strong 3Q and Guidance Reaffirmed

NI reported strong 3Q EPS driven by lower O&M. NI maintained its 2020 capex guidance of $1.7B-$1.8B and 2021 adj EPS guidance of $1.28-$1.36 (incl. $0.05/share impact from COVID). Management noted some modest C&I load impacts from the pandemic which are partially offset by higher residential vols. Additionally, lower costs help mitigate the negative impacts on revenues. During the call, we will listen for an update on the potential impact on gas utility from the pandemic during the heating season and changes in bad debt. On its recent Investor Day, management discussed the hybrid financing of its capex in 2021 and we expect the focus on the call will be on timing and what options is management reviewing. On Oct 21st, NIPSCO announced it will add an incremental 900MWs of renewable generation as part of its transition strategy. NI finalized $850MM of build-transfer agreements with NextEra for 3 Indiana solar & storage projects. During the call, we will also listen for an update on pending regulatory filings, in particular $100.4MM revenue increase request in PA. New rates are expected in January 2021. We expect strong 3Q will be well received by investors.

Results: 3Q EPS Above UBSe/Consensus

NI reported 3Q adj EPS of $0.09 above UBSe of $0.02 and Consensus of $0.03. The beat was primarily driven by lower O&M in Gas Distribution segment. Gas Distribution operating income of $9.7MM was above UBSe of ($9.1MM) loss, while Electric Utility segment op. income was $132.9MM, 3% above UBSe. On Oct 9th, NI completed the sale of the Columbia of MA.

Increasing Estimates

To reflect 3Q earnings, we are increasing 2020E EPS by 5% to $1.37. We are maintaining our 2021/2022E EPS roughly unchanged.

Valuation:

We maintain Neutral rating and $25 PT.

Forecast price appreciation	+8.8%
Forecast dividend yield	4.0%
Forecast stock return	+12.9%
Market return assumption	5.2%
Forecast excess return	+7.7%

Valuation Method and Risk Statement

Risks include, but are not limited to, the following: changes to the regulatory environment, ability to achieve favorable returns on investment projects, and ability to continue to reinvest in the business for growth. Our price target is derived using a sum-of-the-parts P/E valuation.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 02 November 2020 01:15 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	50%	31%
Neutral	FSR is between -6% and 6% of the MRA.	38%	29%
Sell	FSR is > 6% below the MRA.	12%	19%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 September 2020.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Aga Zmigrodzka, CFA, Brian Reynolds, Shneur Z. Gershuni, CFA.

The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse

Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. This report is not an offer of securities in Indonesia and may not be distributed within the territory of the Republic of Indonesia or to Indonesian citizens in circumstance which constitutes an offering within the meaning of Indonesian capital market laws and regulations.

The disclosures contained in research documents produced by UBS AG, London Branch or UBS Europe SE shall be governed by and construed in accordance with English law.

Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates ("UBS") with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliarios Ltda, UBS Asesores Mexico, S.A. de C.V., UBS Securities Japan Co., Ltd, UBS Wealth Management Israel Ltd and UBS Menkul Degerler AS are affiliates of UBS AG. UBS Financial Services Incorporated of Puerto Rico is a subsidiary of UBS Financial Services Inc. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain and does not undertake banking or investment business activities in Bahrain. Therefore, clients have no protection under local banking and investment services laws and regulations. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This research report is neither intended to be distributed to PRC investors nor to provide securities investment consultancy services within the territory of PRC. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. NI – 3Q Earnings Beat; Renewables Projects Taking Shape, COVID Remains Factor to Watch Headed into Heating Season

Key Message: NiSource reported 3Q20 earnings, beating Guggenheim and consensus estimates. Mgmt. reiterated LT EPS growth, FY21 EPS guidance, and capital spending that were updated at the investor day a month ago. Mgmt. continues to make progress on its renewable generation additions at NIPSCO – three more projects were announced with more coming before yearend. Mgmt. continues to forecast conservatively for FY21 EPS guidance, and COVID impacts during the heating season in 4Q will give us a better sense of FY21.

Key takeaways: NI reported 2Q20 adj. EPS of $0.09 vs. Guggenheim at $0.04 and Street at $0.03 driven mainly by higher operating earnings at the gas distribution segment and roughly flat operating earnings at the electric segment YoY. **Mgmt. reiterated the FY20 capital spending guidance of $1.7B-$1.8B, EPS growth of 5-7% and 7-9% from 2021-2023 and 2021-2024, respectively, and FY21 EPS guidance of $1.28-$1.36 – all consistent with our model.** Three more build transfer solar and storage projects were announced on Oct. 21 and represent $850M of investment in capital investment – NI has announced $1.25B of the $1.8B-$2.0B in renewable investment and the announced projects are working through their respective regulatory processes. There are still five to seven projects in advanced negotiations and we expect more clarity on these projects before yearend – potentially through an 8K. Financing plan reaffirmed with block equity needs in 2022-2023 related to the renewables spending. **When asked about asset sales to mitigate the equity needs, Mgmt.'s commentary around potential portfolio optimization was unchanged – they would look to monetize assets if it were accretive to shareholders. That said, we aren't sure LDC sales could make sense in this environment given the sector's current depressed trading multiples – in other words, we aren't certain whether selling an LDC, that is earnings accretive and a perpetual cashflow generator, at trough multiples to simply mitigate some NT equity needs is the most efficient use of capital.**

Continued progress on renewable projects at NIPSCO – three more projects announced recently with $550M-$750M in projects still under negotiation. NI has $0.4B in approved projects, $850M in projects awaiting approval and $550M-$750M in projects in advanced commercial negotiations. The tax equity investment totals ~$1.0B and will be additive to rate base over time as the tax equity partners farm out the benefits. Since the 2Q20 call, Indiana Crossroads, the 300 MW build transfer wind project, has commenced construction. Rosewater and Jordan Creek are still under construction and mgmt. expects them to be in-service by the end of the year. Brickyard Solar, 200 MW PPA, Greensboro Solar, 130 MW PPA, Dunns Bridge I Solar, 265 MW build transfer, Dunns Bridge II Solar, 510 MW build transfer, and Cavalry Solar, 260 MW build transfer are still awaiting regulatory approval. There are five to seven projects in advanced negotiations, mostly solar. We look forward to an update on additional projects before yearend.

Base capital plan remains strong with a majority of the investment recovered within 18 months. The updated capital plan includes spending on safety and modernization of $8.1B-$8.5B from 2021-2024, or $1.9B-$2.2B annually. Over 75% of these investments start earning in less than 18 months due to favorable regulatory mechanisms in NI's service territories.

Managing the COVID-19 impact through cost cutting and regulatory support. The impacts of COVID-19 in 3Q were mostly in line with mgmt.'s expectations. YoY for the third quarter, residential, commercial, and industrial gas margins were $0.3M, $(1.8M), and $(0.8M) while residential, commercial, and industrial electric margins were $5.8M, $(3.1M), and $(1.3M). The impact of COVID-19 on 3Q20 EPS was ~$(0.01), offset with cost cutting

See pages 4 - 5 for analyst certification and important disclosures.

and regulatory support. Mgmt. still expects a gradual recovery of the economy into 2021. **Mgmt. still expects ~$(0.05) of COVID-19 impact into 2021 – roughly $0.03 gas and $0.02 electric.** The impacts will be critical to keep an eye on as we move through the winter heating season. **Mgmt. has not seen an impact to date in the fourth quarter**. NI has bad debt or incremental COVID-19 expense trackers in most states and is not pursuing any more regulatory support, but that may change depending on the impact of the pandemic.

Financing plan put together with investment grade credit metrics in mind – flexibility built into plan. Mgmt. reiterated its financing plan that was updated at the investor day. As a reminder, mgmt. broke down capital needs between core investments in safety and modernization and investments in renewables. Mgmt. assumes issuing $230M-$350M annually between 2021 and 2023 through ATM and ESPP/401K/Other and $500M-$700M in LT debt annually from 2022-2024 to support core capex. The renewables investments will be funded by $600M-$1,000M in hybrids, convertibles, etc., in 2021, block equity issuance of $500M-$700M total in 2022-2023, and LT debt of $500M-700M total in 2022-2023. **Though the midpoints of the renewables equity stipulate $1.4B, mgmt. confirmed that they are targeting $1.2B, or ~60%.** The capital structure of the issuances gives us some insight into what NI may ask for in the 2023 rate case. **Mgmt. stated they have flexibility in the financing plan to potentially look at a forward equity issuance to remove the pricing overhang.** LT adj. FFO/total debt target ~14-15% and investment grade credit metrics continue to be a focus for mgmt. Liquidity is sufficient and there are no significant refinancing needs over the plan.

What about portfolio optimization? Messaging unchanged from the analyst day… Mgmt. continuously reviews its assets and said it would not be opposed to divesting additional LDCs if it is accretive for shareholders. Mgmt. does not assume any portfolio optimization in its financing plan but additional LDC and noncore asset sales could offset some financing needs. Mgmt. stated that any sale would have to be value-add to shareholders and, in our view, this may be a tall task given where LDCs trade at this time; however, certain players may be willing to pay up. If mgmt. were to divest any of its gas operations, they would essentially be swapping gas for electric, which could be multiple accretive in this market. **The CMA transaction was closed on Oct. 9.**

NI reported 3Q20 adj. EPS of $0.09 vs. $0.00 in 2019. Gas segment operating earnings were up ~$36.1M YoY driven by new rates from infrastructure replacement programs and Columbia of Ohio's CEP, customer growth, lower employee and administrative expenses, and lower outside service costs partially offset by the effect of lower C&I demand, and decreased late payment fees and reconnection fees. Electric segment earnings were lower by ~$2.5M YoY driven by the effect of lower C&I usage, higher depreciation rates, higher outside service costs, and increased material and supplies cost partially offset by new rates from the base rate proceeding and higher residential demand.

We are raising our FY20 EPS estimate to account for 3Q actuals. We maintain our FY21-FY23 estimates.

Source: Guggenheim Securities, LLC estimates, company filings

Valuation

We apply an 18x multiple on the electric utility and 21x multiple on the gas LDCs. We arrive at our valuation utilizing a sum-of-the parts analysis, based on: (1) ~$10/share for the regulated electric utility; (2) ~$20/share value for the regulated gas segment given the limited spread from LDCs after recent market volatility; and (3) (~$-3)/share for other adjustments for Corp and Other. We use this sum of the parts to arrive at our $27 valuation.

Risks

The primary risk on the regulated utility encompass the traditional risk factors inherent with all utilities including: (1) rate case risk, (2) lower capex outlook, and (3) interest rate changes above what we account for in our regression model.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Guggenheim Securities, LLC or its affiliates expect(s) to receive or intend(s) to seek compensation for investment banking services from NiSource Inc. in the next 3 months.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

Rating and Price Target History for: NiSource Inc. (NI) as of 10-30-2020

Created by: BlueMatrix

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

NiSource Inc.

NI: Rebuilding The Track Record

Overweight/$27

Natural Gas LDCs

Price Target Change

- **Summary.** In the month since NI's 9/29 Investor Day (takeaways here), the company has announced progress on multiple fronts. First and foremost, NI and ES closed on the CMA transaction on 10/9, which also resolves the state investigations into the 2018 Greater Lawrence event. Further, on 10/21, the company announced three renewable build-transfer agreements with NEE. While both of these items are consistent with the plan, we are encouraged to see progress; we view the re-building of the company's track record as one of the key drivers to our positive thesis. Moving forward, we look for NI to (1) execute on near-term financial targets including 2021 EPS guidance of $1.28-1.36, (2) secure approvals for announced renewable projects, (3) finalize agreements related to outstanding renewable capex plans and, last but certainly not least, (4) secure equity financing and/or execute on asset sales to mitigate equity needs – could be a multi-year process.

  We reiterate our Overweight rating as we see a path for NI to garner a premium multiple relative to gas/electric peers (versus the current 2-3% discount) supported by above-average EPS growth prospects and supportive regulatory constructs. No change to our '20-24E EPS of $1.26, $1.32, $1.40, $1.50 & $1.66, respectively. We increase our price target to $27/sh (19X on our '22E) from $25/sh on higher peer group multiples since our last update. Key risks to our thesis include a greater than expected COVID impacts on sales in the winter heating season, operational/event risk (pipe incidents), unexpected cost pressures, and negative regulatory/political developments (pushback on renewable proposals, anti-gas policies, etc.).

- **Renewable Additions.** Since the analyst day update, NI announced plans to add 900 MWs of renewables via the Dunns Bridge I, Dunns Bridge II and Cavalry Solar Energy Centers. The company executed build-transfer agreements with NEE and the projects are to be operational in the 2022-2023 time frame. NI will own the projects, which total ~$850mm of capital investment for the company, via JV tax equity arrangements. NI plans to submit regulatory filings for the new projects by year-end. As a reminder, NI targets $1.8-2.0B of renewable investment through 2023 (net of JV/tax equity financing) – $0.4B has been approved, $0.8B is backed by finalized agreement subject to regulatory approval, and $0.6-0.8B remain in the negotiation phase.

- COVID Comments. YTD, COVID has had an EPS impact of negative $0.07 *before* cost and regulatory offsets. While we are encouraged by the company's ability to manage the impacts thus far, NI highlighted that the financial implications on gas sales have not yet been observed in the winter months – further, many of the LDCs have residential decoupling (and/or high fixed charges), which suggests that higher residential sales will not necessarily provide a meaningful offset to lower C&I volumes. Mgmt. continues to forecast a $0.05 COVID impact in 2021.
- Equity Needs. NI affirmed previously communicated equity financing plans including $600-1,000mm of hybrids/convertibles in '21E and $500-700mm of aggregate block equity during the period '22-23E on top of ongoing plans ($200-300mm annually under the ATM '21-23E and $30-50mm annually under employee/other programs). The company is in the process of assessing the lowest cost sources of equity, which could include asset/system sales. Management clarified that portfolio optimization is not new to the story and will be considered in the context of what is optimal for shareholder value and credit quality.

Acronyms
ATM – At-the-Market
C&I – Commercial & Industrial
CMA – Columbia Gas of MA
JV – Joint Venture
MW – Megawatt

Price Target

Price Target: $27 from $25

Our price target is based on a P/E multiple analysis (apply a 5-7% premium to the blended gas/electric peer group multiple of ~18X on our '22E EPS). Risks include lower than expected sales growth, unfavorable regulatory developments, and unexpected cost pressures.

Investment Thesis

We rate shares Overweight. We are attracted to NI's robust long-term infrastructure growth opportunities and supportive regulatory treatment.

Company Description

Based in Merrillville, Indiana, NiSource, Inc. is a holding company with regulated gas (64%) and electric (36%) utility operations across seven states. The company's Gas Distribution Operations serve 3.5 million customers in Indiana, Kentucky, Maryland, Massachusetts, Ohio, Pennsylvania, and Virginia. The Electric Operations consist of a vertically-integrated utility serving approximately 500 thousand customers in northern Indiana. On July 1, 2015, NiSource completed the separation of Columbia Pipeline Group (CPG) from NiSource via the distribution of one share of CPG common stock for every share of NI common stock.

NiSource Inc

NI-NYSE	Rating	Price: Nov-2	Target	Total Rtn
	Outperform	$23.45	$27.00	19%

Let the Sunshine IN

Bottom Line:

NiSource reported 3Q20 adjusted EPS of $0.09 vs. our/Street's estimate of $0.03. Management reaffirmed 2021 EPS guidance of $1.28-1.36, inclusive of $0.05 of COVID-19 impacts. The company's outlook remains unchanged from its recent investor day in September with a NOEPS CAGR of 5-7% from 2021 to 2023, rising to 7-9% including the full-year impact of its renewable investment in the rate base in 2024 at NIPSCO. **In October, NiSource finalized build transfer agreements with NextEra for three solar and storage projects totaling 900MWs, representing capital investment at NIPSCO of $850mm.**

Key Points

During the quarter, NIPSCO announced it finalized three build transfer agreements with NextEra Energy Resources (NEE; $75.13; Outperform) for 900MWs of solar and storage projects totalling a capital investment of $850mm. The three projects, Dunns Bridge I (265MW, in-service 2022E), Dunns Bridge II (510MW, in-service 2023E), and Cavalary Solar (260MW, in-service 2023E) are expected to begin construction in 2022 and be recovered through rate base in 2023. **Management continues to expect total renewable investments of $1.8-2B at NIPSCO through 2023 with expectations for additional capital investments of $550-750mm.**

With the third quarter a not a meaningful contributor for NiSource (our estimate of ~7% of annual earnings this year), the YoY beat was driven by successful cost and regulatory mitigation efforts. **Year to date, NiSource has largely offset $0.07 of COVID-19 impacts through cost and regulatory mitigation efforts and continues to expect COVID-19 to impact 2021 EPS by $0.05, which is currently reflected in the company's base case guidance of $1.28-1.36.**

The financing plan update given during its September analyst day remains unchanged with expectations to issue total equity of approximately $1.2B from 2021 to 2024 to finance ~60% of the $1.8-2.0B investment in renewables. Our base case assumes $600mm in hybrids in 2021 and $300mm of block equity in 2022 and 2023.

Despite its decarbonizing profile and visible gas infrastructure growth, we acknowledge the valuations for pure-play gas distribution companies continue to come under pressure, which will create a headwind for the re-rating of the stock. **We reiterate our Outperform rating and $27 target price, which reflects our longer-term view that with consistent execution and the company's above-average growth profile, NiSource still represents an attractive relative value opportunity.**

Scenarios

Valuation

Our $27 target price is the product of a P/E-based sum of the parts. We utilize a regulated average multiple using 2022E EPS as base valuation and then make specific adjustments to reflect our current view of the fundamental outlook. For NI, we have removed EPS for its MA gas business from our P/E valuation and instead include only the asset value (1x equity rate base) in our SOTP framework.

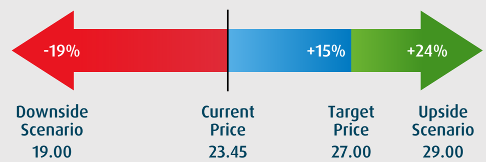
Upside Scenario $29.00

Our upside scenario reflects continued multiple expansion associated with the company's premium and above-average earnings and dividend growth profile.

Downside Scenario $19.00

Our downside scenario reflects a tightening monetary policy and a deceleration of the company's rate base growth.

in USD



Key Catalysts

Initial indicative pricing in its second renewable RFP in IN. Potentially, capital spending and growth rate update in 2H20 given clarity in the aforementioned RFP and recent rate orders in MA and IN.

Company Description

NiSource, Inc. is a regulated utility holding company, serving approximately 3.5 million natural gas customers and 500,000 electric customers across seven states. Through its Columbia Gas and NIPSCO brands, it provides natural gas, electricity, and other products and services. The company was founded in 1987 and is headquartered in Merrillville, Indiana.

IMPORTANT DISCLOSURES

Analyst's Certification

I, James M. Thalacker, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosures

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months from NextEra Energy.

Disclosure 6C: NextEra Energy is a client (or was a client) of BMO Nesbitt Burns Inc., BMO Capital Markets Corp., BMO Capital Markets Limited or an affiliate within the past 12 months: C) Non-Securities Related Services.

Disclosure 9B: BMO Capital Markets makes a market in NiSource Inc in United States.

Methodology and Risks to Target Price/Valuation for (NEE-NYSE)

Methodology: Our $317 target price is arrived at using a sum-of-the-parts methodology. Our framework begins with the relevant sector average P/E and EBITDA multiple using 2022E EPS as a base, which we then adjust (premium, discount, or no change) to reflect the relative fundamentals of that segment.

BMO Capital Markets

Risks: NEE's regulated electric and gas distribution companies are subject to numerous state and federal regulatory agencies that determine the rates they can charge for their services. Utility businesses are highly correlated to interest rate movements. NEE's development of solar and wind generation assets are often dependent on the presence of Federal and State Tax incentives that may not be renewed. NEE owns and operates multiple nuclear generation assets that are subject to Federal and State regulatory on operational and safety standards.

Methodology and Risks to Target Price/Valuation for NiSource Inc (NI-NYSE)

Methodology: Our $27 target price is the product of a P/E-based sum-of-the-parts (SOTP) analysis of the company's primary regulated operating companies. We utilize a regulated group-average multiple based on 2022E EPS as our initial basis for valuation and then make adjustments specific to each jurisdiction to reflect our current view of the fundamental outlook.

Risks: NI's regulated profile exposes the company to business risk including but not limited to federal and state regulatory risk, federal and state political risk, environmental policy, interest rate risk, access to capital markets, construction risk, changes in customer demand trends, changes in customer affordability, extreme weather, natural disaster, and equipment failure.

Ratings Key (as of October 2016)

We use the following ratings system definitions:
OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis;
Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis;
Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis;
(S) = Speculative investment;
Spd = Suspended - Coverage and rating suspended until coverage is reinstated;
NR = No Rated - No rating at this time; and
R = Restricted - Dissemination of research is currently restricted.

The total return potential, target price and the associated time horizon is 12 months unless otherwise stated in each report. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small Cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

Additional Matters

This report is directed only at entities or persons in jurisdictions or countries where access to and use of the information is not contrary to local laws or regulations. Its contents have not been reviewed by any regulatory authority. BMO Capital Markets does not represent that this report may be lawfully distributed or that any financial products may be lawfully offered or dealt with, in compliance with regulatory requirements in other jurisdictions, or pursuant to an exemption available thereunder.

To Australian residents: BMO Capital Markets Limited is exempt from the requirement to hold an Australian financial services licence under the Corporations Act and is regulated by the UK Financial Conduct Authority under UK laws, which differ from Australian laws. This document is only intended for wholesale clients (as defined in the Corporations Act 2001) and Eligible Counterparties or Professional Clients (as defined in Annex II to MiFID II).

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Colin Hamilton, Alexander Pearce, Raj Ray, David Round or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and distributed by BMO Capital Markets Limited or Bank of Montreal Europe Plc and is subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom and the Central Bank of Ireland (CBI) in Ireland. FCA and CBI regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore each of BMO Capital Markets Limited and Bank of Montreal Europe Plc will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To E.U. Residents: In an E.U. Member State this document is issued and distributed by Bank of Montreal Europe plc which is authorised and regulated in Ireland and operates in the E.U. on a passported basis. This document is only intended for Eligible Counterparties or Professional Clients, as defined in Annex II to "Markets in Financial Instruments Directive" 2014/65/EU ("MiFID II").

Compelling Re-Rate Story

Strong Q3 adjusted EPS beat. NI posted $0.09 in Q3'20 operating EPS versus consensus of $0.03 and our estimate of $0.05/share. Earnings increased $0.09/share YoY driven by cost management and regulatory mitigation efforts. Note that the third quarter does not contribute significantly to NI's full-year EPS results (we estimate 7% of our total estimate this year) because it occurs in the off-peak months of gas demand. NiSource maintained its 2021 EPS guidance of $1.28-1.36/share, which includes -$0.05 impact from COVID. As expected, the company reaffirmed all of its long-term EPS, capex and financing guidance in 2021 through 2024 that it announced at its recent Investor Day on Sept. 29th. Recall NiSource recently announced build transfer agreements with NEE for three Indiana solar projects, representing capex of $850mm, which had already been contemplated in its plan. The projects are expected to be under construction by 2022 and placed into service in 2022 and 2023. The company is also in advanced negotiations for another 5-7 renewable projects that are expected to complete the remaining $550-750mm of its renewable capex plans through 2024. Announcements on projects are likely to come as they progress between now and year-end. Separately, as previously announced, NI closed on its sale of MA assets on Oct. 9th, with net proceeds of $1.1bn used to pay down its term loan and other short-term debt. Lastly, NiSource did not comment meaningfully on asset sales, a topic that has gained investor interest since NI pointed out at its Analyst Day that its financing plan does not include any "portfolio optimization."

We see NI benefitting from a potential tax rate increase under Biden. Biden's tax proposal calls for raising federal income tax (FIT) rate from 21% to 28%. NI is a 100% regulated utility, so a higher FIT rate doesn't lower profitability and should be passed through to customers in the form of higher rates. This increase in tax collections would raise holding company cash flow. This will lower parent financing costs and strengthen credit metrics. A higher FIT rate results in lower parent because of a larger tax shield. In our Biden note we estimated increase in the FIT rate under a potential Biden presidency could result in 3.0% EPS accretion in 2022 (vs group average of 0.7% accretion).

We continue to see support for a compelling re-rate story. NI has struggled with EPS growth since the Massachusetts incident and EPS is expected to be essentially flat between 2018 and 2021. We expect the stock to re-rate with the Massachusetts divestiture now behind NiSource and now that strong growth expectations have been reset off of a 2021 baseline. NI has historically traded at a premium (call it merger-related or gas LDC) and is now at a ~10% discount. As we pointed out earlier we see NI as a relative winner under a potential Biden administration.

Risk/reward is palatable. We are maintaining our 2020-2022 EPS forecast of $1.26 / $1.34 / $1.41 and our price target of $26 using our SOTP. We believe the stock underperformance the last six months presents an attractive entry point with a total return profile of >15% at our target. Our bear case derives a $21 target while our bull is $28.

2020 Investor Day Highlights

EPS growth and dividend forecast: NiSource now expects to deliver a back-end loaded 7-9% net operating EPS CAGR in 2021 through 2024. Notably, the annual EPS growth is forecasted to be 5-7% in 2021 through 2023. The company is targeting a long-term 60-70% dividend pay-out ratio.

Capital program and rate base growth: NiSource announced $40 billion in infrastructure investment opportunities over 20 years, an increase of $10 billion over prior expectations. The company outlined a $9.9-10.5 billion capital plan in 2021 through 2024, which is expected to drive a 10-12% rate base CAGR. Gas currently represents roughly 65% of rate base while electric is 35%, but the mix is expected to shift more towards electric over the coming years with $400-600 million of base electric investments and $1.8-2.0 billion of renewable generation opportunities primarily in 2022 and 2023. The capital forecast is comprised of 60% gas infrastructure & asset modernization, 20% renewable investments and 20% electric infrastructure & asset modernization. Specifically, NI's capex forecast for 2021-2024 is $2.0-2.3 / $2.4-2.7 / $3.3-3.6 / $1.9-2.2 billion, which has a meaningful increase in 2023 due to the renewable investments. Roughly $5.5-5.7 billion is expected to be recovered through tracker mechanisms in less than 18 months, $1.9-2.0 billion on maintenance/other to be recovered through periodic rate cases and $0.7-0.8 billion of growth investment to be recovered in less than 3 months. The renewables investment is expected to be recovered in a 2023 electric rate case with rates anticipate to be effective in 2H 2023.

O&M forecast: NiSource's "Next" initiative and the Columbia Gas of Massachusetts sale are projected to drive an 8% reduction in O&M costs in 2021 from 2020. Subsequently, O&M is expected to be "relatively flat" in 2021 through 2024. Cost initiatives under way include voluntary separation program savings and the following improvements identified: streamlined organization structure, evolved business services, work standardization, greater field mobility and connected customer experience. Modernization-driven fuel and cost reductions are also under way.

Rate increases: NiSource is targeting moderate annual rate increases in the low-to-mid single digit percentage thanks to O&M management and the changing generation mix (i.e. replacing coal with renewables).

Financing strategy: NiSource continues to target a long-term adjusted FFO to debt of 14-15% through a combination of block equity, ATM equity, employee equity, hybrid/convertibles and long-term debt in 2021-2024. The company is targeting renewable investment financing at 60% equity. There are no major debt maturities through the planning horizon in 2021-2024.

Source: NiSource Analyst Day 2020 Presentation, 9/29/20

Long-term supply mix: As outlined in the 2018 IRP, NiSource is targeting a replacement of 80% of coal capacity by 2023, primarily with renewables, and plans to retire all coal by 2028. The company's current generation mix includes 70% coal, 25% gas, 4% other (includes DSM) and 1% renewables. By 2023, NiSource plans to transform the mix to 15% coal, 25% gas, 7% other (includes DSM) and 53% renewables. By 2028, the mix is expected to be comprised of 0% coal, 24% gas and 12% other (includes DSM). The retirement of coal and the mix of renewable joint ventures and purchase power agreements are expected to drive $4 billion of customer savings over 30 years, including a $105 in average annual savings per household. Roughly $400 million of the $1.8-2.0 billion renewable investments planned through 2023 are approved projects with the remaining $1.4-1.6 billion under negotiation. Greenhouse gas emissions are anticipated to be reduced by 90% by 2030 when compared to a 2005 baseline.

Estimates and Price Target Derivation

Maintaining our 2020-2022 EPS estimates and price target: Our 2020-2022 EPS forecast remains $1.26 / $1.34 / $1.41. Recall that NiSource rescinded 2020 EPS guidance with the sale of Massachusetts and has not reissued it. Our 2021 EPS estimate is slightly above the midpoint of $1.28-1.36 guidance and our 2022 EPS forecast is within the 5-7% annual growth forecast through 2023. Specifically, we assume NIPSCO electric takes the brunt of the COVID impact and earns an 8.9% ROE this year, increasing to 9.4% next year before modestly under-earning its authorized 9.75% by 2022. For the gas segment, we assume the company modestly under-earns its blended ~10% ROE in 2020 through 2022.

Our price target of $26/share is unchanged. Our bear case derives a $21 target while our bull case is $28/share. Below is a summary of our base, bull and bear case scenarios. See Exhibit 2 on the next page.

- Our base case assumes 2022 EPS of $1.41/share. For the electric business, we assign a 10% premium to our anchor 2022 P/E target multiple of 17.5x. For the gas segment, we apply a 17.9x P/E multiple, an in line multiple current comparable LDC trading multiples. We apply a blended multiple for parent drag.
- Our bull case assumes 2022 EPS of $1.46/share, which is 7% growth over the high end of 2021 guidance. For the electric business, we continue to apply a 10% premium multiple to our anchor 2022 P/E target multiple of 17.5x. For the gas segment, we apply a 19.5x multiple, a 10% premium to current comparable LDC trading multiples. We apply a blended multiple for parent drag.
- Our bear case assumes 2022 EPS of $1.34/share, which is 5% growth over the low end of 2021 guidance. For the electric business, we apply an in line multiple to our anchor 2022 P/E target multiple of 17.5x. For the gas segment, we apply a 14.4x multiple, an in line multiple with a broader group of LDC trading multiples. We apply a blended multiple for parent drag.

Exhibit 2: SOTP Valuation: Base, Bull and Bear Cases

Base Case	'22 EPS	P/E	Val/Shr
Gas EPS	$1.16	17.7x	$20.55
Electric EPS	$0.59	19.3x	$11.37
Parent/Other	($0.34)	18.2x	($6.24)
Consolidated 2022 EPS	**$1.41**	18.2x	**$25.67**

Bull Case	'22 EPS	P/E	Val/Shr
Gas EPS	$1.19	19.5x	$23.21
Electric EPS	$0.61	19.3x	$11.67
Parent/Other	($0.34)	19.4x	($6.64)
Consolidated 2022 EPS	**$1.46**	19.4x	**$28.23**

Bear Case	'22 EPS	P/E	Val/Shr
Gas EPS	$1.12	14.4x	$16.07
Electric EPS	$0.57	17.5x	$9.96
Parent/Other	($0.34)	15.4x	($5.29)
Consolidated 2022 EPS	**$1.34**	15.4x	**$20.74**

Source: EVRISI Research

COVID-19 Exposure

COVID impacts: NiSource has guided to net COVID impacts (after mitigation measures) of $0.00-0.10 EPS hit for both 2020 and 2021. Specifically, the company expects a negative $0.15-0.20 EPS impact in 2020 to be partially offset with mitigation measures of +$0.10-0.15. NiSource expects to cut O&M by 8% next year.

NiSource's sensitivity to load is partly mitigated by fixed rate designs and revenue decoupling/normalization mechanisms.

In electric, a 1% change in load results in a total of $10.1mm impact to earnings, which rounds to $0.03 in EPS. Specifically, in residential electric, a 1% change in load impacts earnings by $3.9mm, which rounds to $0.01 in EPS. In commercial electric, a 1% change in load also impacts earnings by $3.9mm, which rounds to $0.01 in EPS. In industrial electric, a 1% change in load impacts earnings by $2.3mm, which rounds to $0.01 in EPS.

In gas, a 1% change in load results in a $7.4mm impact to earnings. Specifically, in residential gas, a 1% change in load impacts earnings by $3.8mm, which rounds to $0.01 in EPS. In commercial gas, a 1% change in load impacts earnings by $2.4mm, which rounds to $0.01 in EPS. In industrial gas, a 1% change in load impacts earnings by $1.2mm, which rounds to $0.00 in EPS.

Note that these sensitivities are not linear for large or prolonged volume changes.

Pension: NI's pension plan was 99% funded as of September 30th versus 97% as of June 30th. The company's pension expense is not impacted until the pension plans are re-measured, which is not expected until year-end 2020. Every 50 basis point change in the discount rate is expected to impact the expense by $1mm. Every $100 mm change in asset valuation is expected to impact expense by $7mm. NiSource benefits from pension trackers in Massachusetts and deferrals in Ohio and Pennsylvania.

Bad debt expense: NiSource bad debt is primarily recovered in base rates. The company has additional tracker mechanisms (quarterly, semi-annual or annual) across its gas jurisdictions but not in electric.

COVID-specific regulatory items: NiSource received orders in IN, PA, VA, MD and OH allow for deferral of COVID-related expenses and bad debt. Orders in MD, OH and VA allow deferral of COVID-related expenses and bad debt for later recovery. The order in PA allows deferral of bad debt above amounts in base rates for later recovery. The order in IN allows deferral of suspended fees and bad debt for later recovery.

VALUATION METHODOLOGY

To arrive at our $26/share price target we use a SOTP analysis described above.

RISKS

Risks to our thesis include an inability to deploy capital at the company's expected rate resulting in a lower rate base and regulatory pressure resulting in lower allowed ROEs.

COMPANIES UNDER COVERAGE BY AUTHOR

ANALYST CERTIFICATION

The analysts, Durgesh Chopra, Michael Lonegan, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and Evercore ISI International Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore "). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI, and can be obtained by writing to Evercore Group L.L.C., Attn. Compliance, 666 Fifth Avenue, 11th Floor, New York, NY 10103.

Evercore and its affiliates, and I or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage universe
In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's universe
Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's universe
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.

Historical Ratings Definitions

Prior to March 2, 2017, Evercore ISI's recommendations were based on a stock's total forecasted return over the next 12 months:

Buy- the total forecasted return is expected to be greater than 10%

Hold- the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%
Sell -the total forecasted return is expected to be less than 0%

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy- Return > 20%
Buy- Return 10% to 20%
Neutral - Return 0% to 10%
Cautious- Return -10% to 0%
Sell- Return< -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight- the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight- the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight -the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended- the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior "Overweight," "Equal-Weight" and "Underweight" ratings were viewed as "Buy," "Hold" and "Sell," respectively.

Ratings Definitions for Portfolio-Based Coverage

Evercore ISI utilizes an alternate rating system for companies covered by analysts who use a model portfolio-based approach to determine a company's investment recommendation. Covered companies are included or not included as holdings in the analyst's Model Portfolio, and have the following ratings:

Long- the stock is a positive holding in the model portfolio; the total forecasted return is expected to be greater than 0%.
Short- the stock is a negative holding in the model portfolio; the total forecasted return is expected to be less than 0%.
No Position- the stock is not included in the model portfolio.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company, and in certain other circumstances; a stock in the model portfolio is removed.
Rating Suspended - Evercore ISI has suspended the rating and/or target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon; a stock in the model portfolio is removed.

Stocks included in the model portfolio will be weighted from 0 to 100% for Long and 0 to -100% for Short. A stock's weight in the portfolio reflects the analyst's degree of conviction in the stock's rating relative to other stocks in the portfolio. The model portfolio may also include a cash component. At any given time the aggregate weight of the stocks included in the portfolio and the cash component must equal100%.

Stocks assigned ratings under the alternative model portfolio-based coverage system cannot also be rated by Evercore ISI's Current Ratings definitions of Outperform, In Line and Underperform.

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell," to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Long, No Position and Short ratings can be equated to Buy, Hold and Sell respectively.

Evercore ISI rating (as of 11/02/2020)

In compliance with the European Securities and Markets Authority's Market Abuse Regulation, a list of all Evercore ISI recommendations disseminated in the preceding 12 months for the subject companies herein, may be found at the following site: https://evercoreisi.mediasterling.com/disclosure.

WOLFE RESEARCH

UTILITIES & POWER

Regulateds – Market Overweight
Gas/Power Infrastructure – Market Overweight

November 2, 2020

NISOURCE

(NI US Equity – $23.45 – Outperform)

Discount on 2022, super cheap on 2024

- **Q3 beats; all recent Analyst Day disclosures reaffirmed.** NI reported 3Q20 non-GAAP EPS of $0.09, ahead of us/cons at $0.03. The beat was driven mostly by strong performance at the gas business, particularly on lower O&M. NI doesn't have official 2020 guidance but is $0.11 ahead of last year YTD. NI reaffirmed its 2021 guidance of $1.28-1.36, which embeds $0.05 of drag related to COVID. 4Q will be NI's first test dealing with COVID during a winter heating season, hence why management is keeping a cautious view on potential impacts to 2021. Capex, rate base forecasts and NI's financing plans were are all reaffirmed. This was one of the more uneventful earnings calls for NI in a while, which we view as a good thing. The focus now is on executing under the plan laid out at the late-September Analyst Day.
- **Not in a rush to do renewable financings, still open to asset sales.** NI's 2021-24 financing strategy as it relates to its renewable investments was unchanged – $500-700M of block equity in 2022 or 2023 and $600-1B of preferreds and/or converts in 2021. On the hybrids, we don't believe NI is in any rush and will likely complete them closer toward YE21. NI is still targeting equity content of 60% for the renewables program which is expected to total $1.8-2.0B. We currently assume $600M of block equity at the tail end of 2022 and $400M each of preferreds (50% equity content) and converts late next year. We still think it makes a lot of sense to consider asset sales as a potential financing alternative. Management remains open to the idea, though it doesn't sound that anything is imminent.
- **CPCN filings on deck, more renewable announcements by YE.** Next steps for the Dunns Bridge I/II (265 MW/510 MW) and Cavalry (260 MW) Solar projects will be CPCN filings at the IURC. These are expected to be filed later this month or in Dec. That is typically a 6-8-month process where the IURC will effectively deem the projects as prudent (not a guarantee of cost recovery). NI expects to announce 5-7 additional projects by yearend, which will fill out the remaining $600-800M of capital investment from the renewables program.
- **Tweaking estimates, PT to $26; Outperform.** We are raising our 2020-22E by $0.01 each after updating our financing and regulatory lag assumptions. Our PT moves up by $1 to 26, mostly reflective of higher utility multiples. We remain Outperform rated and believe a re-rating back to at least a group average (2x gap on 2022E) is attainable as NI executes on its new plan.

Company description

NiSource, headquartered in Merrillville, Indiana, operates two separate business lines: electric utility and gas distribution LDCs. The electric utility serves just under 500,000 customers in northern Indiana and owns 3,300 MW of generation. The gas LDC serves 3.5 million customers in Indiana, Ohio, Pennsylvania, Kentucky, Virginia, Maryland and Massachusetts.

Investment Thesis

We see above-average rate base and earnings growth potential for NiSource relative to other electric and natural gas distribution utilities. NI has a $40B backlog of capital investment with recovery largely through trackers in mostly constructive regulatory environments. We see NI as a de-risking story in 2020 with solid growth prospects through its base capex program and renewable investment opportunities at NIPSCO.

Valuation

Our $26 price target is derived by using a full-turn premium (18.5 x) on NI's electric earnings and an average (17.5x) on its gas LDC earnings in 2022. Risks for NiSource are 1) bad regulatory outcomes; 2) pipeline safety incidents. Upsides are 1) additional growth projects and 2) customer sales growth

WOLFE RESEARCH

November 2, 2020

Investment Conclusion

We are Outperform rated on NiSource. Most of the NI's annual capex (~75%) is recovered with minimal lag via tracking mechanisms and the company has built a constructive track record with most of its state regulators. Post the sale of Columbia Gas of Massachusetts, we believe the company's plan will be a lot easier to execute on. Further, $1.8-2.0B of incremental renewable capex has now been identified for deployment across 2022 and 2023, which will help drive rate base growth of 10-12% and EPS growth of 7-9%, on average, through 2024 (off 2021 base year). The dramatic shift toward renewables and fact that NI will be coal-free by 2028 is also helpful from an ESG perspective. We see exiting MA as a turning point for the company that should allow NI to re-rate closer to a group average over time as it proves out the ability to execute.

Reiterate Rating: BUY | PO: 26.00 USD | Price: 23.45 USD

03 November 2020

Equity

Solid 3Q, winter execution is key & renewables on track

Despite posting a 3Q beat and reaffirming '21 guidance/long term plan, NI shares closed +2.1% vs Gas LDC peers +3.3% and XLU +2.2%. With COVID only driving a -1c EPS impact in 3Q, NI reaffirmed its 2021 EPS guidance of $1.28-1.32, which includes a -5c EPS impact due to COVID. We perceive this guidance likely screens conservative (yet prudent) given COVID -7c EPS impact YTD, but we monitor NI's execution this winter heating season on the gas side as it was not exposed to COVID last yr – we still model the midpoint of '21 guide (below consensus). Regarding the renewable strategy, no new commercial deals were announced, although NI disclosed capex on the recent solar and solar+ storage BoT JVs of $850mn (assuming 70/30 JV this implies ~$1,200/kW). NI expects to announce a total of 5-7 remaining renewable deals, with the next set of agreements likely before YE20 (~$550-750mn of remaining capex associated with BoT JVs net to NIPSCO) – see our IN renewables tracker inside. Our EPS estimates remain unchanged pending execution this winter heating season. Even on our unchanged and relatively conservative estimates vs consensus, we still arrive at a PO of $26 (+14.6% potential total return incl. div yield of 3.6%) after we mtm NI with peer utility multiples of 13.9x (from 14.2x) for gas and 16.5x (from 16.8x) for electric. Reiterate Buy as we believe NI shares continue to present a unique play on the wide relative discount in Gas LDCs with M&A optionality, renewables upside in rate base, and potential for positive revisions.

Portfolio optimization at top of mind

Mgmt. did *not* provide any specific timing around the $600-1,000mn of equity-linked hybrid issuance outside of by YE21, but we perceive mgmt. could still be evaluating potential portfolio optimization to possibly replace a portion of the equity needs to fund the renewable strategy, albeit an asset sale is not baked into the current plan. We stress any range of potential buyers exists after NI acknowledged it would evaluate a sale of its smaller subsidiaries. Admittedly, mgmt. commentary suggested NI's Gas LDCs are all earning close to their authorized, providing less attractive opportunities for potential buyers in the utility space.

Company Sector

Natural Gas-Local Distribution Companies

Company Description

NiSource Inc. (NI) is a fully-regulated utility company serving approximately 3.5mn natural gas customers and 500,000 electric customers across seven states through its local Columbia Gas and NIPSCO brands. NI generates substantially all of its operating income through these rate-regulated businesses.

Investment Rationale

Our Buy rating on NI is underpinned by 1) likely positive revisions given ultra conservative EPS CAGR guidance baked into consensus, 2) gas LDC M&A optionality acute to NI, 3) renewable rate base upside, and 4) the ability to re-rate higher following any gas LDC asset sale.

Stock Data

Average Daily Volume	3,323,138

Quarterly Earnings Estimates

	2019	2020

Q2	0.05A	0.13A
Q3	0A	0.09A
Q4	0.45A	0.26E

Watching the divestiture angle

While NI reiterated its renewable financing strategy does not include any asset sales, mgmt. still included the same portfolio optimization language in the 3Q investor presentation. Mgmt. made clear it would always evaluate opportunities to maximize shareholder value, which could include divestiture opportunities. We continue to perceive the divestiture route for funding a portion/all of the renewable strategy replacing some/all of the equity needs as potentially quite attractive for the NI narrative, and broader Gas LDC subsector. We would argue that a sale of a Gas LDC could drive a re-rating higher for NI shares, and the broader Gas LDC peer group as we perceive unique sensitivity for the wider sector to any M&A. Recall, in our recent upgrade, our theoretical scenario analysis indicated that a potential asset sale of its three smaller Gas LDCs could offset most of its renewable equity financing in the current plan in a likely accretive manner, on our assumptions. We continue to think the most feasible assets considered for sale by NI would likely be the company's smaller Gas LDCs in Virginia (~$700mn rate base), Kentucky (~$300mn RB), and Maryland (~$100mn RB), as discussed in our recent scenario analysis.

With a sale of any Gas LDC, NI would effectively be replacing gas rate base with renewable electric rate base. That said, when the company was asked if NI's subsidiaries were earning their authorized return, mgmt.'s answer seemed to imply that the subs are earning close to or at their authorized returns. From a buyer's perspective, this would make the gas LDC subsidiaries less attractive candidates given potentially accretive deals are harder to find if the target is already earning at its authorized ROE. If this implication is valid, this might present more difficulty finding a willing buyer should the company seek to sell one or more of these assets, but we would still see a potential divestiture as creating a more streamlined and balanced (gas vs electric) portfolio at NI. At the same time, the steep relative discount of gas utilities, could present accretive acquisition targets (depending on the premium) from a valuation perspective. We also contemplate whether a Midstream player might be interested in NI's Gas LDC assets to diversify away from the more volatile gathering & processing business, particularly midstream companies that have overlapping footprints with the Gas LDCs may drive synergies.

Renewable deals on track & awaiting next set before YE20

While we did not get any new commercial renewable deals on the 3Q update, NI disclosed that the capex associated with the recent Solar and Solar+Storage Build-own-Transfer (BoT) JVs announced a couple weeks ago is a total of $850mn. Assuming these three projects are 70/30 NIPSCO/Tax Equity partner, this implies NIPSCO is spending roughly $1,200/kW. This compares to its wind BoT JVs (Rosewater and IN Crossroads), which equate to roughly $2,000+/kW. Recall, at the investor day, NI noted it is currently in advanced negotiations on about 8-10 solar projects, implying roughly 5-7 project announcements could be remaining following this recent update. Mgmt. highlighted on the earnings call that it expects to have more commercial renewable deals announced before YE20.

Renewables financing strategy reaffirmed

Along with reaffirming guidance across the board, NI reaffirmed its plan to finance its renewable strategy. Recall, NI's renewable financing strategy consists of $1.8-2.0bn of capex at NIPSCO electric funded with 60% equity. This implies a maximum of $1.2bn of equity with guided flexibility of $600-1,000mn of equity-linked hybrids and $500-700mn of traditional equity. We continue to model $700mn of converts (issued/converted '21/'24) as the equity-linked hybrids and $500mn of traditional equity issued in 2023. Even excluding an asset sale, we continue to look for NI shares to potentially inflect next year pending the company's choice around its $600-1,000mn equity-linked hybrids (i.e. converts or perpetual preferreds) along with putting the '21 Indiana legislative session in the rearview. We believe if mgmt. chooses converts over perpetual preferreds, this would be a positive read into mgmt.'s confidence in the earnings outlook such that it could offset the ultimate dilution in 2024.

Estimates

Our EPS estimates are unchanged following the 3Q update. Note our estimates continue to assume an equity issuance share price of $23.00 in 2021 and beyond (vs shares trading at $23.45 today). Our 2021 EPS estimate remains in line with the midpoint of NI's 2021 guidance of $1.28-1.36, in which the company includes a 5c negative EPS impact from COVID at the midpoint. Note our conservative '21 EPS estimate due to our reservations about the gas utility's execution amid COVID this winter heating season actually inflates our EPS CAGRs vs consensus given it creates a lower base year.

Our EPS estimates imply EPS CAGRs above both NI's guided ranges of +5-7% EPS CAGR (-21-'23) and +7-9% EPS CAGR ('21-'24). However, when the -5c COVID impact baked into '21 guidance at the midpoint is added back to the base year, both our '21-'23 and '21-'24 EPS CAGRs still land within the guidance ranges of 5-7% and 7-9%, respectively. While consensus would imply lower EPS CAGRs over these timeframes, we would also critically note that 2023 consensus EPS only is composed of four EPS estimates and 2024 consensus EPS is only composed of two estimates. We think the Street is failing to capture that NI will be presumably earning close to its authorized in '22 and '23 at the gas utilities in addition to the renewables EPS upside in '24.

Even not assuming an asset sale as part of the renewable financing, which we think could be accretive vs current equity financing in our estimates (as we highlighted in our recent upgrade), we continue to emphasize clear upside to EPS estimates as we perceive management is capable of hitting above its guidance range given the conservatism baked into the base year ('21). If the negative 5c EPS impact is excluded from the base year of '21 guidance, the new +7-9% EPS CAGR ('21-'24) would imply positive revisions in the out years ('23/'24). While the reaffirmed guidance from the recent Investor Day could be perceived cautiously given the implied conservatism embedded, we reaffirm our underlying confidence on '24E EPS upon realization of full earnings potential from renewables (and no lag from delayed financing to address accelerated spend).

Table 2: NI EPS Estimates: we see clear upward bias within '21 range - reaffirmed by mgmt.

Valuation

Our PO of $26 (unchanged) is based on the recent mark to market of our SOTP valuation on peer '23 multiples of 13.9x for gas (from 14.2x) and 16.5x for electric (from 16.8x).

As noted in our recent report, we now assign a 3x M&A premium (20-25%) to the VA, KY and MD gas utilities. It remains unclear what kind of a premium to rate base could be realized in any sale, as we have seen such few gas LDCs transactions of late. Historically over the last 15 years, utility M&A deals have garnered roughly a 25% premium on average. Also, we assign a 0.5x premium on OH, PA and NIPSCO gas for their embedded re-rating potential following a hypothetical sale.

At the electric utility (NIPSCO Electric), we assign a 2x premium to our electric peer group multiple to account for incremental renewable earnings growth long-term.

Lastly, we net out 50% of the incremental assumed converts (and interest) associated with the renewables strategy by including it in the netting out of parent debt and interest expense in our SOTP below.

Table 3: NI SOTP Valuation

NI SOTP Valuation

Price objective basis & risk

NiSource Inc (NI)

Our $26 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2023 forward P/E multiples of 13.9x for gas utilities and 16.6x for electric utilities with a 2.0x premium for the electric utility's strong growth rates and incremental renewable buildout with capex beginning in '22, but acknowledge industrial risk. Also, we now assign a 3x M&A premium to the VA, KY and MD gas utilities and a 0.5x premium on OH, PA and NIPSCO gas utilities to account for their embedded re-rating potential following any hypothetical sale. We note that electric / gas peer P/E multiples are grossed up by 5% to reflect capital appreciation across the sector. We subtract the value of excess holding company debt at the parent not supporting the utility opcos. We believe NI's 5-7% EPS/dividend growth outlook, attractive regulated earnings profile and constructive legislation across NI's service territories are under-estimated given its discounted multiple versus peers.

Downside risks to our PO are a sustained period of economic weakness pressuring customer growth, interest rate increases, high natural gas prices, financing plan updates, unforeseen costs associated with the MA incident, and challenging steel production economics in Indiana.

* Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

***INCOME RATINGS*, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend.** *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

General Investment Related Disclosures:
Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.
This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.
Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including,

among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

UK Readers: The protections provided by the U.K. regulatory regime, including the Financial Services Scheme, do not apply in general to business coordinated by BofA Securities entities located outside of the United Kingdom.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

Natural Gas | Increase Target Price

- **2021 Guidance Reaffirmed $1.28-$1.36.** The company reaffirmed 2021 NOEPS guidance of $1.28- $1.36 (CS $1.33 vs. consensus $1.34) from the recent analyst day, which includes $0.00-$0.10 improvement from COVID-19 drag and Columbia Gas synergy impacts in 2020. For the quarter, NI reported a 3Q20 adj. EPS beat at $0.09 vs cons/CS $0.02/$0.03 (and vs 3Q19 $0.00) driven by cost and regulatory mitigation which reduced COVID impact. Additionally, the company **reiterated 7%-9% EPS CAGR** through 2024, with a jump in 2024 (only 5%-7% through 2023) after Indiana renewables come in service (build-own-transfer, so no AFUDC). We expect NI to attain at least the midpoint of a 5%-7% EPS CAGR (vs 2021) by 2024 after renewables are in service.
- **Columbia Gas of Massachusetts sale to ES closed Oct 9.** Net proceeds of $1.1B were used to pay down term loan and company's short-term debt in October.
- **No change to equity plans**: Equity plans for 2020-2023 remain unchanged at $200-$300M annual ATM plus $30-50M employee plans (no convertible or hybrid financing) plus $500-$700M block equity in 2022/23 for 60% of $1.8-$2.0B renewables capex.
- **Additional Renewable Generation in Indiana represents $850M in NIPSCO utility capital investment.** NI executed Build-Transfer Agreements (JVs) with NextEra (NEE) for three new solar and storage projects: Dunns Bridge I (265MW), Dunns Bridge II (510MW), and Cavalry Solar (260MW) and will file for a CPCN in 4Q.
- **2020 Capex reaffirmed at $1.7-$1.8B and 5yr plan (2021-2024) left unchanged.** NI reaffirmed its 2020 expected capex at $1.7B-$1.8B and continues to identify total expected investment opportunities of ~$9.9B- $10.5B (2021-2024) of which ~20% is expected for renewables Investment, ~20% for electric infrastructure and asset modernization, and ~60% for gas infrastructure and asset modernization.
- **Valuation:** Our estimates are unchanged, but we raise the TP $2 to $28 for higher peer 2022 P/E multiples within a SoTP. Our TP includes the discounted value of $0.19 uplift in 2024 (worth $3/sh) from expected earnings from Indiana renewables. Risks include regulatory, capital plan execution.

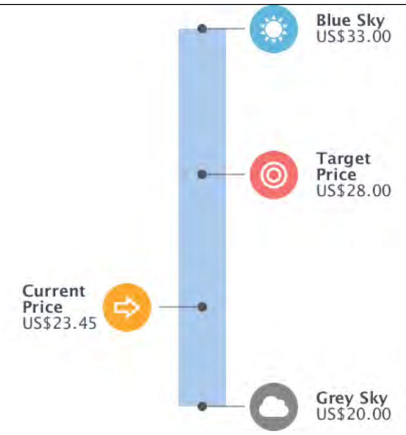
Company Background

NiSource Inc. is energy holding company whose subsidiaries provide natural gas, electricity & other products & services. It operates in 3 segments: Gas Distribution Operations; Gas Transmission & Storage Operations, & Electric Operations.

Blue/Grey Sky Scenario



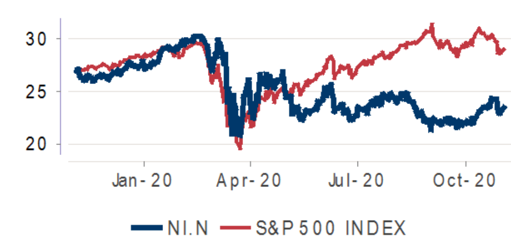
Our Blue Sky Scenario (US$) (from 32.00) 33.00

In our blue sky scenario we assume favorable regulatory outcomes across NI's jurisdictions, successful execution of their capital plan, and growth of infrastructure replacement program backlog. We assume that capex is at the high end of the $1.8-$1.9B and that NI is able to grow ratebase at the high end of their 8-10% range and grow earnings at the high end of their 5-7% range. We assume a 5.0x premium to the average peer 2021 P/E multiples.

Our Grey Sky Scenario (US$) (from 18.00) 20.00

In our grey sky scenario we assume unfavorable regulatory outcomes across NI's jurisdictions, only partial execution of their capital plan, and a decline in the infrastructure replacement program backlog. We assume that capex is at the low end of the $1.8-$1.9B and that NI is able to grow ratebase at the low end of their 8-10% range and grow earnings at the low end of their 5-7% range. We assume a -1.5x discount to the average peer 2021 P/E mult.

Share price performance



On 02-Nov-2020 the S&P 500 INDEX closed at 3310.24
Daily Nov04, 2019 - Nov02, 2020, 11/04/19 = US$27.31

- **See our recent reports:** 10/15 Earnings Preview, 9/30 Investor Day Takeaways, 9/27 Investor Day Preview, 8/7 Indiana Turning Green, 5/26 Left Behind but Holding Up Well, 5/11 COVID-19 Adds Near-Term Uncertainty, but Long-Term Fundamentals Remain Strong, 5/5 1Q20 Earnings Preview, 2/28 Raise to Outperform on Sale of Mass, Elimination of Block Equity Plan, 2020 Outlook – Getting Meaner and Less Defensive,

- **2021 Guidance Reaffirmed $1.28-$1.36.** The company reaffirmed its 2021 NOEPS guidance of $1.28- $1.36 (CS $1.33 vs. consensus $1.34), which includes $0.00-$0.10 improvement from COVID-19 drag and Columbia Gas synergy impacts in 2020. 2021 Guidance also assumes $1.9-$2.2B in annual growth, safety and asset modernization investments (2021-2024), $1.8B-$2B of renewable investment opportunities (2022-2023) and 7%-9% NOEPS CAGR (2021-2024), with 5%-7% from 2021-2023. 2021 NOEPS guidance also includes (~$0.05) impact of COVID-19 at the midpoint of 2021 base case. We expect the company to attain at least the midpoint of a 5%-7% EPS CAGR (vs 2021) by 2024 after renewables are in service. Recall that 2021 Guidance was initiated in August.

- **No change to equity plans: No block equity needed in 2020 and liquidity is ample for 2021, but equity is planned for 2022 and 2023 for Indiana renewables.** Equity plans for 2020 remain $200-$300M annual ATM plus $35-60M employee plans (no convertible or hybrid financing). For 2021, $600-$1,000M for hybrids/convertible are expected for planned renewable generation investments and $500-$700M common block equity in 2022/23 for 60% of $1.8-$2.0B renewables capex (in line with CS). Equity needs through 2023 also include the $200-$300M annual ATM plus $30-$50M employee plans.
  - **Financing the renewables.** We expect ~60% of $1.8-$2.0B of incremental Indiana plant investment in 2022/23 to be financed with equity. We model half in 2022 and remaining half in 2023. However, this neither results in AFUDC (turnkey projects) nor earn a return until a forward test year ratecase is filed around early 2023 for rates effective 2024. Note that this only represents the utility's initial investment in the Indiana projects, with an additional $1.0B financed with tax equity for the benefit of utility customers. Of the $1.8-$2.0B to be financed by the utility, only $0.4B has been approved to date, with ~0.8B agreements finalized, and the remaining projects (~$0.6-$0.8B) still in negotiation.

- **Columbia Gas of Massachusetts sale to ES closed Oct 9.** Net proceeds of $1.1B will be used to pay down term loan and company's short-term debt. Recall, on July 2, NI announced that it will pay $56M to settle and resolve the state's investigation into the 2018 Greater Lawrence incident.

- **Additional Renewable Generation.** NI executed Build-Transfer Agreements (JVs) with NextEra (NEE) for three solar and storage projects in Indiana, which represent $850M in NIPSCO capital investment. The three new projects are Dunns Bridge I (265MW), Dunns Bridge II (510MW), and Cavalry Solar (260MW) which are expected to go in service by end of 2022, 2023 and 2023 respectively.

- **Investor day takeaways.** NI hosted its investor day on Tuesday 9/29, which was mostly in-line with our previewed expectations. Among the biggest takeaways, the company reiterated 7%-9% EPS CAGR with a jump in 2024 (only 5%-7% through 2023) after Indiana renewables come in service (build-own-transfer so no AFUDC). The 2024 ratebase projection of $21.2B is $0.5B higher than the prior forecast. Additionally, NI expects annual O&M for 2021-2024 to remain "relatively flat". FFO/D target unchanged at 14-15%. Broadly, the company discussed long-term growth strategy, cost structure refinements, equity needs, renewable generation including transition from coal to renewables, as well as updates to their Safety Management System (SMS) progress.

- **Reported a 3Q20 adj. EPS beat at $0.09 vs cons/CS** $0.02/$0.03 (and vs 3Q19 $0.00) driven by cost and regulatory mitigation which reduced COVID's impact.

Figure 1: NI 3Q20 Earning Drivers

Gas Distribution Operations ($M)	3Q20	3Q19	Dif
Operating Revenues	472.5	468.6	3.9
Operating Expenses	462.8	495.0	32.2
Total Adj. Earnings	**9.7**	**-26.4**	**36.1**

Electric Operations ($M)	3Q20	3Q19	Dif
Operating Revenues	427.7	462.6	-34.9
Operating Expenses	294.8	327.2	32.4
Total Adj. Earnings	**132.9**	**135.4**	**-2.5**

Source: Company data, Credit Suisse estimates

- **2020 Capex reaffirmed at $1.7-$1.8B and its 5yr plan (2021-2024) left unchanged at ~$9.9B- $10.5B.** NI reaffirmed its 2020 expected capex at $1.7B-$1.8B and continues to identify total expected investment opportunities of ~$9.9B- $10.5B from 2021-2024 of which ~20% is expected for renewables Investment, ~20% for electric infrastructure and asset modernization, and ~60% for gas infrastructure and asset modernization. As seen in table below, NI's capital forecast stands at $2.0B-$2.3B in 2021, $2.4B-$2.7B in 2022, $3.3B-$3.6B in 2023, and $1.9B-$2.2B in 2024.

Figure 2: NI's Capex and Rate Base Growth

Capex & Rate Base	2020E	2021E	2022E	2023E	2024E
Capex ($B)	1.7 - 1.8	2.0 - 2.3	2.4 - 2.7	3.3 - 3.6	1.9 - 2.2
Rate Base Growth ($B)	13.9	15.2	17.0	19.8	21.2

Source: Company data, Credit Suisse estimates

- **Ratebase growth** is expected to grow at a 10%-12% CAGR from $13.9B in 2020 to $21.2B in 2024. The 2024 ratebase projection of $21.2B is $0.5B higher than the prior forecast.

- **Our unchanged 2022 estimate of $1.39 includes about -$0.04 expected drag from equity issuance for investment in Indiana renewables** that will not benefit from AFUDC nor receive a rate increase until 2024.

- **Gas Regulatory Update:** Rate case settlement reached in Maryland which includes $3.3M total increase in annual revenue ($2M net of infrastructure trackers). Final order is expected in Nov with new rates becoming effective in Dec. Additionally, final orders are still expected for Pennsylvania, Kentucky, NIPSCO's modernization program and Virginia's Energy (SAVE) Annual Rider Update.

- **COVID's Impact to Load was (-$0.9M), or a (~$0.01) drag to EPS in Q3.** Residential customer class saw a positive impact of $6.1M (Gas + Electric) YoY in 3Q20, while commercial and industrial customer class both saw a combined reduction of $4.9M and $2.1M (vs. 3Q19) respectively. YTD, NI has seen an overall reduction of (-$11.6M) which is comprised of (-$8.8M) and (-$15.7M) reductions in commercial and industrial respectively, partially offset by a $12.9M increase in residential. **YTD, NI has seen a gross (~$0.07) drag to EPS 2020** which has been offset by cost management and regulatory solutions.

Figure 3: NI's COVID Impact to Load in Q3

COVID impact to Gas Margin (3Q20 v 3Q19)	$(M)
Residential	0.3
Commercial	-1.8
Industrial	-0.8
Total	**-2.3**

COVID impact to Electric Margin (3Q20 v 3Q19)	$(M)
Residential	5.8
Commercial	-3.1
Industrial	-1.3
Total	**1.4**

Total Impact to Load in Q3 (Gas + Electric) ($M)	-0.9

Source: Company data, Credit Suisse estimates

- **COVID-19 annual impact to load**. Management expects lower sales volumes from commercial and industrial customers, partially offset by a potential increase in residential sales volume. Increased bad debt expenses (although recent orders in MD, VA allow for deferring the COVID-related expenses and bad debt), and sustained customer attrition. The company's sensitivity analysis continues to project that a +/- 1% change in annual sales volumes, will result in pre-tax operating earnings of $3.9M, $3.9M and $2.3M to residential, commercial and industrial on the electric side respectively, and $3.8M, $2.4M and $1.2M to residential, commercial and industrial on the Gas side respectively. The residential customer class represents 39% and 69% of the retail margins in electric and gas respectively, with commercial at 35% and 22% in electric and gas respectively.

Figure 4: COVID-19 Impact to NiSource Load

Pre-tax Operating Earnings Sensitivity to +/- 1% CHG in annual sales volume	Electric	Retail Margins %
Residential	$3.9	59%
Commercial	$3.9	26%
Industrial	$2.3	15%
Total	**$10.1**	**100%**

Pre-tax Operating Earnings Sensitivity to +/- 1% CHG in annual sales volume	Gas	Retail Margins %
Residential	$3.8	69%
Commercial	$2.4	22%
Industrial	$1.2	9%
Total	**7.40**	**100%**

Source: Company data, Credit Suisse estimates

- **Liquidity update.** NI's net liquidity available is ~$1.6B as of Sep 30th (vs. ~$2B on June 30th). Total long term debt is ~$9.1B with a weighted average maturity of ~15 years and a 3.68% interest rate as of September 30th vs the prior update in June (which included a ~$10B debt level, with ~$8.7B of long-term debt, and a weighted average maturity of ~16 years and a 4.31% interest rate). Additionally, the company expects no significant refinancing needs through 2024. Dividend growth is expected to remain at targeted 60%-70% LT payout ratio.

- **Pension 99% funded in 3Q20** vs. 97% in 2Q20, and ~98% as of year-end 2019 with 52% of pension plan assets in equities.

- **Rosewater and Jordan Creek to go in service by year-end.** Rosewater Wind (100 MW JV project) and Jordan Creek (400 MW JV project) are both expected to go in service by year-end. JV project Indiana Crossroads (300MW), and PPA projects Brickyard Solar (200MW) and Greensboro Solar (130) MW are expected to go in service by 2021, 2022 and 2022 respectively. Recall CPCN filings were made on 2/1/19 seeking approvals to develop the wind farm consistent with the IRP filed in the fall of 2018. Regulatory approvals were received in August 2019 and tax equity financing was closed in July 2020.

- **Retiring coal and replacing with renewables.** NI is targeting to replacing 80% of coal capacity by 2023 with primarily renewable resources and retiring 100% of coal assets by 2028. The company targets to achieve 90% reduction in greenhouse gas emissions by 2030.

Regulatory Update - Gas

- **Columbia Gas of MD** filed a new base rate case on 5/15 requesting $6.3M total revenue increase; $5M net of infrastructure trackers, which supports continued replacement of aging pipelines and safety upgrades. Rate case settlement reached in Maryland, which includes $3.3M total increase in annual revenue ($2M net of infrastructure trackers). Final order is expected in Nov with new rates becoming effective in Dec.
- **Columbia Gas of PA.** Filed a base rate case 4/24/2020 which supports continued replacement of aging pipelines as well as adoption of safety upgrades. Ratecase includes $100.4M total annual revenue increase. Order is expected in 1Q21 with new rates effective in Jan 2021.
- **Columbia Gas of Kentucky** Safety Modification and Replacement Program (SMRP) Annual Rider Update was filed on 10/15 and is requesting $50M for 2021 capital investments to support continued replacement of aging pipelines and adoption of pipeline safety upgrades. Order is expected on Q1 2021, with rates effective from Q1 2021.
- **NIPSCO Gas System Modernization Program** was filed on 8/25 and covers $26M in incremental capital investments made between Jan-Jun 2020. An order is expected in December 2020.
- **Columbia Gas of Virginia Steps to Advance Virginia's Energy (SAVE)** Annual Rider update was filed on 7/24 and covers $46.4M for 2021 capex in order to continue support and adoption of pipeline safety upgrades under SMS. A final order is expected in November 2020, with rates effective January 2021.
- **Columbia Gas of Ohio Capital Expenditure Program (CEP)** Annual Rider Update filed on 2/28, received order on 8/12, and new rates became effective in September. Recall application included ~185M in 2019 capital investments. The CEP rider allows recovery capital investments and deferred expenses that are related but not covered through IRP.

Regulatory Update – Electric Operations

- **Electric Operations.** Three new solar JV projects have been announced for coal replacement capacity: Dunns Bridge I (265MW), Dunns Bridge II (510MW), and Cavalry Solar (260MW). They are expected to go in service by end of 2022, 2023 and 2023 respectively. Additionally, the company expects $1.8B-$2B incremental capital investment opportunities in 2022 and 2023. The company expects continued execution of 7yr ~$1.2B electric system modernization program. Brickyard Solar and Greensboro Solar + Storage are pending regulatory approval.
- **CPCN filing in 4Q20.** CPCN filing is expected for Dunns Bridge I, Dunns Bridge II and Cavalry in Q4.
- **Electric System Modernization Program** filed on 9/29 and focuses on electric transmission and distribution investments to improve reliability. The TDSIC 7 semi-annual tracker filed for $122.3M in investments from July 2019-July 2020. A final order is expected in Jan 2021, with rates becoming effective on February.
- **Renewable Generation Projects. Construction continues on Jordan Creek (400 MW) and Rosewater (100 MW) – expected to go in service by year-end**. Recall CPCN filings were made on Feb 1st, 2019 seeking approvals to develop 3 wind farms

consistent with the IRP filed in the fall of 2018. Orders approving the PPAs on these filings were received on June 5, 2019 and the wind farms are expected to be built by yearend 2020.

- **Indiana Crossroads Wind under construction and expected to be in-service by end of 2021**. Recall that on Oct 22, 2019, a Build-Transfer Agreement BTA was filed for Indiana Crossroads (300MW) JV between NIPSCO and EDP Renewables (302 MW). FERC approved order on 2/19/2020 for sections 203 and 205 applications for Rosewater. Commercial terms reached on Brickyard and Greensboro Solar PPAs filed. Latest RFP represents replacement ~1,400MW of coal capacity through 2023.
- **Tax equity partnership reached for Rosewater, Indiana Crossroads.** Regulatory approval pending for Brickyard Solar (200MW) and Greensboro Solar (100MW) + storage (30MW). Altogether, the company expects about $1.0B of tax equity financing to help capitalize ~$2.8-$3.0B of JV renewable projects in Indiana from 2022-2023. The remaining $1.8-$2.0B of NI ratebase investment is expected to be financed with ~60% equity/40% debt. Next IRP expected in 2021.
- **Settlement and order in Indiana ratecase for rates effective 1Q20.** A final order approving two settlements in NIPSCO's electric ratecase was issued on Dec 4, 2019, including a 9.75% authorized ROE on 47.86% equity for a $4.116B ratebase that resulted in a two-step revenue increase of $42.7M. The case was filed in Oct 2018 in conjunction with a new long-term Integrated Resource Plan (IRP). The settled portion of the case includes a revenue requirement and accelerated depreciation schedule related to early retirement of coal plants, including an agreement to reduce the book lives of $1.5B coal ratebase to match retirement plans at an average 2032 vs. the prior 2030s-2040s. Non-protected accumulated deferred income tax passback amortization has also been agreed at a comfortable 10-year amortization period. It also includes a new rate structure for industrial customers that allows the utility to manage market purchases in order to keep track of capacity requirements (reduces risk of stranded assets).

Previous Relevant Commentary

- **Next initiative and Columbia Gas of Massachusetts sale to drive ~8% O&M reduction in 2021.** The company has undertaken various cost initiatives including voluntary separation program savings, operational processes improvements and modernization driven fuel and cost reductions. NI expects annual O&M for 2021-2024 to remain "relatively flat".
- **Columbia Gas of Massachusetts sale to ES closed Oct 9.** Net proceeds of $1.1B will be used to pay down term loan and company's short term debt. On July 2, NI announced that it will pay $56M to settle and resolve the state's investigation into the 2018 Greater Lawrence incident.
  - **A federal guilty plea and the sale of Columbia Gas of Mass.** On Wednesday, 2/26, the US Department of Justice announced that NI will plead guilty to a criminal violation of the federal Natural Gas Pipeline Safety Act and pay a $53M fine in connection with the Sept 2018 gas explosion incident in Merrimack Valley, Massachusetts. NI has also agreed to sell its operations in Massachusetts to ES for $1.1B and will forfeit any profit earned from the sale (none expected, so retaining the whole $1.1B). The plea is on a corporate level; no individual officers or employees of the company were charged.
  - **Sale of Columbia Gas of Massachusetts to Eversource for $1.1B - with no gains allowed (or expected).** NI has also agreed to sell its operations in Massachusetts to ES and will forfeit any profit earned from the sale. We calculate that ES is purchasing at a 1.0x multiple of ratebase, or 19.7x 2021 P/E at the allowed 9.55% ROE – in line with the group average. However, the elimination of

a previously planned $500-$700M block equity issuance in 2020 brings the combined effect to about breakeven to a modest $0.01 accretion to 2021 expectations before accounting for -$0.05 corporate disynergies. Expect the transaction to close in October. See our 7/31 ES 2Q earnings note for further detail.

- **Emphasis on safety and leak reduction.** The company continues to emphasize reducing the operational risk and enhancing gas systems safety through the implementation of the Safety Management System (SMS) and new safety system installations across all NI gas service territories. NI has rolled out a corrective action program with the hopes of providing a very clear process and technology for employees and more than 1,000 automatic shut-off devices have now been installed. NiSource is looking to advance safety new technologies, leakage sensing, smoke detectors, safety performance, and predictable models where human error could create risks. The company is projecting a 50% reduction in methane emissions from natural gas pipelines by 2025.
- **COVID-related regulatory updates.** Orders received in Maryland (4/9/2020), in Virginia (4/29/2020), in Pennsylvania (5/13/2020), in Indiana (6/29/2020) and in Ohio (7/15/2020). Orders in MD, OH and VA allow deferral of COVID-19 related expenses and bad debt for later recovery. Order in PA allows deferral of bad debt above amounts in base rates for later recovery, and order in IN allows deferral of suspended fees and bad debt for later recovery.
- **Decoupling.** Full decoupling in OH, MA, MD, VA. Weather normalization in KY, MD, VA, PA. **Bad debt handling.** Clauses for bad debt in KY, OH, MD, PA, VA, MA & IN.

Valuation

- **Valuation.** Our estimates are unchanged, but we raise the TP $2 to $28 for higher peer 2022 P/E multiples within a SoTP. Our TP includes the discounted value of $0.19 uplift in 2024 (worth $3/sh) from expected earnings from $1.8-$2.0B Indiana renewables that will not benefit from AFUDC and will not receive a rate increase until 2024. Meanwhile, our 2022 estimate includes -$0.04 drag from equity issued for these projects (~60% of the ratebase, with half issued in 2022 and half in 2023). We expect the company to attain at least the midpoint of a 5%-7% EPS CAGR (vs 2021) by 2024. We continue to apply a 2.0x premium to the gas utilities for favorable regulatory jurisdictions and lower operational risk since the explosive incident in Lawrence Mass in 2018. We continue to value the electric operation in Indiana at a 2.0x premium for excellent operations and supportive regulation. Risks include 1) ROE risk related to the ongoing ratecases, 2) continued approvals relating to infrastructure replacement/grid modernization programs, 3) commodity risk, 4) interest rate risk, 5) derivative risk, 6) load growth risk particularly in the non-decoupled jurisdictions, 7) weather risk, 8) environmental and climate change risk, 9) physical infrastructure and cybersecurity risk, 10) continued improvement to gas system operations safety, 11) COVID-19 pandemic response load reduction, particularly at the electric utility.

Valuation, Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource Inc. (NI.N)

Method: We arrive at our $28 target price for NI by applying a 2.0x premium to the gas segment peer 2021 P/E to reflect the constructive regulatory environments with capex trackers in place in the jurisdictions that NI operates. We also apply a 2.0x premium to the average peer electric utility 2021 P/E multiple for NIPSCO Electric utility in Indiana to reflect the favorable ratebase growth profile and regulatory environment in the state. Our OUTPERFORM rating reflects a forecasted total return that is equal the group average.

Risk: Risks to our $28 target price and OUTPERFORM rating are: 1) ROE risk related to the ongoing ratecases 2) continued approvals relating to infrastructure replacement/grid modernization programs 3) commodity risk, 4) interest rate risk, 5) derivative risk, 6) load growth risk particulary in the non-decoupled jurisdictions, 7) weather risk, and 8) environmental and climate change risk, 9) physical infrastructure and cybersecurity risk, 10) continued improvement to gas system operations safety after the 2018 explosion incident in Mass. 11) COVID19 load reductions

** Asterisk signifies initiation or assumption of coverage.*

As of December 10, 2012 Analysts' stock rating are defined as follows:
Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.
Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.
Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.
**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*
Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.
Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.
Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:
Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.
Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.
Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.
**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	50%	(33% banking clients)
Neutral/Hold*	37%	(28% banking clients)
Underperform/Sell*	11%	(20% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.

**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

The same important disclosures, with the exception of valuation methodology and risk discussions, are also available on Credit Suisse's disclosure website at https://rave.credit-suisse.com/disclosures . For valuation methodology and risks associated with any recommendation, price target, or rating referenced in this report, please refer to the disclosures section of the most recent report regarding the subject company.

This report is produced by subsidiaries and affiliates of Credit Suisse operating under its Global Markets Division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. NiSource Inc

Upgrade to Buy: a unique gas utility play w/ both M&A & renewables upside

Rating Change: BUY | PO: 26.00 USD | Price: 23.50 USD

19 October 2020

Equity

Raise to Buy as quantify EPS & gas LDC sale upside too

We upgrade NI to Buy as it presents a unique way to position for the wide discount in gas LDCs with 1) asset sale upside that reduces equity overhang by 5c+ in EPS on '25 run-rate basis (sale in '21), 2) rate base renewables upside – unique among gas LDC peers, and 3) positive est revisions *still* post Investor Day – reiterate our confidence in our well above Street EPS on '24. We see clear upside as an LDC sale could remove equity overhang. NI has differentiated itself as the only Gas LDC adding renewables to rate base to date, and now has potential to sell smaller Gas LDCs (VA, KY or MD) to replace a portion (or close to all) of the $1.2bn of equity financing behind its renewable strategy per mgmt. at Investor Day. This gas LDC M&A upside is still under-appreciated in our view, and we perceive a strategic action like this could drive a re-rating higher for NI, along with the broader Gas LDC group given the potential for an M&A premium. We stress NI's proven track record of divestitures including the recent CMA sale to ES and the successful spin of its pipeline business in '15. We still favor transitioning utility portfolios like NI, which provide upside to renewables in rate base yielding an improving screen to ESG fund flows. Street EPS is missing the extent of the conservatism baked into NI's CAGR guide.

A Gas LDC sale could be more accretive vs current plan

If NI could execute an asset sale that implies more EPS accretion vs current financing, we perceive it could pursue the divestiture route. The question is, what premium can Gas LDCs garner in the current market? On our estimates, a 3x (20-25%) M&A premium to peers on '23 EPS for NI's VA, KY & MD gas utilities equals $2.76/share of total value (net equity proceeds of ~$1.1bn). We estimate asset sales would be 5c/5c accretive to our '24/'25 EPS vs current financing plan (see inside). Last, we raise '23/'24 EPS as our equity issuance price/share increases to $23 (vs $22) implying fewer shares outstanding. After mtm SOTP on slightly higher ests w/ peers of 13.9x for gas (from 13.2x) & 16.6x for electric (from 15.3x), we arrive at a PO of $26 (from $23). We now apply 3x M&A premium to VA, KY & MD and a 0.5x premium on OH, PA and NIPSCO gas for ability to re-rate.

Company Sector

Natural Gas-Local Distribution Companies

Company Description

NiSource Inc. (NI) is a fully-regulated utility company serving approximately 3.5mn natural gas customers and 500,000 electric customers across seven states through its local Columbia Gas and NIPSCO brands. NI generates substantially all of its operating income through these rate-regulated businesses.

Investment Rationale

Our Buy rating on NI is underpinned by 1) likely positive revisions given ultra conservative EPS CAGR guidance baked into consensus, 2) gas LDC M&A optionality acute to NI, 3) renewable rate base upside, and 4) the ability to re-rate higher following any gas LDC asset sale.

Stock Data

Average Daily Volume	3,460,675

Quarterly Earnings Estimates

	2019	2020
Q1	0.82A	0.76A
Q2	-0.75A	0.13A
Q3	0A	0.05E
Q4	1.24A	0.31E

Why are we making the move *now*?

We upgrade shares to Buy now given our perception that management has effectively lowered the bar after what we perceive was a bit of an awkward update. Our '24 EPS estimates are still high, despite initial guidance provided a few weeks back that confusingly suggests meaningfully lower outlook as we could see no reason to adjust them. Our confidence on upside to the outlook is even stronger and even upside to our estimates, which are already higher than the street with a further 5-7c of EPS accretion by '25 from any contemplated asset selldown of gas LDCs. For those focused on operational issues, we stress estimates appear to allow ample room for disappointment and *still* beat mgmt. guidance and their own guidance. We emphasize the outlook is de-risked given the awkward update (pushing down Street expectations a step lower) and following close of previously announced Mass LDC (CMA) acquisition by ES.

<u>In our view,</u> the LDC divestment angle is among the most intriguing and emerging angles for the wider gas LDC sector following their statements affirming a strategic review at their latest Analyst Day. While historically this may have immediately triggered a shift in sentiment by investors, the latest framing of EPS trajectory masked this focus, at least initially. With valuations at multi-year relative lows for gas vs. the wider utilities (electric) group, we perceive unique sensitivity for the <u>wider</u> sector to any M&A. We suspect NI shares could be particularly well positioned to see any *further* divestment re-rate shares given improved business mix – and driving a bid back into the sector. We presume this interest is driven principally by financial buyers (rather than necessarily strategics) following many earlier utility sales. To this end, we see no fundamental reason as to why utilities are perceived at such a wide valuation discrepancy – and see scope for NI to potentially become a key bell-weather around *where gas LDCs could trade?*

<u>We note some downside risks</u>. First off, we perceive the election backdrop as less than ideal for perceived gas LDCs (and NI's blended multiple). While deceleration of rate base growth remains protracted, we acknowledge we may be early to upgrade more gas LDCs. Second, we stress the IN legislative session next year could add some (very limited) concerns to execution. Third & most critically, equity overhang – both form and timing heading into '21 depresses need to act now. That said, a gas LDC asset sale and step-function change lower in equity needs is a real potential shift in expectations with surprisingly few investors we speak to focused on this angle thus far.

That said, we see NI as particularly attractive given gyrations in EPS estimates: where our confidence remains intact. We see renewable repositioning as indeed attractive despite the execution challenges. Confidence from CNP likely ahead with 3Q should bolster prospects to see through NI's own program (despite legislative backdrop of threats to stem renewables growth). Meanwhile, we could well see further announcements of specific renewable build-own-transfer (BoT) projects to firm up the specifics of the solar plan too (vs. placeholders for now) with 3Q/EEI results in near-term.

Intriguing divestiture angle: just what NI & gas LDCs need

At the recent investor day, management made clear that its renewable strategy financing plan did *not* assume any portfolio optimization. However, mgmt. also emphasized that it is always looking to evaluate opportunities to maximize incremental long term shareholder value, and if that involved selling an LDC it would take a look at that opportunity. Note a potential asset sale could offset some or all of its renewable equity financing in the current plan in a likely accretive manner. In our view, the most realistic assets that could be considered for sale by NI could be the company's smaller Gas LDCs in Virginia (~$700mn rate base), Kentucky (~$300mn RB), and Maryland (~$100mn RB).

If NI were to consider the sale of one or more of these assets, NI would effectively replacing gas rate base with renewable electric rate base. We would argue that a sale of any one or combination of these assets could drive a re-rating higher for NI shares, and the broader Gas LDC peer group. With gas utilities down 26% on average YTD (vs XLU -1%), now trading at almost a -3x discount to electric utilities, NI's smaller gas LDCs could present attractive options for hybrid (gas + electric) utilities that trade at much higher P/E multiples. Additionally, the remaining NI equity after this hypothetical asset sale could present a much more streamlined and balanced (electric vs gas) portfolio, in our view. For the hypothetical remaining NI equity, the earnings mix would be more weighted toward renewables (with more opportunities in the future), which also has the tailwind of the Biden bid and ESG fund flows. In the long term, NI will also have incremental renewable generation opportunities in the queue to replace the retirement of its Michigan City coal plant. Look for another RFP by this time next year presumably enabling another round of investment in the 2026-2028 period.

Quantifying the accretion from an asset sale vs current equity financing plan

If NI can capture an asset sale price that is more accretive to EPS compared to its current equity financing plan, we believe the company may consider whether to pursue the gas LDC divestitures to fund its renewable strategy (assuming it can find a willing buyer). The question is, in such a scenario, what premium could a small Gas LDC garner in the current market? On our estimates, we apply a 3x (~20-25%) M&A premium as a base case to peer gas multiples on '23 EPS for the VA, KY and MD gas utilities. This would equate to \$2.76/share of total equity value for the three small gas utilities or net equity proceeds of ~\$1-1.1bn if NI were to sell all three assets (including 10% tax leakage assumption). This implies NI would only have to issue ~\$130mn of supplemental equity to finance the renewable strategy. If NI were to execute the sale of these three gas LDCs, we forecast this asset sale financing route could be roughly +5c/+5c accretive to our current '24/'25 EPS estimates, which currently bakes in \$700mn of converts (issued/converted in '21/'24) and \$500mn of traditional equity issued in 2023. Recall, NI has stated that its \$1.8-2bn renewables strategy would be funded with 60% equity, which implies a maximum of \$1.2bn of equity with guided flexibility of \$600-1,000mn of equity-linked hybrids and \$500-700mn of traditional equity.

Shape of earnings would shift with a sale between timeline of deal & converts

We assume the divestitures occur in 2021, and the supporting equity issuance occurs in mid-2023. Note the EPS accretion in 2023 is sensitive to the timing of the supporting equity in that year. Admittedly, the bulk of the accretion comes in 2024 as that is the year our assumed converts issued in 2021 convert into equity in '24, and under this asset sale scenario, we remove this \$700mn of assumed coverts. Management has noted that it is looking at a number of different equity-linked hybrid securities, all of which would receive 50% equity treatment from the credit agencies. This includes even perpetual preferreds, which would not imply the same amount of accretion given no incremental dilution in 2024 from our assumed converts.

Asset sales, even with taxes, are likely better than convertible option

Bottom line, under what we believe is the most likely financing scenario of some type of convertible (issued/converted in 2021/2024), our analysis suggests an asset sale of the three small gas LDCs could drive more accretion on our estimates compared to this assumed financing plan. *While we see our +3x P/E multiple as a bit of a placeholder for admittedly much more robust historical sale multiples, we see some degree of uncertainty on whether mgmt. follows through on any sale and see the +3x P/E as effectively a weighted upside on any sale. Further at just ~1.4x P/RAB multiple, this would appear quite conservative vs any historical transaction too – seeing electric utilities in the US trading at 1.5x or better in many instances even without a merger premium.*

Other considerations on any sale include: 1) tax leakage – no disclosure on any of the smaller (3) gas LDCs on tax basis: we just reflect ~10% of equity proceeds as a placeholder; 2) timeline & whether a deal can get closed – even if marginally more accretive is it *worth* it given the challenges on execution & reduction in biz scale for NI .

No obvious buyers – but the point is would affirm willingness to review LDCs…

While KY, MD, and VA have no obvious buyers from adjacent entities as publically disclosed – we see any number of utilities as still open to acquisitions to backfill earnings & ratebase growth generically. Whether they are open to gas LDC acquisitions as incremental platforms to drive earnings growth (given the sharp pullback in WTRG performance after its downturn post its own LDC acquisition is notable warning to the balance of the sector – although potentially driven in part by wider de-rating of water utilities too).

Table 1: Scenario analysis: Asset sale of VA, KY, and MD EPS accretion vs current plan assumed of converts + equity financing for renewable strategy

Estimates – setup for (clearly) positive revisions for years

We slightly raise our '23/'24 EPS estimates as we raise our assumed equity raise share price to $23 (from $22) in the out years vs current shares trading at $23.50 implying a lower share count in the out years. Our 2020 and 2021 EPS estimates remain unchanged with our 2021 EPS estimate in line with the midpoint of guidance.

Despite our higher EPS estimates, when the -5c COVID impact baked into '21 guidance is added back to the base year, both our '21-'23 and '21-'24 EPS CAGRs still land within the guidance ranges of 5-7% and 7-9%, respectively. However, when using the '21 EPS guidance midpoint as the base year, we derive a '21-'23 EPS CAGR of 8.5% and '21-'24 EPS CAGR of 10.3%. While consensus would imply lower EPS CAGRs over these timeframes, we would critically note that 2023 consensus EPS only is composed of four

EPS estimates and there are only two EPS estimates in 2024 consensus EPS. We perceive the street is failing to capture that NI will be presumably earning close to its authorized in '22 and '23 at the gas utilities in addition to the renewables upside to EPS in '24.

We expect to see the most lag this year, slightly better in '21 (lag spread about evenly across the utilities with those lacking decoupling being hit slightly harder), and then lag should generally recover in 2022 where we expect NI to earn nearly at its authorized ROE aside from slight incremental parent interest drag from higher coupon rate on the assumed converts. Following regulatory lag plus some timing lag from renewables in '23 and a portion remaining in '24, we expect NIPSCO electric to recover earning close to the authorized beyond 2024.

Even not assuming an asset sale as part of the renewable financing, which we perceive could be accretive vs current equity financing in our estimates (as mentioned above), we continue to emphasize clear upside to EPS estimates as we perceive management as capable of hitting (well above) its guidance range given the conservatism baked into the base year ('21) with a 5c COVID impact built into the '21 guidance range of $1.28-1.36. If this 5c impact is excluded from the base year of '21, the new +7-9% EPS CAGR ('21-'24) implies positive revisions in the out years ('23/'24). While the recent Investor Day could be perceived cautiously given the very low bar established, we reaffirm our underlying confidence on ultimate '24 EPS upon realization of full earnings potential from renewables (and no lag from delayed financing to address accelerated spend).

3Q20 EPS walk

Previewing 3Q20, we forecast adjusted 3Q20 EPS of $0.05 vs consensus of $0.03 and adjusted 3Q19 EPS of $0.00.

- **Key Drivers**: Positive Y/Y rate/rider implementation at Columbia Gas of OH (+0.02), NIPSCO Electric (+0.01) lower pension expense (+0.01), lower gas utility O&M (+0.05), and lower electric utility O&M (+0.03). This is partially offset by higher D&A

at the gas utilities (-0.01) and electric utility (-0.02) in addition to a negative COVID impact of (-0.03).

- **Wildcards/Unknowns**: The largest unknown on the quarter is how much COVID impact NI will be able to offset with O&M cost controls. Recall, in 2Q, NI was able to offset -6c of COVID impact with cost management and regulatory solutions. Mgmt.'s 2020 base case includes a negative COVID impact of (-0.15-0.20) partially offset by $0.10-0.15 of mitigation efforts. 3Q is generally a slower quarter for NI given shoulder season for the gas utilities. Focus on the call will be more around financing renewable strategy and EPS driver updates into 2021.

Awaiting more commercial renewable deals

Leading into the 3Q call we will be looking for an update on NI's commercial renewable deals to complete its ongoing renewable build out. Management highlighted at the investor day that the company is currently in advanced negotiations on about 8- 10 solar projects. We believe NI will complete its renewable procurement this year. Even excluding a potential asset sale, we still expect NI shares to likely inflect next year pending the company's choice around its $600-1,000mn equity-linked hybrids (i.e. converts or perpetual preferreds) along with putting the (hopefully successful) '21 Indiana legislative session in the rearview. If mgmt. chooses converts over perpetual preferreds, we perceive this would be a positive read into mgmt.'s confidence in the earnings outlook such that it can offset the ultimate dilution in 2024. That said, we still believe replacing some (or all) of the equity-linked hybrids/traditional equity financing with an asset sale would provide the most upside to EPS.

Valuation

Our PO increases to $26 (from $23) as we mark to market our SOTP valuation on peer '23 multiples of 13.9x for gas (from 13.2x) and 16.6x for electric (from 15.3x).

We now assign a 3x M&A premium (20-25%) to the VA, KY and MD gas utilities. It remains unclear what kind of a premium to rate base could be realized in any sale, as we have seen such few gas LDCs transactions of late. Historically over the last 15 years, utility M&A deals have garnered roughly a 25% premium on average. Also, we now assign a 0.5x premium on OH, PA and NIPSCO gas for their embedded re-rating potential following a hypothetical sale.

At the electric utility (NIPSCO Electric), we assign a 2x premium to our electric peer group multiple to account for incremental renewable earnings growth long-term.

Lastly, we net out 50% of the incremental assumed converts (and interest) associated with the renewables strategy by including it in the netting out of parent debt and interest expense in our SOTP below.

Table 4: NI SOTP Valuation analysis

NI SOTP Valuation									
	Metric			P/E Multiple					
	2023E EPS	Low	Peer	Prem/ Discount	Base	High	Low	Base	High

Price objective basis & risk

NiSource Inc (NI)

Our $26 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2023 forward P/E multiples of 13.9x for gas utilities and 16.6x for electric utilities with a 2.0x premium for the electric utility's strong growth rates and incremental renewable buildout with capex beginning in '22, but acknowledge industrial risk. Also, we now assign a 3x M&A premium to the VA, KY and MD gas utilities and a 0.5x premium on OH, PA and NIPSCO gas utilities to account for their embedded re-rating potential following any hypothetical sale. We note that electric / gas peer P/E multiples are grossed up by 5% to reflect capital appreciation across the sector. We subtract the value of excess holding company debt at the parent not supporting the utility opcos. We believe NI's 5-7% EPS/dividend growth outlook, attractive regulated earnings profile and constructive legislation across NI's service territories are under-estimated given its discounted multiple versus peers.

Downside risks to our PO are a sustained period of economic weakness pressuring customer growth, interest rate increases, high natural gas prices, financing plan updates, unforeseen costs associated with the MA incident, and challenging steel production economics in Indiana.

Equity Investment Rating Distribution: Utilities Group (as of 30 Sep 2020)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	79	51.63%	Buy	59	74.68%
Hold	36	23.53%	Hold	24	66.67%
Sell	38	24.84%	Sell	25	65.79%

Equity Investment Rating Distribution: Global Group (as of 30 Sep 2020)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	1749	54.79%	Buy	1114	63.69%
Hold	677	21.21%	Hold	415	61.30%
Sell	766	24.00%	Sell	386	50.39%

* Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

***INCOME RATINGS*, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend.** *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price charts for the securities referenced in this research report are available at https://pricecharts.baml.com, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: NiSource Inc.
BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: NiSource Inc.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: NiSource Inc.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: NiSource Inc.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: NiSource Inc.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: NiSource Inc.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: NiSource Inc.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of

the report: NiSource Inc.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: NiSource Inc.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: NiSource Inc.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for the purpose of any recommendation in relation to: (i) an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report; or (ii) a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Staging a Comeback, Q3 Preview

Staging a comeback. After lagging the S&P500 for most of the year, utilities started making a comeback the past few weeks. In fact since Sep 1 uts are up +8.2%, materially outperforming S&P500 -0.4%. Strong Q2 prints (despite COVID headwinds most companies met/exceeded expectations and our coverage universe earnings grew 5% year over year helped by favorable weather and cost management), attractive relative/absolute valuations, Biden's extended lead in the polls and reports around M&A/portfolio optimization amongst other things have in part contributed to the recent outperformance. Since Mid Q2, as we saw COVID trends stabilizing we have made the case for a comeback in utility valuations, see note here. Our view was (is) that group fundamentals remain intact and a strong economic rebound could ultimately drive valuations towards case 2 of our valuation framework (page 37), where the group was trading pre-COVID (19x '22 EPS). With strong performance past few weeks our coverage universe now trades at 18.1x '22 EPS, in between our case 1 & 2 in our DDM used to set our anchor multiples. While the group has closed the valuation gap, from being ~20% cheap in our bond model in May to ~7% inexpensive on expected '21 dividend yields, there is still room to run with positive catalysts being strong Q3 season and a potential presidential change which we described in our 'What Would Biden Bring?' note.

We are expecting another strong earnings season. Our conversations with ~40 companies in our coverage universe centered upon COVID impacts, weather, regulatory updates and M&A in the space. Generally speaking, most companies saw COVID related demand headwinds improving although still a net drag year-over-year. Across the US, weather was generally favorable in July/August versus normal and YoY, but September was unfavorable year over year though favorable versus normal; we show cooling degree days for the quarter, and our dialogue with companies suggest more of a tailwind but for some to a lesser extent when compared to last year. Helped by weather and COVID trends improving, we expect DTE and PNW to raise 2020 earnings expectations on the call. Going into earnings starting next week, we are positive on CMS, DTE, NI and PNW and cautious on ED and OGE.

Valuations look less attractive in our bond model, but there is still room to run. While the group has closed the valuation gap, from being ~20% cheap in our bond model in May to ~7% inexpensive on expected '21 dividend yields (as of 10/13), there is still room to run with positive catalysts being strong Q3 season and a potential presidential change**.** Specifically, on 10/13/20, the 10yr yield was 0.73% and the Moody's Baa yield was 3.39%. Our bond model reading was 6% cheap on '20 dividend yields and 7% inexpensive on expected '21 dividend yields. The model discounts corporates at 3.76% in '21 and the 10yr yield at 1.54%, assuming a historical spread of 222bp. The discount on NTM relative P/E appears to be much larger (page 40).

Within, we include company-specific tear sheets with our / consensus second quarter EPS estimates along with discussion on key investor debates going into earnings.

AES
we are the energy

Outperform **TP $20**
Analyst: Durgesh Chopra / Tulkin Niyazov

- **Q3 EPS Bridge:** We project year-over-year EPS to decrease $0.03 (or ~6%) primarily driven by reversal of $0.05 insurance benefit in 3Q19, $0.02 covid related impacts, and $0.02 related to DPL/Argentina rate reductions partially offset by $0.02 benefit related to organic growth including Southland project, $0.01-$0.02 cost savings and favorable weather and other items. We think AES is tracking in-line with its updated FY20 EPS guidance range of $1.32-$1.42/sh.

- **What to look for in the earnings report (Key debates/themes):**
  - **Fluence Transaction:** On the last earnings call, management confirmed that they are on track to monetize Fluence, a battery storage JV with Siemens, by the year-end '20. Investors will focus on the progress of this transaction and would like to better understand economics of a potential deal.
  - **ESG Transition:** AES recently divested its coal plants in India and DR and moved closer to its goal of achieving 30% (or less) generation from coal by the year end '20. This is very important, as AES is becoming one of the most transformational ESG stories under our coverage universe.
  - **Balance Sheet / Credit Metrics:** AES is expected to secure a second investment grade upgrade in 2H20. Investors will focus on recent conversations with rating agencies and their views.
  - **Covid Impacts:** On the last earnings call, management reduced its FY20 guidance by $0.07 or ~5% due to foreign currencies and commodities exposure ($0.03), higher interest expense ($0.02) and lower electricity demand at US utilities ($0.07) partially offset by cost cuts ($0.05). Management incorporated an extended u-shaped recovery in its assumptions and didn't anticipate returning to pre-crisis levels until 2021 at that time. Given we have experienced a v-shaped recovery, we think their assumptions could be conservative. Also, it would be interesting to hear how company's world-wide operations are performing during the global pandemic especially in South America.
  - **Regulatory Agenda:** DPL filed for SEET test in April and expects to secure a final decision in early 2021. Recall, the company plans to invest $300m of equity to modernize T&D infrastructure in OH.

- **Positioning into Qtr : Neutral.**

Ameren

Outperform — **TP $84**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We project year over year EPS to grow $0.05 to $1.52/share. Weather was $0.05 favorable last year in 3Q19. We assume a +$0.07 EPS pick-up this quarter from new rates in Missouri. We anticipate a roughly -$0.03 COVID impact in the quarter due to lower Missouri sales volumes. Missouri O&M is expected to be lower as Ameren mitigates the impact of COVID; we estimate a +$0.07 benefit. AEE will see a negative YoY impact from lack of Missouri energy efficiency incentives (-$0.03), and we expect the COLI contribution to be relatively flat. In Ameren Transmission, we estimate a +$0.02-0.03 benefit from increased infrastructure investments. In Illinois gas, we expect a +$0.02 pick-up from increased infrastructure investments with 50% qualifying for the QIP rider. In Illinois electric, we anticipate a -$0.01-0.02 EPS hit due to the lower 30-year treasury rate outweighing the benefit of increased investment. Lastly, we anticipate higher interest expense to contribute -$0.02 issuances and a tax adjustment to have a -$0.01 impact. All numbers are rounded to the nearest penny.

- **What to look for in the earnings report (Key debates/themes):**
  - **Coronavirus sales impacts**: this impacts only Missouri given that it has no decoupling and a lack of formulaic / FERC rates in the jurisdiction. Ameren has been assuming a gradual recovery in sales in Q3/Q4. However, the COVID sales remain a big unknown and will be difficult to predict going forward as Missouri continues to see a rise in COVID cases. Ameren currently assumes a -$0.05 YoY impact from sales in Missouri in Q3-Q4.
  - **O&M management**: AEE has maintained its 2020 EPS guidance of $3.40-3.60 this year under the assumption that it can cut O&M to offset the impact of COVID.
  - **Narrowing of 2020 EPS guidance**: Ameren has a history of narrowing current year guidance with Q3 results.
  - **AEE typically updates its long-term capex, rate base and earnings growth rates with Q4 results in February.**
  - **Thoughts on Missouri IRP**: In late September, AEE filed its triennial Missouri Integrated Resource Plan. We estimate that the newly filed IRP could add roughly ~$1 billion of incremental investment (~6% increase) to the current five-year $16 billion plan, greater than $3 billion incremental capex (~8% increase) to the current ten-year $36 billion plan and roughly $6.5 billion incremental investment through 2040. As mentioned, Ameren typically updates its five-year capital plan in February each year and includes in it what it has high confidence in achieving. We expect Ameren to file Certificates of Convenience and Necessities (CCNs) in piecemeal fashion for each renewable project through 2040 as it has done with its wind projects to date; the approval process for each CCN typically takes 4-5 months.
  - **Missouri rate case**: AEE has said it expects to file a rate case in the first half of 2021 to incorporate the wind projects and COVID impacts.
  - **Missouri wind projects**: with the Missouri IRP update, Ameren announced that another $100mm of wind projects would be delayed until early 2021. Now roughly $1.0bn of Missouri wind investment is expected in service in 2020 and $200mm in early 2021. There is a limited financial impact given the PTC extension.
  - **Downstate Clean Energy Affordability Act in Illinois**: this was legislation not brought up in the most recent session but could be in special or veto sessions or next year. It could represent +$0.07 annual EPS update from a revision in ROE formula, plus has potential upside with renewable and electric vehicle investments.
  - **FERC transmission incentive update**: Comments were filed this summer. An increase in the RTO adder to 100bps from 50bps would result in +$0.04 annual EPS benefit. Recall in May 2020, FERC established a new base ROE methodology and set new base ROE of 10.02% (resulting in ROE of 10.52% including 50 bps adder).

- **Positioning into Qtr: Neutral.**

Outperform **TP $95**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We project year-over-year EPS to increase $0.02 to $1.48 driven by rate increases, and lower O&M. Weather in the quarter was favorable but to a lesser degree when compared to prior year ($0.12 EPS benefit). We expect these items to be partially offset by higher depreciation, transmission true-ups and load declines from COVID.

- **What to look for in the earnings report (Key debates/themes):**
  - **OH related risks/HB 6 Investigation**. In late July local news agencies reported that AEP contributed to campaigns that supported the passage of Ohio HB6. Subsequently, AEP put out a statement denying any wrongdoing. AEP said that it has not been approached by the authorities in the Ohio House Bill 6 (HB6) investigation and none of the wrongful activities in the criminal complaint involve AEP or its subsidiaries. The company further stated that neither AEP nor any of its subsidiaries made any contributions to Generation Now, the group charged in the federal criminal complaint involving First Energy (see our note here). We foresee no meaningful near-term earnings impact with repeal of HB6. Investor concerns are around the risk of potential fines if the authorities decide to investigate AEP.
  - **North Central Project**. During the second quarter, the Louisiana Public Service Commission approved the settlement AEP reached regarding the North Central Wind project. The PSC also approved the flex-up option, ensuring that the $2Bn project can move forward in full, despite Texas rejection. We see the LA decision as a positive for AEP and expect the North Central Wind project to ultimately be $0.04/sh accretive to our 2022E, all else equal. This assumes 2/3rd equity financing ($1.3B) and issuance around the current stock price. We will look for additional color and size/timing of equity on the call.
  - **Ongoing rate cases.** We will look for an update on the status of ongoing rate case in OH ($41MM rate increase request), where a final decision is expected by mid-2021. The company also expects a final commission decision in VA rate case ($38MM revenue increase requested) next month with rates going into effect in early 2021.

AVANGRID

In Line **TP $46**
Analyst: Durgesh Chopra / Tulkin Niyazov

- **Q3 EPS Bridge:** We project year-over-year EPS to increase $0.02 to $0.42 driven by rate increases at Networks and new wind assets placed into service along with associated PTC's within the renewable segment. We expect these items to be partially offset by higher depreciation and interest expenses as well as potentially higher O&M expenses related to storm activity in 3Q20 across AGR's footprint.

- **What to look for in the earnings report (Key debates/themes):**
  - **NY Rate Settlement**. AGR filed a settlement in their ongoing NY rate case, the settlement proposal. In our view, this is a positive development as some investors were skeptical on a rate increase request granted to the company amid COVID in 2020. With that said the proposed capex/RB is below our projections and if approved would be ~$0.05 (or 2%) EPS hit to our '22 EPS projection and the company has yet to receive a final order which was expected in early/mid 2020.
  - **Vineyard Wind:** The Bureau of Ocean Energy Management (BOEM) released a draft supplemental to its Environmental Impact Statement (EIS) on June 12th concerning Vineyard Wind. The final EIS expected to be released in November with approval decision to follow in December. This is consistent with prior expectations -- Covid-19 has not delayed the BOEM's work. In terms of bringing Vineyard Wind online, AGR continues to believe it will be no earlier than 2023, with Iberdrola recently pointing to 2024.
  - **New England Clean Energy Connect:** AGR is close to compiling all the permits it needs for its ~$1Bn NECEC transmission line project in ME. The company was successful in its appeal of ballot referendum in ME courts and now expecting to secure presidential permit by the year-end.
  - **New LT outlook expected in 4Q**: Consistent with previous commentary, AGR expects to hold an Investor Day in concert with majority owner Iberdrola on November 5th. Long-term EPS CAGR targets, updated rate base and capex, and renewable business capacity factor disclosures are expected.
  - **Updates from new CEO:** We are looking forward to learn about Dennis' priorities for near and long term future of the company. In our view, leadership change is an instrumental step forward and will bring an opportunity to improve AGR's operations across its regulated as well as renewable businesses and deliver long aspired financial results.

CenterPoint. Energy

In Line **TP $18**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We project year-over-year EPS to decline by $0.22 to $0.31/share driven by a negative rate case outcome in Houston Electric, a reduction in midstream earnings contribution, COVID sales impacts, higher deprecation/property taxes and increased share count. We expect these items to be partially offset by higher customer growth in both the electric and gas businesses, Houston Electric TCOS recovery, reduced O&M, a small CAREs Act benefit, and rate relief.

- **What to look for in the earnings report (Key debates/themes):**
  - **Coronavirus sales update and cost management:** CenterPoint has said it expects a $0.04-0.09 EPS impact from COVID in the second half of this year after a $0.06 impact in the second quarter. The company is targeting $40mm of O&M reductions this year, already having reduced O&M by 4% QoQ in the second quarter.
  - **New CEO and CFO messaging:** On the second quarter conference call, new CEO David Lesar spoke impressively about the potential for incremental capex and a focus on long-term capital structure that would allow the utility business to increase its EPS growth rate. He also spoke about several of the strategic priorities of the Business Review and Evaluation Committee. He is considered a growth-oriented deal-maker. Investor reception has been positive since his hiring even though he does not have utility experience having joined CNP after a long career in oil services at Halliburton. CenterPoint also recently announced Jason Wells as its new CFO, which became effective on September 28th. Wells brings a wealth of utility experience, most recently serving as CFO at PCG.
  - **Business Review and Evaluation Committee potential update:** CNP has said the Committee would make strategic recommendations to the Board later this month in October 2020 and would follow that up with an Analyst Day before the end of 1Q21. Lesar is said to be eager to move forward with a new strategy and will not do that without updating the investor community, so we expect any decisions from the BREC committee to be announced as they happen, before the Analyst Day. We do not anticipate much to be decided on by the November 5th earnings release date, however, given that it will likely take the Board some time to make its decisions following the recommendations.
  - **ENBL update:** All options are said to be on the table for a shift in strategy at CNP, but one Lesar's major focuses is a review of ENBL amid the challenges facing the oil & gas industry. We would expect Lesar to not sit idle on Enable. We would also note that former Anadarko Petroleum CEO Al Walker and President Robert Gwin have recently been added as representatives for CenterPoint on Enable's GP board.
  - **Customer growth:** CNP continued to see very strong customer growth in the second quarter (+2.4% electric and +2.0% gas YoY).

Clearway Energy

In Line **TP $22**
Analyst: Durgesh Chopra / Tulkin Niyazov

- **Q3 EPS Bridge:** We project year over year Adj. EBITDA to grow $19m or ~6% due contribution from growth projects and reversal of renewable energy performance vs. median expectations, especially giving challenging renewable environment in California. We expect Adj. EBITDA and CAFD will come in line in with management's sensitivity ranges, albeit at the lower end.

- **What to look for in the earnings report (Key debates/themes):**
  - **PCG Bankruptcy.** Management will share latest developments related to PCG bankruptcy. They will also discuss next steps as it relates to trapped cash at PCG. Recall half of trapped cash was released in 2Q and remaining balance expected to be released by the year-end.
  - **Growth Projects and FY21 Guidance.** We expect management to provide update on previously disclosed growth projects including a 1.2GW of renewable pipeline. We also expect management will provide FY21 EBITDA and CAFD guidance on the earnings call.
  - **COVID impacts**. CWEN has pay or take PPA contracts with its counterparties and don't expect material impact from Covid-19. However investors will focus on growth prospects and how they are going to be impacted in the post-covid world.

CMS ENERGY

In Line **TP $63**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We project year over year EPS to decrease $0.01 to $0.72/share on a rounded basis. Last year, in 3Q19, weather was $0.05 favorable and CMS received a $0.05 gain on sale of transmission assets. This year, in 3Q20, we expect weather to be +$0.10 favorable in total, with CMS having disclosed $0.10 in July and our expectation that August/September were neither favorable nor unfavorable. We expect new electric and gas rates to contribute a total of +$0.04 (+$0.02 each) and O&M reductions to drive a +$0.08 benefit. We anticipate a lower effective tax rate from wind tax credits to be a +$0.02 benefit. Conversely, we expect higher D&A, property taxes and interest expense at the utility to result in a -$0.06-0.07 hit. We anticipate a reduction in sales from COVID to have a -$0.02-0.03 contribution and higher COVID-related expenses to be a -$0.01 hit. A write-off from the Ray gas incident disallowed recovery of $7mm (-$0.02). We expect Enterprises should result in a reduction in EPS of -$0.01 with Enerbank's contribution flat. Increased debt at the parent should result in a -$0.03 reduction to EPS with dilution a -$0.01 impact. All numbers are rounded to the nearest penny.

- **What to look for in the earnings report (Key debates/themes):**
  - **COVID sales update**: Recall that CMS does not have decoupling and has higher sensitivity to C&I load than many peers, on our estimates. The company expects a $0.025/share EPS hit for every 1% decline in C&I demand in a given year. Like other utilities, CMS is more sensitive to changes in residential load, with 1% decline or increase in residential demand translating to a +$0.03/share increase in EPS. For the full-year 2020, total weather-normalized electric sales are expected to be down -4-6% YoY, with residential up +5%, more than offset by lower commercial -7-12% and reduced industrial -14-18%. Year-to-date through Q2, total weather-normalized electric sales are down -5% with residential up +4% YoY while commercial is down -7% and industrial is down -18%. On the August 3rd third quarter conference call, CMS said it has been seeing a recovery in C&I sales and said was looking at levels that are 90-95% of pre-pandemic amounts.
  - **O&M management**: CMS has said it plans to offset second half 2020 sales margin impacts of flat to 0.07/share of EPS and additional COVID-related expenses of $0.02/share. The company has identified up to $0.10/share of cost offsets in total through the CE Way, supply chain benefits, work optimization and other initiatives.
  - **Historically, CMS has introduced forward year's EPS guidance in Q3 and narrowed its current year outlook**. We expect another year of 7% YoY EPS growth. CMS does not typically update its capex forecast until it releases Q4 results.
  - **Rate case update**: CMS currently has ongoing electric rate case and we expect updated thoughts on developments there. In June, Commission Staff issued its recommendation and a revised revenue increase in August. An ALJ recommendation is expected shortly with a final decision expected by year-end.
  - **Enerbank and Enterprises**: At Enerbank, CMS has said it is on track for $0.18-0.20/share of EPS for the full year. The bank has continued to see good origination volumes across most of the projects that it provides financing for, and June was a historic month of loan approvals and loan originations. Enterprises is on track for $0.08-0.10/share of EPS this year.

- **Positioning into Qtr: Positive.** Our YoY earnings bridge drives $0.72/share, which is 8% above current consensus, though the Street estimates come up between now and when the company announces results.

Source: Evercore ISI and FactSet as of 10/12/20

conEdison

In Line **TP $80**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We project year over year EPS to decline $0.02 to $1.52/share driven by the suspension of late/other fees during COVID, higher reserves for un-collectibles and increased depreciation / property taxes / interest expense, partially offset by the benefit of new rates at CECONY electric and gas. We expect O&M to be relatively flat, as Con Ed offsets its original expectation for higher expense with the pull forward of future cost savings plans amid the pandemic. The Clean Energy business (CEBs) should also be relatively flat with no new projects coming online and ConEd Transmission (CET) should also be the same.

- **What to look for in the earnings report (reminder that ED does not host a conference call):**
    - **Reserve for un-collectibles and suspension of late fees**: Recall that, with 1Q20 results, Con Ed lowered its 2020 EPS guidance from $4.30-4.50 to $4.15-4.35/share with first quarter results because of an increase in the reserve for un-collectibles and the suspension of late/other fees amid COVID (and also unfavorable steam weather). Con Ed has still not reinstated late fees as NYC continues the process of re-opening. The steam weather in Q3 is not impactful given that the majority of steam revenues come in the winter from heating.
    - **Equity needs:** ED has said that it still plans to issue up to $600mm of equity this year. The company has given itself flexibility around the timing of issuances with updates to its credit facility.
    - **CECONY performance incentives:** we do not expect them to achieve any of their performance incentives at CECONY this year because most of the incentives are based on customer-sited activities (amid the pandemic), such as energy efficiency and distributed generation. In terms of reliability/operational performance, ED does not have many incentives but rather just penalties if performance is subpar.
    - **Cost management:** Con Ed has spoken about accelerating future O&M reduction plans into 2020 amid the pandemic.
    - **Mountain Valley Pipeline**: the Mountain Valley Pipeline is greater than 90% complete. Recall that Con Ed has capped its investment in MVP at $530mm (currently ~12%).
    - **ESG:** we expect Con Ed to continue to push its ESG story following its Investor Day, which is compelling to us but has not gotten as much traction as it should, in our view. The company is purely T&D at the Utilities, has the second largest solar portfolio in the US and invests heavily in energy efficiency. The only mark against ED from an ESG-perspective is its gas distribution/transmission exposure, but that is small when compared to the size of electric T&D.
    - **Potential gas transmission asset sales:** Con Ed signaled at its ESG day that it would consider monetizing gas transmission assets at the right time and price.
    - **Renewables supply chain**: we will be looking to see if the company has procured the necessary materials/supplies for its 2021 CEB capex program.
    - **CEO transition**: CEO John McAvoy is retiring at the end of the year and Tim Cawley will be taking over. Cawley has been president of CECONY and was previously president and CEO of O&R.

- **Positioning into Qtr: Negative.** ED stock has outperformed significantly over the last several weeks (Since Sep 1 up +19% vs group +9%) and we do not expect any particular good (or bad) to come out this quarter, but believe it could be a sell the news event.

Dominion Energy®

In Line **TP $77**
Analyst: Durgesh Chopra / Tulkin Niyazov

- **Q3 EPS Bridge:** We project year over year EPS decrease of $0.22 or ~19% driven by sale of Gas Business, Covid-19 related impacts, Millstone capacity prices and other items, partially offset by investments in regulated businesses and O&M management. On the last earnings call, management provided Q'3 operating EPS guidance range of $0.85-$1.05.

- **What to look for in the earnings call (Key debates/themes):**
  - **Business Strategy / Vision Update:** We expect management will provide an update on the sale of the gas business to Berkshire Hathaway. In addition, we expect they will talk about their vision and how they are trying to become mostly regulated ESG focused utility. It is important that management clearly articulates its long-term strategy and how they are going to achieve it. They also need to talk about their improved balance sheet and favorable regulatory framework in VA that would allow them to grow 6%+ annually for many years to come.
  - **Covid Impacts:** YTD, Dominion has not experienced covid-19 related sales decline in VA, however SC sales were down significantly. In our view, management took a conservative approach when they re-affirmed their guidance for FY20. As we have seen better than expected economic recovery, we think D would be well positioned and print stronger than expected results related to Covid-19.
  - **Capex Updated / ACP replacement:** Investors will be interested to know if Dominion decides to update their LT capital program and provide details around their future growth opportunities. Given the company rebased their financial guidance we feel comfortable about updated outlook.
  - **Offshore EIS:** In June, the Bureau of Ocean and Energy Management (BOEM) released a long-awaited supplemental environmental impact statement (SEIS) and the cumulative impact of the build out of offshore wind in New England. The SEIS came out a bit earlier than expectations, indicating the BOEM was still on track for a final EIS in November and a Record of a Decision in December. The SEIS reviews the environmental impact of the future proposed offshore projects.

- **Positioning into Qtr :** **Neutral.**

DTE

In Line **TP $120**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge**: We project year over year EPS to grow $0.24 to $2.15. For the electric utility, recall that last year in 3Q19 there was $0.18 of favorable weather. Weather in 3Q20 is expected to be very favorable and we assume +$0.29 for its contribution. We expect new electric rates to add +$0.19. COVID savings net of sales is expected to be a positive +$0.05. We expect higher depreciation, property taxes and interest expense to drive a -$0.05 drag. On the gas utility side, weather last year in 3Q19 was $0.01 unfavorable. IRM revenue should contribute a +$0.02 benefit while higher D&A, property taxes and interest expense to result in a -$0.03 drag. The GSP and Energy Trading businesses are trending towards the high end of 2020 EPS guidance and we assume the balance of expected Q3-Q4 earnings is split evenly between Q3-Q4. For the P&I segment, we assume the company delivers the midpoint of guidance this year with better earnings in Q3 than Q4 due to higher REF volumes. We assume an "other" negative impact of $0.08. Lastly, we expect the corporate segment to deliver the midpoint of 2020 guidance this year and assume the remaining balance is split evenly between Q3-Q4.

- **What to look for in the earnings report (Key debates/themes):**
  - **COVID sales impact**: as of Q2, electric sales were trending better-than-expected, driven by higher-than-forecasted residential and slightly better commercial/industrial.
  - **Contingency plans**: despite better electric sales, DTE has thus far maintained its $120-130mm after-tax contingency plans, most of which is expected to be one-time.
  - **Bloomberg reported on Oct. 7th that DTE is considering a sale or spinoff of its non-utility businesses**: We do not expect the company to comment much on this.
  - **Potential update to 2020 EPS guidance and introduction of 2021 EPS guidance:** Historically, in the third quarter, DTE has sometimes updated 2020 EPS guidance and also typically issues 2021 EPS guidance. Recall that DTE Electric, GSP and Energy Trading are trending towards the high end of 2020 guidance.
  - **Longer-term capital, earnings and financing projections expected to come at EEI.**
  - **DTE Electric, GSP and Energy Trading trending to high end of guidance**: with second quarter results, DTE said it is targeting the high end of 2020 electric utility earnings guidance of $759-773mm. The company also expects to achieve the high end of 2020 Gas Storage & Pipeline earnings guidance of $277-293mm. Lastly, DTE is also targeting the high end of 2020 Energy Trading earnings guidance of $15-25mm.
  - **Gas Storage & Pipeline update**: We expect a status update on oil & gas producer activity and volumes. The gas basins that DTE's producers operate in have not seen the same level of scale back in activity as more oily basins. DTE has consistently spoken about a long-term future for gas midstream and added assets in recent years, which is why the Bloomberg report of a potential sale or spinoff comes as a surprise. The company has highlighted its better positioning and potential expansion opportunities for Link and Nexus. That being said, the market continues to assign low values to these assets and investor appetite for ESG continues to accelerate.
  - **Equity needs**: guidance is the midpoint of $100-300mm this year.
  - **Quiet regulatory calendar:** the near-term regulatory calendar is limited with the electric and gas rate cases now behind DTE plus an approved stay-out for next year. The voluntary renewables docket remains open.

- **Positioning into Qtr: Positive.** Due to favorable weather in Q3 and strong first half results, we expect DTE to raise 2020 EPS guidance.

DUKE ENERGY.

In Line **TP $89**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We project year over year EPS to increase +$0.09 to $1.88/share driven by favorable weather. Recall that in 3Q19 last year, Duke had $0.15 of favorable weather. This year, in 3Q20, weather was favorable in July and August and returned to more normal levels in September. DUK has said it expects a $0.25-0.35 impact from electric load declines this year but there is possible upside given that load trends came in better-than-expected in Q2. We expect electric riders to contribute a modest YoY benefit and a partial quarter of new DEP/DEC rates to also have a modest impact. Depreciation, property tax and interest expense should impact EPS by over a nickel. Through the second quarter, DUK has achieved ~40% of its full-year cost mitigation goal of $350-450mm and we expect the remaining amount to be achieved equally in Q3-Q4. On the gas side, the new Piedmont rates are expected to add an insignificant amount as most of its contribution comes in Q1/Q4. The cancelation of ACP will drive a YoY reduction of -$0.04 to earnings. We anticipate the Commercial Renewables segment to have an insignificant higher contribution with the Rambler solar project coming online in July but with a smoothed, long tenor earnings profile. At the parent, we expect the higher financing costs to be a -$0.02 drag and quarterly DRIP and ATM dilution to impact EPS by -$0.01.

- **What to look for in the earnings report (Key debates/themes):**
  - **COVID sales update**: DUK has continued to anticipate a range of $0.25-0.35 EPS impact from 3-5% lower retail sales this year, with possible upside based on favorable residential trends.
  - **Cost management**: as of the second quarter, DUK has achieved ~40% of its full-year cost mitigation goal of $350-450mm.
  - **WSJ report on NextEra takeover**: the WSJ recently reported that NextEra made a takeover approach to DUK that was rebuffed. We do not expect Duke to comment on this rumor, other than to say they are heavily focused on their organic plan and feel good about the momentum they have been getting with the recently filed Carolina IRPs.
  - **Coal ash recovery**: final decisions in DEC and DEP rate cases are expected by year-end 2020 and early 2021, respectively. A potential Supreme Court opinion on the 2017 rate case treatment (fully recovery and return) could come in mid-December. The company has said no return on coal ash could be a $0.05-0.10 EPS hit and impact FFO to debt by 100 basis points, potentially prompting credit rating downgrades. DUK has baked in a range of assumptions into its 2021 guidance and long-term 4-6% growth outlook.
  - **Credit metrics**: Duke still expects AMT credits and cost control to support FFO/Debt of 15% this year but, as mentioned, an unfavorable decision on coal ash could lead to downgrades in credit ratings.

- **Positioning into Qtr : Neutral.**

Entergy

In Line **TP $106**
Analyst: Durgesh Chopra / Tulkin Niyazov

- **Q3 EPS Bridge:** We project year over year EPS to decline $0.12 (~5%) to $2.40 driven by COVID related lower sales and higher uncollectable expense as well as Hurricane Laura impacts which would be partially offset by previously announced reduction in non-fuel O&M. Q3 19 also had $0.06 unfavorable weather impact and $0.26 dilution impact that we expect would reverse to some extent this quarter. We assume previously articulated revenue drives will come in as expected and O&M savings would be major drivers of Earnings volatility.

- **What to look for in the earnings report (Key debates/themes):**
  - **Analyst Day Feedback:** Investors had time to digest ETR's analyst day disclosures. We expect more questions around their financing plan, especially equity issuance going forward. We also expect management will provide update on Hurricane Delta as well as Hurricane Laura.
  - **Update on SERI Complaint**: The company filed briefs on exceptions to the initial decision, so investors would like to know about the details of the filing and latest thought process on the case. On the last earnings call, management said potential downside could be around $0.15-$0.20, which they expect to fully offset with internal levers.
  - **COVID Impacts:** COVID impacts to earnings and cash flow recall that company estimated $120m-$140m revenue impact to be offset by $100m spending reduction for 2020. During early Covid-19 days, ETR was penalized for its commercial and industrial load exposure as investors thought that particular customer class would be largely impacted by early shutdown efforts. As we have seen robust economic recovery, we expect C&I load to pick up faster than expected, which could show up in Q'3 results.
  - **Regulatory Agenda:** The Company filed for renewal and extension of their FRP filings in AR and LA. These regulatory mechanisms ensure timely and efficient recoveries of capital spend.

- **Positioning into Qtr: Neutral.**

EVERSOURCE

In Line **TP $91**
Analyst: Durgesh Chopra / Tulkin Niyazaov

- **Q3 EPS Bridge:** We project year-over-year EPS to increase $0.04 to $1.02 driven by rate increases at state utilities and transmission investments. We expect these items to be partially offset by higher depreciation, interest and taxes. COVID impacts are relatively muted for ES with the benefits of revenue decoupling for over 90% of its business and constructive mechanisms that allow for more immediate recovery of everything from certain capital expenditures to pension and bad debt expense.

- **What to look for in the earnings report (Key debates/themes):**
  - **CT Legislation on storm preparedness**. On 10/02/20, Connecticut Governor Ned Lamont signed a legislation (HB7006) that addresses utilities' storm preparation and response. The bill (here) lays out new requirements as well as penalties regarding utilities' performance in event of a storm. More specifically, The Connecticut Public Utilities Regulatory Authority (PURA) has to initiate a proceeding that would enable performance based regulation framework by mid-2022. Under the bill, the electric distribution companies have to give $25-per-day credit for any outage that last longer than four days. Utilities would not be able to recover those costs through rates. Moreover, Utilities would have to compensate their customers' up-to $250 for any spoiled food or medication. Going forward, The PURA will determine minimum staffing level standards related to particular storm event and utilities have to report their preparation efforts and staffing preparedness. ES and AGR's United Illuminating sub would be subject to this new law. In our view the potential of increased/new penalties are negative all things considered. Separately PURA is doing its procedural investigation of company's response to Tropical Storm Isais which could result in additional fines/penalties up to $0.05-$0.06 potential EPS headwind in 2021.
  - **Offshore wind**. Earlier in the year, ES indicated that its South Fork Wind project is unlikely to enter service before 2023 due to its BOEM application being put on pause and a delay in the NY PSC approval process due to Covid. Previously, South Fork was targeted for a YE 2022 in-service. They still target a YE'23 in-service for Revolution Wind with a BOEM filing made in March but indicated that survey work on Sunrise Wind had been delayed and they will know whether this could impact the YE'24 in-service date later this summer. In June, the Bureau of Ocean and Energy Management (BOEM) released a long-awaited supplemental environmental impact statement (SEIS) and the cumulative impact of the build out of offshore wind in New England. The SEIS came out a bit early than expectations, indicating the BOEM was still on track for a final EIS in November and a Record of a Decision in December. The SEIS reviews the environmental impact of the future proposed offshore projects.
  - **Columbia Gas of Massachusetts Acquisition:** On 10/09/20, ES and NI consummated the Columbia gas of MA acquisition after receiving approval from the state commission in line with expectation of early Q4 close. Recall that on July 2nd, NiSource and Eversource filed with the MA Department of Public Utilities a joint petition for the approval of the $1.1B transaction and a proposed multi-year rate plan.

evergy™

Outperform **TP $62**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** we project year over year EPS to grow $0.04 to $1.61/share, driven the most by O&M cost reductions, plus share accretion from buybacks and higher COLI income. This will be partially offset by reduced electric sales from COVID and higher depreciation, property taxes and interest expense. Recall that weather was $0.09 favorable last year in 3Q19 and we expect it to be modestly unfavorable in this year's 3Q20 quarter. Last year's 3Q19 numbers also had a one-time -$0.05 adjustment for Sibley/Jeffrey.

- **What to look for in the earnings report (Key debates/themes):**
  - **Sales trends:** EVRG is more exposed than our average company to sales decline as it does not have decoupling and, on our estimates, just 13% of EPS comes from FERC assets. The company has said every 1% change in residential load is expected to have a $10mm earnings impact ($0.04 of EPS). Every 1% change in commercial load is expected to have an $8mm earnings impact ($0.03 of EPS). Every 1% change in industrial is expected to have a $2mm earnings impact ($0.01 of EPS). Weather-adjusted total retail sales in Q2 were down -7% YoY, driven by -13% lower commercial and -12% lower industrial sales, partially offset by +5% higher residential. Sales improved over the course of the second quarter, and Evergy's outlook has assumed a slow and steady recovery throughout Q3 and Q4. Cases have continued to rise in Kansas and Missouri in recent weeks.
  - **Cost management:** EVRG is now guiding to 8-11% lower adjusted O&M this year after having achieved $150mm net merger synergies through 2019 since deal closure. Through 2Q20, the company has reduced O&M by another $87mm this year.
  - **Sustainability Transformation Plan (STP) update**: with Q2 results, Evergy raised and extended its EPS CAGR forecast from 5-7% in 2019 through 2023 to 6-8% through 2024. EVRG is expecting to deliver the low end of the range through 2022 while earning near or at its allowed ROEs between rate cases through cost management and the top end of the range in 2022-2024 with new Missouri (2023) and Kansas (2024) rates. EVRG also raised its capex program through 2024 by $1.4 billion, or 19%, to $8.9 billion with no plans to issue equity. The higher spending is now expected to support a rate base growth outlook of 5-6% CAGR from 2019 through 2024 versus 3-4% previously, while limiting bill increases through 2024 averaging 2% per year across the jurisdictions (incl. FERC), with Missouri above that level but comfortably inside the PISA 3% cap and Kansas (where regulators have been concerned about high rates) very manageably below 2%. Evergy now expects to lower 2020 adjusted O&M by a sharper 8-11% (vs. prior 6-9%) and by an additional 9% by 2024. Evergy continues to target CO_2 reductions of 80% by 2050 but sees potential for more rapid de-carbonization (and associated capex): up to 85% by 2030.
  - **Securitization**: we believe concerns about securitization are overblown and will be addressed on the Q3 call. In its five-year outlook, Evergy is currently assuming securitization for one ~500 MW coal plant in 2024, for which we estimate a book value of $300mm and a $0.07 - $0.10 ongoing EPS contribution (<3% of our '22EPS projection) that we believe could be offset with the backlog of investments or through additional cost cutting. EVRG said up to 3,000 MW of coal plant retirements beyond the current five-year plan carry enough asset value on the books that they would require legislation, such as securitization. The retirements could be pulled forward with passage of the law.
  - **KCC and MPSC investigation into STP:** We expect Evergy to provide updated thoughts on the ongoing Kansas and Missouri commission STP investigations. The Missouri Staff report is expected mid-November. In Kansas, the timeline is not as clear yet as a procedural schedule still needs to be set. The investigations are likely to extend into 2021.
  - **Long-term Energy Plan (LTEP):** Evergy is working with stakeholders to better inform the level and timing of future renewables and coal retirements beyond 2024. A Missouri IRP is expected to be filed April 1, 2021 and a Kansas IRP is expected to be filed July 1, 2021.
  - **CEO search**: on Aug. 27th, Terry Bassham announced his retirement. EVRG is looking to hire his replacement by year-end with an internal or external candidate.

Exelon.

Outperform **TP $45**
Analyst: Durgesh Chopra / Tulkin Niyazov

- **Q3 EPS Bridge:** We project year over year EPS to decline $0.06 (~7%) to $0.86 driven by COVID related lower sales and higher uncollectable expense and decreased in power prices and lower volumes impacting generation business which would be partially offset by previously announced reduction in non-fuel O&M and higher interest rates impacting ComEd ROEs. On the last earnings call, management provided Q'3 operating EPS guidance range of $0.80-$0.90.

- **What to look for in the earnings report (Key debates/themes):**

  - **Utility/GenCo Split:** It was recently reported that management hired outside advisors to consider splitting generation and regulated utility businesses. We think a transaction could unlock value but could be challenging to execute, see our note here.
  - **Generation Business**: We expect low power prices and volumes impact ExGen margins. However, management was transparent about generation headwinds (including their retail exposure to C&I customer class), so it shouldn't come in as a surprise to the investors.
  - **IL's FRR Bill:** Investors continue to focus on IL legislation that could provide financial support to EXC's nuclear fleet.
  - **COVID Impacts:** Previously management assumed C&I load to decrease by 2-6% and Residential load to be flat to down 2% by Q'4 due to Covid-19. To mitigate these headwinds, management announced $250m of cost savings and $125m of ExGen capex reduction in 2020. All in all, management expected -$0.10 impact on each ExGen and utilities FY20 earnings after netting against cost saving initiatives. They also expected $100m cash flow hit on ExGen.
  - **Regulatory Agenda:** There are multiple rate cases pending across EXC utilities. Investors are also focused on PJM Capacity market revision, which is pending at FERC. IL legislation considering an FRR option is very important factor as well. We look forward to get more clarity and update on these regulatory matters.

- **Positioning into Qtr: Neutral**.

- **Q3 EPS Bridge:** We project year over year EPS to increase $0.04 (~5%) to $0.80 driven by favorable weather (vs. normal), riders at Distribution business and margin increase at Transmission business partially offset by COVID related lower sales and higher uncollectable expense and higher depreciation and interest expenses. Q3 19 had $0.05 favorable weather impact vs. normal. On the last earnings call, management provided 3Q operating EPS guidance range of $0.73-$0.83/sh.

- **What to look for in the earnings report (Key debates/themes):**

  - **Ohio Investigation:** Investors will focus on the latest developments in OH related to bribery investigation and what the next steps are. It would be interesting to know management's thoughts on House Bill 6 (HB6).
  - **Business Update:** Management will continue to highlight its fully regulated strategy and how it is resilient during economic slowdown. Debates around balance sheet and credit metrics will linger, but with rating agencies continues support we think they are in decent shape at least in near-term. We don't expect the company to provide FY21 guidance on the earnings call as they have previously.
  - **COVID Impacts:** COVID impacts to earnings and cash flow recall that management estimated 6% system-wide load reduction in April y/y. At the same time, management was seeing increased load from residential customer class. Recall, 68% of base distribution revenues come from residential customer class, hence FE is better positioned to weather Covid-19 impacts.
  - **Regulatory Agenda:** Investors will focus on the pending rate case in NJ. FE also plans to file an IRP in WV by the year-end.

- **Positioning into Qtr: Neutral**

HEI

Underperform **TP $34**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We project year over year EPS to be down $0.08 to $0.50/share. On the positive side, we expect higher RAM revenues, increased revenue from recovery of the West Loch project and Grid Modernization projects under the MPIR mechanism, reduced interest expense from debt re-financings and lower O&M. We anticipate these benefits to be more than offset from increased bank provisioning for credit losses, increased depreciation and lower AFUDC.

- **What to look for in the earnings report (Key debates/themes):**
  - **ASB provisioning and net interest margin:** recall that HE rescinded 2020 bank EPS guidance due to uncertainty with provisioning for credit losses. Separately, ASB's net interest margin has continued to come under pressure in recent quarters amid low interest rates.
  - **Hawaiian economy / tourism:** the Hawaiian economy is very dependent on tourism, which has obviously taken a huge hit recently. We expect an update on the current state of the economy and outlook for the remainder of the year and beyond. On the utility side, HE received approval on June 30th from the Hawaiian commission to defer COVID costs (the company assumes $22mm of deferrals in its guidance this year). The utilities are also revenue decoupled, which insulates them from declines in sales volumes. The economic fallout has obvious implications for the creditworthiness of the bank customers.
  - **Regulatory lag:** HE has suffered from chronic regulatory lag. We have been assuming structural lag between the utilities' authorized and earned ROE (running at ~130bp in TTM) compresses by 50bp by 2022 and constructive outcomes in the PBR proceeding lead to an additional 50bp of PIMs upside by 2022.
  - **Status of cost savings:** HE has plans to achieve $25 million of cost savings by YE 2022. Cost savings are expected to be 80% capital and 20% O&M. As of 2Q20, Hawaiian said it has already started to deliver savings.
  - **Performance Based Rates proceedings:** the Performance Based Rate proceeding has been said to be on track for a December commission decision. In August, parties filed reply statements of position in the Performance Based Rates Phase 2 proceeding.
  - **Renewable RFP third party project timing and status of Stage 2:** COVID may affect Stage 1 RFP third party project timing; the next mandated RPS requirement is 40% by 2030. Per Hawaiian, this provides sufficient runway to make adjustments, if needed. However, 3rd party force majeure notices indicate potential COVID-related delays may impact HE's 2022 target of 50%. For the Stage 2 RFP, 16 projects were selected in May 2020. PPA negotiation and community engagement phases have been underway. To qualify for full value of the PIMs, renewable and storage contracts were due in September. Hawaiian filed eight PPAs and also two self-build storage projects.

In Line	TP $277
Analyst: Durgesh Chopra / Michael Lonegan	

- **Q3 EPS Bridge:** We expect year-over-year EPS to grow $0.21 to $2.60/share. We anticipate that Florida Power & Light will utilize its depreciation reserve ($736mm balance) to offset sales declines and any weather impacts to earn the top end of its 9.6-11.6% allowed ROE band on rate base growth of 9%. At Gulf Power, we expect COVID sales declines (only $0.01 EPS impact in Q2) to be offset by planned O&M reductions as Gulf moves to earn the top half of its 9.25-11.25% ROE (it earned 10.4% last quarter). Hurricane Sally caused power outages to 60% of Gulf's service territory, but they were restored within five days; storm cost recovery is subject to PSC approval. Note that Gulf Power is only one-tenth the size of FPL. In the Energy Resources segment, we anticipate growth to be driven by new projects added, plus existing projects, though wind resource could be weaker YoY after a strong 3Q19 at 104%. NextEra permanently retired the Duane Arnold nuclear plant during the quarter. Recall that NEET has been reclassified under NEER as of 4Q19 results and NextEra closed the Transbay Cable acquisition in July 2019. It is important to note that last year in 3Q19 NextEra had a one-time $0.10 write-off of transmission assets and that the Customer Supply & Trading business did not have as strong a second half last year as it did during the first half last year.

- **What to look for in the earnings report (Key debates/themes):**
  - **Sales trends amid COVID and amount of utilization of FPL's depreciation reserve:** Recall that FPL has the depreciation reserve that it can use to offset the negative sales impact on earnings. NEE had a robust $736mm reserve balance as of the end of the second quarter. Every 1% impact to sales is roughly a $70mm annual hit to FPL revenue. The company has previously said that they have sufficient depreciation reserve to earn the top end of their allowed 9.6-11.6% ROE band through 2021, after which new rates are expected to go into effect from an upcoming rate case filing. At Gulf Power, where there is no depreciation reserve, every 1% change in Gulf Power sales volumes results in a $0.008/share annualized impact to EPS.
  - **Gulf Power integration:** NEE is guiding to $0.15 and $0.20/share accretion to EPS from the Gulf Power acquisitions in 2020 and 2021, respectively.
  - **M&A:** The WSJ reported that NextEra reportedly made a takeover approach to Duke Energy that was rebuffed. NEE is reportedly still interested in pursuing a deal. We show multiple scenarios inside this note that generate 24-34% accretion to 2022 consolidated EPS and $14-43/share or 5-16% accretion to our price target of $277. We found a potential deal to be moderately or significantly credit negative depending on the scenario. We do not expect NEE to comment much on DUK but anticipate they will say (as always) they are interested in regulated acquisitions in the Southeast or Midwest in constructive jurisdictions where a deal would be immediately accretive.
  - **MVP and gas transmission assets:** Mountain Valley Pipeline is over 90% complete and has received all the permits it needs to continue forward, with an in-service date expected early 2021. Recall that MVP is anticipated to contribute only $0.07-0.09 of annual EPS. Separately, we believe there could be more commentary on the future role that gas transmission assets could play at NEE given the increased focus of ESG and increasing challenges facing the value / development of midstream.
  - **Rate case details:** NextEra plans to file a combined FPL-Gulf Power rate case in early 2021 for rates effective in 2022.
  - **Capital projects and NEER supply chain:** NEE has said that all capital projects on track this year and that it is not currently experiencing any significant equipment or labor issues for the 5,000 MW of wind/solar projects that it expects to complete in 2020. We believe NEE's extensive experience, scale, and relationships with customer suppliers, contractors and financers separates it from smaller developers who have less buying power and access to tax equity.
  - **FERC electric transmission**: NEE announced the $660mm GridLiance acquisition including debt in late September. This follows NEE's $1 billion acquisition of Transbay Cable in 2019. NextEra has said electric transmission could play an increased role in its portfolio going forward given the nationwide expansion of renewables.
  - **Hydrogen**: NEE announced a $65mm renewable hydrogen pilot subject to Florida PSC approval. The company anticipates hydrogen to play a significant role beyond 2030.

- **Positioning into Qtr: Neutral.**

NiSource®

Outperform **TP $26**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We project year over year EPS to grow $0.05 to $0.05/share. Recall that NI adjusts weather out of its non-GAAP EPS results. We expect infrastructure modernization to contribute a +$0.03 benefit and O&M reductions to add +$0.06, partially offset by -$0.04 a reduction to sales volumes from COVID.

- **What to look for in the earnings report (Key debates/themes):**
  - **Quiet quarter given recent Analyst Day:** NiSource provided a comprehensive update on its Investor Day on Sept. 29th, so we expect a quiet quarter in terms of business updates**.** At its Investor Day, NI announced $40Bn in infrastructure investment opportunities over the next 20 years, an increase of $10 billion over previous expectations. The company outlined a $9.9-10.5 billion capital plan in 2021 through 2024, which is expected to drive 10-12% rate base CAGR and a back-end loaded 7-9% EPS CAGR. Notably, the annual EPS growth is forecasted to be 5-7% in 2021 through 2023. Prior to its Analyst Day, NiSource had said its five-year EPS growth outlook would be greater than 5-7%, but the 7-9% CAGR that was announced at the event was higher than our expectations and materially above industry average projected EPS growth rate of 5%. NiSource continues to target long-term 14-15% FFO to debt, as expected. The company's newly disclosed financing plan includes $200-300 million of ATM equity annually in 2021-2023, $500-700 million of total block equity in 2022-2023, $600-1,000 million of hybrids/convertibles/other in 2021, plus employee equity programs and long-term debt. The planned $1.8-2.0 billion of renewables replacement power capex was reaffirmed, and is expected to be financed with 60% equity, with recovery of investment sought through a 2023 rate case. The amount of equity in the financing plan to achieve its targeted credit metrics was largely to be expected given that we see NI trending towards 13% FFO to debt this year. NiSource now projects an 8% reduction in O&M costs in 2021 from 2020 levels with subsequent O&M expected to be "relatively flat" in 2021-2024. The sustainable outlook for O&M savings is positive news given that some of the COVID mitigation measures for the near term are expected to be one-time in nature. NI anticipates moderate annual rate increases in the low-to-mid single digits thanks to the O&M management and a changing supply mix (i.e. renewables replacing coal). The company is targeting a 60-70% dividend pay-out ratio over the long term.
  - **COVID update and mitigation measures:** We expect NiSource to provide an update on sales volumes and estimated COVID-related EPS impacts. The company has guided to COVID impacts of $0.15-0.20 in 2020, to be partially offset with mitigation measures of +$0.10-0.15 this year.
  - **O&M reductions**: NI has mitigation measures in place for +$0.10-0.15 this year and is also guiding to 8% lower next year and relatively flat O&M beyond in 2021-2024.
  - **Columbia Gas of Massachusetts divestiture closing:** On 10/09/20, ES and NI consummated the Columbia gas of MA acquisition after receiving approval from the state commission, in line with expectation of early Q4 close. Recall that on July 2nd, NiSource and Eversource filed with the MA Department of Public Utilities a joint petition for the approval of the $1.1B transaction and a proposed multi-year rate plan.
  - **M&A**: NI said at its Analyst Day that its financing plan does not include any potential "portfolio optimization" opportunities to enhance shareholder value, leading many to believe the company is evaluating opportunities.
  - **Property insurance in Massachusetts:** NI has not had any update to date on its filing $300mm of property insurance, which would represent upside to the company's current plan. NiSource has received all its $800mm of casualty insurance.
  - **Rate case updates**: NI currently has pending rate cases in Pennsylvania and Maryland. PA is a much larger jurisdiction, which we expect to contribute $0.25-0.30 of EPS this year, or roughly 20% of our consolidated $1.26 EPS estimate. In contrast, we expect Maryland to contribute just a few pennies in 2020.
  - **Update on renewable projects:** we could see an update on commercial negotiations.

- **Positioning into Qtr: Positive.** We expect NI to deliver a strong quarter above current consensus estimates aided by strong performance on cost reductions.

nrg

Outperform **TP $40**
Analyst: Durgesh Chopra / Tulkin Niyazov

- **Q3 EBITDA Bridge:** We project year over year Adj. EBITDA to decrease by $53m or ~77% driven by Covid-19 headwinds at both generation and retail businesses, partially offset by the higher revenues from margin enhancement, strong economic recovery especially in TX and other items.

- **What to look for in the earnings call (Key debates/themes):**

  - **Direct Energy Acquisition:** We expect management will provide latest updates regarding Direct Energy acquisition. Investors will also focus on financing plan and integration synergies.
  - **Resiliency of Hybrid Business Model.** NRG will continue to highlight resiliency of its fully integrated business model. They will try to make a case that hot summer with potentially volatile / higher power prices in TX shouldn't have significant impact on their earnings given increased supply cost at their retail business would be offset with higher margins at generation business. It would be interesting to get management's view on merchant solar in TX.
  - **COVID Impacts:** Previously, management talked about $50m of incremental bad debt expense related to COVID-19, which they expect to fully offset and remain inside of the guidance range. Given we have seen robust economic recovery across the US and in TX particular; these assumptions could turn out to be too conservative. Admittedly, management said an IG upgrade could be pushed back by six months or so due to COVID-19.
  - **Capital Allocation Priorities:** NRG needs to stay disciplined with its capital allocation priorities. Investors will continue to demand share buy-backs, investment grade credit metrics, stable and growing dividends.

- **Positioning into Qtr: Neutral.**

OG+E

Outperform **TP $35**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We project year over year EPS to decline -0.29 to $0.96/share driven the most by unfavorable weather and lower ENBL contribution. Recall that last year in 3Q19 weather was favorable by $0.06. This year in 2Q20, we expect weather to be unfavorable by -$0.10 with cooling degree days 16% below normal. We expect OGE's degradation in load due to COVID to be fully offset with O&M reductions. OG&E is not expected to materially benefit from any new assets in service. We estimate depreciation / property taxes to be a -$0.05 drag and higher interest expense from new debt issuances to contribute -$0.02. We expect Enable to contribute -$0.05-0.06 lower earnings YoY, assuming the company delivers the balance of its full-year guidance equally between Q3-Q4.

- **What to look for in the earnings report (Key debates/themes):**
  - **COVID load impacts**: OGE has said weather-normalized load in the first half of this year was down 3% compared to 2019. About half of the company's margin comes from residential load, which has increased, and the other half is commercial/industrial, which has declined. Every 1% change in total load is expected to result in a $0.05 annual EPS impact.
    Cost management: OGE has said it expects to mitigate load impacts from COVID this year through cost control. The company cut O&M by $11mm in O&M in first half and expect similar reductions in the back half of the year.
  - **ENBL**: We expect commentary on oil & gas producer activity. Given the headwinds facing the oil & gas industry, CenterPoint CEO Lesar is considering Enable as a major priority in his strategic review. Naturally, OGE's options for ENBL have been a popular topic. The company is likely not going to comment on strategic options for ENBL but is thought to be more aligned with CNP in its approach to ENBL than it has been ever before.
  - **Oklahoma Grid Enhancement Filing Plan settlement**: On Oct. 5th, OGE reached a unanimous settlement in its Oklahoma Grid Enhancement mechanism filing. The mechanism establishes a revenue requirement cap of $7mm for 2020 projects and another $7mm cap for 2021 projects. The projects need to be placed in service in 2020 and 2021 and will be limited to investment in grid automation and related communication and technology systems. Return will be based on the 9.5% ROE and 53% equity ratio approved in the last rate case. No O&M expense is included in the mechanism, which will terminate at the issuance of a final order in the next rate case or Oct. 31, 2022, whichever comes first. A final decision is expected by YE 2020. OGE is has not changed its full capex program and is expected to seek reauthorization of this mechanism when it files its next rate case. We believe this is a positive development in a historically challenging jurisdiction that will enable avoidance of more regular rate cases and also helps solidify LT utility 5% EPS growth. It is another indication of an improving regulatory environment in OK that follows balanced outcomes in the last two rate cases.
  - **2021 EPS guidance and a refresh of five-year capital plan and long-term EPS growth rate likely to come in February with Q4 results, based on history.** It is possible that 2020 guidance could be updated with Q3 results though.
  - **Customer growth**: Customer growth has continued to be strong and was +1.1% YoY in the second quarter.

- **Positioning into Qtr : Negative.** Our YoY earnings bridge brings us materially below consensus projections for the quarter in good part due to unfavorable weather.

PNM Resources

In Line **TP $44**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We project year over year EPS to decrease $0.03 to $1.25/share. The company recently increased 2020 EPS guidance by $0.05-0.07, which it attributed to hot Q3 weather and lower interest expense for the third quarter. This came after PNM had previously said it expected roughly ~54% of prior $2.16-2.26 guidance to come during the quarter. Adding these two data points together we get to $1.25/share for our Q3 estimate.

- **What to look for in the earnings report (Key debates/themes):**
  - **COVID update**: we expect to see an update on weather-normalized load trends to date and what the expectation is going forward.
  - **Ballot initiative:** There is a ballot initiative in November 2020 to change the New Mexico commission from elected to appointed and reduce the number of commissioners from five to three. PNM said historically ~85% of ballot initiatives have passed in the state. The company has said it does not have a preference for five versus three commissioners. If the ballot initiative passes by a simple majority, 1) the legislature defines the nominating committee and the requirements for the commissioners; 2) the terms for commissioners elected in Districts 1 and 3 in 2020 will be for a two-year term ending in 2022 as the terms in Districts 2, 4 and 5 already expire in 2022; and 3) three appointed commissioners would begin new staggered terms on January 1, 2023.
  - **O&M management:** given favorable weather in Q2-Q3, it will be interesting to hear if PNM will scale back its O&M management or move full speed ahead with COVID mitigation plans.
  - **More details on the recent increase to 2020 EPS guidance:** on October 1st, PNM increased its 2020 EPS guidance from $2.16-2.26 to $2.23-2.31/share to reflect higher residential loads resulting from COVID and hotter summer temperatures, along with interest savings from refinancing of debt.
  - **Reaffirmation of long-term EPS growth rate**: on October 1st, PNM also reiterated its 5-6% EPS CAGR outlook for 2019-2023.
  - **Roll out of investment plans and earnings power to incorporate 2024.** PNM has already announced that it plans to provide an update to incorporate 2024 into its investment plans and earnings power estimates. We expect a robust backlog of T&D investments in a transmission-constrained New Mexico to support a solid capital program and continued growth in earnings power.
  - **2021 guidance and updated dividend outlook likely coming in mid-December**. PNM typically updates its forward-year guidance and dividend outlook after its Board meeting in December.
  - **New Mexico decoupling filing update:** As testimony was filed and parties prepared for hearings in the decoupling case, some questions were raised on the legal interpretation of the law amended in 2019 (Efficient Use of Energy Act) that serves as the basis for PNM's decoupling filing. PNM subsequently asked the hearing examiner to stay the schedule and asked the commission to provide an order on how it interprets the law. PNM is hoping to get the issues cleared up before its next planned rate case filing in mid-2021. Previously, a decision in the decoupling case was expected by year-end 2020.
  - **ESG story**: we expect PNM to continue to push an underappreciated, compelling ESG story that targets emissions-free energy by 2040 versus many other company goals of net zero in the 2040 or 2050 timeframe.

- **Positioning into Qtr: Neutral.** PNM just raised its 2020 EPS guidance and reaffirmed its long-term EPS growth outlook on October 1st, so we view the quarter as neutral given the outlook has already been refreshed ahead of the quarter. The introduction of 2024 does present opportunities for an extended outlook though.

PINNACLE WEST CAPITAL CORPORATION

In Line **TP $85**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We project year over year EPS to grow $0.33 to $3.10/share. Recall that weather last year in 3Q19 was relatively normal. This year, Pinnacle has posted very favorable weather data in the third quarter on its website (we assume a $0.45/share pick-up). Weather-normalized load recovery has also been strong since mid-May and cost management has been effective. We assume a continuation of the pension benefit for Pinnacle West that we saw in Q1-Q2. The LFCR and TCA riders should collectively contribute a modest positive, with other operating expense (D&A and TOTI) and higher interest expense as modest headwinds. Recall that historically 56% of Pinnacle's earnings come in Q3 due to air conditioning loads in the hottest months in Arizona.

- **What to look for in the earnings report (Key debates/themes):**
  - **Electric sales and cost management**: Last quarter, given the impact of COVID, Pinnacle reduced its 2020 weather-normalized YoY sales growth expectations from 1-2% growth to flat to negative 1%, but added that it believes this is a conservative given that its electric sales have been recovering. PNW has continued to see weather-normalize load improve and it is actually up +1% YoY in May 13th-Aug 31st, with C&I down -5% and residential up +6%. Recall that historically 56% of earnings come in Q3 due to air conditioning loads in the hottest months in Arizona. PNW has reaffirmed 2020 EPS guidance of $4.75-4.95 with the expectation that cost control would offset the impacts of COVID this year.
  - **Rate case thoughts following Staff / intervener testimony**: On Oct. 2nd, Arizona commission Staff/interveners filed testimony in Pinnacle West's Arizona rate case. While Staff recommended an ROE of 9.4%, which is well below the proposed 10.15% and the current 10.0%, it is close to the national average of 9.45% and above the 9.28% recommended by Staff in the Tucson Electric case. Staff also recommended an equity ratio of 54.67%, in line with the request (as expected) of 54.70% but below existing 55.80%. In addition, Staff proposed two alternatives (0.0% and 0.3%) for return on fair value increment that are both below request (1.0%) and current (0.8%); but we did not expect much on that, Staff also recommended an original cost rate base of 8,788mm and a fair value rate base of 12,225mm, both similar to the request of $8,873mm and $12,310mm, respectively. Lastly, Staff is proposing revenue decreases of -$38.8mm on original cost rate base, -$39.1mm on fair value alternative 1 and -$25.3mm on fair value alternative 2, versus APS' revenue increase request of +$22.9mm on original cost rate base and +$68.6mm on fair value rate base. We view this update positively primarily because Staff's proposed ROE is above that Staff proposed for Tucson electric and in line with national averages in a challenging jurisdiction. We do not expect a settlement in the APS rate case given the current commission's recent history. PNW has said it expects a final decision mid-2021.
  - **Revisit of 2020 EPS guidance:** Historically, PNW revisits current year EPS guidance in the third quarter. We believe it is possible 2020 EPS guidance could be increased after a very hot third quarter and strong beat in the second quarter on weather and in the first quarter on cost control.
  - **We do not expect PNW to introduce 2021 EPS guidance despite historically announcing forward year guidance in Q3.** Given the pending rate case, we do not expect 2021 EPS guidance until that rate case is concluded, likely in mid-2021.
  - **Hydrogen pilot:** Palo Verde is collaborating on a pilot project in 2020-2022 to explore the production of hydrogen at Palo Verde Generating Station.
  - **Deregulation proceeding thoughts:** No workshops are currently scheduled. We view the likelihood of deregulation in the state as a low probability outcome given that it was previously deemed unconstitutional and support of it does not seem very strong. Commissioner Olson and Burns have been pushing for it, and Burns' term will end this year.
  - **Commission election**: It is an election year for the Arizona commission and three seats will be filled with one incumbent on the ballot (Lea Marquez Peterson). PNW has said they are relatively agnostic to the make-up of the commission and believes they are well-positioned for both a Republican or Democratic majority.

- **Positioning into Qtr : Positive.** We expect PNW to raise 2020 EPS guidance with a strong Q3 EPS beat following strong Q1-Q2 results.

100 ppl
A century of people powering life.

In Line **TP $31**
Analyst: Durgesh Chopra / Tulkin Niyazov

- **Q3 EPS Bridge:** We project year over year EPS to increase by $0.04 (~6%) to $0.65 driven by favorable FX position vs. last year, warmer than normal weather and organic growth across PPL's platform, partially offset by Covid-19 impacts and share dilution. 3Q19 Adj. EPS was $0.61/sh. We are also refining our FY20 EPS estimate to $2.45/sh from $2.50/sh taking into account YTD performance which reflects lower sales driven by Covid-19 impacts and unfavorable weather in Q'1.

- **What to look for in the earnings report (Key debates/themes):**

  - **Strategic Alternatives:** We expect management will update investor community on their progress to sell the UK business. Most of the questions will center around potential deal economics and future of the company. More specifically, it would be interesting to know what management plans to do with investment proceeds and their latest thinking around financing/capex programs going forward.
  - **Timeline for the RIIO-2 process is long-dated.** In August '19, the UK utility regulator (Ofgem) kicked off the review process for electric distribution companies. Ofgem is expected to reach an initial determination for Distribution Networks Operators (DNOs) in June '22 and a final determination by YE '22, with rates effective April '23.
  - **PPL's exposure to FX risk:** As of 2Q20, PPL is 95% hedged against the pound in '20 at $1.47, 8% hedged in '21 at $1.32, and unhedged in '22. The company uses options in their hedging strategy, which represents one-third of their hedge portfolio for '20. Currency volatility creates potential headwinds.
  - **COVID Impacts:** Management expected (-$0.03)-(-$0.04) monthly EPS impact based on April's shutdown primarily in UK and Kentucky. Most of this decline in sales volume. They expect to recover lost revenue through UK decoupling mechanism albeit with two year lag.
  - **Regulatory Agenda:** The company plans to file a rate case in Kentucky later this year. This could slip to next year due to Covid-19 related impacts and super low interest rates. ROE Complaint related to PA operations at FERC will also be point of discussion. Also, Investors would like to get an update on the Ofgem RIIO-2 Draft Determinations for Transmission, Gas Distribution and Electricity System Operator.

- **Positioning into Qtr:** **Neutral.**

PSEG
We make things work for you.

In Line **TP $53**
Analyst: Durgesh Chopra / Tulkin Niyazov

- **Q3 EPS Bridge:** We project year over year EPS to decline $0.03 (~3%) to $0.95 driven mostly by higher O&M related to storm activities, Covid-19 impacts, and weakness at generation business partially offset by organic growth at utilities and higher capacity revenues at generation business. We expect management will continue to pull O&M levers, especially at generation business, to offset Covid-19 related impacts. Although we have seen continues reduction in forward power prices, the company is almost fully hedged for '20 and shouldn't experience significant volatility in power segment. Increased PJM capacity prices for DY20/21 could partially offset re-contracting / volume degradation.

- **What to look for in the earnings report (Key debates/themes):**

  - **Progress on separating the GenCo business:** In the last earnings preview note we said: 'As power prices continues to stay low and ESG theme becoming more prevalent we expect management would address its GenCo strategy going forward'. Indeed on the last earnings call management announced a process to separate its generation business. We think Q'3 call will be focused on the progress so far and future of standalone utility business.
  - **COVID Impacts:** COVID impacts to earnings and cash flow. Recall, PEG's transmission and residential segments of distribution contribute 75% of total utility margin. Transmission revenues are fixed and 60% of distribution margin comes from residential customer class, which was expected to increase during the shutdown period. The company has electric bad debt expense recovered through the social benefits clause, while gas distribution has weather normalization clause.
  - **Regulatory Agenda:** BPU recently approved PEG's EE filing, a 1$bn program for three years. The filing also included a decoupling like mechanism that would help PEG offset lost load. We think investors would be interested to know more about the details of approved filing. Decision on PJM Capacity Market is still pending at FERC. A new docket reviewing the FRR option at NJ is ongoing; we think investor would like to get more color on that docket and potential implications as it relates to the offshore wind project. Concerns around FERC transmission ROE could also be discussed on the call.

- **Positioning into Qtr: Neutral.**

Sempra Energy

Outperform **TP $138**
Analyst: Durgesh Chopra / Tulkin Niyazov

- **Q3 EPS Bridge:** We project year over year EPS to decline $0.06 (~4%) to $1.44 driven by asset sale (Peru and Chile), FX headwinds, higher depreciation and interest expenses and other partially offset by continues rate base growth at CA utilities, favorable weather in TX and LNG and Mexico Sub contributions.

- **What to look for in the earnings report (Key debates/themes):**

  - **COVID Impacts:** The company is fully decoupled at its California utilities but has exposure in Texas. That said, revenues have been holding up better than expected in Texas, as residential demand has increased, offsetting the impacts from lower C&I sales.
  - **Non-utility exposure:** SRE sees limited volumetric exposure at Ienova or Cameron LNG as most of their contracts are take-or-pay. That said capital spending at the Mexican business could be delayed due to Covid-19. On that front, the ECA LNG export permit has been delayed as the Mexican government has been understandably more focused on responding to Covid than in issuing permit.
  - **Texas looking better than expected.** With CA decoupled, investors have been more concerned with how TX demand would hold up during Covid-19 and as a result of the sell-off in oil prices. Interestingly, electric demand actually increased 1% in 1Q in Texas and the utility added 18k new customers. Most utilities saw demand declines in 1Q led by weather. Further, SRE is still seeing significant demand from drillers in west Texas to move from stand by generation to the grid, despite a declining rig count and the commodity backdrop. Overall, Management still expects weather to be a more important variable than Covid on TX this year.
  - **CA franchise agreement.** The city charter in San Diego requires a competitive bid to renew its franchise agreement. The city council is actively involved in this process and Mayor's office expected to issue invitation to bid this month. SRE plans to fully engage in the process and submit its bid in the second half of October and a final decision is expected by year end, we will look for additional color from management on this front.

- **Positioning into Qtr:** **Neutral.**

Source: Evercore ISI, FactSet as of 10/12/20

Southern Company

In Line **TP $59**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We project year over year EPS to decrease $0.14 to $1.20/share versus guidance of $1.15/share. In 3Q19, weather was $0.15 favorable. This year, in 3Q20, we expect weather to be modestly beneficial versus normal (we estimate +$0.03). Mitigated COVID impacts (lower sales coupled partially offset by reduced O&M) are expected to have a -$0.04 impact, while increased interest expense is anticipated to contribute a -$0.02 drag at the parent with share dilution contributing -$0.01. At the regulated businesses, the rate action net of D&A and interest expense is expected to be a +$0.02 benefit YoY. We expect Southern Power to add an additional +$0.01 with a couple new wind farms this year driving the increase. All numbers are rounded to the nearest penny.

- **What to look for in the earnings report (Key debates/themes):**
    - **COVID sales impact update**: SO has been forecasting a weather-normalized retail sales decline of 2-5%, resulting in a $250-$400mm hit to revenues. They expect to offset this impact with cuts to O&M expense. Through June, the company said the COVID impact on retail revenues has been lower than anticipated. Retail sales have seen improving trends since May. We note that COVID cases are lower in Georgia and staying low while cases are higher and staying high in Alabama and Mississippi.
    - **Cost management:** Southern has previously said that it expects to offset $0.20-0.30/share of EPS impacts from coronavirus with O&M reductions. Cost control was very strong in the first half of the year and if SO is well-positioned in the fourth quarter we suspect it could pull forward some 2021 O&M.
    - **Potential narrowing of range of 2020 EPS guidance:** SO has historically narrowed its current-year EPS guidance during its third quarter call and we expect the same this year. We see more tailwinds than headwinds to guidance with electric sales trending better than originally expected and modestly favorable weather in Q3 after an unfavorable first half that saw the company still maintain its guidance with effective cost control.
    - **Guidance for 2021 and a refresh to the long-term outlook is not expected until February, as per typical.** Recall that the company is currently targeting a long-term EPS growth rate of 4-6% on the back of a five-year capex program of $40 billion.
    - **Vogtle update**: Southern is on track for cold hydro testing in October before the third quarter conference call. Southern continues to work toward fuel load occurring in 2020; however, this milestone is not required to be achieved until later in 2021 to support the approved in-service dates. The current in-service dates for Units 3 and 4 remain Nov 2021 and Nov 2022 at an unchanged capital cost of $8.4Bn, respectively.

VISTRA ENERGY

Outperform **TP $27**
Analyst: Durgesh Chopra / Tulkin Niyazov

- **Q3 EPS Bridge:** We project year over year Adj. EBITDA to decrease by $14m or ~1% due to higher fuel cost at retail business and Covid-19 related headwinds partially offset by the acquisition of Ambit and Crius retail businesses, resilient power market environment at ERCOT, and OPI contributions.

- **What to look for in the earnings report (Key debates/themes):**

  - **Texas Summer.** We think management will discuss FY20 summer takeaways and provide their updated hedging disclosure which would impact their next year EBITDA and FCF metrics.
  - **Merchant Solar Investment:** We expect management will address investor concerns around solar economics in TX and why they think it is attractive avenue of growth.
  - **Capital Allocation:** VST recently hosted a virtual analyst day where they discussed two main themes: 1) Capital Allocation. 2) Portfolio Transition. At the end of the day, VST has to put up cash flows that are in fact somewhat resilient to wholesale price declines. They understand this and that is part of the reason for the LT Outlook. They must also maintain capital discipline by keeping capex low sticking to conservative debt/EBITDA targets, and buying back stock, and keep optimizing their fleet. We also need to see some evidence that power market and capacity market conditions will stabilize.

- **Positioning into Qtr: Neutral.** We expect Q'3 Adj. EBITDA will come in at $1,050m vs. consensus estimate of $1,102m. We do think our estimates are conservative even after incorporating Covid related impacts on Retail as well as Wholesale businesses. More importantly, a load demand (and economy in general) in TX continues to be strong benefitting VST's generation/retail load match portfolio.

Source: Evercore ISI, FactSet of 10/12/20

WEC Energy Group

In Line **TP $93**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We project year-over-year EPS to increase $0.03 to $0.77 due to favorable weather and cost reductions mainly. Our projection is a penny higher than the company's Q3 guidance range of $0.74 - $0.76 due to better than expected weather in Aug/Sep.

- **What to look for in the earnings report (Key debates/themes):**
  - **Five year capex**. We will look for update to WEC's five year capex plan through 2025. The company has been signaling accelerated coal retirements, we expect the capex plan to include higher % of generation capex currently at 15%.
  - **More opportunities possible in the infrastructure segment**. WEC has been buying gas storage and renewable projects outside their utility in recent years and noted on the previous call that there might be opportunities to invest more in this segment than initially planned. These opportunities may arise as other companies need to raise cash in an economic downturn.
  - **M&A**. With the premium valuation being ascribed to WEC (rightfully deserved given the execution) and wider dispersion in utility multiples within our coverage universe, we expect continued investor debate around M&A and possible consolidation opportunities.

- **Positioning into Qtr: Neutral.**

Xcel Energy®

In Line **TP $65**
Analyst: Durgesh Chopra / Michael Lonegan

- **Q3 EPS Bridge:** We project year over year EPS to grow $0.08 to $1.09/share. Weather last year in 3Q19 was $0.04 beneficial and weather this year in 3Q20 is also expected to be $0.04 favorable. The YoY increase is driven the benefit of Minnesota rate case stay-out (+$0.05), O&M cuts (+$0.04), new rates in Colorado (+$0.02) and New Mexico (+$0.01) and Texas (+$0.03), capital rider recovery (+$0.02) and AFUDC equity (+$0.02). The benefit of these items will be partially offset by higher depreciation expense (-$0.07), increased interest expense (-$0.02), higher property taxes (-$0.01) and dilution (-$0.01).

- **What to look for in the earnings report (Key debates/themes):**
  - **COVID sales impact:** Weather-normal retail electric sales have tracked better than XEL's base case and were down 9.6% in April, 6.7% in May, -4.7% in June, up 0.4% in July and down -2.3% in August (preliminary). Every 100bp change in electric sales has a $25mm pre-tax impact. Xcel's base case assumes total sales decline 4% this year. Its base case also assumes up to a $0.17 EPS impact from COVID in 2020, with its mild case scenario a $0.11 impact and its severe case scenario a $0.37 impact. The company expects to deliver 2020 guidance in its base case through O&M management and deferral of some incremental COVID expenses.
  - **O&M management:** XEL has thus far been on track to reduce O&M by 4-5% (base case) this year. Every 100bp change in O&M has a $23mm pre-tax impact.
  - **Minnesota Relief and Recovery investment plan**: we expect investors to inquire about the expected timing of decisions as well as the financing of the investment plan. About half of the $3 billion proposed plan would be incremental to the five-year capital budget and the other half would be accelerated into the plan. The R&R filings / planned filings are in three pieces 1) grid investment plan with incremental EV spending, 2) wind repowering for 800-1,000MW of owned & PPAs, 3) solar generation with storage, incremental investment for 460MW. We would expect Xcel to finance any incremental capex above its base plan with 40-42% equity, with the remainder debt.
  - **Expect XEL to issue a series of updated forecasts for capex in 2021-2025, rate base growth, financing plan, credit metrics. They are also expected to issue 2021 EPS guidance.**
  - **PPA buyouts and status of wind projects:** additional PPA buyouts represent upside beyond XEL's current plan. Separately, the company has said there are potential delays in two wind projects into 2021, though that is not expect to have an impact from a financial standpoint because of the extension of safe harbor.
  - **Equity forward settlement:** We expect the company to indicate that it still plans to settle the $740mm equity forward priced in 2019 in 4Q20.
  - **Other regulatory updates:** XEL has filed for wildfire and advanced gird riders in Colorado in lieu of filing a full rate case. The company has an outstanding Minnesota resource plan and is expected to make a resource plan filing in Colorado in 2021. In the Minnesota R&R filing, Xcel outlined a stay-out plan. Separately, the company is required to file a rate case in TX and NM, expected in 1Q21. In July, XEL reached a settlement with all parties in the Colorado Gas rate case.

- **Positioning into Qtr: Neutral.**

Updated as of 10/13/20

Source: FactSet, Evercore ISI Research

Utilities are trading modestly above our Case 1. Post COVID valuations should appreciate towards Case 2.

- Our historic base case ("case 1") assumed an orderly transition to higher interest rates, with authorized ROEs falling to 9.25% from 9.75%, and 10- year Treasury yields rising over the next several years, resulting at the end in a **2.25%** spread between the return on equity and the calculated cost of equity.
  - When you look at the current valuation of 18.1x '22, it is modestly above our "case 1" scenario of 17.5x, which as described above implies moderation in authorized ROEs and gradual increase in treasury yields.
- The perceived "best in class" earnings compounders and COVID-19 immune names (WEC, NEE, ES, XEL, CMS) trade a multiple that discounts both a more or less status quo authorized ROE regime and a longer runway for sustained rate base growth. That is "case 3".
- In our "case 4" scenario we assume authorized ROEs moderate and interest rates rise more rapidly, resulting in a more meaningful near-term reduction in profitability, along with a steeper decline in rate base growth, which drives utilities back to a P/E multiple that is closer to long-term historic averages.
- We believe the group is modestly overvalued barring severe recession related to COVID-19 or significant economic recovery. We set our target prices on "market-agnostic" basis using an anchor P/E multiple of ~17.5x '22 EPS so investors can better see where we see good relative value. Near term we could see some pressure on multiples if spreads widen, long term we see multiples diverging back towards Case 2 (or 19.5x) as the economy recovers.

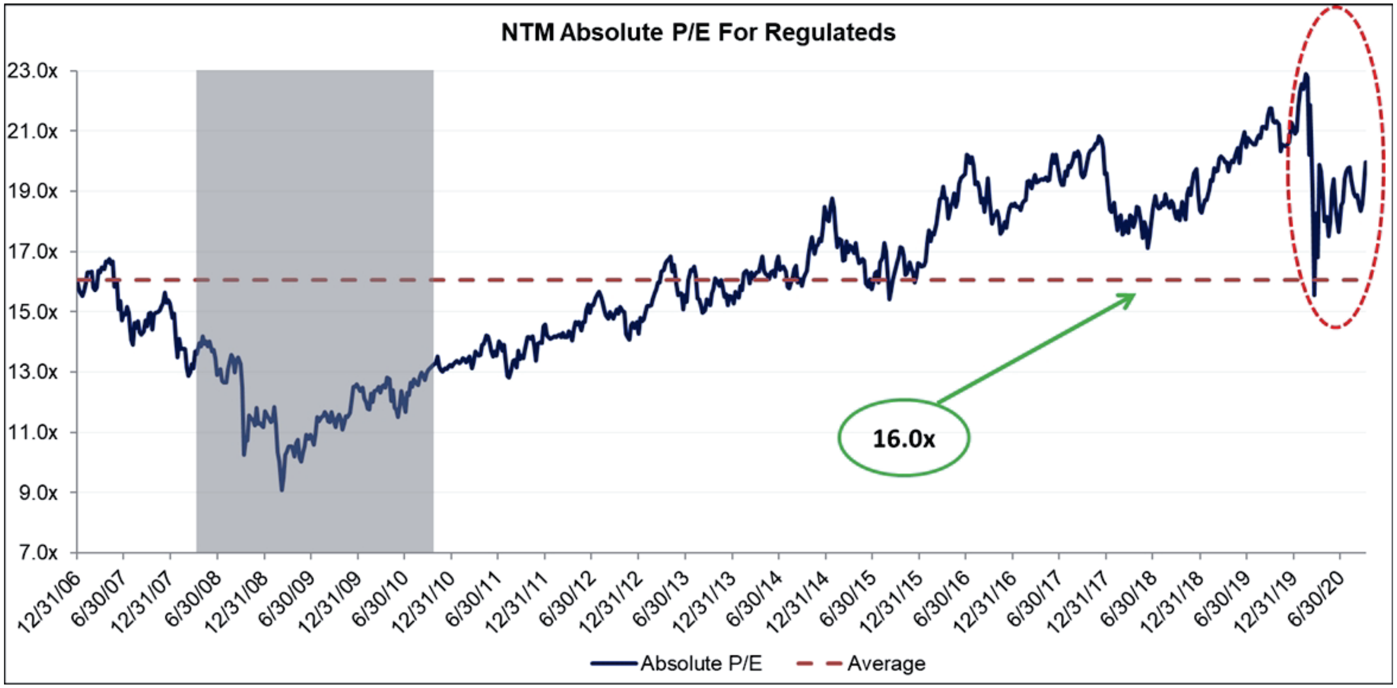
If rates stay unchanged for the next 12 months, regulated utilities now look ~7% inexpensive

Updated as of 10/13/20

Source: FactSet, Evercore ISI Research

Utility valuation has a ~4.0x potential downside to reach historical average

- On 10/13/20, NTM absolute P/E was **20.11x** using FactSet consensus. The NTM absolute P/E had peaked on 02/16/20 at ~22.9x and on 7/15/16 (post-Brexit) at 19.93x.
- Since '06 the average NTM absolute P/E is ~16.0x. Since '95 it is ~14.4x.



Updated as of 10/13/20

Source: FactSet, Evercore ISI Research

NTM Relative P/E Below Historical Average

- The average relative P/E since 2006 is 1.09x. Since ’95 it is 0.93x.
- On 10/13/20, the relative P/E was **0.90x** vs. the 1.17x level at YE ’19.
- The relative P/E post Brexit vote was 1.17x, which we hit again in mid November ’18.
- It was 1.36x on 12/23/18 when we were pricing in recession risk at a high probability.

ANALYST CERTIFICATION

The analysts, Durgesh Chopra, Tulkin Niyazov, Michael Lonegan, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and Evercore ISI International Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore "). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI, and can be obtained by writing to Evercore Group L.L.C., Attn. Compliance, 666 Fifth Avenue, 11th Floor, New York, NY 10103.

Evercore and its affiliates, and I or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage universe
In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's universe
Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's universe
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.

Historical Ratings Definitions

Prior to March 2, 2017, Evercore ISI's recommendations were based on a stock's total forecasted return over the next 12 months:

Buy- the total forecasted return is expected to be greater than 10%
Hold- the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%

Sell -the total forecasted return is expected to be less than 0%

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy- Return > 20%
Buy- Return 10% to 20%
Neutral - Return 0% to 10%
Cautious- Return -10% to 0%
Sell- Return< -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight- the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight- the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight -the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended- the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior "Overweight," "Equal-Weight" and "Underweight" ratings were viewed as "Buy," "Hold" and "Sell," respectively.

Ratings Definitions for Portfolio-Based Coverage

Evercore ISI utilizes an alternate rating system for companies covered by analysts who use a model portfolio-based approach to determine a company's investment recommendation. Covered companies are included or not included as holdings in the analyst's Model Portfolio, and have the following ratings:

Long- the stock is a positive holding in the model portfolio; the total forecasted return is expected to be greater than 0%.
Short- the stock is a negative holding in the model portfolio; the total forecasted return is expected to be less than 0%.
No Position- the stock is not included in the model portfolio.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company, and in certain other circumstances; a stock in the model portfolio is removed.
Rating Suspended - Evercore ISI has suspended the rating and/or target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon; a stock in the model portfolio is removed.

Stocks included in the model portfolio will be weighted from 0 to 100% for Long and 0 to -100% for Short. A stock's weight in the portfolio reflects the analyst's degree of conviction in the stock's rating relative to other stocks in the portfolio. The model portfolio may also include a cash component. At any given time the aggregate weight of the stocks included in the portfolio and the cash component must equal100%.

Stocks assigned ratings under the alternative model portfolio-based coverage system cannot also be rated by Evercore ISI's Current Ratings definitions of Outperform, In Line and Underperform.

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell," to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Long, No Position and Short ratings can be equated to Buy, Hold and Sell respectively.

Evercore ISI rating (as of 10/14/2020)

This report is provided for informational purposes only. It is not to be construed as an offer to buy or sell or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy in any jurisdiction. The information and opinions in this report were prepared by registered employees of Evercore ISI. The information herein is believed by Evercore ISI to be reliable and has been obtained from public sources believed to be reliable, but Evercore ISI makes no representation as to the accuracy or completeness of such information. Opinions, estimates and projections in this report constitute the current judgment of the author as of the date of this report. They do not necessarily reflect the opinions of Evercore and are subject to change without notice. In addition, opinions, estimates and projections in this report may differ from or be contrary to those expressed by other business areas or groups of Evercore and its affiliates. Evercore ISI has no obligation to update, modify or amend this report or to otherwise notify a reader thereof in the event that any matter stated herein, or any opinion, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate. Facts and views in Evercore ISI research reports and notes have not been reviewed by, and may not reflect information known to, professionals in other Evercore affiliates or business areas, including investment banking personnel.

Evercore ISI does not provide individually tailored investment advice in research reports. This report has been prepared without regard to the particular investments and circumstances of the recipient. The financial instruments discussed in this report may not suitable for all investors and investors must make their own investment decisions using their own independent advisors as they believe necessary and based upon their specific financial situations and investment objectives. Securities and other financial instruments discussed in this report, or recommended or offered by Evercore ISI, are not insured by the Federal Deposit Insurance Corporation and are not deposits of or other obligations of any insured depository institution. If a financial instrument is denominated in a currency other than an investor’s currency, a change in exchange rates may adversely affect the price or value of, or the income derived from the financial instrument, and such investor effectively assumes such currency risk. In addition, income from an investment may fluctuate and the price or value of financial instruments described in this report, either directly or indirectly, may rise or fall. Estimates of future performance are based on assumptions that may not be realized. Furthermore, past performance is not necessarily indicative of future performance.

Evercore ISI salespeople, traders and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed in this research. Our asset management affiliates and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

Electronic research is simultaneously available to all clients. This report is provided to Evercore ISI clients and may not be redistributed, retransmitted or disclosed, in whole or in part, or in any form or manner, without the express written consent of Evercore ISI. Receipt and review of this research report constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion or information contained in this report (including any investment recommendations, estimates or target prices) without first obtaining express permission from Evercore ISI.

This report is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

For investors in the UK: In making this report available, Evercore makes no recommendation to buy, sell or otherwise deal in any securities or investments whatsoever and you should neither rely or act upon, directly or indirectly, any of the information contained in this report in respect of any such investment activity. This report is being directed at or distributed to, (a) persons who fall within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”)); (b) persons falling within the definition of high net worth companies, unincorporated associations, etc. (set out in Article 49(2) of the Order); (c) other persons to whom it may otherwise lawfully be communicated (all such persons together being referred to as “relevant persons”). This report must not be acted on or relied on by persons who are not relevant persons.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI, and can be obtained by writing to Evercore Group L.L.C., Attn. Compliance, 666 Fifth Avenue, 11th Floor, New York, NY 10103.

In compliance with the European Securities and Markets Authority's Market Abuse Regulation, a list of all Evercore ISI recommendations disseminated in the preceding 12 months for the subject companies herein, may be found at the following site: https://evercoreisi.mediasterling.com/disclosure.

3Q20 Earnings Preview

Natural Gas | Earnings

NI

Target price (12M, US$)
26.00
Outperform

- **We expect 3Q20 EPS in-line at $0.03** vs consensus $0.02 (vs 3Q19 $0.00) driven by electric grid modernization rate increases with any remaining COVID impacts from this year offset with O&M savings. **Columbia Gas of Massachusetts sale to ES is now closed.**
- **Investor day (virtual) takeaways.** NI hosted its investor day on Tuesday 9/29, which was mostly in-line with our previewed expectations. Among the biggest takeaways, the company reiterated 7%-9% EPS CAGR with a jump in 2024 (only 5%-7% through 2023) after Indiana renewables come in service (build-own-transfer so no AFUDC). The 2024 ratebase projection of $21.2B is $0.5B higher than the prior forecast. Flat annual O&M. FFO/D target unchanged at 14-15%. We expect the company to attain at least the midpoint of a 5%-7% EPS CAGR (vs 2021) by 2024 after renewables are in service.
- **2021 Guidance Reaffirmed.** The company reaffirmed its 2021 NOEPS guidance of $1.28- $1.36 (CS $1.33 vs. consensus $1.34), which includes $0.00-$0.10 improvement from COVID-19 drag and Columbia Gas synergy impacts in 2020.
- **~$9.9B- $10.5B capital plan 2021-2024.** NI identified total expected investment opportunities of ~$9.9B- $10.5B from 2021-2024 of which ~20% is expected for renewables Investment, ~20% for electric infrastructure and asset modernization, and ~60% for gas infrastructure and asset modernization.
- **No block equity needed in 2020 and liquidity is ample for 2021, but equity is planned for 2022 and 2023 for Indiana renewables.** Equity plans for 2020 remain $200-$300M annual ATM plus $30-50M employee plans (no convertible or hybrid financing). Columbia Gas of Massachusetts sale to ES expected to close in October. $500-$700M in 2022/23 for 60% of $1.8-$2.0B renewables capex (in line with CS).
- **Valuation:** Our estimates and $26 TP are unchanged and based on peer 2022 P/E multiples within a SoTP. Our TP includes the discounted value of $0.19 uplift in 2024 (worth $3/sh) from expected earnings from Indiana renewables. Risks include regulatory, capital plan execution, interest rates.

Company Background

NiSource Inc. is energy holding company whose subsidiaries provide natural gas, electricity & other products & services. It operates in 3 segments: Gas Distribution Operations; Gas Transmission & Storage Operations, & Electric Operations.

Blue/Grey Sky Scenario

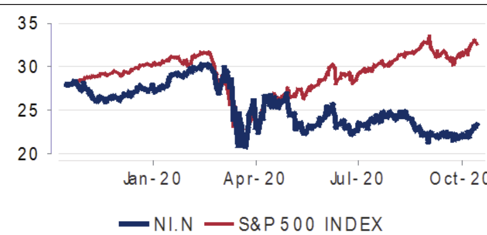
Our Blue Sky Scenario (US$) **32.00**

In our blue sky scenario we assume favorable regulatory outcomes across NI's jurisdictions, successful execution of their capital plan, and growth of infrastructure replacement program backlog. We assume that capex is at the high end of the $1.8-$1.9B and that NI is able to grow ratebase at the high end of their 8-10% range and grow earnings at the high end of their 5-7% range. We assume a 5.0x premium to the average peer 2021 P/E multiples.

Our Grey Sky Scenario (US$) **18.00**

In our grey sky scenario we assume unfavorable regulatory outcomes across NI's jurisdictions, only partial execution of their capital plan, and a decline in the infrastructure replacement program backlog. We assume that capex is at the low end of the $1.8-$1.9B and that NI is able to grow ratebase at the low end of their 8-10% range and grow earnings at the low end of their 5-7% range. We assume a -1.5x discount to the average peer 2021 P/E mult.

Share price performance



On 14-Oct-2020 the S&P 500 INDEX closed at 3488.67
Daily Oct16, 2019 - Oct14, 2020, 10/16/19 = US$27.97

Additional commentary

- **See our recent reports:** 9/30 Investor Day Takeaways, 9/27 Investor Day Preview, 8/7 Indiana Turning Green, 5/26 Left Behind but Holding Up Well, 5/11 COVID-19 Adds Near-Term Uncertainty, but Long-Term Fundamentals Remain Strong, 5/5 1Q20 Earnings Preview, 2/28 Raise to Outperform on Sale of Mass, Elimination of Block Equity Plan, 2020 Outlook – Getting Meaner and Less Defensive,

- **2021 Guidance Reaffirmed.** The company has reaffirmed its 2021 NOEPS guidance of $1.28- $1.36 (CS $1.33 vs. consensus $1.34), which includes $0.00-$0.10 improvement from COVID-19 drag and Columbia Gas synergy impacts in 2020. We expect the company to attain at least the midpoint of a 5%-7% EPS CAGR (vs 2021) by 2024 once these projects are in service. Ratebase growth is also expected to grow at a 10%-12% CAGR from $13.9B in 2020 to $20.7B in 2024.

- **Capital plan 2021-2024.** NI plans to deploy ~$9.9B- $10.5B from 2021-2024 in already identified capital investment opportunities, of which ~20% is expected for renewables Investment, ~20% for electric infrastructure and asset modernization, and ~60% for gas infrastructure and asset modernization. NI plans annual Growth, Safety & Modernization investments of $1.9B-$2.2B through 2024 (total $8.1B-$8.5B from 2021-2024) of which >75% of capex begins earnings in under 18 months. Renewable Generation investments of $1.8B -$2.0B occur in Indiana, primarily across 2022 and 2023. For the electric utility, NI plans $400M-$600M of annual capital investment in base electric system infrastructure and asset modernization programs through 2024.

- **No block equity needed in 2020 and liquidity is ample for 2021, but equity is planned for 2022 and 2023 for Indiana renewables.** Equity plans for 2020 remain $200-$300M annual ATM plus $30-50M employee plans (no convertible or hybrid financing). Columbia Gas of Massachusetts sale to ES expected to close in October. $500-$700M in 2022/23 for 60% of $1.8-$2.0B renewables capex (in line with CS).

- **Columbia Gas of Massachusetts sale now closed.** We expect some comments on closing of CMA sale on this call. Proceeds will be used to pay down term loan and company's short term debt. Recall, on July 2, NI announced that it will pay $56M to settle and resolve the state's investigation into the 2018 Greater Lawrence incident.

- **Retiring coal and replacing with renewables.** NI is targeting to replacing 80% of coal capacity by 2023 with primarily renewable resources and retiring 100% of coal assets by 2028. The company targets to achieve 90% reduction in greenhouse gas emissions by 2030.

- **Financing the renewables.** Equity plans for 2020 remain $200-$300M annual ATM plus $30-$50M employee plans (no convertible or hybrid financing). However, we expect ~60% of $1.8-$2.0B of incremental Indiana plant investment in 2022/23 to be financed with equity (we model half in 2022 and remaining half in 2023. However, this neither results in AFUDC (turnkey projects) nor earn a return until a forward test year ratecase is filed around early 2023 for rates effective 2024. Note that this only represents the utility's initial investment in the Indiana projects, with an additional $1.0B financed with tax equity for the benefit of utility customers. Of the $1.8-$2.0B to be financed by the utility, only $0.4B has been approved to date, with the remaining projects still in negotiation. On the debt side of the ledger, the company plans incremental long term debt of $500M-$700M annually from 2022-2024 for the Indiana renewable generation investments. NI also plans $600M-$1,000M in hybrids and convertibles financing in 2021. The current plan targets renewable investment financing (60% Equity / 40% Debt) and long-term Adj. FFO/total debt of ~14%-15%.

- **Rate base and NOEPS.** Ratebase growth is expected to grow at a 10%-12% CAGR from $13.9B in 2020 to $21.2B in 2024. The company reaffirmed 2021 NOEPS guidance of $1.28- $1.36 (CS $1.33 vs. consensus $1.34), which includes $0.00-$0.10 improvement from COVID-19 drag and Columbia Gas synergy impacts in 2020. NOEPS is expected to grow at 7% to 9% CAGR 2021–2024, with a near term annual growth of 5%-7% in 2021-2023. Further, the company expects long-term ~$40B investment opportunity to drive continued NOEPS growth beyond 2024.

Figure 2: Capital Plan and Rate base

Capex & Rate Base ($B)	2021	2022	2023	2024
Capex	2.0-2.3	2.4-2.7	3.3-3.6	1.9-2.2
Rate base	15.2	17.0	19.8	21.2

Source: Company data, Credit Suisse estimates

- **Liquidity update.** NI's net liquidity available is $1.5B-$1.6B as of Sep 30th (vs. ~$2B on June 30th). Total long term debt is $9.1B with a weighted average maturity of 15.5 years and a 3.68% interest rate as of September 30th vs the prior update in June which included a ~$10B debt level, with ~$8.7B of long-term debt, with a weighted average maturity of ~16 years and a 4.31% interest rate. Additionally, the company expects no significant refinancing needs through 2024.

- **Next initiative and Columbia Gas of Massachusetts sale to drive ~8% O&M reduction in 2021.** The company has undertaken various cost initiatives including voluntary separation program savings, operational processes improvements and modernization driven fuel and cost reductions. NI expects annual O&M for 2021-2024 to remain "relatively flat".

- **Rosewater and Jordan Creek to go in service by year-end.** Rosewater Wind (100 MW JV project) and Jordan Creek (400 MW JV project) are both expected to go in service by year-end. PPA projects Indiana Crossroads (300MW), Brickyard Solar (200MW) and Greensboro Solar (130) MW are expected to go in service by 2021, 2022 and 2022 respectively. Additionally, 8-10 additional projects in advanced commercial negotiations.

- **COVID-19 annual impact to load**. Management expects lower sales volumes from commercial and industrial customers, partially offset by a potential increase in residential sales volume. Increased bad debt expenses (although recent orders in MD, VA allow for deferring the COVID-related expenses and bad debt), and sustained customer attrition. The company's sensitivity analysis continues to project that a +/- 1% change in annual sales volumes, will result in pre-tax operating earnings of $3.9M, $3.9M and $2.3M to residential, commercial and industrial on the electric side respectively, and $3.8M, $2.4M and $1.2M to residential, commercial and industrial on the Gas side respectively. The residential customer class represents 39% and 69% of the retail margins in electric and gas respectively, with commercial at 35% and 22% in electric and gas respectively.

Figure 3: COVID-19 Impact to Nisource Load

Pre-tax Operating Earnings Sensitivity to +/- 1% CHG in annual sales volume	Electric	Retail Margins %
Residential	$3.9	59%
Commercial	$3.9	26%
Industrial	$2.3	15%
Total	**$10.1**	**100%**

Pre-tax Operating Earnings Sensitivity to +/- 1% CHG in annual sales volume	Gas	Retail Margins %
Residential	$3.8	69%
Commercial	$2.4	22%
Industrial	$1.2	9%
Total	**7.40**	**100%**

Source: Company data, Credit Suisse estimates

Regulatory Updates

- **Columbia Gas of MD** filed a new base rate case on 5/15 requesting $6.3M total revenue increase; $5M net of infrastructure trackers which supports continued replacement of aging pipelines and safety upgrades. The final order is expected in 4Q20 with new rates effective in Dec 2020.
- **Columbia Gas of PA.** Filed a base rate case 4/24/2020 which supports continued replacement of aging pipelines as well as adoption of safety upgrades. Ratecase includes $100.4M total annual revenue increase. Order is expected in 1Q21 with new rates effective in Jan 2021.

Valuation

- **Valuation.** Our $26 TP is unchanged and based on peer 2022 P/E multiples within a SoTP. Our TP includes the discounted value of $0.19 uplift in 2024 (worth $3/sh) from expected earnings from $1.8-$2.0B Indiana renewables that will not benefit from AFUDC and will not receive a rate increase until 2024. Meanwhile, our 2022 estimate includes -$0.04 drag from equity issued for these projects (~60% of the ratebase, with half issued in 2022 and half in 2023). We expect the company to attain at least the midpoint of a 5%-7% EPS CAGR (vs 2021) by 2024. We continue to apply a 2.0x premium to the gas utilities for favorable regulatory jurisdictions and lower operational risk since the explosive incident in Lawrence Mass in 2018. We continue to value the electric operation in Indiana at a 2.0x premium for excellent operations and supportive regulation. Risks include 1) ROE risk related to the ongoing ratecases, 2) continued approvals relating to infrastructure replacement/grid modernization programs, 3) commodity risk, 4) interest rate risk, 5) derivative risk, 6) load growth risk particularly in the non-decoupled jurisdictions, 7) weather risk, 8) environmental and climate change risk, 9) physical infrastructure and cybersecurity risk, 10) continued improvement to gas system operations safety, 11) COVID-19 pandemic response load reduction, particularly at the electric utility.

Figure 4: NI Valuation

Valuation, Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Eversource Energy (ES.N)

Method: Our UNDERPERFORM rating and $81 target price for ES are based on a sum-of-the-parts valuation on average peer utility 2021 P/E multiples. For the distribution segment, we apply a 1.0x premium for CL&P and NSTAR. We use a 1.0x premium for the Transmission segment as well. The Transmission segment deserves a premium multiple over average Electric Distribution because being FERC-regulated, the business is not subjected to local state regulation and enjoys a higher ROE for its investments. In our model, we assume a base ROE of 10% plus various incentives for transmission projects. We rate the stock NEUTRAL as we expect its total return to be in line with peers.

Risk: Risks to our $81 target price and UNDERPERFORM rating for ES are: Company Specific Risks from the potential for higher ROEs from the upcoming transmission ROE review, lower-than-expected costs and higher returns for offshore wind, and other risks:1) regulatory risk, 2) legislative risk, 3) commodity risk, 4) interest rate risk, 5) derivate risk, 6) load growth risk, 7) weather risk, 8) environmental and climate change risk, and 9) physical infrastructure and cyber security risk.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource Inc. (NI.N)

Method: We arrive at our $26 target price for NI by applying a 2.0x premium to the gas segment peer 2021 P/E to reflect the constructive regulatory environments with capex trackers in place in the jurisdictions that NI operates. We also apply a 2.0x premium to the average peer electric utility 2021 P/E multiple for NIPSCO Electric utility in Indiana to reflect the favorable ratebase growth profile and regulatory environment in the state. Our OUTPERFORM rating reflects a forecasted total return that is equal the group average.

Risk: Risks to our $26 target price and OUTPERFORM rating are: 1) ROE risk related to the ongoing ratecases 2) continued approvals relating to infrastructure replacement/grid modernization programs 3) commodity risk, 4) interest rate risk, 5) derivative risk, 6) load growth risk particulary in the non-decoupled jurisdictions, 7) weather risk, and 8) environmental and climate change risk, 9) physical infrastructure and cybersecurity risk, 10) continued improvement to gas system operations safety after the 2018 explosion incident in Mass. 11) COVID19 load reductions

** Asterisk signifies initiation or assumption of coverage.*

As of December 10, 2012 Analysts' stock rating are defined as follows:
Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.
Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.
Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.

**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*

Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.

Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:

Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	50%	(33% banking clients)
Neutral/Hold*	36%	(28% banking clients)
Underperform/Sell*	12%	(20% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.

**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse currently has, or had within the past 12 months, the following as investment banking client(s): NI.N

Credit Suisse provided investment banking services to the subject company (NI.N) within the past 12 months.
Within the last 12 months, Credit Suisse has received compensation for non-investment banking services or products from the following issuer(s): NI.N
Credit Suisse has managed or co-managed a public offering of securities for the subject company (NI.N) within the past 12 months.
Within the past 12 months, Credit Suisse has received compensation for investment banking services from the following issuer(s): NI.N
Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (NI.N, ES.N) within the next 3 months.
Credit Suisse currently has, or had within the past 12 months, the following issuer(s) as client(s), and the services provided were non-investment-banking, securities-related: NI.N
Credit Suisse currently has, or had within the past 12 months, the following issuer(s) as client(s), and the services provided were non-investment-banking, non securities-related: NI.N
Credit Suisse or a member of the Credit Suisse Group is a market maker or liquidity provider in the securities of the following subject issuer(s): ES.N, NI.N
A member of the Credit Suisse Group is party to an agreement with, or may have provided services set out in sections A and B of Annex I of Directive 2014/65/EU of the European Parliament and Council ("MiFID Services") to, the subject issuer (NI.N) within the past 12 months.

Guggenheim EEI Takeaways - Day Two

Monday Day 2: We met DUK, OGE, PNW, DTE, CMS, PPL, FE, AEP, D, NI, ALE, and PCG senior management. We'll recap key themes from our 2nd day of meetings at EEI below and go into company-specific topics further in the note. Discussions have centered largely around gives/takes with respect to each individual company's growth outlook, with a specific focus on the sustainability of capex into the 2020s; otherwise, **the key commonality across discussions with companies was the impact of COVID going into 2021, renewables opportunities, regulatory proceedings, potential M&A/ strategic opportunities, and the impact of the election.**

As a reminder, Day 3 (Tuesday) will include 1-on-1 meetings with EVRG, NEE, EXC, PEG, SO, ES, AEE, LNT, and NWE; and **Day 4 (Wednesday)** will include 1-on-1 meetings with ED, POR, SRE, and AVA.

Items worth noting from our management meetings include (see note for full details):

DUK - We met with DUK Chairman, CEO, and President, Lynn Good, for a discussion on the Carolinas IRP, NC rate cases, recently updated capex, the guide to the top-end of the growth range, and initial 2021 thoughts. DUK is set up well going into 2021 as it clears the remaining NC rate case hurdle, receives more clarity around potential legislation stemming from Gov. Cooper's working groups, and starts to execute its robust capital plan focused on the transition to clean energy.

OGE - We met with the full OGE leadership team, including CEO Sean Trauschke. OGE continues to recover through a tough weather and sales year in 2020, with 2021 looking like a return to normal. Capex plan reiterated, underpinning a 4-6% regulated growth story and the position on ENBL ownership remains the same (i.e., maximizing shareholder value).

DTE - We met with CEO, Gerry Norcia, CFO Dave Ruud and other leadership of DTE. The biggest focus for DTE is execution on the DTE Midstream spin-off, while recent updates including EEI provided an increasingly improving capex and financing plan supportive of the high end of 5-7% EPS long term growth.

CMS - We met with CFO Reggi Hayes, Garrick Rochow EVP of operations and the CMS leadership team. CMS continues its industry-leading performance on cost management and growth. No deviations from prior strategy as mgmt. continues to execute the "CE Way" for cost optimization and deliver a "firm 7%" growth rate.

PNW - We met with the full PNW leadership team, including CEO Jeff Guldner and CFO Ted Geisler. Rate case outcomes and the regulatory relationship remain key focus areas as the ACC looks set to change in '21, but long-term growth and decarbonization provide strong foundations regardless.

PPL - We met with PPL's CEO, Vince Sorgi and Kent Blake, CFO of the Kentucky utilities to discuss thoughts on strategic optionality around the WPD sale process and the more straightforward outlook for regulatory activity in Kentucky and at FERC.

FE - We met with the full FE leadership team, including CEO Steve Strah and CFO Jon Taylor and other senior executives. Management continues to work through the fallout of the HB6 investigation and the subsequent executive terminations, including building balance sheet flexibility into its 2021 plans. Details on the internal and external processes were unsurprisingly sparse.

AEP - We met with AEP Chairman, CEO, and President, Nick Akins, incoming Executive VP and COO, Lisa Barton, and other members of the AEP mgmt. team to discuss 2021 EPS guidance, the new capital plan that contains upside for renewables, an update on North Central Wind, rate cases, and other regulatory proceedings, views around the OH policy environment and HB6, and potential portfolio rotation/optimization.

D - We met with D CEO and President, Bob Blue, and EVP and CFO, Jim Chapman. Post GT&S sale, D is in execution mode – there is a defined strategy and now mgmt. must focus on moving through the regulatory processes and building projects on time and on budget.

NI - We met with NI President and CEO, Joe Hamrock, EVP, CFO, CAO, and Controller, Donald Brown, Chief Strategy & Risk Officer, Shawn Anderson, and other members of the senior management team. Portfolio optimization to offset equity needs related to the renewables investment was top-of-mind for investors and mgmt. provided some incremental color on how they are thinking about asset sales.

ALE - We met with the full ALE leadership team, including CEO Bethany Owen, CFO Bob Adams, Controller/CAO Steve Morris, and other members of senior leadership. Management was fresh off its 3Q20 call earlier in the morning, with NT growth challenges disclosed on that call our main focus, in addition to regulatory and customer considerations at MN Power.

PCG - We met with CEO Bill Smith and interim CFO Chris Foster and the PCG leadership team. PCG is in progress of leadership transition, working through post-bankruptcy challenges and wildfire mitigation improvements. We touched on several moving pieces on the overhangs to what moves towards a 10% rate base CAGR utility.

(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

(5) Mult-Industry Utilities operate some comibination of regulated electric and/or gas utilities, in addtion to substantial non-power unregulated activities (i.e. midstream, renewable development, energy trading, etc.).

Source: Bloomberg, Guggenheim Securities, LLC estimates.

DUKE ENERGY (DUK)

We met with DUK Chairman, CEO, and President, Lynn Good, for a discussion on the Carolinas IRP, NC rate cases, recently updated capex, the guide to the top-end of the growth range, and initial 2021 thoughts. DUK is set up well going into 2021 as it clears the remaining NC rate case hurdle, receives more clarity around potential legislation stemming from Gov. Cooper's working groups, and starts to execute its robust capital plan focused on the transition to clean energy.

- **We met with DUK Chairman, CEO, and President, Lynn Good. DUK is on a path to resolve the remaining uncertainties around the story by early next year, most notably the NC rate cases, and is set up well to start delivering on its robust plan going into 2021, in our view.** Mgmt. has been highly visible in the past few months and messaging was consistent with our recent investor group call with CEO Lynn Good (see our note HERE), the ESG Investor Day (see our note HERE), and the third quarter call (see our note HERE). **Mgmt. is looking forward to a clean 2021 where they will ramp up capital investment in the grid and renewables, potentially see incremental policy/regulatory support, and a recovery of the economy coming out of the pandemic.**

- **LT EPS growth of 6% *per annum* driven by solid ~7% rate base growth is strong, sustainable, and still contains some upside.** Mgmt. highlighted the stable profile of the plan and its ability to deliver 6% EPS growth per year driven by modular, low-risk projects with no binary projects or lumpy spending years. **There are still incremental opportunities – mgmt. highlighted the need for additional investment in distribution that is perpetual and the cancelation of ACP has left DUK short gas in their NC territory.** Mgmt. included ~$750M of gas LDC expansion capital in their 2Q update to support new customers in their Piedmont territory in East NC. The spend does not need regulatory approval and mgmt. is still cementing the types of projects that will be targeted. On the electric side, the IRP assumes there is ample gas supply and DUK is reviewing their options – one option is tying into MVP but it is dependent on the risk/reward of where the project stands and how that project fits into their timeline.

- **Drivers in 2021 set up to deliver EPS guidance in excess of the conservative $5.15 number laid out in the past two earnings calls.** The $5.15 EPS number for 2021 is a floor and assumes a less constructive outcome in the Carolinas rate case (i.e., no recovery on coal ash), and does not give credit for O&M levers that can be sustained into 2021 among other items including incremental upside from GRC filings, NC legislative initiatives, and ACP substitution spend. There are multiple items that still need to be resolved to be able to issue firm guidance and we should have more clarity leading up to the year-end call in Feb. (i.e. rate case outcome at the end of the year/early next year and Gov. Cooper's working group report before year-end).

- **Strong interest around a 70% carbon reduction path in NC and momentum behind offshore wind is building.** Mgmt. indicated they are seeing more support around the 70% carbon reduction goal by 2030 and noted they are looking to find the balance between environment, reliability, and price. The Gov. has set the goal of 70% carbon reduction, and the carbon policy group plans to issue a report by year-end. **Offshore wind seems like the most likely path.** Mgmt. stated there is enthusiasm and momentum around the prospects of offshore wind and, at this time, the technology is far ahead of SMR. Even though the SMR path has a lower revenue requirement, the resource is still in its infancy stage. As a reminder, the NC, MD, and VA Governors recently signed an MOU to drive the advancement of offshore wind in the Mid-Atlantic **(see our daily take HERE). Gas is an important portion of the IRP and stakeholders are generally in support of the fuel given DUK's analysis.** The "no new gas" path requires coal to operate for longer which caused environmentalists to realize the importance of the generation resource in the transition to clean energy.

- **What about alternate regulation in NC? Gov. Cooper's working groups to release a report by year-end that could spring legislation next session – more timely recovery of expenditures or other support could move LT EPS growth north of the current range.** Gov. Cooper's Clean Energy Plan includes instruction to look at regulatory options to enable and incent the transition to clean energy. The alternate regulation group is expected to issue a report and recommendation by year-end that could help inform legislation next year. The group is looking at a balanced solution that incentivizes investment while maintaining customer affordability. **Mgmt. believes that regulatory reform that would accelerate investment and recovery could be potential upside to the top end of the 4-6% guidance range.** It is unclear what this legislation and regulation may look like, but mgmt. mentioned multi-year rate plans, performance-based rates, decoupling, etc.

- **No surprise from the post-hearing briefs filed in the DEC rate cases last week.** Mgmt. expected the positions presented in the post-hearing briefs and is now awaiting direction from the commission and an order by the end of this year/early next year for DEC with DEP expected by mgmt. shortly after. **Coal ash will remain contentious at least until the NC Supreme Court provides directive in Dec. – hearings spur the analysis of alternative recovery options.** A settlement prior to the Dec. 11 date when we expect the NC Supreme Court to release its opinion on the coal ash recovery issue is still highly unlikely. DUK responded to the commission's request to provide alternate recovery scenarios positively, in mgmt.'s view, and believes the commission is doing its due diligence in exploring all options available **(see our daily take on the alternative options HERE)**. As a reminder, recovery of but no return on coal ash expenditures would cause the ratings agencies' calculation of FFO/Debt to drop 100bps which would be below the downgrade threshold. DUK would not attempt to fight the downgrade with more equity but rather operate at the lower rating with increased financing costs passed to customers. **Mgmt. is still assessing how the ratings agencies would view a debt-like return on coal ash (rather than the current WACC return).**

- **Optimism around the approval of the FL Clean Energy Connection program – a number of stakeholders are at the table in support.** Mgmt. displayed confidence in the approval of a voluntary solar program, the Clean Energy Connection Program, for DEF stating a number of intervenors in the case have voiced their support. The program would expand renewables in the state and has a low income element making it non-contentious for most parties. As a reminder, there is a hearing scheduled on the case on Nov. 17. **DEF is still working through the items that will be included in the multi-year rate plan that will be filed next year, but it should include ongoing investment toward aging infrastructure, energy storage, and the CEC program while the Storm Protection Program will cover the infrastructure hardening and resiliency.** The filing will be made around the end of 1Q21 and will set DEF up for the next 2-3 years.

- **DUK continues to monitor COVID-19 and assumes a 1-2% recovery in sales in 2021.** The sales guide for 2021 is conservative in our view and does not assume a full recovery to 2019 levels. The bottom line impact from the pandemic has been consistent with plan as the customer class mix has shifted. Mgmt. noted that they are watching the potential for increased lockdowns given the election results.

- **Moody's outlook revision comes as no surprise – the agency assesses their outlook annually in the fall.** As a reminder, Moody's revised Duke Energy Corp (Baa1), Duke Energy Carolinas (A1), and Duke Energy Progress (A2) ratings outlook to negative from stable driven by substantial capex coupled with the potential for a negative outcome on coal ash recovery in DEC and DEP's ongoing rate cases. The revision was expected as Moody's was hinting at it earlier this year and the timing makes sense given the agency reviews their outlook annually in the fall. No change on equity messaging – DUK will take the notch downgrade if the coal ash outcome is negative and operate at the same rating as a lot of their peers – i.e., will not issue equity to support the current ratings.

- **Compelling standalone plan and growth program delivers value to shareholders, making a sale of the business unlikely, in our view.** Mgmt. is building on their position to deliver a robust dividend and visible low-risk returns… further regulatory initiatives and an acceleration of the transition to clean energy would only strengthen their position causing us to believe that a sale is highly unlikely (see our note on the NEE/DUK merger headlines HERE).

OGE ENERGY (OGE)

We met with the full OGE leadership team including CEO Sean Trauschke. OGE continues to recover through a tough weather and sales year in 2020, with 2021 looking like a return to normal. Capex plan reiterated, underpining a 4-6% regulated growth story and the position on ENBL ownership remains the same (i.e., maximizing shareholder value).

- **We met with the full OGE leadership team, including CEO Sean Trauschke, catching up on Covid recovery in Oklahoma, long-term prospects for regulated growth and strategic positioning around ENBL.** OG&E utilities remain fundamentally sounds, with good customer growth as a leading indicator of load recovery. Mgmt. remained guarded on strategic options for ENBL but ensured that the company always looks to maximize shareholder value.

- **Tough 2020, but ex-weather would trend top end of guidance; 2021 setting up for a cleaner year.** In terms of economic recovery post-Covid, OGE noted that on a monthly basis commercial has started to see first months that show growth year over year, which if sustained is a constructive indicator for 2021. **OGE has continued adding customers year over year,** so assuming average load per customer doesn't change (no reason to assume it would), the fundamentals remain intact. The one customer class still waiting for recovery is public authorities like schools which are on delayed reopening schedule. All things said, OGE acknowledged that excluding weather in 2020, results would be trending at or above the top end of the original guidance, so a return to normal weather and ~$20M of recurring cost savings would bring 2021 back in line with the original 4-6% trajectory.

- **For OGE mgmt., views on ENBL have not changed – mgmt. will pursue value for shareholders but does not necessarily think about the business as anything other than a regulated utility.** OGE remains in a different strategic position on ENBL than its partner CNP, who is taking an "everything on the table" approach to business review. OGE has no parent leverage on ENBL ownership (implicit or explicit), credit metrics remain strong (north of 18% FFO/D) and the investment is treated purely as a cash-on-cash source (i.e., no control, no mgmt. capacity drain). **When asked, mgmt. commented on the past ROFO as just a strategic attempt to get CNP out of the partnership at the time**, but OGE expressed it had and has no interest in owning more ENBL. The relationship with partners has improved since then and mgmt. does not feel the need to make any sporadic strategic decisions. Tax basis is a hurdle, and any potential alternatives have a lot of complexity as scenarios are weaved; with OGE not having any public stance other than shareholder value maximization, mgmt. feels no need to discuss.

-

See pages 46 - 47 for analyst certification and important disclosures.

- **4-6% growth underpinned by constructive regulatory environment; more frequent discrete filings set up well for incremental capex deployment.** OGE noted a good cadence of regulatory filings in Oklahoma, which is done by design with smaller, simpler cases. This type of filing strategy is moving similar to a formula rate construct but with incremental steps. Mgmt. does not see it helpful in the regulatory arena to put forward lumpy capex plans of billion dollar projects, noting the goal is to limit the amount of large filings, but **working with regulators every year at reassessing system needs – mgmt. sees potential to ratchet up individual programs.** Overall, OGE sees investment opportunity as various investment programs roll forward.

- **Future capex mix – OGE prefers wires T&D.** OGE noted that after the recent environmental and generation investments, the utility wants to minimize investments in generation needs and would rather spend on customer facing projects (i.e., wires). While the approval establishing Grid Mod was not what OGE wanted (reduced scope and timeframe), it does help get a foot in the door with regulators to **prove the concept and subsequently grow into a larger Grid Mod program** in future years. Additionally, OGE called out **system hardening, which could be a beneficial program to expand capex** given the recent weather events and would be covered under a rider mechanism. The 9.5% ROE settled in the prior rate case was initially viewed as low but is now seen as more balanced given the rate environment; while intervenors can argue lower, **OGE has not seen messaging from commission on wanting a lower ROE**. Lastly, on the remaining generation opportunities, OGE will look for some marginal MWh of renewables volumes but reminded investors that there are still capacity obligations which are not well satisfied with intermittent resources.

DTE ENERGY (DTE)

We met with CEO, Gerry Norcia, CFO Dave Ruud and other leadership of DTE. The biggest focus for DTE is execution on the DTE Midstream spin-off, while recent updates including EEI provided an increasingly improving capex and financing plan supportive of the high end of 5-7% EPS long term growth.

- **We met with CEO, Gerry Norcia, CFO Dave Ruud and other leadership of DTE.** DTE continues to show constructive signals on the core regulated business and building contingency for 2021, with a 3Q capex raise and the new EEI financing plan showing lower equity needs. The DTE Midstream segment is performing well, with opportunities for accretive growth investments and mgmt. believes will set up for a successful spin out.

- **How will DTE Energy look post-spin: 90-10 regulated mix, with P&I rounding out the mix and still complementary to the core business, but not precluding further optimization.** The decision for the spin has been long-contemplated as far as before the Haynesville asset acquisitions, which mgmt. bought with the commodity improvement and scale-building thesis, both of which played out to mgmt. expectations. While DTE and the board contemplated both a sale and spin, the spin was more efficient for tax leakage, allow current shareholders to participate in the rebound from the bottom of the business cycle for midstream as well as the business expansion that is embedded in the GS&P business plan. Overall, DTE mgmt. is currently planning to reach 8-10% dividend growth through post spin (2021-2022) on an equivalent basis for “remain co” and “spin co”. Since the transaction was contemplated for ~2 years, mgmt. noted a variety of investor feedback including existing shareholders, but offered no visibility on activist involvement or current activist economic interest. **Speaking to the “core” status of the remaining unregulated business (P&I), mgmt. believes there are some complementary qualities**, but did not preclude further optimization or providing more in-depth disclosure to highlight earnings quality and fit.

- **Strong 2020 year, reinvestment and recurring O&M flex setting up for strong 2021 regulated base year. DTE provided insight into current economic dynamics for the service territory, citing c**ommercial and industrial customers that are adjusting well to Covid operations with less reported transmission than bars and restaurants. There are no new orders on shutdowns from the governor, so the balance of the year looks stable. Residential load continues to drive earnings benefits due to higher segment margins**. Mgmt. also does not see a lot of moderation for residential load going into 2021 as people are generally expected to stay home** as employers keep remote work plans active. DTE is building contingency into 2021, probably more than 2020 per mgmt. as strong 3Q weather allows for reinvestment, with recurring benefits from 2020 starting to allow for pull forwards out of 2022.

- **Post spin 5-7% growth for utilities and P&I; potentially at high end in the near term.** DTE sees the 2021 post spin regulated growth around 7.4%, with some slight drag from equity converts, REF earnings decline and near term dis-synergies form the spin, but reaching a more steady state in the second half of the 5 year plan. Most shared services costs are already allocated to GS&P and mgmt. will transfer those along with the spin, with any remaining costs / capacity absorbed by the "remain co" growth. In the end, **DTE is confident in providing investors with LT 5-7% EPS growth, but there is a historical level of contingency embedded, so if is not activated, that takes EPS closer to the 7% mark**; mgmt. noting that the back end of the plan is conservative. The near term drag from declining REF earnings is likewise being addressed at the P&I segment with a handful of projects on DTE's desk for final approval; mgmt. expects to fill the $15M backfill target for 2021, noting the 3-5 year cash payback on the projects.

- **Capex visibility and updates? Mgmt. always looking to add to the tail end. Time for an Analyst day? Not yet…** The post Spin capex allocation is predominantly regulated utility spend, executing on the $17B (+$2B added on 3Q) capex plan. Visibility on existing and incremental capex remains high, even as DTE added a lot of electric capex like substations, transmission and distribution rebuilds. **Mgmt. looks forward to potential investment on the gas side such as compressor rebuilds and large diameter high pressure replacement as the assets are starting to reach 60+ years of age,** but would need to get creative in terms of headroom on rates before any formal plan inclusion. Mgmt. elaborated on the MPSC support for these programs as they have been a part of the annual filings and have received positive reception from Staff as long as rates are managed to a 2-3% increase. **The associated financing needs are being negated through credit metric accretion of improved business mix**; credit agencies looking to lower metric thresholds from 18% to 16% FFO/Debt. The equity plan presented at EEI is lowered from $100-400M to $0-200M for 2021, with another $0-200 in 2023. While tax reform outcomes are far from determined, higher tax certainly lowers equity needs, but also puts some pressure on customer rates.

- **Decarbonization at DTE – Michigan is supportive but currently moving pieces beyond plan.** While the remaining coal assets were proposed to be retired in 2030 and 2040, the MPSC order on the IRP required DTE to analyze accelerated retirement, which will be addressed in the 2023 plan. Mgmt noted the analysis is in progress, and while 2023 will be the next formal filing, the new plan could come sooner. From a statewide perspective, DTE is active in the MI Healthy Climate Plan, providing feedback to the stakeholder council and the plan lines up well with DTEs net zero goals. **Future decarbonization opportunities include hydrogen and DTE sees hydrogen value likely in the electric utility value chain** as complementing gas supply is more speculative (due to heat value and technical requirements). Mgmt noted feasibility studies for carbon sequestration and regulatory constructs will determine the involvement going forward.

CMS ENERGY (CMS)

We met with CFO Reggi Hayes, Garrick Rochow EVP of operations and the CMS leadership team. CMS continues its industry-leading performance on cost management and growth. No deviations from prior strategy as mgmt. continues to execute the "CE Way" for cost optimization and deliver a "firm 7%" growth rate.

- **We met with CFO Reggi Hayes, Garrick Rochow EVP of operations and the CMS leadership team to catch up on 2020 recovery, inputs into 2021 and some of the longer term considerations for CMS capex plans and opportunities on decarbonization.** Fundamentals remain strong and consistent execution continues to keep CMs on track for a perpetual 6-8% growth with conservatism (i.e., "firm 7%). On the strategic side, CMs is comfortable with the 90% regulated mix, with the balance being Enerbank (serving affluent construction loans) and Enterprises (long term contracted assets). On the question of value of Enerbank, mgmt. noted the segment has manageable beta and no reason to seek strategic options at the bottom of the rate cycle.

- **Trending to a strong finish to 2020, reinvesting 2021, mgmt. appeared confident in a "firm 7% NT growth".** 2020 recovery has been tracking well, CMS noting economic activity very close to pre pandemic level: companies are able to follow CDC guidelines and have seen good resilience in supply chains and activities. CMS has seen continued growth across the service territory in consumer goods manufacturing, auto related manufacturing investment, corporate offices expansion and new homebuilding (up 2%). Residential energy use has introduced a new dynamic and CMS noted a number of companies anticipate a portion of workforce to remain at home, creating sustained residential load. Given the rates were set in February 2020, there is likely to be benefits of the residential load in 2021 before rates are rebalanced in the next rate case. **Building on the fundamental recovery are CMS contingency actions, namely the ~$100M saved in 2020, that mgmt. expects to be ~50% recurring** in 2021. The benefits of a strong 2020 likewise have enabled some reinvestment to start, creating further contingency against 2021 headwinds.

- **CMS previously presented one of the longest investment outlooks among peers: 5 year distribution plan, 10 year gas plan, 20 year IRP. Our meeting reinforced the capex runway and clarified the trigger points for incremental opportunities – balance sheet and affordability.** CMS already identified a $3-5B capex upside, with mgmt. highlighting that those numbers include only bottom up projects with high visibility, noting that CMS does not have a need to "find capex", the needs are already there. The constraint for increasing capex is balance sheet and affordability; as CMS sees cost savings, those can be reinvested. Energy waste reduction (i.e., EE) is another way to make room for investment as the programs lower customer bill and wallet share due to lower usage. This approach has resonated with the MPSC as the conversation with MPSC staff is always about efficiency of new capital deployment and CMS has quantifiable examples to such effect. **Mgmt. noted the unseen element of building capex plans in that every plan that gets presented is built on monthly meetings with Staff to show the why and how of the end results.**

- **Accelerating renewables? – yes, but ride the cost curve down.** CMS agreed with the thesis of increased renewables penetration as economics become more advantageous, but there is no step function change in investment. **CMS would rather integrate renewables gradually and realize benefits of a downward slipping cost curve over time.** CMS has multiple voluntary renewables tariffs and could include some expansion of the access programs as well as a potential filing for more RNG integration. Mgmt noted that the **energy storage play is a big difference going into the next IRP** as prices come down. Likewise, the next IRP would look at some early retirements at Campbell 1-2 (depending on replacement resources and balance sheet implications, securitization, etc.). On the contracted renewables ownership, CMS prefers a “crawl before you walk” type of investment; no appetite for billion-dollar projects, looking more for existing customer relationships on PPAs and supporting those needs.

- **Long term growth remains a 6-8% story with a bias to a “firm 7%”, helped by above authorized ROE incentives, equity needs modest.** The capex plan continues to support the LT 6-8% growth with a “strong bias to the midpoint”, although as we note continued O&M flex has allowed for execution at or above that target. **CMS has mechanisms of earning above authorized ROEs which help drive some incremental growth in EPS, but not beyond the “firm 7%”.** CMs earns a renewables incentive 10.7% on investment towards MI RPS, energy efficiency incentive that provides ~30-40bp above authorized; demand response ~5-10bp and ~5bp for earning on PPAs. There has been no indication from the governor or legislature on any changes to energy policy or incentives. **The equity needs on the back end are not huge compare to peers’ ~6% of capex and mgmt. does not envision any steady-state changes.** The tax reform recipe is already in place in MI from a regulatory standpoint based on the TCJA tax cuts, so the effects would likely be easy to flow through, in our view. CMS OCF went down around ~$200M and lost 150-200bp of FFO/debt; going to a 28% tax rate would reverse roughly half of the effects. Bill impacts were ~3% and reversal would bring back around 1.5% increase, but CMS would plan to negate the bill impacts through O&M offsets.

 See pages 46 - 47 for analyst certification and important disclosures.

PINNACLE WEST (PNW)

We met with the full PNW leadership team, including CEO Jeff Guldner and CFO Ted Geisler. Rate case outcomes and the regulatory relationship remain key focus areas as the ACC looks set to change in '21, but long-term growth and decarbonization provide strong foundations regardless

- **Our meeting with PNW management, which included CEO Jeff Guldner and CFO Ted Geisler, focused heavily on the ongoing rate case and efforts to improve relations with both the ACC and other stakeholders like the Navajo Nation.** Rebuttal testimony was filed only this past Friday, and while management was understandably limited in what it could discuss regarding specific details of the case, they did indicate that they saw Staff's previous initial testimony as constructive. We asked about the potential for a settlement given hearings are next month and the window of opportunity is potentially shrinking, with management acknowledging that while they continue to seek opportunities for compromise with other parties, the prospects get more challenging as parties get further into the testimony preparation phase ahead of hearings. **The Rebuttal testimony includes a renewables tracker proposal, robust transition assistance for the Navajo Nation, and some tampered asks on metrics – injecting interesting dynamics into the process.** Management indicated in our meeting that it is keenly watching for feedback on the tracker proposal. Synergistic to that is the Navajo transition plan, which includes a suite of financial and labor assistance to the Nation as Four Corners' deactivation approaches. The support of the tribe going forward for things like the tracker could be an important driver as the current case progresses in our view, and also as proposals like securitization of undepreciated balances come up in the future. On that latter item, securitization, management noted in our conversation that there is precedent in the past for regulatory assets for retired plants and that it remains open to looking at it given the existing opportunities to recycle the capital into decarbonization growth. Management also emphasized that it sees value in the transition proposal from a de-risking standpoint, as it removes potential unknown costs from the planned coal exit. Finally, on a more specific note, we also asked about bid-ask on the fair value increment, with management generally of the view that it takes a holistic approach to its revenue requirement, and while the FV increment can decline, other aspects of the requirement build up could prove constructive.

- **New faces coming to the ACC but Republicans appear headed for control… Marquez Peterson could become a key swing vote…** With greater clarity on a likely Republican majority in 2021 and beyond, management was of the view, supported by other reports we have seen (e.g., HERE), that the election sets up Marquez Peterson to serve as an interesting vote to watch on many policy issues. **Specifically, management was of the view that Commissioner Olson and**

Commissioner-elect O'Connor are generally skeptical of specific renewables mandates, while Marquez Peterson has voted for zero carbon targets while voicing trepidation on resource-specific mandates and policies like retail competition. On the question of whether a Chair Olson could mark a strong departure from Chair Burns, management did not have a strong view, and instead reiterated its commitment to work with all parties. Finally, we asked on how the previously-filed IRP could be viewed by the new commission, with management highlighting that the currently-proposed energy rules package includes a more formal process that would have the ACC actually approve an IRP vs. just acknowledge. The company remains supportive of that change given the clarity and investment policy alignment it brings.

- **2021 drivers, next rate case timing, equity needs, and the 4Q capex roll all have linkages to the current case…** While management is understandably withholding 2021 guidance while it continues to work through the current rate case, we asked whether the pull forward of O&M from 2021 to 2020 discussed on the 3Q20 call could have read through to how we should be thinking about general guardrails for the upcoming year. Here management emphasized that while the shift helps de-risk for mild weather in 2021, it should not be thought of as a 1 for 1 reduction in costs. The outcome and timing of the case will also have implications for when management files again and potentially issues equity, with the company again reiterating the potential for $300-400mm before the next case to keep the equity layer in line with the ask. We asked about a preferred method, but management indicated that it depends on timing and market levels. The current proposal in rebuttal testimony for a renewables tracker (the Advanced Energy Mechanism) could also have an impact on management's timing and need to file in late 2021. Without it, the robust renewables buildout could require frequent filing to avoid lag. **Turning to the capex program, based on our broader conversation, we expect storage could continue to feature prominently in future rolls,** especially as the company gains comfort with the resource over the course of its *current* 300MW/year deployment program. **Finally, we also touched on the investment program at Bright Canyon, which management expects to remain a minor contributor to net income.** The group continues to pursue incremental opportunities, like microgrids and renewables, that align with PNW's existing core competencies.

- **Economic growth remains strong despite COVID, drivers are more diverse versus prior downturns… EIM membership continues to drive savings and bill headroom…** The strength of the AZ economy in the face of COVID remains an area of interest for investors, and PNW continues to see robust growth from a diverse base of residential and commercial economic growth. For example, data centers continue to come into the West Valley region, further diversifying versus prior cycles that were highly dependent on things like residential construction. Finally, we note that management remains pleased with how the EIM has afforded APS the ability to pass savings on to customers, with the concurrent benefit of bill headroom and more flexibility on investment opportunities. While the products and offerings of the EIM may evolve in the coming years, management still does not envision an evolution to a full-blown RTO – not a major surprise.

PPL (PPL)

We met with PPL's CEO, Vince Sorgi and Kent Blake, CFO of the Kentucky utilities to discuss thoughts on strategic optionality around the WPD sale process and the more straightforward outlook for regulatory activity in Kentucky and at FERC

- **WPD sale continues to run on schedule, management strikes a positive tone on the process to date.** While management was understandably limited on what it could say regarding specifics, they did note that sale process to date has been going according to the initial high expectations, with the bidders exhibiting a high degree of quality. Contrary to some medial reports, the process is not yet at a point where PPL is getting indications of value, however they laid out several items of note that they see as supportive of things from a high level. These include the broad interest from infrastructure funds in assets like WPD's, and the domestic improvements both on the regulatory and political sides. The CMA's earlier decision on Ofwat's returns was one example, as were the government's upcoming decarbonization whitepaper and Ofgem's upcoming GT/ET/GD final determinations.

- **Transaction logistics like timeline to close, hedging of proceeds, and other details remain in flux…** Management indicated that a 1H21 close remains the target, with the timing therein partially dependent upon the acquirer's own closing timeframe. Management pointed to its own 30 day close on Central Networks as an instructive example, with a clean buyer potentially able to replicate that time frame – meaning an announcement in 2Q21 and a close by the end of the quarter. Ownership of existing assets in the UK could potentially slow the process slightly, but management was generally of the view that it does not envision closing conflicts. On the question of hedging, the company indicated that it continues to work through the logistics. Options here are generally the same as the normal course of handling WPD earnings today, including options, forwards, or some combination of the two. Management also pointed out that the possibility of a US asset swap would also change the need for potential hedging scenarios. On the subject of a swap, management noted that it does not envision a like-kind exchange given WPD is a foreign asset.

- **Use of proceeds? Management has a base case, but possibilities open up from there.** As noted on the 3Q and earlier conversations, management's base case remains a delevering of the remainCo to FFO/debt in the mid-teens, with holdco debt below ~30% of total. The remainder of any WPD proceeds would then be put towards buybacks. The company indicated it is also open to alternatives that present better value, including acquiring US utilities. What does this mean? Management indicated that its initial preference is for electric utilities given its current mix and decarbonization, but electric/gas utilities also present opportunities, as do renewables. On the subject of gas LDCs, management noted that they are not a top choice, but they are also not

See pages 46 - 47 for analyst certification and important disclosures.

excluding them as a possibility. We did not get a sense that there were particular regions or constructs that management would target, with management emphasizing instead it looks for opportunities to bring its operational excellence playbook to bear. Midstream and competitive generation remain out of bounds, but some expansion at the Safari Energy subsidiary (primarily C&I solar) is also under consideration. **Finally, we also asked about the dividend policy for the remainCo,** with management responding that it will continue to target its 60-70% payout, but otherwise it is still too early to predict given there are still many possibilities for what remainCo actually looks like (i.e., stateside M&A). In the event there were not concurrent M&A, management indicated it would adjust to the base case and proceed from there.

- **Rate case filing and IRP process point to an active 2021 regulatory cycle in Kentucky…** As discussed on the 3Q call, the Kentucky utilities are expected to file a rate case on or about November 25th for rates that would begin 7/1/2021. The request would be based on revenues for a year begging that day. Given the filing has not been formally made yet, management was hesitant to provide detailed specifics, but in line with its notice the filing is expected to include another request for AMI deployment. Management indicated that investors should be on the lookout for additional details around mid-late November in advance of the formal filing. Importantly, the proposal will include a credit to customers to return over the course of a year some accrued regulatory liabilities. This will have a dampening effect on the rate impact for the first year of the proposed increase, which management sees as important for a customer base still expected to be emerging from the repercussions of COVID. The IRP meanwhile will be filed in October of next year, with a 15 year look forward. Given the time frames in question there will be little interaction with the current case, although management expects to see ongoing discussions around portfolio optionality. The company remains very aware of the ESG implications of the KY coal fleet in our view, with noted enthusiasm for potentially planning around generation replacement in the state in the future. We asked about the status and past usage of securitization, with management noting that would require a legislative change for the commission, as it does currently not have the authority.

- **FERC transmission complaint continues to grind through the process…** PPL also continues to work through the ongoing ROE complaint at FERC, with no new updates during our meetings on the process. As we expected, their view of a potential settlement was muted given the gulf between the complainant and their current allowed. Management reiterated its confidence in the strength of its case should it need to present it, while also noting that it also looks on the potential for new incentives as a positive. Per the company, a ~25bps change in ROE equates to ~$0.01/share. Finally, management also noted that 1) it could look to convert to formula rates to provide a modest offset to any

See pages 46 - 47 for analyst certification and important disclosures.

potential ROE reduction, and 2) that these processes tend to run for a significant amount of time (e.g. 2022 and beyond in this case).

See pages 46 - 47 for analyst certification and important disclosures.

FIRSTENERGY (FE)

We met with the full FE leadership team, including CEO Steve Strah and CFO Jon Taylor and other senior executives. Management continues to work through the fallout of the HB6 investigation and the subsequent executive terminations, including building balance sheet flexibility into its 2021 plans. Details on the internal and external processes were unsurprisingly sparse.

- **As expected, the bulk of our conversation focused heavily on the ongoing HB6 investigations – both internal and external.** Management was unsurprisingly limited in what it could and could not say with several investigations ongoing, and mostly pointed to comments made in conjunction with last week's earnings call and the 8K Monday morning on the 'separations' of the Chief Legal and Risk officers from the company. Per management, the internal investigation remains ongoing, with the ratings agencies briefed on this morning's announcement. **Stay tuned for potential updates with 4Q results in February.**

- **On the question of mitigation levers for potential fines in 2021, we discussed management's planning processes to date and came away with more detail on potential O&M and capex reductions that were first discussed on the 3Q call last week...** To that end, management indicated that it continues to look at both O&M and capex reductions, with management of the view that the $250mm in capex cuts discussed on the 3Q call could be prudent from a shareholder's perspective given where shares currently trade (i.e., not sure if that additional $250mm on a $3bn plan would transplant in the share price right now). On the O&M side, management indicated that of a ~$2bn program ~$600-700mm is recovered formulaically/annually, leaving another $1.3-1.4bn to evaluate for savings. To support this, management noted that it has begun standing up several internal planning teams to look at options and will be bringing in consultants to provide a third party perspective. While management was asked about potential noncore asset sales, we came away with the impression that this is not under consideration at this time – not a surprise to us given this exercise was just completed under the genco separation in 2018.

- **Balance sheet planning continues to target gradual FFO/debt improvement, dividend growth on hold through '21, while potential tax reform provides some potential benefits…** Management continues to target the same gradual improvements in its credit metrics it had envisioned before this summer's events, with a trend towards the ~12.5% range through it planning period still the goal. Management indicated it remains committed to investment grade despite recent governance-related actions by the agencies. We asked how the dividend fits into this given management has growth on hold for '21, with the team generally of the view that it still has to see more of the current situation unfold before evolving its strategy. The board generally meets in the

 See pages 46 - 47 for analyst certification and important disclosures.

second half of the year to discuss future plans, with management sounding a positive tone on the role of the aforementioned flexibility adjustments with regard to the dividend. Finally, on the subject of the balance sheet, we note that management also provided some high level thoughts on the potential for tax reform to provide cash flow relief, in the event a higher corporate rate were to make it through the post-election house and senate. Specifically, management sees a $0.04-0.05/share benefit from the holdco interest tax shield, while a higher rate could also add up to $200mm a year in incremental cash flows to the utilities. Much would depend on the specifics though, with GAAP vs. tax earnings, the AMT, and NOL utilization changes presenting scenarios in which there could be *negative* cash flow implications.

- **Too early to say on PUCO processes…** The readthrough to FE's relationships at PUCO remains a developing situation in our view, with management speaking at a high level to its desire to mend fences and move forward. The company has been cooperating to the extent that it can and needs to. Beyond the initial investigation in spending the PUCO it is now also investigating the separation process at FE in 2017-19, and the Ohio utilities continue to work through the finalization of prior SEET tests. We asked about the potential for modifications to the SEET calculation by PUCO, with management highlighting that it is enshrined in legislation.

- **Normal utility updates? West Virginia IRP upcoming, while management looks to finish formula rate conversions at transmission business.** Management will seek to file its IRP in WV in the next 5-6 weeks, with an expectation that it will be consistent with the climate goals the company recently announced (carbon neutral by 2050). Management indicated that it expects to see a slight capacity shortage in the latest filing, as was the case in the previous iteration. Looking forward, there could be a potential for new solar investments based on our conversation, with utilities allowed to rate base ~200MWs across ~50MW tranches. On the transmission side the recently announced KatCo conversion will essentially finish the conversion of FE's transmission segment to formulaic rates.

 See pages 46 - 47 for analyst certification and important disclosures.

AMERICAN ELECTRIC POWER (AEP)

We met with AEP Chairman, CEO, and President, Nick Akins, incoming Executive VP and COO, Lisa Barton, and other members of the AEP mgmt. team to discuss 2021 EPS guidance, the new capital plan that contains upside for renewables, an update on North Central Wind, rate cases, and other regulatory proceedings, views around the OH policy environment and HB6, and potential portfolio rotation/optimization.

- **We met with AEP Chairman, CEO, and President, Nick Akins, incoming Executive VP and COO, Lisa Barton, and other members of the AEP mgmt. team to discuss a number of moving pieces into 2021 and beyond, including EPS guidance, capital plan and renewables, O&M, OH policy, North Central Wind, and ongoing rate cases and regulatory items.** Our first topic, however, centered on the recent mgmt. transitions that were announced last week – EVP of Utilities, Lisa Barton, appointed to EVP and COO, SVP of Treasury & Risk, Julie Sloat, appointed to EVP and CFO, and EVP and CFO, Brian Tierney, appointed to EVP of strategy. The succession planning has been in the works for years with a focus on development of top leaders. Incoming EVP and COO, Lisa Barton, will now look at the company as a whole and drive efficiencies across all business segments rather than just the utilities – Lisa is a very familiar face for investors. Brian has been CFO for over ten years and Julie appears ready and able to take on his role so he can focus on AEP's portfolio and development. The board will focus on succession planning at the CEO level at the right time with Lisa clearly being a strong candidate in time, in our view.

- **FY21 EPS guidance lighter than expected? Mgmt. taking a conservative view on drivers and COVID heading into next year.** Mgmt. forecasts a 0.6% growth in sales YoY in 2021 driven by sustained higher-than-normal load in residential, a bounce back in industrial load, and a challenged commercial load until a vaccine is made widely available. The customer class mix will be an important factor to monitor given different margin profiles of each (i.e., higher margin in residential than commercial and industrial). Mgmt. will continue to update forecasts as they receive more clarity on the impacts of the virus. Rate cases and preparation for North Central Wind also play a factor into 2021.

- **Updated capital plan continues the trend of heavy investment in wires and includes some investment in renewables – there is potential upside to the plan, and we expect to receive more clarity as the pipeline builds.** The updated capital plan of $37B is allocated 71% in wires and 14% in renewables (8% regulated and 6% contracted). Investors may have expected more investment in renewables (i.e., AEP would be the key ESG story of EEI which may have fallen short on expectations to some) on the roll forward of the plan, but there are incremental opportunities in replacement generation related to the lease expiration of Rockport 2 (1,310 MW coal-fired) in 2022 and the retirement of Pirkey (580 MW coal-fired) in 2023. Mgmt. also announced the retirement of Welsh 1 & 3 (1,053 MW coal-fired) in 2028. These retirements will lower O&M and free up capital… *for every $1 saved in O&M, $8 of capital can be deployed.* The renewables pipeline will continue to develop, however mgmt. noted the timing issue of pulling investments forward into the current plan. **The plan calls out incremental distribution opportunities – mgmt. is looking to have supportive regulatory mechanisms in place to be able to upsize their current investment.** Distribution plans cover ten years and are focused on reliability and resiliency, however there is opportunity to upsize the current plan if regulatory support (i.e., riders and trackers) are implemented. Mgmt. wants the distribution construct in its states to be as positive as the transmission construct in terms of recovery.

- **Contrary to the views of multiple OH lobbyists and policy experts that we have hosted for client calls, mgmt. would be surprised if HB6 is repealed… more likely we could see a restructuring to address renewable energy and energy efficiency.** Mgmt. noted there is still support for the nuclear units in the state as it looks to transition to clean energy, therefore, it may be hard to repeal HB6, rather there may be augmenting legislation/restructuring that further supports the clean energy push. This view contrasts with policy experts that we hosted for client calls that were sure the bill would be repealed **(see our notes HERE and HERE).** If there is support for nuclear, AEP would like to see support for renewables and energy efficiency. As a reminder, a repeal of HB6 would not materially impact AEP – AEP had several years of recovery for the OVEC units prior to the passage of HB6 and has not booked any of the recovery of OVEC under HB6. AEP is also mostly decoupled in OH and mgmt. has stated in the past that they will continue to look to enter into a bilateral solar agreement regardless of any HB6 outcome. The investigation in the state has not impact AEP's relationship with PUCO, and AEP continues to have constructive dialogue with regulators and legislators on policy. **AEP has still not been contacted by authorities for its minor role in HB6.** Mgmt. continues to state that all donations to 501(c)(4) organizations were lawful and ethical and, as a result of the investigation, mgmt. has increased the disclosure of donations to these types of organizations – i.e., doesn't expect the external investigations to bleed into AEP nor do they see any impacts internally with Mgmt. structure, governance etc.

- **North Central Wind remains on track – timeline range for Traverse into 1Q22 is a worst-case scenario.** The timeline for the Traverse project was widened to Dec. 2021-Apr. 2022, from Dec. 2021 on the 3Q call due to delays in the permitting process as offices were closed due to the pandemic. Mgmt. stated the developer is still aiming for Dec. 2021 but added the range given the unanticipated challenges. Mgmt. does not expect an impact to financials as the project is acquired after completion. We note mgmt. has included spending of a little over $1.2B in 2022 for Traverse. Foundation work has started on the Sundance project that is expected by mgmt. to be completed in 1Q21 and final site preparation is underway on the Maverick and Traverse projects. **Financing for the**

project remains 2/3 equity, or ~$1.3B, financed through ATM, block, or asset rotation close to the date of the commercial operation and transfer of projects. What about asset rotation? All assets are on the table – mgmt. evaluates each utility individually to identify those that are underperforming. The underperforming utilities may be up for potential divestment to mitigate some potential equity needs as well as other non-core assets.

- **Rate cases at AEP Ohio, APCo VA, KPCo, and SWEPCO TX continue to churn through the process.** At AEP Ohio, mgmt. expects the procedural schedule sometime this month. Mgmt. is disappointed with the position that the SCC Staff and the AG took in there APCo VA rate case that looked to prove that APCo VA was earning within its range and therefore not allowed to ask for a rate increase. Mgmt. has confidence in the commission letting them earn their allowed return. There is a hearing scheduled for Nov. 17 in the contested KPCo rate case and mgmt. expects a decision by year-end. As a reminder, KPCo was in a stayout until June of this year which meant that they were unable to cure the load lost in the state leading to low earned ROEs. SWEPCO TX is focused on a number of base investments and making sure there is adequate storm reserve. **Regulatory activity into 2021? Rate cases to fix equity layer and additional support for distribution investment (i.e., riders and trackers)**

DOMINION ENERGY (D)

We met with D CEO and President, Bob Blue, and EVP and CFO, Jim Chapman. Post GT&S sale, D is in execution mode – there is a defined strategy and now mgmt. must focus on moving through the regulatory processes and building projects on-time and on-budget.

- **We met with D CEO and President, Bob Blue, and EVP and CFO, Jim Chapman, to discuss renewable investments under the VCEA, T&D investment related to the transition to clean energy, regulatory processes in SC and VA, resiliency in D's service territories to the impact of the pandemic, and the stock buyback programs progress to date and execution through the remainder of the year.** Post the sale of the GT&S segment, D is a pure-play regulated electric and gas utility in growing states with top-tier regulatory constructs and, in VA, an aggressive push toward renewables and storage.

- **Confidence in the buildout of offshore wind continues from the third quarter call as mgmt. has the experience of working through the federal permitting process.** Some of the issues that offshore wind projects face in the Northeast are not present in VA, i.e., the fishing interest is not as much of a hurdle, and mgmt. feels confident in the COP that they will file with BOEM by the end of the year as they communicate with the Coast Guard, environmental groups, and other stakeholders. Though we have seen some Northeast projects face delays in receiving review schedules from BOEM, mgmt. stated that one cannot translate one project to another and restated their confidence in the schedule. There is a unified, bipartisan effort in the state to push for clean energy and offshore wind is a major component of the plan.

- **Solar and storage development is ramping up rapidly – mix will shift to more owned generation from PPA over time.** D just filed for 500 MW of solar PPA and noted that the project mix will likely be more PPA focused in the near-term followed by a larger amount of owned generation over the longer-term. Project development is ramping up significantly – D is securing land for these projects and seeking approval for 600 MW of solar per year. **The investment in renewables will be recovered under riders that are trued-up annually.**

- **T&D investment could shift from aging infrastructure to more enablement of new generation resources.** Mgmt. noted there is upside to the investment in T&D but also wants to be mindful of customer bill impacts. Currently, investment in T&D is \$0.8B-\$1.0B annually and is mostly focused on aging infrastructure but mgmt. stated the mix could shift to more enablement of new renewable generation in time. The investment in transmission will also depend on the siting of the renewables project so it is hard to quantify the exact amount of investment needed. **All-in, customer bills are expected by mgmt. to increase by less than 3% per year before O&M efficiencies.** D is also starting from a very low base when compared to Mid-Atlantic peers and

See pages 46 - 47 for analyst certification and important disclosures.

other RGGI states. Overall, the bill impacts are manageable and reasonable.

- **SC rate case is straightforward, but mgmt. finds it unlikely that they will be able to settle.** D completed its merger obligations with SCANA to file the first SC base rate case for the business since 2012. Discovery and initial testimony is underway, and hearings are scheduled to begin in early 2021 before a decision in Feb. 2021. Mgmt. believes the filing is well supported and solid but, given the new commission and political environment, finds reaching a settlement to be unlikely. **Triennial review process for the years 2017-2020 to start in Mar. and conclude in Nov. – levers are available to offset overearning.** As a reminder, DEV's earned return will be measured vs. an authorized return of 9.9% (9.2% base with a 70bps collar) and any overearning will be either refunded to customers or invest in grid mod or renewables (Customer Credit Reinvestment Offset). There is very little risk in the approval of the CCROs as they are investments that would have been approved by the commission prior to the triennial review. The commission can decide to lower rates at the review, but they cannot lower them by more than $50M which, if enacted, would impact 2022. Mgmt. noted base rates as a percentage of total rates will gradually become smaller as D invests capital under the riders. **Other regulatory processes just include filings related to renewables.**

- **V-shaped recovery? DEV never saw a decline and has proved resilient throughout the pandemic while DESC is trending positively.** Sales in VA have remained strong despite COVID-19 – as DEV saw an increase in weather-normalized retail sales of 1.4% vs. 2018/19 average in the third quarter. Driving the resiliency is DEV's large data center component (~30% of commercial volumes) – data center sales are up 19% YTD. DESC has been more challenged with the pandemic but saw a strong bounce back in the third quarter – weather-normalized retail sales were 0.8% lower than the 2018/2019 average in the 3Q vs 4.8% lower than the same average from Mar.-Jun. of 2020. The total nine-month impact of COVID-19 is $0.05 which D has been able to offset with O&M.

- **Stock buyback post sale of GT&S gives D a clean slate starting in 2021...** There is $700M in stock left to be bought back since the third quarter update. Mgmt. stated they are still working through their options but it could be completed through open market purchases, another accelerated share repurchase agreement, or a tender. As a reminder, the stock buyback program was upsized given conservative cash tax assumptions and is set to be complete by year end. As of the end of the third quarter, mgmt. completed the purchase of ~$900M in stock and executed $1.5B in accelerated share repurchase agreements. The program was upsized $100M to $3.1B – mgmt. previously guided to the potential for the stock buyback to be upsized in the range of $0-$200M given conservative cash tax assumptions. The program being completed by year-end clears some concern that the process would leak into 2021 given a portion of the sale was shifted to 2021.

- Mgmt. stated that it will be turning on the DRIP program in 2021 followed by modest ATM issuances starting in 2022 and ramping up through 2024 because it is supportive of the current metrics. **Dialogue with the ratings agencies has been constructive and quiet.** The ratings agencies have been positive on D's improved metrics and business risk profiles – Moody's revised the FFO/Debt upgrade threshold to 17% from 18% directly after the sale and S&P revised their outlook as positive. Mgmt. noted it will take some time for the dust to settle but could see further lowering of the threshold.

NISOURCE (NI)

We met with NI President and CEO, Joe Hamrock, EVP, CFO, CAO, and Controller, Donald Brown, Chief Strategy & Risk Officer, Shawn Anderson, and other members of the senior management team. Portfolio optimization to offset equity needs related to the renewables investment was top of mind for investors, and mgmt. provided some incremental color on how they are thinking about asset sales.

- **We met with NI President and CEO, Joe Hamrock, EVP, CFO, CAO, and Controller, Donald Brown, Chief Strategy & Risk Officer, Shawn Anderson, and other members of the senior management team to discuss potential asset sales, thoughts around the valuation of the LDC space, NIPSCO renewables projects, and COVID-19.** NI is set up well with a robust base capital plan that is highly tracked paired with large investments in renewables projects driving top-tier growth from 2021-2024. Mgmt. feels good about its ability to execute on the plan and has the sale of Columbia Gas of MA behind them.

- **Swap gas for electric? Asset sales would lead to lower equity needs to support the robust investment in renewables.** When assessing a potential asset rotation, mgmt. looks at the fundamentals of the business, specifically, is the asset contributing on an earnings standpoint as a percentage of capital allocation. Mgmt. noted it is important to view the earnings profile that is being given up and cost structure leading us to believe that larger utilities would be more difficult to offload. **If NI looks to sell and investors attempt to triangulate on which assets NI could be willing to sell, they will likely target their smaller utilities which would come with less dis-synergies and less dilution that would need to be backfilled.** Mgmt. could also utilize NOLs, which could be material, to offset the tax leakage that would arise from a sale given the very low basis on the utility assets. If mgmt. were to divest any of its gas operations, they would essentially be swapping gas for electric, which could be multiple accretive in this market.

- **We note mgmt.'s comments on the value of LDCs in the current market seemed obstructive to a potential sale, i.e. in our view, mgmt. believes LDC valuations are at somewhat of a trough…** the fundamentals of the business are sound. Mgmt. stated that depressed valuations are an overreaction given robust customer growth, strong regulatory support for safety and reliability, and no real substitutes. *The only pushback mgmt. has seen from their service territories is that they are not expanding enough…* Electrification is not viable in many service territories and decarbonization will more likely be achieved through RNG and hydrogen over the longer-term.

- **Continued progress on renewable projects at NIPSCO – $550M-$750M in projects still under negotiation.** NI has $0.4B in approved projects, $850M in projects awaiting approval and $550M-$750M in projects in advanced commercial negotiations. The tax equity investment totals ~$1.0B and will be additive to rate base over time as the tax equity partners farm out the benefits. Indiana Crossroads, the 300 MW build transfer wind project, has commenced construction. Rosewater and Jordan Creek are still under construction, all material is on-site relieving supply chain issues from the pandemic, and mgmt. expects them to be in-service by the end of the year. Brickyard Solar, 200 MW PPA, Greensboro Solar, 130 MW PPA have been filed with the commission and are awaiting approval while Dunns Bridge I Solar, 265 MW build transfer, Dunns Bridge II Solar, 510 MW build transfer, and Cavalry Solar, 260 MW build transfer will be filed before the end of the year. There are five to seven projects in advanced negotiations, mostly solar. The projects are locked in with their bid and are all safe-harbored otherwise they would not be competitive. We look forward to an update on additional projects before year-end.

- **Stepping through another IRP to address the retirement of Michigan City… all coal will be replaced with renewable generation.** NI will conduct another IRP process in 2021 that will inform more on the retirement of Michigan City (currently scheduled for retirement in 2028) and any replacement generation needed to fill the gap. Mgmt. noted that solar-plus-storage is outpacing wind on economics, so we expect the replacement generation needed when Michigan City is up for retirement will look similar to the renewables projects recently announced with NEE.

- **MD rate case settlement was approved today.** The settlement stipulated a 9.6% ROE and 52.63% equity layer which is much lower than the ask of 10.95% ROE but in line with utility averages and consistent with what we model. New rates are effective in Dec. **PA rate case still working through the process but settlement talks are solid and the case is ripe for decision.** The deadline for approval is Feb. 25, but rates are to be effective in late Jan.

- **Conservative view on FY21 EPS guidance unchanged… mgmt. expects ~$(0.05) of COVID-19 impact into 2021** – roughly $0.03 gas and $0.02 electric. The impacts will be critical to keep an eye on as we move through the winter heating season. As a reminder, the gas businesses have a more fixed rate structure on the residential side so the impact will come from the C&I customers. NI has bad debt or incremental COVID-19 expense trackers in most states and is not pursuing any more regulatory support, but that may change depending on the impact of the pandemic.

ALLETE (ALE)

We met with the full ALE leadership team, including CEO Bethany Owen, CFO Bob Adams, Controller/CAO Steve Morris, and other members of senior leadership. Management was fresh off its 3Q20 call earlier in the morning, with NT growth challenges disclosed on that call our main focus, in addition to regulatory and customer considerations at MN Power

- **Headwinds across the business complex and a conservative team lead to lower NT growth expectations of ~4% in the near term, with the LT 5-7% still targeted…** Management lowered its near term growth expectations in the 2020-2025 time period to approximately 4% using 2019 as a base year, citing the impacts of COVID and customer impacts at MN Power, in addition to pressure on project returns at ACE and the impact on accretion from potentially using equity at ALE's current stock price. We see this as in character for ALE's management team, who have not shied from making similar capital allocation decisions in the past (e.g. holding individual segments to their return thresholds).

- **At ACE in particular, management noted that it has been seeing pricing pressures in the renewables space creep into its operating niche within the segment** – namely smaller wind projects. Management attributed the pressures primarily to ongoing degradation in the outer years of consultant's forward curves, which in the most recent forecasts have fallen some 20%. This is important for ACE because a 30-year project may only be contracted for the first 15-20, leaving the second half subject to the curves. In the case of most recent consultant forecasts, management sees the decline lowering project IRRs by some 150bps on its own. Beyond the curves management's caution is reinforced by the different accretion it sees from issuing small amounts of wind-supportive equity at *current* stock levels, in addition to pressure from customers who have been looking for contracts at pricing that brings projected IRRs *below* management's thresholds. As a result, management expects to tamper its prior new project cadence of 2-3 per year, and while there will still be NT growth, the prospects for the longer term have dimmed.

- **So what's next? More to come in 2021, but management is working through different investment theses, including M&A and complementary products and services at ACE.** Focusing on ACE's repositioning first, management noted that segments of opportunity include solar, storage, grid resiliency, and even moving slightly within the development chain (e.g. selling projects). Specifically, on the latter pivot we note that management is still not interested in doing greenfield development. Management also minced no word emphasizing that it will exit businesses that don't achieve their return thresholds – in line with many of our prior conversations. **With regard to diversifying the broader business thesis, management indicated that this includes adding other regulated business, which could even include gas LDCs**. Here management emphasized that any target would have to possess a good growth profile, which could be challenging in the case of

 See pages 46 - 47 for analyst certification and important disclosures.

some gas systems. Still management sounded an open tone to a variety of options across the business complex as it continues to evaluate its options.

- **2021 rate case looking like a November event as MN Power files for a lost revenue tracker and taconite customers resume full production.** Management indicated that last week it filed for a deferral of lost revenues associated with the idling of Keetac [NYSE: X] and Verso Paper's [NYSE: VRS] mill. On an annualized basis this would be approximately $30mm or revenue, however we note that Keetac appears to be in the process of resuming full production. Management's update on the Verso mill indicates a more uncertain outcome, with the company still trying to find a buyer or restart thesis. Importantly, the deferral request would essentially supplant the need to file a case in March 2021, meaning management's preferred November 2021 timing would be intact. As it stands management plans to file for a 2022 test year, which would align well with the start of the Manitoba Hydro [PRIVATE] PPA. We also asked about any updated thoughts on ROEs in light of some of the risks unique to MN Power, with management pointing to other recently-filed cases seeking ~10% ROEs as potentially instructive for its own process next fall. Finally, we note that management remains enthusiastic on its current IRP process (running through February), with the Boswell coal units (~800MW) of particular interest to all parties. Per management the interest has been strong because the units are the last in the state to not have set retirement dates. Their retirement, and the associated loss of northern MN baseload, could require substantial renewables and T&D investment to preserve reliability for large industrial customers, in management's view.

 See pages 46 - 47 for analyst certification and important disclosures.

PG&E CORP (PCG)

We met with CEO Bill Smith and interim CFO Chris Foster and the PCG leadership team. PCG is in progress of leadership transition, working through post-bankruptcy challenges and wildfire mitigation improvements. We touched on several moving pieces on the overhangs to what moves towards a 10% rate base CAGR utility.

- **We met with CEO Bill Smith and interim CFO Chris Foster and the PCG leadership team**. The main focus of our meeting was a recap of the multiple hurdles that PCG is working to address post-bankruptcy, some color on leadership structure and CEO search, and work being done to mitigate wildfire risk.

- **PCG's CEO search is broad reaching but likely to require utility experience, while a supporting leadership team of CRO and CIO have been assigned.** In our meeting we heard some thoughts on the prospective CEO search and some of the past C-level positions that have been filled to date. Outgoing CEO Bill Smith provided some color on what he believes will make for a good fit CEO as the board moves through the broad reaching candidate process – in short pointing to **someone who understands the utility space, but maybe comes with external experience, i.e., able to bring new perspective to PCG.** Bill Smith was not shy in acknowledging the need for improvement across the organization (hence the need for new perspective), but noted valiant efforts being made to date including a new Chief Risk Officer, Sumeet Singh and new Chief Information Officer, Ajay Waghray. The appointments will look to improve PCG's performance in risk mitigation on the most effective dollars per risk mitigated basis and help improve information systems consolidation and efficiency improvements.

- **Any strategic considerations post-bankruptcy? No immediate benefit, as operational improvements are needed across the enterprise.** CEO Bill Smith noted that there was some consideration of a company split driven by the idea that PCG was "too big to manage efficiently", but the process was not well thought out in his view. Pulling on prior experience Bill lead a multinational organization of ~100k, so from a practical sense there was no reason why a single-state enterprise of ~20k could not drive improvement internally. Mgmt noted that there are certainly issues with technology and efficiency (as is evident to some degree across the sector) with too many different and legacy systems being used between gas and electric utilities. Likewise, improvements in work management systems and manual entry processes have paved a path for much of the internal improvement which have been chipped away under current management (but perhaps held back by the bankruptcy process). **Overall, in mgmt.'s view there is no need to have any kind of strategic reorg to realize improvements**, especially since a company split will not likely result in two more efficient companies.

 See pages 46 - 47 for analyst certification and important disclosures.

- **Technical overhang from Wildfire Victims trust ownership (24% ownership per FactSet) is managed with communication, alignment, registration and demand rights provisions.** The fire victims trust owns ~478M shares (per FactSet) which presents a technical overhang for PCG, especially as the lockup period has expired. The registration rights agreement has provisions for blackout periods which is 120 days for MNPI. If the trust wants to go through an underwritten offering, the trust will give the company awareness. Makes sure that the offering doesn't overstress the market. Mgmt. noted that at a high-level interest is aligned between CPG and the largest shareholder. **Can the trust DRIP the shares to market? – yes, they can have a small program**, but mgmt. not sure if that is tactically necessary. PCG is making sure to keep the trust in the loop on growth plans and strategy to make sure both sides don't mis-manage information.

- **PCG is building confidence with regulatory and by virtue of legal settlement has reached alignment with stakeholders.** PCG sees current status quo on CPUC and stakeholder alignment better than before, as everybody took the most aggressive swings during bankruptcy and the new stage now has set up a lot of transparency. There is now a process for quarterly operational feedback, enhanced oversight from the CPUC, access for the governor and administrative team to have an operational overseer of the company. This type of structure is having full reach into the enterprise which is unusual but good for alignment, and PCG does not mind that this is forced alignment through legal agreements.

- **Wildfire Risk Mitigation is in plan and working, but the proof of construct will require time.** PCG noted that the intent of the legislature and the governor was clear – resolve asymmetric risk, and they believe that has been accomplished. While the question came up on a demonstration of the process from start to finish, mgmt. noted that would require a massive wildfire with imprudent management, which is not a case that anyone wants to see for any utility (especially as the process could take years). What PCG seeks to offer is operational improvements, wildfire mitigation plan certification and managing risk through wildfire season. PCG noted that retroactive analysis of power shutoffs has shown many instances of foreign debris on de-energized lines and current protocols have worked well, including new sectionalization, which helped limit the extent of the outages.

- **Securitization process remains a hurdle, PCG notes constructive signs from intervenors.** Intervenors filed positions in mid-October which had a range of issues, but PCG notes that even historically opposing stakeholders have recognized the need for securitization as a low cost financing option for wildfire resolution. PCG noted a focus of stakeholder goals being the customer credit trust ability to deliver on keeping rates flat, which is aided by the low interest rate environment. **In an adverse scenario of not receiving the level of securitization PCG**

asked for, PCG maintains a 5 year capital structure waiver at the CPUC which will allow for some flexibility in managing the overhang. The resolution is important to the fire victim trust payouts so the January 22, 2021 date will be important for ALJs to take ~90 days for a proposed decision, and another ~30 for a final CPUC commissioner decision vote (peg mgmt.); this takes the process for financing resolution to 2Q20 as PCG mentioned on 3Q earnings.

See pages 46 - 47 for analyst certification and important disclosures.

COMPANY VALUATION/RISKS

DUK

Valuation: We utilize our regulated electric utilities multiple of 18.0x and apply a 2.0x premium to account for incremental distribution spending not yet in plan. We then apply this 20x multiple to our $5.25 2021 EPS estimate to arrive at our $102 valuation.

Risks: Risks to our rating and to achieving our price target for DUK mainly encompass traditional risk factors inherent with all electric utilities including: 1) rate case risk, 2) lower capex outlook, and 3) interest rate changes above what we account for in our regression mode.

OGE

Valuation: We arrive at our valuation utilizing a sum-of-the-parts analysis, which is composed of: (1) ~$35/share for the regulated electric utility, using our base regulated multiple of 18x P/E, and (2) ~ $2/ share for OGE's ~26% ownership of ENBL's LP units using ENBL stock price. Adding the segments, we arrive at our $36 PT.

Risks: Outside of noise around ENBL, downside risks include (1) negative rate case outcomes (e.g., regulatory risk including AR), (2) lower capex outlook, and (3) interest rate changes above what we account for in our regression model.

PNW

Valuation: We take our target multiple of 18x, which we derive from our regression model, which uses the correlation between electric utility valuations and forward interest rate expectations over the past 30+ years, and apply it to our 2021 EPS estimate of $5.11 to arrive at our $92 PT.

Risks: Risks to our thesis for Pinnacle West mainly encompass traditional risk factors inherent with all electric utilities including: (1) rate case risk, (2) lower CapEx outlook, and (3) interest rate changes above what we account for in our regression model.

DTE

Valuation: We arrive at our valuation utilizing a sum-of-the-parts analysis based on an 18x P/E base regulated multiple and a 2x premium. Our SOTP analysis is comprised of: (1) ~$87 for DTE Electric utilizing our target multiple; (2) ~$21 for DTE Gas utilizing our target multiple; (3) ~$15 for Power & Industrial Projects; (4) ~$26 for Gas Storage and Pipelines; (5) ~$2 of value for Energy Trading; and (6) -$13 for corporate drag. Adding the DTE segments we arrive at our $138PT.

Risks: DTE downside risks mainly encompass traditional risk factors inherent with all electric utilities, including: 1) rate case risk, 2) lower capex outlook, 3)

See pages 46 - 47 for analyst certification and important disclosures.

interest rate changes above what we account for in our regression model, 4) decline in allowed ROE, and 5) risks associated with the contemplated spin-off of the GS&P segment.

CMS

Valuation: We arrive at our valuation utilizing a sum-of-the-parts analysis based on an 18x P/E base regulated multiple and a 4x premium for CMS's constructive regulatory environment and strong organic growth. The SOTP is composed of: (1) $68/sh for the Consumers Electric and Gas utilities and (2) -$5/share for the Enterprises merchant generation and Corp. & Other segment. We then arrive at our consolidated SOTP $63 PT.

Risks: CMS risks mainly encompass traditional risk factors inherent with all electric utilities, including: 1) rate case risk, 2) lower/higher capex outlook, and 3) interest rate changes above/below what we account for in our regression model. Additional risk factors include: Executing and implementing the Michigan Energy law and commodity risk exposure through CMS' Enterprises segment - a decrease/increase in power prices and spark spreads can negatively/positively impact the merchant generation business.

PPL

Valuation: We apply our regulated utility group target multiple 18x to our 2021 EPS estimate of $1.29 for PPL's US utility franchises (i.e., PA and KY utilities) to arrive at a ~$23 valuation; we combine this with the ~$8bn equity value we estimate for PPL's UK franchise above (~$11/ share) and subtract ~$2/share of holding company drag to arrive at our $31 12-month price target.

Risks: Downside risks include: PPL's UK segment performance, which accounts for a portion of consolidated results, can be impacted by fluctuations on FX rates between USD/GBP as well as potential deterioration in regulatory construct and actions outside of the US. Outside of the UK segment, risks to estimates for PPL Corp mainly encompass traditional risk factors inherent with all electric and gas utilities including: (1) rate case risk, (2) lower capex outlook, and (3) interest rate changes above what we account for in our regression model.

FE

Valuation: We use a sum-of-the-parts analysis to value FE shares. We maintain our NEUTRAL rating but do not ascribe a price target while we await additional clarity on the ongoing investigation.

Risks: Beyond the potential for large fines stemming from the DOJ and SEC's investigations, downside risks mainly encompass traditional risk factors inherent with all electric utilities, including: (1) rate case risk, (2) lower capex outlook, and (3) interest rate changes above what we account for in our regression model.

See pages 46 - 47 for analyst certification and important disclosures.

Upside risks include: (1) improved regulatory constructs; (2) higher capex outlook; (3) if interest rates fall lower.

AEP

Valuation: Our $78 PT is derived by applying a target multiple of 17x (a discount to our regulated group multiple of 18x given balance sheet and equity needs vs. utility peers and adjusting for externalities created by the current market dynamics) to our 2021 EPS estimate of $4.63.

Risks: Upside risks: AEP could breach our estimates/valuation if capital investments exceed our modeling assumptions, or with interest rate changes below those reflected in our regression model.

D

Valuation: We utilize our regulated electric utilities multiple of 18x including a 5x premium to account for spending not in plan and constructive regulatory environments and apply this multiple to our 2021 EPS estimate of $3.88 to arrive at our $89 valuation.

Risks: Risks to our thesis for D mainly encompass traditional risk factors inherent with all electric utilities including: (1) rate case risk, (2) lower capex outlook, and (3) interest rate changes above what we account for in our regression model.

NI

Valuation: We apply an 18x multiple on the electric utility and 21x multiple on the gas LDCs. We arrive at our valuation utilizing a sum-of-the parts analysis, based on: (1) ~$10/share for the regulated electric utility; (2) ~$20/share value for the regulated gas segment given the limited spread from LDCs after recent market volatility; and (3) (~$-3)/share for other adjustments for Corp and Other. We use this sum of the parts to arrive at our $27 valuation.

Risks: The primary risk on the regulated utility encompass the traditional risk factors inherent with all utilities including: (1) rate case risk, (2) lower capex outlook, and (3) interest rate changes above what we account for in our regression model.

ALE

Valuation: We value ALE using a sum of the parts valuation. To the entire business excluding ACE, we take our regulated group multiple of 18x and apply a two-turn discount, which is applied to our 2021 EPS (ex-ACE) estimate of $2.85 for an equity value of ~$46. We then apply a 20x premium to our 2021 ACE EPS of $0.18 for an equity value of ~$17. The combination of the two parts equals our $62 price target.

Risks: Outside of the smaller base of large industrial customers and weak industrial demand, downside risks to achieving our PT for ALE mainly encompass traditional risk factors inherent with regulated utilities including: (1) rate case risk, (2) lower capex outlook, and (3) interest rate changes above what we account for in our regression model.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

RATINGS DISTRIBUTIONS FOR GUGGENHEIM SECURITIES:

			IB Serv./ Past 12Mos.	
Rating Category	**Count**	**Percent**	**Count**	**Percent**
BUY	246	62.76%	46	18.70%
NEUTRAL	140	35.71%	6	4.29%
SELL	6	1.53%	0	0.00%

OTHER DISCLOSURES

This research is for our clients and prospective clients only. Other than disclosures relating to Guggenheim Securities and its affiliates, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the research analyst's judgement. Guggenheim Securities conducts a full-service, integrated investment banking and brokerage business, and one or more of its affiliates conducts an investment management business. Guggenheim Securities is a member of SIPC (http://www.sipc.org). Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our employees trading for our own account that reflect opinions that are contrary to the opinions expressed in this research. Guggenheim Securities or certain of its affiliates conducts an investment management business, trades for its own account, and conducts an investment business, and may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research. We and our affiliates also may sell to or buy from customers

on a principal basis the securities described herein. We and our affiliates also do business with, or that relates to, companies covered in Guggenheim Securities' research, and may have a position in the debt of the company or companies discussed herein.

This research is not an offer to sell or the solicitation of an offer to buy any security. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

This communication does not constitute an offer of Shares to the public in the United Kingdom. No prospectus has been or will be approved in the United Kingdom in respect of the Securities. Consequently, this communication is directed only at (i) persons who are outside the United Kingdom or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"), (iii) high net worth entities falling within Article 49(2) of the Order (iv) and other persons to whom it may lawfully be communicated (all such persons together being referred to as "relevant persons"). Any investment activity to which this communication relates will only be available to, and will only be engaged with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

ES

- The most significant read-through from the Vineyard Wind cumulative EIS would be any judgement on spacing/transit lanes that differs from previous 1x1 nautical mile guidance. Subsequently, any required efforts to mitigate the impact to commercial fishing will be in focus. No significant changes from the Draft EIS are expected.

- Management anticipates awards in the NY offshore wind RFP to be announced by EOY. There is opportunity for ES to invest in transmission upgrades along Cape Cod to support the interconnection of offshore wind generation. ISO-NE recently initiated its cluster transmission study of the Cape, and whether onshore transmission upgrades fall to the offshore wind developer or to ES is yet to be determined.

- Management views the regulatory outcomes at NSTAR Gas and ES Gas Co. of MA as constructive frameworks which include ROE sharing bands, ten- and eight-year respective stay outs, and a performance based rates-esque design for rate increases.

NI

- Replacement power from the recent RFP is on track for the same PPA/BTA mix as anticipated from the 2018 IRP. To date, NI has executed contracts for $1.25 billion of the $1.8 billion planned renewables investment.

- The impact of COVID-19 on gas load in the winter heating months remains a close focus. Management anticipates it will be similar to that of electric, though gas load may be stickier in that vacant buildings still need heat to prevent burst pipes.

- Despite investor concerns regarding the potential for electrification of heating to diminish future gas need, management notes they have not sensed a similar tone from regulators. Management believes that the need for gas in NI service territory will continue to be strong and the potential for electrification of heating to reduce gas demand is overstated due to economic and technological constraints.

- Tax equity markets remain liquid, and investors may find the opportunities for regulated PPA deals are attractive. Management has no concerns regarding future access to tax equity financing.

NWE

NWE initiated $3.40-$3.60 2021 adjusted EPS guidance. The range is a bit wider than 2020 given COVID-19-

PM Summary

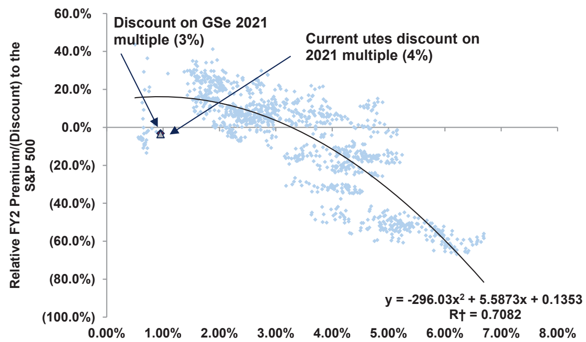
We come away from our 2020 Edison Electric Institute (EEI) meetings with management with two major themes:

1. **Clean energy transition and lowering emissions:** Companies remain focused on transitioning their generation fleet towards renewables, reducing emissions while supporting increased investments. Both state policy (Renewable Portfolio Standards) and federal tax credits (ITCs/PTCs) along with declining renewable costs are driving the transition.
2. **Shrink to grow opportunities:** Corporate simplification - either announced or in consideration - are driving many of the Diversified Utilities (CNP, DTE, EXC, PPL) as management teams seek to simplify the story and close valuation discounts.

We remain positive on utilities despite recent upticks in share prices and valuations as the sector still trades at a discount to the S&P500 versus a historical 20%-25% premium in a similar low-rate environment. Additionally, utility yields continue to screen favorably in comparison to IG bonds and the UST 10-year. Our top picks include renewable/green names such as NEP and WTRG (both Buy-rated and on the CL), while attractive generation fleet transformation plays include AEE, DUK, and PNW. For more value opportunities, we also see compelling upside in Buy-rated value names FE and PCG, along with Diversified Utilities with SOTP discounts like Buy-rated DTE, EXC and SRE (on CL).

Exhibit 1: Utilities currently trade at a discount to the S&P 500, at a 20%-25% discount to what history would imply in a low rate environment

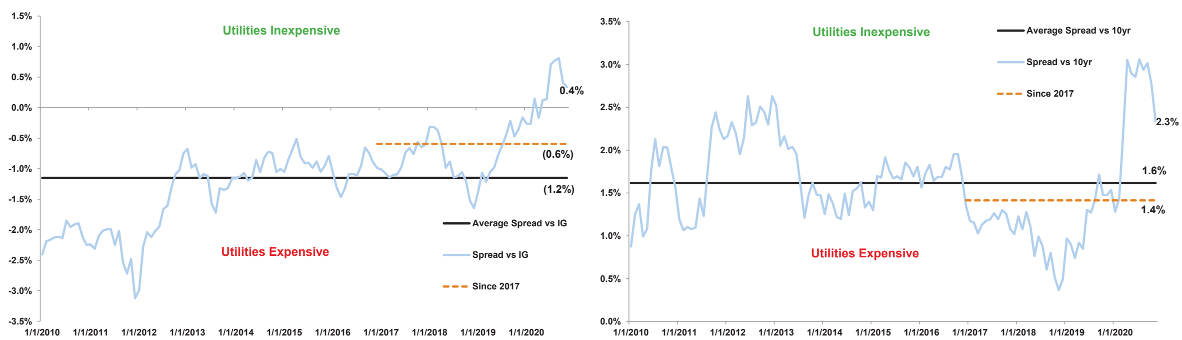
Utilities FY2 P/E premium/(discount) to the S&P vs UST 10-year yields



Source: FactSet, Goldman Sachs Global Investment Research

Exhibit 2: Utilities continue to trade above average yield spreads in relation to IG bonds and US 10-year treasuries

Utilities yield vs IG bonds vs UST 10 year



Source: FactSet

Top 10 Takeaways from EEI

1. **WTRG expects increased municipal water system acquisition opportunities,** driven by potential increased focus on water quality at both the federal and state levels.
2. **SRE appears still super bullish LNG growth** and financing options for developing new LNG without needing sizable contributions from SRE to fund construction.
3. **Securitization and the wildfire certificate process could drive relief rallies in PCG** – as PCG does not seem significantly concerned on receiving the wildfire safety certificate in the near term and securitizing debt in the longer term.
4. **EVRG maintains high conviction in its Sustainable Transformation Plan (STP)** — recognizing though that new state legislation in KS/MO is the key driver to this, with no clarity coming before early 2021.
5. **D highlights its sizable clean energy related growth at its core regulated VA**

electric utility - but recognizes permitting hurdles and rate making in VA (longer term) and SC (near term) present risks.

6. **EXC remains a sum of the parts story - and the company does not embed a "carbon value"** in its assessment of its ExGen subsidiary's potential value.
7. **CNP continues to see upside to its regulated growth plan,** at both the electric and gas utilities, while continuing to assess options to reduce its midstream exposure as expeditiously as possible.
8. **PNW remains confident in its robust renewable/storage investment plans,** which should achieve both de-carbonization and long-term customer rate benefit, while looking for a constructive clean energy recovery mechanism.
9. **DTE's 2021 guidance includes more contingency than normal.** Management indicated that given the ongoing pandemic and the uncertainty related to load and margin mix, they believe that they incorporated more than the typical level of conservatism in their initial guidance.
10. **More settlements in Michigan?** With both DTE/CMS announcing rate case settlements this year, the management teams indicated that the new MPSC composition coupled with significant multi-year filings approving large chunks of capex ahead of time could bode well for more settled rate cases in the future.

Company Takeaways

We hosted meetings at the fall EEI (Edison Electric Institute) conference - an industry conference for US utilities. We highlight the following company updates:

- **PPL expects to compare all options against simply reducing debt and buying back shares with potential UK sale proceeds**, but debt reduction remains key post sale to elevate FFO/debt target ~15%-16% from current ~12%-13% level - as detailed in our prior note on this topic. The company hopes, once becoming a pure play US utility, to trade more in line with peer levels post the sale. Likely a federal cash tax payer soon, diversifying into renewables may allow PPL to utilize tax credits and we note management prefers solar over wind from a competitive perspective. Upside may exist to rate base growth in Kentucky — but not till 2022 or later - as they plan to file an Integrated Resource Plan (IRP) in the state to outline gradual generation fleet changes in this coal heavy state.
- **With AZ commission elections complete, PNW remains confident in medium-term renewables/storage investment plans with conviction in ability to demonstrate cost competitiveness.** The company continues to target procurement of utility scale solar coupled with storage aggressively and believes higher clean energy in resource mix creates significant fuel savings despite initial bill impacts. In the ongoing APS rate case, PNW proposed in the recent rebuttal testimony the Advanced Energy Mechanism (AEM), which would provide rider recovery of renewable/storage investments. If not approved in the rate case, the company looks to push the proposal separately, reducing rate case filings while

aligning clean energy investment goals. On the financing side, while the outcome of the rate case would give additional clarity on the timing/magnitude of equity issuance (current forecast at around $300-$400mn), management expects issuance timing as prior to the next rate case filing, while noting that an approval of a clean energy rider could help push back such a filing and/or mitigate the amount.

- **CMS remains well positioned to continue executing with supportive regulation and a constant eye on operational improvements.** Management reiterated the low hanging fruit of fuel (Palisades; MCV) and O&M (Karn 1&2 and defined contribution vs benefit) tailwinds benefiting the customer over the current 5 year plan. However, CMS emphasized that the real value continues to come from operational cost improvements that heighten the quality of experience for both customers and employees as ways to benefit all stakeholders in MI. The state remains focused on decarbonizing and CMS believes that their current targets and plans already remain on track or exceed those goals while offering significant growth. However, management did note that energy storage remains an area where the next IRP could see more investment sooner and the coal Campbell Units 1 &2 could potentially retire earlier. Management sees multi-year filings as providing support for potentially settling rate cases given more known and already agreed upon factors during future rate cases, but noted the ongoing electric rate case is already far along given the PFD. CMs does not view longer-term trackers as likely, preferring the flexibility with annual or near annual filings, indicating that performance based ratemaking has come up and is already evident in energy efficiency and RPS spend.

- **ETR sees, as part of its multi year guidance, modest under earning levels continuing — and sizable rate base growth as well - but regulatory risk remains.** The company anticipates earning 9%-9.5% RoE levels - below authorized - given rate increase caps or regulatory lag in a few jurisdictions like AR, MS and LA. The FERC docket for its SERI segment could present downside - they've highlighted $0.15+ of EPS at risk, largely to finance refunds, but believe they could potentially mitigate this. Recent 2020 storms likely cost roughly $2bn - they hope to securitize these, based on precedents in Louisiana and Texas - otherwise financing this could weigh on earnings slightly. Low utility rates relative to other utilities remains a tailwind for rate base growth - they seek to add $1.4bn of renewables to the system over the next few years and could add emerging technologies (a new CCGT that is hydrogen capable) as well - RFP processes, especially for its Texas utility, remain key for investors to monitor. Finally, the company - while not a large coal fired generator - still owns the sizable White Bluffs facility in Arkansas with plans to retire in the late 2020s - an earlier expected retirement, being evaluated now, could add to rate base and earnings growth.

- **AGR remains confident in its offshore wind timeline, in addition to its growth through PNM and NECEC.** On Vineyard Wind, the company is expecting final environmental impact statement (EIS) this week and final approval by end of year, but notes an approval delayed until 1Q2021 would not alter their 2024 COD target. Given this timeline, AGR would still qualify for 18% ITCs, while looking to take advantage of any extensions/changes to offshore wind ITC rules if appropriate. The company also reiterated its interest in onshore transmission for future offshore wind projects, which is not embedded in the current capital plan. On the New England Clean Energy Connect (NECEC) transmission project, AGR continues to monitor the Maine citizens' initiative as the group plans for a 2nd referendum in opposition, but management believes the project's clean energy and economic benefits to the state will outweigh the opposition arguments. Despite the hurdles to overcome with a project of this magnitude, management expressed interest in considering other future large-scale transmission projects to route clean energy to the NY/NE area to meet clean energy targets. Regarding the company's balance sheet forecast, while AGR looks for Moody's to relax the downgrade threshold for post the PNM acquisition, the guided 14.5%+ FFO/debt from 2022-2025 embeds a potential one-notch downgrade at Moody's.

- **The Florida utilities remain a growth engine for NEE while seeing only modest rate case risk - the renewable segment benefits from massive tailwinds and advantages.** NEE anticipates filling a joint rate case for FP&L and Gulf Power in Florida, where 4 of the current 5 PSC commissioners will oversee the 2021 rate case process. While they likely will seek a rate increase, they recognize RoE risks exist - but they also see potential for continued lower costs going forward that would create headroom for higher rate base growth. The company still sees buyer power, financing advantages, lower O&M costs, site selection skills and economies of scale as their biggest advantages in renewables given their status as the biggest US operator - and an extension of renewable tax credits would not change this, if the new administration in Washington pushes for this. Hydrogen grabs a lot of mind share today - they do not see this as a major near term (2021-25) contributor to earnings, but like energy storage 8-10 years ago, see this as worth monitoring as cost curves improve.
- **CNP sees incremental capital spend spread across its electric/gas jurisdictions,** with 2/3 of the $3bn incremental plan expected at the electric utilities (TX/IN). Electric items include transmission connections for increasing solar build in TX, investments to support customer growth (2-2.5% in TX, 1% in Indiana), while gas investments primarily consist of accelerated gas pipe replacements. Management expects the guided 1-2% annual O&M reductions through 2025 driven by unearthing sustainable O&M savings, conversion from coal to natural gas/renewables, and utilizing technology to improve efficiencies. CNP looks to shift to a majority electric utility profile - partly driving its plan to divest one or two of its regulated gas utilities - while continuing to assess options to reduce its midstream exposure as expeditiously as possible.
- **WEC benefits from a favorable service territory - especially for gas utility service - and believes the current state administration will back its recently announced fleet transformation plan**. With Governor Evers' climate task force still underway, WEC does not fully know the impact of any proposals that will emerge - but they believe retiring older coal/gas units and replacing with solar and storage, along with new gas capacity, will fit in well with broader policy objectives. Cost management could continue in the coming years — while 2020 benefited from greater than originally anticipated levels, more integration could drive even lower

costs. As a utility in a cash tax paying status, WEC could continue buying renewable projects and keeping the tax benefits - a competitive advantage versus others who need tax equity.

- **DTE maintains outsized regulated growth and contingency in its initial 2021 guidance, noting more cost headroom over time translates to more investment from their substantial backlog of opportunities.** The current 5-year plan assumes regulated net income growth in excess of 7-8%/9% at DTE Electric/Gas, offsetting REF roll-offs and equity conversion headwinds during 2022-2023. While the current capital expenditure forecast implies slower levels during the back half of the 5-year plan, if management can find more cost savings they can pull forward more distribution and potentially renewable capex into the plan. DTE noted that given the uncertainty related to the ongoing pandemic, their initial 2021 guidance implies more than their typical 1 standard deviation below normal load in cushion. Other topics included an expectation to assess retiring the Belle River (2030) and Monroe (2040) coal plants earlier in the next IRP, which could require more capex in 2024/2025 to replace the Belle River capacity but would also require accelerated depreciation of the rate base. Management believes that providing more granularity on a standalone GSP/DTE Midstream company will create value for shareholders, highlighting the strength of their platform and opportunities for growth – especially in the Haynesville as well as the Nexus/Link platforms.
- **Potential corporate structure changes - as initially outlined by EXC in its 3Q2020 release - drove a sizable portion of our discussion with EXC,** as the company evaluates a possible separation of ExGen from the regulated businesses. Realizing higher valuation levels remains a key aspect of the decision making process - but regulatory approvals at state/federal levels remain key as well to whether they move forward or not with any changes. They do not "price in" or assume a value for carbon or a carbon tax when assessing the company's largely nuclear ExGen fleet — as they do not seem overly optimistic of a national carbon regime emerging soon - but see this as a "call option" not embedded in their base case. The company reiterated plans to meet its regulated utility EPS growth guidance given out previously - despite the impact of weak demand driven partially by COVID 19.
- **For AEP, while earned RoE's may decline, higher equity layers could offset this partially.** In our chat with management, they discussed that guidance assumes a low 9% range for earned RoE's - driven by regulatory lag in jurisdictions like Oklahoma and Louisiana - but hope to offset this with increased investment in projects with trackers and with higher equity layers in rates. The new 5-year capital spending plan incorporates not just the North Central wind project, but other smaller scale renewable spend as well as incremental transmission investment.
- **Dominion faces limited regulatory risk in the near term, but acknowledges longer term risk still exists.** The 2021 triennial earnings review in Virginia creates limited risk given the $50mn cap on revenue reductions, but the company did recognize that (1) risk in Virginia exists in the 2024 review, where no revenue reduction caps exist and (2) the ongoing South Carolina rate case may see

intervenor testimony that seeks a far lower rate increase than sought by Dominion. Potential changes at the state utility regulatory commission remain worth monitoring in Virginia. D stays positive on gas utilities given trackers that exist in markets like Ohio, paired with opportunities to grow renewable natural gas and even do its first small scale hydrogen pilot test in Utah. D also iterated that it does not expect change in the company's views on its remaining contracted assets like Cove Point LNG or Millstone nuclear in CT.

- **SRE remains very bullish its mix of US utilities and infrastructure businesses - and expects positive LNG related news in the coming months.** With SRE having sold its Latin American utilities and its US renewable business in the last year, the company's new simplified structure should prove easier for investors to understand going forward. Rate base growth remains material in California given the transition to clean energy - and even with a potential risk to authorized RoE's for 2022 there, authorized levels remain above national averages. Texas remains a growth opportunity - they just raised rate base growth projections by $300mn and could see another $775m+ upside in the coming years - and do not expect an overly contentious rate case proceeding in 2021. On the LNG front, Sempra expects to FID the Costa Azul LNG project - and assume limited construction risk — with only $250m of Sempra's equity capital used to finance this project - and still see Port Arthur LNG as one of the few US facilities potentially moving forward in the coming years.
- **WTRG highlights increasing water quality focus as a potential catalyst to support municipal water acquisitions.** While increased federal funding for water infrastructure, if implemented, could deter certain acquisition opportunities, management expects smaller systems to continue to face funding shortages, especially when combined with potential increase in water quality standards. On its recently acquired Peoples Gas system, WTRG expects pipeline replacement to fuel robust rate base growth at Peoples, while its low pressure systems and above-ground checkpoints enhancing its operational safety.
- **ED continues to face uncertainty related to COVID-related costs and storm response,** while reiterating its equity issuance plan (up to $600mn in 2020, $1.1bn total from 2021-2022) with an update expected with 4Q2020 earnings. At CECONY, ED sees potential investment opportunities to improve grid reliability, including potential for additional undergrounding of its distribution system. ED also looks to continue growing its renewable footprint, although offshore wind remains above its risk tolerance level except for associated onshore transmission investments. Finally, management reiterated its view that its midstream equity stakes in Mountain Valley Pipeline (MVP) and Stagecoach are non-core while looking to mitigate the exposure.
- **DUK anticipates trying to put together a coalition to seek electricity related state legislation in N Carolina** – seeking (1) revised rate making – including multi-year plans, decoupling and/or trackers, (2) policy support for a timeline around coal plant retirements, (3) detailed emission reduction targets and (4) policy support for offshore wind. Cognizant of managing the rate impact, which remains key to get industrial customers on board, the company may need to agree to annual or multi-year rate caps. However, we note their IRP (Integrated Resource Plan) base

case assumes ~1% annual rate change and the more aggressive no carbon plan assumes ~2.5% annual increases - so none that appear overly material or that would drive rate concerns for customers. Increased spend at the gas utilities will help drive overall rate base growth - they still see these businesses as attractive growth opportunities - as would higher solar related spend at the Florida electric utility. Florida remains worth monitoring given (1) a proposal to add 750 MWs of community solar, which will go before the PSC in late 2020 and (2) next year's rate case, where DUK will likely seek small rate increase levels.

- **The regulatory front and wildfire recovery will drive EIX from here**. EIX remains bullish regarding changes in California utility regulation — they see faster regulatory decisions as showing the state utility commission wants to work in a more expedited approval process. Recent approvals on securitization, insurance cost recovery, COVID 19 cost deferral and recovery, and wildfire spend recovery (2018-2020), show the state continues to see utilities as necessary "partners" in moving to a cleaner energy economy. They view the cost estimates for 2020 wildfires as likely falling within insurance recovery levels and continue to work to resolve claims related to the 2017/2018 wildfires, after reaching settlements with public entities and the subrogation claims holders. EIX still plans to issue $1bn in common equity - more likely doing so after wildfire season ends in late 2020 and as they get closer to reaching settlements with claimants from prior wildfires — and can utilize $800mn of insurance to pay out claims for now on the 2018 wildfires.
- **XEL looks to continue its robust renewable investment pipeline,** while ITC/PTC extensions - if realized - could support incremental renewable PPA buyout opportunities. Along with the renewable theme, XEL highlighted its commitment to support EV infrastructure and increased EV adoption, with $500mn of planned investments across its various jurisdictions. Finally, XEL expects to be able to grow at the upper half of 5-7% EPS growth guidance with just its base capital plan, while the proposed $1.4bn in incremental wind/solar investments could pad the growth toward the upper end of the guidance range, supported by a flattish base O&M CAGR through the mid-2020's.
- **In our discussion with PG&E Corp's (PCG) interim president and other officers, the company highlighted skills sought in incoming CEO/CFO** level personnel - with announcements likely in the months ahead on who will fill these seats. Operational experience, political and regulatory expertise remain key to the skillset needed for PCG's incoming CEO — while the CFO search focuses on individuals with strong investor relations skill sets as well as in balancing capital spend goals with the impact on customer rate levels. The company did not seem overly concerned regarding the Wildfire Safety Certificate process - they view the delay as more of a technical issue - and hope to get resolution soon. The 2019 certificate remains in place unless the state regulator outright rejects their 2020 application. PCG still anticipates $625m of costs related to the 2019 wildfire - but upside to this may exist and certainty may not emerge for another 1-2 years. They remain optimistic about cost savings opportunities as well as on securitization - they hope to finalize the regulatory docket by late spring 2021 and utilize securitization proceeds to pay down temporarily issued debt in the near term (up to $6bn), with

plans to pay down $3bn of outstanding holding company debt over the next 2-3 years. Upside may exist to rate base forecast levels - but risks to the authorized RoE for 2022 remains given the state's cost of capital mechanism.

- **Grid infrastructure investment remains top of mind for AEE, while continuing its fleet transition initiatives.** In Illinois, while management continues to pursue passage of the proposed legislation to extend formula rate-making (expiring in 2022) while opening the doors for renewable investments, they view traditional rate-making as relatively constructive as well given a future test year and de-coupling. In Missouri, the utility noted positive feedback and reception from all stakeholders on the recently filed Integrated Resource Plan (IRP) which, combined with ongoing grid investments in the state, should provide robust long-term rate base growth. Management noted that an extension of renewable tax credits - if implemented, could warrant further acceleration of its renewable growth plan.
- **EVRG remains focused on the state legislative front in Kansas and Missouri - outcomes next year likely will significantly impact earnings growth** and realizing EPS targets. The company still believes, as outlined at 2Q2020 earnings, that retiring up to 500 MWs of coal generation earlier than planned - and securitizing these costs - and redeploying the proceeds into new renewables remains, along with raising transmission/distribution investment, the best growth strategy available. They believe strong support exists for energy transition planning in Kansas — and will seek consensus backing on this in Missouri next year - but risks exist that other low cost alternatives, besides simply company owned generation in rate base, could emerge and present a modest risk to their goals of adding more renewables to rate base. Higher transmission spend comes with limited lag — they anticipated higher levels for multiple years to help Kansas integrate wind capacity, but actually see a bit of an uptick in its smaller segment in Missouri (Missouri West). EVRG does not see asset sales as likely needed or leading to lower costs - early retirements remain the core driver.
- **AWK spoke on opportunities to address water contaminants even in the absence of a federal water quality mandate,** which could drive both organic and inorganic growth via continued acquisitions of small municipal water and wastewater systems. While private capital is present in larger systems, AWK is best positioned to do tuck-in deals with 20,000 customers or less, as they can provide investment and improved service while spreading costs across the entire AWK business. The company still expects the NY utility sale to close in early 2021, with NY commission approval the only outstanding condition. AWK continues to replace water pipes within its system, and is targeting a 100-year replacement cycle versus 120-130 years currently compared to many municipal systems at 200 years. AWK's military business continues to see good traction, with numerous opportunities and proposals currently in the works while the Homeowner Services Business has seen some headwind from COVID-19 in 2020 but margins should be stable moving forward ex-COVID.
- **NI continues to see both electric and gas utilities as integral components of the US energy mix.** Management sees an attractive growth trajectory for both types of Utilities, noting that the recent pressure on regulated natural gas valuations

in the public markets does not appear to reflect the fundamental value they deliver for customers that is not easily replaced. The company does see opportunities to decarbonize on the natural gas side through infrastructure replacement as well as RNG, especially given Ohio and Indiana offer attractive RNG resource – noting this will represent a small amount of volume. On the electric side, management highlighted that potential renewable tax credit extensions could potentially support further acceleration of coal retirements, pulling Michigan City earlier than 2028. Separately, NI reiterated that management remains comfortable with current guidance, incorporating ~$0.05 of impact related to COVID.

- **POR continues to see state-driven clean energy goals supporting on-going renewable/storage investments in Oregon,** as well a growing focus on EV infrastructure opportunities, especially for industrial customer base. With the recent state wildfires mostly contained, POR continues to assess the overall cost from an expense/capital standpoint, although they see the levels as largely manageable and supported by the approved cost deferrals from the state commission. POR in 4Q2020 earnings looks to provide an update on both the wildfire cost estimate as well as thoughts on timing of the next base rate case; for 2021, the company looks to grow earnings (using 2019 as the base and 4-6% long-term growth forecast) driven by cost management, benefit from the completion of the Wheatridge renewable facility, and lower costs associated with the retired Boardman coal plant.
- **OGE focuses on maintaining and growing its regulated electric utility profile, primarily through continued transmission & distribution investments at its Oklahoma/Arkansas jurisdictions, supported by improving regulatory frameworks through certain investment recovery mechanisms.** While fleet de-carbonization is not a primary investment driver near-term, OGE does see select solar opportunities that could combine with gas-fired generation in replacing retiring coal plants. Finally, management views the growth of its regulated utilities as the primary use of any capital allocation opportunities.

Valuation and Key risks

PPL Corp. (PPL, Neutral): $31/sh 12 month target price is based on a sum of the parts analysis. Key risks include regulatory risk, power demand and financing.

Pinnacle West Capital Corp. (PNW, Buy): $94, 12-month price target based on 19.5x P/E multiple on 2021 EPS. Key downside risks include 1) APS rate case outcome corresponding to our bear-case scenario that could pressure valuation multiples in the near-to-medium term, 2) realized electric demand is worse than expected, impacting earnings and cash flows, 3) the November 2020 election results in a non-constructive commission, and 4) PNW is unable to secure much ownership in future renewable generation build-out, limiting rate base growth.

CMS Energy Corp. (CMS, Buy): $69, 12-month price target based on 24x 2021 P/E multiple. Key risks include regulation, legislation, cost management, and financing.

Entergy Corp. (ETR, Buy): $119, 12 month target price based on a sum of the parts analysis. Primary risks include regulatory risks, power demand and financing.

Avangrid Inc. (AGR, Sell): $45, 12-month price target based on a sum-of-the-parts analysis. Key upside risks for AGR include 1) AGR receives approvals to defer all COVID-19 related costs, mitigating the earnings impact, 2) incremental O&M savings help offset other EPS headwinds, and 3) U.S. government extends federal renewable tax credits, which improve future renewable investment return profiles for AGR's renewable business.

NextEra Energy Inc. (NEE, Neutral): $74, 12-month price target based on a sum-of-the-parts analysis. Key risks include Florida utility regulation, renewable development, tax credit legislation, and operating cost management levels.

Centerpoint Energy Inc. (CNP, Neutral): $22, 12-month price target is based on a sum-of-the-parts valuation. Key risks include customer demand/growth, COVID-related costs, and financing.

WEC Energy Group (WEC, Sell): $88, 12-month target price based a 22x P/E multiple on our 2021 EPS. Key risks to our view include higher than expected capital spend and rate base growth for 2021+, lower than expected operating costs and improved demand.

DTE Energy Co. (DTE, Buy): $142, 12 month price target derived from a sum-of-the-parts valuation. Multiple risks exist to our current view of DTE: (1) Unlike a sale, spinoff valuation remains an unknown for shareholders, if midstream valuations change due to adjustments in legislation, taxes, or supply and demand balances in a negative way, this could impact DTE's valuation. (2) The regulated asset base – representing ~70% of earnings today and theoretically 90% post spin-off – maintains a single state regulatory environment. If MI sees significant changes in regulatory quality – especially the ability to earn timely recovery on investment as well as authorized returns — this could impact our view. (3) Similarly, demand, cost, and investment trends in the state remain critical. (4) DTE currently offers a substantial regulated growth profile, in order to finance this DTE may require equity beyond our forecasts or debt financing costs ahead of our expectations.

Exelon Corp. (EXC, Buy): $53, 12-month price target based off a SOTP analysis. Key risks include retail MWh sales, power prices, generation output, and utility regulation.

American Electric Power (AEP, Neutral): $90, 12-month target price based on SOTP. Key risks include power demand, rate case and regulatory risks, as well as financing.

Dominion Energy Inc. (D, Neutral): $84, 12-month target price based on SOTP. Key risks include regulation, project execution, power demand and financing.

Sempra Energy (SRE, Buy on CL): $150, 12-month price target derived using SOTP. Key risks include project awards, regulatory approvals, construction, and financing.

Essential Utilities (WTRG, Buy on CL): $51, 12-month price target based on SOTP. Key risks include regulation, municipal water system acquisition approvals, and longer-term growth concerns about the gas utility weighing on valuation.

ConEdison (ED, Sell): $78, 12-month price target based on 18x P/E on 2021 EPS. Risks include NY utility commission authorization of COVID-19 related costs and bad debt expense, NY economic conditions, renewable segment growth.

Duke Energy (DUK, Buy): $99, 12-month price target based on 19x P/E on 2021 EPS. Key risks include utility regulation, power demand and coal ash related issues.

Edison International (EIX, Buy): $74, 12-month price target based on 17x P/E on 2022 earnings discounted back to 2021. Key risks include wildfire related costs, litigation claims, utility regulation and financing.

Xcel Energy (XEL, Neutral): $71, 12-month price target based on 20x P/E on 2021 EPS. Key risks include upward revisions to rate base/EPS growth, O&M savings, renewable tax credit extension, negative rate case outcomes, less generation in rate base, materialization of PPA buyouts, COVID-19 related cash drag.

PG&E Corp. (PCG, Buy): $15, 12-month price target based on 14x P/E on 2022 EPS discounted back to 2021, and DDM. Key risks include wildfire risk, continued underearning due to legacy holding costs, financing risk and trading risk.

Ameren Corp. (AEE, Buy): $93, 12-month price target based on 24.5x P/E on 2021 EPS. Key risks include regulation, project awards, and financing.

Evergy, Inc. (EVRG, Neutral): $58, 12-month price target based on 18x P/E on 2021 EPS. Key risks include utility regulation, power demand and cost management.

American Water Works (AWK, Buy): $166, 12-month price target based on 39x P/E on 2021 EPS. Key risks include water quality issues, cost management, regulatory environment, growth at non-regulated segments, reduced ESG fund flows.

NiSource (NI, Buy): $27, 12-month price target based on 20x P/E on 2021 EPS. Key risks include Indiana regulatory approvals for renewables, earnings/cash impacts due to COVID-19, higher than expected O&M, electricity demand and customer growth, and financing.

Portland General Electric (POR, Sell): $39, 12-month price target based on 16x P/E on 2021 EPS. Key risks include COVID-19 impacts on earnings/cash, level of COVID/wildfire related cash drag, renewable ownership, and M&A target risk.

OGE Energy (OGE, Neutral): $35, 12-month price target based on 18.5x P/E on 2021 EPS. Key risks include upsized rate base growth, the company could be a target of a take-out, customer and demand growth, further distribution cuts at ENBL, COVID-19 headwinds.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	49%	35%	16%	64%	57%	54%

As of October 1, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,122 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Ouvidoria Goldman Sachs Brasil: 0800 727 5764 e/ou ouvidoriagoldmansachs@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by either Goldman Sachs Canada Inc. or Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

The latest trends at this year's virtual mega conference

We provide our latest day of conference takeaways with our most substantive set of meetings on Tuesday. We include takes from AEE, AES, ALE, AVA, AWK, BKH, CMS, D, EVRG, FTS, IDA, NI, NWE, OGE, PEG, PNM, PNW, POR, WEC, and XEL. While there are few substantive updates we continue to stress several key themes: 1) rate cases are to be avoided as much as possible – we see delay efforts across the sector to limit scrutiny of authorized returns: examples include BKH, XEL, WEC among a litany of others that have been successful in avoiding these outcomes. 2) Expansion of contracted renewables remains a key point of discussion as this is increasingly affording latitude for companies to backfill their EPS growth with undefined project acquisitions as ratebase otherwise slows or is unable to meet the 5-7% growth contemplated. 3) Continued elevated residential trends, and *especially* sustained cost cuts from 2020 into 2021 provide substantive latitude in earnings. While we've remarked before at just how confident companies are already within their stated or implied '21 EPS guidance ranges, we reiterate this focus. By contrast, those with challenges to achieve '21 EPS appear outliers and the greater risks for performance vs utility peers. 4) Debate on sector valuations remains clear, with substantial focus on just whether there is value in gas LDCs. On balance near every executive agrees on LDC merits – in northern latitudes and central geographies so dependent on winter heating – and hence we see clear bias for consolidation whether driven by strategics or financial sponsors. See our earlier takes from Day 1 and Day 2. AVA PO to $38 (from $35) on mtm of17.3x for electric (from 16.5x) and 15.5x for gas (from 13.8x); POR to $48 (from $42) on mtm (from 16.2x).

So what about company specifics? Some high points

AES remains among the best meetings of the conference given continued discussion of positive EPS factors driving extension of EPS CAGR, further divestments, constructive sales prices on recent sales, and ultimately upside surprise on other smaller start-ups (Uplight). We saw NEE as among the better Day 1 meetings as well. A few of the key points from our meetings: AEE doesn't see '20 EPS as intermediating on its '21+ outlook; this is important to consider given recent pressures. AES see even more latitude than we realized (out to '25) and could see further halving of its coal capacity by end of '21. BKH quite confident on its ability to scale incrementally still – more upside on the come despite constructive '21 guide release. D aspires to provide *consistent* 6.5% EPS growth despite lumpy nature of its growth; see some modest positive tailwinds as roll its outlook ever deeper into the core of its offshore upside (expect ratebase likely still 7-8% if not higher). EVRG offered some caution on earned ROE trends heading into '21/'22, but affirmed updates on new executives would be forthcoming well before 4Q roll; appears confident on getting approval for ratebase wind investment of 700MW with clarity likely by YE21 to bolster confidence in stand-alone plan. NI divestment remains a key focus of debate – appears to be still interested, but not entirely clear. PNW has put together an intriguing rider package for clean energy recovery tied to economic support for impacted native American communities: positive update, but *how much* can it address lag? Finally XEL appears poised to kick out rate cases in its two core geographies – and sustain its current level too. *See company specific write-ups enclosed.*

Contents

Ameren (AEE)

Shares of Ameren experienced weakness following the company's Q3 report and reduction in the top end of its guidance range. Without a significant update as part of its EEI release, mgmt. reiterated its focus on executing its updated resource plan in Missouri as well as ongoing efforts to extend IL formula rates as its top priorities. Maintain Neutral on Ameren.

Focus on 6-8% growth with MO rate review filing expected by mid-2021

Mgmt flagged its upcoming MO rate filings for both its electric and gas utilities as key H1 items on the regulatory agenda, with the filing at the electric utility intended to capture the $1.2B of wind entering service by the end of 2020. We perceive some sensitivity to the overall trajectory of O&M reductions as well given the test year period for an electric filing is ongoing, and accordingly are less concerned about the 2020 guidance reduction as a sign of persistent execution issues. The bulk of 2020 Covid impacts affected the MO Electric business, mgmt. indicated that the majority of offsets were undertaken at that utility rather than across the enterprise. Looking ahead some investors are identifying natural gas demand in the key Q1 period as a potential tail wind for non-decoupled gas distribution utilities, similar to the boost seen in residential electric demand from Covid-related changes in usage patterns. AEE mgmt. see this as less of a consideration given that its larger gas business is in IL (decoupled) with a relatively small number of gas customers in MO (120k).

Constructive on ROEs, Liberty not a blueprint, Formula Rates key in IL

The MO Electric rate settlement received earlier in 2020 is seen constructively by mgmt. (and indeed led to upward estimate revisions and enthusiasm around AEE shares), though the precise ROE and equity remain part of the black box settlement. Mgmt. does not expect that the Liberty Utilities decision from earlier in the year serves as a leading indicator for the path of ROEs in MO broadly (a view echoed by other stakeholders in our previous conversations). Generally we believe that the commission maintains a constructive stance toward AEE Electric and see a pathway to a potential settlement in the upcoming 2021 filing as well. In Illinois, the extension of formula rates and corresponding increase in adder from 580 to 680 bps remains top priority – mgmt. indicates that formula-based ROEs today are lower than would otherwise be expected under a traditional rate case process, though the advantages of the formula rates in terms of stability and procedural simplification are seen as key. Remains constructive on *eventual* resolution of lingering IL extension question.

Latitude to move up coal retirements, but currently key part of gen mix

Mgmt. did not rule out further acceleration of coal plant retirements in Missouri after the resource filing in September moved forward planned shut downs at Sioux, Rush Island, and Labadie. Mgmt. sees the current planned lives of the facilities as appropriate given the plants' capacity factors, which remain high (unlike EVRG's KS facilities). Also worth noting is the significant rate base associated with coal generation at AEE's Missouri facilities – mgmt. indicated a preference for accelerating depreciation of these assets (Merrimac will be nearly depreciated when retired in 2022) over securitization, which remains uncertain at this point. While stakeholder conversations indicate a degree of momentum and support for securitization, AEE mgmt. is not indicating that the legislation is a key component of its coal strategy – we continue to see this as more of a factor for Evergy.

AES Corp (AES)

Watch Fluence Selldown with Developments Imminent

After an S&P upgrade to Investment Grade and coming off of a positive 3Q report last week, discussions with management continued to highlight pending developments around Fluence – the battery storage JV with Siemens - as the company looks to do a capital raise to establish a value marker for the biz and drive continued investment ahead of an IPO in two or three years. We continue to perceive the most likely construct as a 5% sell down each of AES/Siemens' 50% stakes. While R&D has kept the business about a $0.02 drag on AES consolidated results, latest discussions continued to stress the company as margin positive with management guiding to a 45% revenue CAGR ($500Mn in 2020) as a base case to grow to ~$3Bn in five years. Current expectations under base forecasts are for the company to yield positive earnings in a couple of years. That said, conversations suggested potential for accelerated growth given the scope of possibilities for energy storage in transmission – which could push out inflection in earnings contribution while further driving longer term value. It remains to be seen just how elevated a valuation the company can achieve with the initial sell down and how the recent acquisition of AMS contributes to driving interest and margin potential over time.

Divestments continuing and could even *accelerate* too

Meanwhile, we expect potential for additional asset sale announcements through year end to further clean the portfolio after announcing last week that that it has signed an agreement to sell a 35% interest in the Southland repowering for $424Mn (meaningfully more than our prior valuation and translating to 14x+ EV/EBITDA multiple), pushing total announced asset sales this year to $650Mn and above their full year target of $550Mn. Look for further divestments of coal by year-end and substantively more even in 2021. We could see a further halving of total coal exposure over 18-months. While EPS dilution from sales remains a clear risk.

Uplight: another efficiency emerging biz within the AES family

While likely more protracted, watch any developments overtime around Uplight – with the biz currently driving 20% top line growth and our model only incorporating the equity invested in the valuation - and other potential partnerships that could yet materialize in coming months. This remains another emerging angle to the story; we value it at book value in our SOTP. Admittedly this could see some growing enthusiasm.

Poised to Extend 7-9% EPS CAGR: *growing clarity*

Overall, we see the company as well positioned to extend their 7-9% EPS CAGR with their typical roll forward early next year to '24. While only 15% of the biz, we expect the utilities to be a key driver of EPS post 2022 with management guiding to high single digit rate base growth for DP&L and mid-single digit rate base growth for IP&L. Recall the company recently reached a constructive settlement in Ohio and has a 1.2GW renewable RFP in Indiana emerging as a potential contributor of EPS through 2025: we see potential for half of the 1.2GW to ultimately make its way in to rate base with participation through a build-own-transfer. While Panama opportunities appear the most immediate, management remains optimistic around LNG prospects broadly with potential additional contribution from the DR in the near term; Vietnam appears a bit more protracted with COD in early 2025 (more then offsets other headwinds in this year) but management sees five cents of earnings upside from LNG in the nearer term (we believe we largely reflect this already).

Meanwhile, with the change in administration, we could see potential extensions of tax credits to help further push renewables domestically – and any extension to applying the tax credits for storage could drive further benefits. With a much greater international exposure, we see renewable subsidies as less critical for AES as they look to deploy 2-3GW annually. Look for possible additional disclosures with the full year results to include a comprehensive disclosure of earnings tied to renewables across its disparate businesses. We see this as yet another angle.

We reiterate our Buy rating ahead of key upcoming catalysts.

Allete (Not Covered)

FY20 headwinds on COVID impacts, but maintaining long-term trajectory

With C&I customer exposure, discussions focused on COVID load impacts. Although ALE has only seen ~5c EPS impact through 3Q on reduced C&I load, mgmt expects 15c impact for FY20 with 4Q impact as US Steel's Keetac and Verso Paper will be idle (Keetac restarting in Dec) coupled with broader C&I load slippage. The company expects COVID impacts to have a lingering effect into 2021. As such, EPS growth for 2020 YTD is ~4% relative to FY19 EPS, below long-term EPS guidance of 5-7%. FY20 utility growth is ~3% while Allete Clean Energy (ACE) growth was ~30%. Despite FY20 headwind, ALE maintained 5-7% long-term EPS growth off 2019 as base for CAGR, 4-5% high-visibility regulated utility earnings growth and 15%+ growth from energy infrastructure & related services.

Upcoming Feb 2021 IPR filing to focus on remaining coal retirements

Discussions also focused on early expectations into the upcoming Feb 2021 IRP filing at the Minnesota Power utility subsidiary. Mgmt expressed a focus on accelerating coal unit retirements, with 7 units already retired. Only Boswell 3 and 4 coal units are remaining without defined retirement dates. As such, mgmt expects the IRP filing to also focus on most cost effective ways to retire the two remaining coal baseload units, expressing additional T&D solar, wind, storage, DSM, and gas as all within discussions. In terms of PPA vs ratebase investments for clean energy, mgmt expressed that while low cost is a priority for regulators, ratebase may get an advantage as well given state focus on local economy benefits.

Clean Energy segment facing pressured wind development returns, akin to solar

For its ACE business segment, mgmt emphasized wind energy development competition and forward curve prices pressuring return profiles. With increasingly shorter contracted PPA tenors towards 10-15 years relative to 30-yr PPA asset life, merchant pricing curves have become more critical for the return profile. Mgmt emphasized focus on a return profile of a few 100bps spread relative to its CoC. That said, with merchant curves having declined ~20% in last 12 months, mgmt expresses a 100-150bps impact on IRRs. In terms of key markets with attractive wind development still, mgmt highlighted MISO, where it holds an advantage as a Midwest utility as well as PJM. Mgmt expressed shifting from wind development into complementary renewable energy spaces including solar and storage, including coupling these at wind sites. In particular, existing commercial customers have asked to add storage to wind projects, which helps support higher returns. Mgmt expects to provide greater details in coming quarters. We view compressing wind development returns and increasingly shorter contracted tenors expressed by mgmt as unsurprising and largely in-line with similar trends across utility-scale solar development.

Avista Corp (AVA)

Our meetings with AVA discussed a range of topics from the recently filed rate case to the ongoing wildfire investigations, M&A, and the IRP. We perceive the WA rate case request to be palatable although watch the tax credit flow-back for multi-jurisdictional approval and impacts to equity needs. On wildfires, the $135-150mn of liability insurance (not wildfire specific) should be adequate to cover any damages, although we wouldn't expect an update from the Department of Natural Resources (DNR) investigation anytime soon. With the IRP filing expected in WA in fall '21, we continue to remain somber on ownership opportunities given AVA cannot take advantage of in WA (state law) and smaller developers requiring lower rate of returns making competition a higher hurdle; Purchase Power Agreements (PPAs) would allow for the ability to earn on the payment stream. Some of the more interesting commentary came from the strategic side where mgmt. acknowledged that once it achieves *earned ROEs near authorized levels it could capitulate and noted that its current size/scale was challenging; from a consolidation standpoint mgmt. was not interested in further Gas LDC exposure, although continues to evaluate Alaskan assets. Net-net we reiterate our Neutral rating given several moving pieces and unresolved items. Our PO moves to $38 (from $35) as we mark-to-market our SOTP valuation with peer multiples on '23 EPS at 17.3x for electric (from 16.5x) and 15.5x for gas (from 13.8x).*

Some interesting M&A commentary

While mgmt. continues to remain committed to improving its earned ROE toward authorized levels, it acknowledged that once it achieves this feat it could entertain those options. We think this is likely because mgmt. feels its current P/E implies a lower earnings power than what it can eventually achieve; although given more fixer-upper type deals tend to get through the finish line, we wonder if a more substantial premium offered could get mgmt. to the table. Mgmt. also acknowledged that not having the scale is challenging because it can't spread costs over a larger customer base, and that it could look for partnership opportunities on the Social side to more align with the ESG trends. While the company was previously involved in M&A in the past through the eventually failed Hydro One deal, we wonder if more attention will come its way on this front.

What about gas LDCs or Alaska?

We perceive mgmt. continues to like its gas LDC assets given the cost considerations in the NW relative to electric despite the electrification trends. Despite some of these assets being on the market (i.e. CNP and NI both disclosing it intends to divest), mgmt. did not seem interested in gaining more exposure here. Rather, similar to meetings in the past, the company highlighted that it continues to look for opportunities in Alaska and has evaluated some of TransAlta's assets, although has yet to pull the trigger.

Puts and takes of the WA rate case filing

On the regulatory front, mgmt. recently filed its rate case in WA requesting a $44.2mn increase for electric (8.3%) and $12.8mn increase for gas (7.9%) with an overall flat increase in customer bills as it requested to accelerate the flow back of the Tax Customer Credit by 2yrs (to 10yrs) to offset the increase. Mgmt. highlighted that feedback from stakeholders has been limited so far, and it would need approval from <u>all commissioners</u> (WA, ID, and OR) for the accounting changes to flow-back tax credits. To that end, mgmt. feels confident in the request as the accounting change is an IRS acceptable method. While mgmt. would get the earnings uplift (assuming commissioners agree to this solution), there would be a cash flow impact, potentially impacting the company's equity needs in '21 (which have typically ranged from $50-70mn/yr). We also note that mgmt. has requested to recover $165mn of Advanced Meter Initiative (AMI), acknowledging it needs 100% recovery of this compared to 50-60% in the past (although has had dialogue with the commission prior to this request). Net-net, while WA has been somewhat challenging in the past we perceive the overall request as palatable yet slightly cautious.

DNR fire investigation ongoing; $135-150mn insurance

AVA continues to have an open dialogue with the Department of Natural Resources (DNR), which is currently investigating the fires where AVA's equipment was involved in early September. AVA previously disclosed that the fires were caused by extremely high winds, but to date, the company has not found any evidence that the fires were caused by any deficiencies in its equipment, maintenance activities or vegetation management practices. Although there is no statutory timeline around the DNR's investigation, mgmt. reiterated that it believes the company followed protocols and was prudent. In terms of wildfire insurance, mgmt. noted that wildfires fall under its general liability insurance coverage where AVA has total coverage of $135-150mn. We expect the wildfire associated insurance costs likely trend higher going forward, especially following this recent worse than normal fire season. We would highlight that in AVA's recently filed WA rate case, the company included an O&M tracker of $5.4mn. This O&M tracker incorporated higher insurance costs along with all the other costs embedded in O&M. Wildfires are not necessarily new to the area, and we note that AVA filed a wildfire resiliency plan prior to occurrence of these recent fires. That said, given the uncertainty around regulatory treatment as it pertains to wildfires across AVA's footprint, we believe this dynamic will add an overhang for shares in the near term.

Renewable RFPs related to IRP likely lack self-build

AVA management noted it is going to have additions related to wind, solar and additional hydro upgrades associated with its latest Integrated Resource Plan (IRP). However, we think most of these will be PPAs rather than self-build. Recall, AVA issued a renewable Request for Proposal (RFP) in June for 120 MW that did not consider self-build. In its next renewable RFP, AVA noted self-build options could be again limited highlighting that there are certain tax credits AVA cannot take advantage of in its WA jurisdiction given state law and smaller developers requiring lower rate of returns makes competition more fierce. We believe further extension of tax credits would likely further limit the ability for AVA to seek self-build options in its IRP, although we could see some hydro plant upgrade opportunities. We also note there is ability to earn on PPAs in WA through legislation recently enacted that will be based on the payment stream (rather than capital deployed) of these contracts). Look for an IRP filing in the fall of 2021 in its WA jurisdiction, although we continue to remain more somber on substantial earnings opportunities from the capacity replacement needs.

American Water Works (AWK)

Ahead of their upcoming 2021 guidance, investment, and outlook roll forward, discussions with AWK management highlighted confidence across their business and their ability to execute on their strategy through both COVID and the longer term. Despite the pandemic, latest disclosures with their 3Q update brought the midpoint of full year 2020 guidance back to the original adjusted 2020 guidance on an adjusted basis – and we see the company as poised to extend expectations another year: We don't perceive a pivot from the strategy with management seemingly committed to their growth triangle and the largely regulated portfolio: *don't expect any changes to outlook with the 4q roll forward of their 5-year outlook and '21 guide.*

Muni & Legislative Tailwinds Continue Unabated

Across the US, favorable legislation continues to materialize for the water sector with particular highlights including HB254 and HB1131 in Indiana for recovery without full rate cases and fair market value, HF2452 in Iowa to allow systems to qualify as a distressed system when they don't have a certified operator and establishing a 180 day timeline to approve acquisitions, S831 in Virginia to establish FMV and authorize a water or sewer public utility acquiring a system to establish rate base through FMV, and S551 in West Virginia to allow for expanded asset valuation, combined water and wastewater ratemaking, and the expansion of how munis can utilize proceeds from the sale of a system. Across their footprint, the company now enjoys FMV legislation in ten states, consolidated tariffs in 12, and water quality accountability legislation in three.

Despite the steep discounts in valuations between AWK and even water peers, we perceive less appetite for public water acquisitions given the constructive legislation and elevated number of muni opportunities in and of itself. We see the latest pressures put on munis from the ongoing pandemic as only further accelerating consolidation in the industry.

Meanwhile, management remains confident around their ability to execute on the pending sale of NYAW to Liberty Utilities despite a somewhat protracted process on the margin and amid the latest legislation introduced in New York to hold utilities accountable – and expectations are to close on the transaction in early 2021. Despite other regulatory setbacks such as the latest decoupling developments in California, we see management as largely committed to the rest of their regulated portfolio.

While Military Wins Continue to Materialize

Recall Joint Base San Antonio and US Military Academy at West Point became operational in June with Joint-Base Lewis-McChord further awarded in September. After the latest win, the company has now won 17 military bases across the footprint with active engagement for another four military solicitations - with two expected to be awarded in the near term. After largely being driven by the Air Force and Army, interest from the Navy could yet drive further opportunities and management alluded to potential for ~70 opportunities over the next bunch of years.

Related to home services biz, mgmt. remains confident it can scale this biz further too based principally on expanding its reach through a variety of channels including its military efforts. Bottom line, no concerns on slowing on even this angle of the biz too. Limited expansion of products it would appear. Focus on owning the customer is an expanding theme in our coverage.

Overall, management continues to look to have market-based business contribute 1-2% of their EPS growth over the current plan.

We maintain our Underperform rating given the steep valuation premium.

Black Hills Corp (BKH)

Contemplating Trajectory after Latest Updates and Prior Concerns

After an early guidance cut against the uncertainty of the pandemic, management re-raised 2020 guidance to $3.60-$3.70 (with the midpoint back to the same level as the original guidance of $3.55-$3.75) and latest discussions continued to suggest confidence around their ability to navigate COVID despite the latest surge in virus cases throughout the US. While the 2021 guidance assumes no material net impact from COVID for the year despite the latest spike, management has thus far been able to execute (even aside from some favorable weather) and we stress the large resi nature of their gas biz (~55%) as likely to limit any potential headwinds as we go in to peak heating season and with moratoriums now lifted in all of their jurisdictions except for Arkansas. Rate relief, Corriedale, and rider recovery should help drive y/y earnings into 2021.

Meanwhile, we expect disclosed equity needs to be financed through the ATM next year after the successful block acceleration in 2020, with the bulk coming through in 2Q and beyond.

While FERC recently approved the Wygen PPA after a rather protracted process - helping to de-risk longer dated estimates - and the company scored a political win in Pueblo earlier this year, we critically watch prospects for higher rate base and add'l recovery mechanisms against lower potential ROEs - and if the overwhelming franchise vote at CO electric and the new aligned leadership strategy can translate to a more constructive outcome with their re-filed rate case in the state. Recall the company opted to forego consolidation after earlier pushback and re-filed a new rate review and separate docket for an integrity rider in September. While there is potential to combine the two, we ultimately expect both processes to play out over 9-10 months, putting resolution at the middle of next year (no procedural docket has been established around the outstanding items). Meanwhile, we have less concern around NE following the recent constructive settlement and hearing.

With a relatively depressed currency and given the more complicated portfolio vs. SMID-peers, we wouldn't expect the company to be too active around M&A – but we nonetheless highlight the overlap in the Arkansas jurisdiction for CNP's LDC assets given their recently noted desire to divest some of their gas assets.

Will Renewables Materialize in Rate Base with Scale?

Under the current status quo, management doesn't anticipate being a cash tax payer until 2027 or 2028. While seemingly less likely under a split government, a partial reversal of tax reform could somewhat expedite this process – accelerating any appetite for renewables. We see further extension of tax credits as more likely under current government composition expectations. Recall the latest previously announced 200MW of renewables in Colorado is being done through a PPA, but management remains confident in ability to participate in more renewables in the future. We await further developments around transition to cleaner sources following the recently released sustainability report and amid CO's (& other states outside BKH's jurisdictions) recent moves to look into gas utilities' role in de-carbonization.

Overall, we see risk/reward as balanced. Maintain Neutral.

CMS Energy (CMS)

Clear-cut confidence on positioning into '21 with reinvestment de-risking in 4Q
Mgmt emphasized strong confidence in FY20 earnings, in particular with more than substantial earnings cushion from ~$100mn cost savings (~28c) realized through 3Q, well above prior historic record of 15c cost saving EPS offset. Rather, discussions focused on ability to drive reinvestment pull-ahead spend in 4Q to de-risk '21. Further, FY21 earnings are not impacted by any pending regulatory outcomes following the upcoming Dec '20 electric order that will be in effect Jan 2021 and with the latest gas case settled with a filing stay-out through Dec '21. Mgmt expressed optimism for FY21 trajectory given leeway to manage negative weather and without full extent of COVID load impacts, with its guidance of $2.82-$2.86, *reflecting long term EPS CAGR of 6-8%*, typically rebasing off year-end results. We continue to view CMS mgmt's best-in-class ability to manage earnings, even in a pandemic-impacted year without decoupling, as underscoring confidence in shares and the forward trajectory. Reiterate Buy.

Cost savings sustained into '21+ with focus driving rate headroom as well
With cost savings materialized through FY20, mgmt emphasizes roughly half of savings is driven by the CE Way, focused on waste elimination (~$50mn), which is fully recurring savings. Additionally leveraging O&M resources during outages or when not being used for full capacity and applying it to capital projects provided another ~$20mn of savings. Additionally, non-operating savings through refinancing further provided cost savings among others. Among other cost levers highlighted include leaner supply chain and remote work by employees expected to continue to an extent post-COVID as well. Overall, mgmt emphasized sustainable cost reduction and management systems, supporting customer bill head-room to continue supporting incremental investments, with support from MPSC in proceedings around capex spend proposed. Bottom-line, mgmt emphasized O&M cost reductions as still merely scratching the surface, expecting to continue ~4% run-rate annual cost reductions.

Incremental to the broader O&M cost reduction trajectory, mgmt emphasized further ability to drive headroom through costs with ~$150mn in cost savings from the roll-off of Palisades PPA (~$90mn) along with MCV PPA expiration in 2025 (based expected extension through 2030 at lower capacity price). Additionally, mgmt expects ~$30mn O&M savings from retirements of Karn 1 and 2, among other opportunities.

IRP filing in 2Q21 to focus on acceleration in coal retirements, renewables
With its upcoming IRP filing in 2Q21, discussions express likely focus on accelerating coal retirements with Campbell 1 and 2 scheduled for 2031 and Campbell 3 scheduled for 2039 given latest state emission targets set could drive incremental renewables spend. In terms of replacing capacity with accelerated retirements, mgmt expressed IRP filing to focus upon incremental renewables beyond 6GW of solar through 2030 already approved in the last IRP as well as on battery energy storage deployment, and demand-side management. Although CMS is only required to file an IRP every 5 years, mgmt expressed a preference in filing more frequently with a voluntarily submission every 3 years, given the clarity provided from tri-annual IRP filing cycles around capital spend around resource planning. Additionally, CMS expects to propose a higher level of earning on the PPA adder towards S&P's methodology rather than weighted average cost of capital. With an IRP approval in Jun '22, we could potentially see an update for the 10-Yr capital outlook in 3Q22, albeit mgmt noting such an update requires material change.

Strategically – don't expect *anything*
With DTE pursuing a substantially back to basics effort, it appears CMS is very much set on status quo. Having achieved an excellent risk rating already despite ownership of an IPP gas asset and a bank, we see no rating agency 'upside'. Focus remains on staying the course with additional spend likely to backstop its outlook by early next year.

Dominion Energy (D)

We had a generally constructive meeting with D mgmt. where the company exuded confidence in its offshore wind permitting timeline (~27 months vs Orsted at 30 months), cost and capital expenditure timeline ($1bn in '22/23 with more substantial chunk in '24-26. Given a large part of this spending initiative will be included in mgmt.'s roll-fwd outlook on the 4Q call, we could see potential upside to VA rate base growth of 7-8% (at a min reinforcing confidence in this trajectory). Related, mgmt. remains adamant that its 6.5% annual EPS growth will indeed be consistent despite the potential lumpiness of its forthcoming Offshore build – managing other elements including cost structure through their in-service to smooth trajectory. While we do not anticipate a fully defined 10yr capex outlook, we expect mgmt. to provide some parameters on how to think about spending into the 2H of that 5yr window. Moreover, we see tailwinds to the '21 guidance range given execution of the share repurchase program and '20 tracking at the high-end of the range.

Additionally, we wouldn't expect further sell down of Cove Point LNG, despite some peers looking to go this route and interest from private capital as mgmt. likes its current 50% passive stake after executing on sales previously. Lastly, we highlight that the S.C. rate case is likely to be noisy with intervenor testimony this week where we could see recommendations for sub-9% ROEs; while this rate case remains critical to watch, mgmt. continues to bake in conservative assumptions in its outlook. Net-net, we maintain our Neutral rating as shares appear fairly valued at these levels based on our SOTP analysis.

Offshore wind angles: confidence continues

Mgmt. continues to highlight confidence in its offshore wind permitting process with a Construction of Operation Plan (COP) expected to be filed shortly with a Bureau of Ocean Management (BOEM) filing thereafter with total timeline of roughly 27 months. (~24months for the BOEM permit). Further, despite challenges faced by projects in the NE, mgmt. continues to highlight commercial shipping, fishing, environmentalist (whale migration from Nov-March), and coast guards shouldn't provide much as an impediment given the engagement with these stakeholders and project in federal waters. In terms of capex, mgmt. expects roughly $1bn of spend between late '22/23 with the more substantial chunk to occur in years '24-26 (we currently assume $5.9bn total from '22-25). On the cost front, mgmt. continues to point to slightly less than ~3% annual bill inflation, and we stress that potential for offshore wind tax credit extensions could further help with the customer bill impact. At the end of the day, we view the permitting timeline as generally in-line with Orsted (D's 3 months tighter slightly) with cost considerations largely manageable as best we can tell at this point.

What to expect on the 4Q call update?

With mgmt.'s upcoming 4Q call we expect to get the roll-forward view of the outlook ro years 2021-2025 as well as capex by year and by program (i.e. offshore wind, battery storage, solar, transmission, nuclear relicensing, S.C. spend, gas pipeline replacement, etc.) In addition, we expect to see rate base growth (potentially annually but more likely a CAGR). While we do not anticipate a fully defined 10yr capex outlook, we expect mgmt. to provide some parameters on how to think about spending into the 2H of that 5yr window. Given a large chunk of offshore wind will be included in this capex outlook, we could see potential upside to rate base growth in VA (vs. guidance of 7-8%).

Where is 2021 guidance shaping? Positive tailwinds

While '21 guidance is expected to equate to 10-11% growth, we could see some slight tailwinds to the $3.85-3.90 guidance with 2020 trending toward the top-end of guidance ($3.37-$3.63). Further given the weighted average price of the share repurchase program for the $2.1bn executed upon was done at the $77-79 range with the remaining amount likely at higher levels (shares currently trading near $85/sh), this could also create a modest tailwind. We would expect to see a clean share count from '21 going forward as buybacks are in the rear-view. Lastly, mgmt. expects to grow at 6.5% annually thereafter despite some lumpiness with capex more back half weighted through

O&M levers to help smooth out the growth trajectory. We think this would be viewed constructively similar to many of D's more aspirational peers (i.e. WEC, CMS, AEE, etc.).

Watching South Carolina: expecting some noise ahead

With the single digit rate increase requested (7.75%) in South Carolina, we perceive the case to be palatable, albeit political considerations are likely to come in the mix given the first rate request since D purchased SCANA. We would not be surprised to see a sub 9% ROE in upcoming Staff/Intervenor testimony (potentially 53% recommended cap structure) given the more consumer friendly Office of Regulatory Staff (ORS) and emotional connection from past nuclear transgressions in the state. That said, mgmt. sees a relatively straightforward case with $3bn of grid hardening related investments, equating to just 1% annualized bill inflation and continues to remain conservative in its guidance assumptions. We stress D is on track to earn low 8% ROEs this year. We also expect mgmt. to provide a full update in its SC spending on the 4Q call despite the rate case process ongoing as it has already filed its IRP in the state and continues to see grid hardening needs.

Federal renewable procurement: early, but nice exposure

Following recent Presidential elections, one potential avenue that we perceive could be a tailwind for D is through federal procurement of renewables (i.e. the President mandating federal buildings to procure renewable generation). Given D's close proximity to these buildings in VA, this could present a potential opportunity. While mgmt. highlighted it is still too early to quantify the impact, it highlighted that 10% of its sales are from government entities and continues to have conversations with its federal customers.

Evergy Inc. (EVRG)

Following recent media reports that EVRG once again rebuffed NEE's offer, mgmt. pointed out the statement in response to Elliott, highlighting that it evaluated the stand-alone plan (STP) and elected to go that route with the activist at that time. Mgmt. went further to say that it doesn't believe they are fairly valued and there is no process going on or offers in front of them. Instead, most of our meetings focused on the stand-alone plan where mgmt. discussed potential securitization with legislation in Jan., an IRP filing in April and July for MO and KS, respectively, that will provide a parallel path with the legislation, and how it intends to execute on renewable ownership, and earning its allowed ROEs while combating rate inflation in order to execute against the 6-8% growth targets. While we note the confidence from mgmt. in its ability to execute against its own targets, we wonder whether the ~13% implied premium (from the $15bn reported offer) relative to EVRG's current stock price (or ~18.8x P/E multiple) can be achieved on a stand-alone basis. Transitioning to a new CEO (internal?) by YE could potentially lead to capitulation. Still we see stand-alone prospects as attractive at current levels and look for more tangible data points in early Jan. with the MO response to the STP on 1/29 (pushed from 11/13) and securitization progress, although do acknowledge potential downside to our estimates in '21/22 to reflect lag dynamics. Maintain Buy on shares.

Securitization process marching forward

Mgmt. continues to expect securitization bill to be filed in early Jan., putting it on a parallel path with its IRP filings in MO and KS (April 1 and July 1, respectively) where the company intends to provide a path w/ and w/o securitization. Given the engaged stakeholder process with other key players in the state, including AEE, the NRDC, Sierra Club, and Staff, commissioners we continue to see momentum on this front.

Targeting 500MW of retirement w/ potential for more through securitization

In the IRP, mgmt. will likely target 500MW of coal to retire that has a modest remaining un-amortized balance that would have minimal financial impact through the loss of rate base earnings. We believe this could be La Cygne given it fits that profile. With securitization mgmt. could accelerate retirements over the next 10 years that would normally be slated for retirement in the 2030-2040 timeframe. Mgmt. further highlighted that maintenance spend for these plants are below depreciation rates so it continues to work down the life of these assets. Given the potential cost savings from these retirements and the reinvestment of proceeds into rate base renewables (700MW expected with IRP) this would likely alleviate any material earnings divot.

Rate case considerations: expect some lag in ‘21/22

While mgmt. expects to file a rate case in 2022 and 2023 for MO and KS, respectively, earning its authorized ROE in the interim through cost savings, we would expect some lag to build in ’21 and 22 in MO and KS prior to the filings. Additionally, given EVRG does not have a rider for the contemplated renewables, it wouldn’t be able to earn on these assets until placed in rates in ‘23/24. While our initial assumptions were that mgmt. could execute on cost savings into the rate case, we believe there could be some additional lag ahead of the ~40bps we assume for Evergy Metro, ~50bps in MO west, and ~75bps in KS Central (we had earlier thought cost synergies from the closed Westar integration could well minimize lag vs historical levels). That said, we appreciate that there is a delicate balance here and perceive this as a trade-off to ensure more constructive regulatory treatment. On balance, we see strategic updates including CEO role as key over next few months *prior* to 4Q.

Cadence of updates: 4Q expectations

While mgmt. provided capex and O&M trajectory updates at an unusual time in the past given the activist involvement, we expect 4Q will be back to the ‘regularly scheduled program’. Look for a 5yr capex program to coordinate with the IRPs but <u>not</u> necessarily a roll forward of the 6-8% EPS growth rate. This will be perceived awkwardly potentially – a new CEO remains critical to providing the latest view forward.

Fortis (FTS)

Can Upside Materialize after Latest Roll Forward?

Latest discussions with management followed the recent roll forward at their Fall update when the company laid out a $19.6Bn investment plan over the next five years, translating to a slightly lower ~6% rate base CAGR (vs. ~7% previously through ’24) – and as the company continues to await key regulatory updates. Commentary suggested confidence in the positioning of the company under the incoming administration, particularly given efforts around clean energy and with AZ in a prime position to capitalize on the renewable push. The company has highlighted an opportunity of $4-$6Bn at UNS from the 2020 TEP IRP while we perceive the ~6% rate base growth at ITC as potentially conservative under a Biden administration if some of his clean energy policies are able to materialize (with a small amount of associated transmission interconnection in the plan). We await further details around large-scale transmission opportunities beyond reaffirming its longer-term aspirations. Meanwhile, we view any pursuit of contract renewables to be more nimble on the margin as opposed to a larger focus area as the company is now largely T&D.

Risk from Reg Agenda Still Lingers

Management continues to anticipate a final decision in the outstanding TEP rate case in late 2020 and is awaiting next steps from FERC’s notice of proposed rulemaking on incentives. With latest results weighed down by the regulatory lag as we await new rates in AZ, this remains the key data point to watch into elections and the end of the year. We continue to perceive confidence from management around a resolution in the TEP rate case for new rates to be ready to take effect in January. Recall the company’s last ask was a 10% ROE (vs. 9.75% currently) compared to staff at a recommendation of 9.28% - with a further bump from the Fair Value Increment Adjustment. While we see downward bias to the current 9.75%, favorable weather has provided some further relief more recently given changing weather patterns in AZ - and we assume this could continue going forward.

While earlier action from FERC around methodology for establishing base ROEs helped de-risk returns at ITC, the future of just what the all-in returns for the biz will be are still unclear with a NOPR on incentives still outstanding. With the latest ruling, FTS's all in ROE at ITC is currently 10.77% – with the 10.02% base, 50bps for RTO participation and a 25bp independence adder. The initial NOPR contemplates a potential elimination of their independence adder – while boosting RTO participation an additional 50bp. If ultimately adopted, we see a 25bp net benefit under new incentives not currently reflected in estimates. It remains to be seen what the future of FERC just may look like under a Biden administration.

In New York, the company filed a rate case in August 2020 with the NYPSC requesting an electric rate increase of US$33 million and gas delivery rate increase of US$14 million, with a decision expected in mid-2021. Given the scrutiny in the state as of late and the recent efforts by Cuomo to hold utilities more accountable, we could yet see pressure here.

Meanwhile, the Alberta Utility Commission issued a decision in November 2020 rescinding the September 2019 order with Fortis Alberta retaining ~$400 million in transmission investments in rate base.

We reiterate our Underperform rating, seeing regulatory risk and a lack of clear cut EPS trajectory as underappreciated at the current valuation.

IDACORP (IDA)

Ratebase Growth – Robust upside opportunities ahead drives confidence

Discussions emphasized robust rate base growth with upside opportunities not included within IDA's current 5-Yr forecast including Hells Canyon re-licensing, increasing ownership of the Boardman-to-Hemingway (B2H) transmission line, and additional distribution system modernization. Additionally, mgmt emphasized that its strong balance sheet should limit any equity needs. Recall the potential for Idaho Power to acquire Bonneville Power Administration's ownership share – which would result in Idaho Power owning up to 45% of the transmission line with a normal return on the capital investment.

Mgmt expressed that they will continue to evaluate whether or not to file for a ratecase annually after having stayed out since 2011. That said, with potential for a meaningful increase in spend within a couple of years as highlighted, we see a rate case as more likely than not over the next couple of years despite the strong growth.

Overall, we remain constructive about further future rate base upside and see IDA as well positioned to execute on their NT plan. We probability-weight rate base upside opportunities from Hells Canyon relicensing and B2H ownership expansion at 75% and 50%, respectively. Reiterate Buy.

Customer load growth trends – remains elevated at 2.6% TTM

Mgmt noted load growth into Idaho from other states with increasing population due to work-from-home flexibility. In terms of customer growth trends, resi remains elevated (+3%) as with most utilities given work-from-home. Agriculture/irrigation load has been stronger this year (+1%), but mostly as a result of a return to normalized weather (colder and weather in prior years). That said, smaller commercial load has been hit harder, while large C&I load was hit earlier but has largely returned. Nonetheless, we stress overall load growth trends of 2.6% TTM even against the pandemic backdrop.

NiSource (NI)

We came away from our NI meeting with increased confidence that mgmt. is evaluating potential portfolio optimization options (i.e. Gas LDC sales) to replace a portion (or all) of the planned equity/equity-linked financing behind its renewables strategy (this remains a key debate after earlier stating it was a prospect at its Analyst Day and holding back on affirming this intention in recent weeks at it 3Q call). However, it is clear to us mgmt. does not believe the discount where Gas LDCs are currently trading is warranted. Additionally, NiSource is not in a rush to get a deal done as the company indicated its equity-linked hybrids issuance (the first portion of its renewable strategy equity financing) can be anytime in 2021. We continue to view the divestiture route as quite attractive for the NI narrative along with the broader Gas LDC subsector. We believe any M&A in the depressed subsector likely brings a re-rating higher for both NI shares and the group. We reiterate our Buy rating as we believe NI shares continue to present a unique opportunity on the wide relative discount in Gas LDCs with M&A optionality, renewables upside in rate base, and potential for positive revisions.

Portfolio optimization still an option – potential smaller Gas LDC sales in focus
Considering mgmt. commentary regarding portfolio optimization to maximize shareholder value, we think it is apparent mgmt. is looking closely at potential asset sales such as it smaller Gas LDCs in lieu of some (or all) of the equity financing behind its renewable strategy. With a sale of any Gas LDC, NI would effectively be replacing gas rate base with renewable electric rate base. Mgmt. does not agree with where Gas LDCs are currently trading (~3x discount vs electric utilities) highlighting that electrification cannot replace gas particularly in the colder climates. We continue to argue that a sale of a Gas LDC could drive the group (and specifically NI) to re-rate higher and drive a material inflection in shares. We perceive unique sensitivity for the wider sector to any M&A. Also, even excluding a potential asset sale, we flag that with NI shares now at ~$25/share, each move higher only implies less dilution in the out years, assuming it can hold these levels into next year and '22.

On the flip side, we note mgmt. affirmed during our meeting that all its Gas LDCs are earning close/at their authorized ROEs (as mentioned on the EPS call last week) – likely screening less attractive for potential buyers. Just in the last week, CNP announced its Gas LDCs are up for sale and the asset sales are baked into its financing plan. We note this is quite different from NI financing strategy, which does not include any asset sales. With the timing of NI's equity-linked hybrids issuance slated for anytime in '21, the company has a wide window of time to get a deal done (likely wider than CNP) to offset some of this financing. Note in our recent NI upgrade, our theoretical scenario analysis indicated that a potential asset sale of NI's three smaller Gas LDCs (VA, KY & MD) could offset most of the renewable equity financing in a likely accretive manner.

Renewables financing: equity-linked hybrid options with 50% equity treatment
Excluding any potential asset sale, more than half ($600-1,000mn) of NI's $1.2bn equity financing of the renewable strategy will be comprised of equity-linked hybrid securities. NiSource reiterated that the primary requirement of these equity-linked hybrids is that the company receives at least 50% equity treatment by the credit rating agencies. Mgmt. outlined that the two main types of securities under consideration at this juncture include: 1) mandatory convertibles, and 2) perpetual preferreds.

Equity-linked Hybrids: Mandatory Converts vs Perpetual Preferreds

NI noted that mandatory converts would look similar to the securities recently issued by Dominion. When assessing a utility's debt metrics, Moody's treats mandatory converts as 50% equity pre-conversion while S&P treats mandatory converts as 100% equity. For perpetual preferreds, the credit rating agencies all use 50% equity treatment. NI has issued perpetual preferreds before at 6.5% and 5.65%, but mgmt. believes it could price perpetual preferreds today at ~200bps lower rates. While perpetual preferreds obviously have greater earnings drag and lack tax deductibility, NI believes the benefit of avoided equity dilution outweigh the income statement friendly mandatory converts. Meanwhile, NI will also have to assess the balance sheet implications when looking at the more favorable equity treatment under the mandatory converts. That said, we believe it is still early stages to make a decision here on the hybrid equity financing strategy considering that any portfolio optimization and the stock price in the interim can influence subsequent decisions.

7-9% EPS growth ('21-'24) with or without the -5c COVID impact in '21(base yr)
Mgmt. noted that that the base year (2021) of the +7-9% EPS CAGR (2021-2024) may include or exclude the -5c COVID EPS impact baked into the mid-point of 2021 EPS guidance of $1.28-1.36. This indicates that the mid-point or roughly the high-end of the guidance range can be used as the base year for the +7-9% EPS CAGR, effectively implying a wider range of EPS outcomes in the out years.

How does guidance commentary reconcile with our EPS CAGRs?
We model 2021 EPS (base year) at $1.32 (the midpoint of guidance including -5c COVID impact). Off of our 2021 EPS estimate at the midpoint of guidance, our implied EPS CAGR ('21-'24) is 10.3%, which is above NI's +7-9% EPS CAGR. However, when the -5c of COVID impact is added back to our base year estimate of $1.32, our implied '21-'24 EPS CAGR is 8.9%, which lands inside NI's +7-9% EPS CAGR. Bottom line, while mgmt. color around the LT EPS CAGR points to a wider perceived range, we believe there is a clear bias to the upside of the range given the conservatism baked into the base year guidance range. Pending execution this winter heating season, this provides potential for positive estimate revisions.

Northwestern Energy (NWE)

2021 Shy of Street but Add'l Spend on the Way

Ahead of upcoming EEI meetings, NWE reaffirmed full year 2020 EPS of $3.30-$3.45 while launching 2021 guidance of $3.40-$3.60. The initial 2021 guidance came in line with our model, but below Street estimates of $3.60 – with the midpoints of '20 and '21 implying 4% growth y/y. Drivers include 1% volumetric growth and less of an impact from COVID, with O&M largely flattish y/y. We perceive the hope from management is to tighten the range in February when we have a bit more clarity around COVID implications and how the pandemic recovery plays out over the next couple of months. Given the fluidity of the pandemic backdrop and latest spike in cases, it remains to be seen how even 4Q will shape up: recall latest load expectations factored into full year guide are +2% resi, -4% commercial, and -9% industrial. Meanwhile, we estimate another nickel at risk if the company isn't able to get a constructive outcome around COVID expense recovery. Look for an outcome in the next month or so.

With the latest update, the company also refined and rolled forward its capex forecast, adding $317Mn through '24 and an initial investment wedge of $400Mn in 2025: we estimate about ~80% of capital is T&D driven as we await clarity around potential generation spend in MT and given what we expect to be some repairs tax eligible spend, we see downward pressure to the tax rate relative to that previously communicated for 2023. Look for more clarity with full year results.

The company continues to target a 3-6% EPS growth over time after latest messaging on the 3Q call: discussions from our meeting clarified expectations for it to be somewhat lumpy with earnings on the lower end without rate relief, and rate cases to provide support to the 4-5% level. We suspect a constructive outcome around generation efforts in MT as necessary to achieve the top end of the range.

Are Cost Cuts Sustainable & Contemplating Equity Needs

We see less concern on the margin around using 2020 as a test year given what is seemingly more sustainability around the cost cuts than feared. That said, we still see a pre-approval filing as more likely if the company is ultimately able to win some generation in Montana. A firm decision around a rate case will likely be communicated with 1Q21 results.

Meanwhile, we await clarity around timing and magnitude of equity needs which we think is likely to come in February after resolution of the ongoing MT RFP. Overall, management continues to allude to the ~14% FFO/Debt threshold to keep credit metrics intact. While outcomes in MT have been more constructive over the years, we stress the Colstrip challenges and PCAM developments more recently as more concerning – and critically wait to see how the regulatory dynamics change under latest commission developments.

We maintain our Underperform rating on shares, stressing limited growth prospects without rate relief and meaningful generation spend longer term.

OGE Energy (OGE)

Following the recent 3Q update last week where OGE lowered FY20 consolidated EPS guidance to $2.00-2.06 (from $2.08-2.18) due to milder weather (-0.09 EPS impact YTD), our EEI meeting was centered mostly on strategy and the moving pieces into '21. Mgmt. continues to provide no comment on any strategic action as it relates to ENBL. We expect an update on ENBL at CNP's Analyst Day on December 7th with OGE now aligned with CNP in terms of strategic decisions at the shared Midstream entity. We flag that excluding the weather impact YTD (i.e. adding the 9c weather impact back to new guide), this implies 2021 consolidated EPS is roughly $2.16 +/- 3c at the high and low end, potentially indicating slight downside to consensus. Perhaps more importantly, mgmt. remains committed to its organic growth profile with Gas LDCs not very high on its list and do not screen well from an ESG standpoint. We maintain our Buy rating as we think OGE continues to present one of the only stocks we cover with such a pristine balance sheet (22% 2020E FFO/debt) where we can apply a 1x discount vs peers, and still arrive at such substantial upside in our SOTP.

+4-6% growth off '19 normalized EPS implies 2021EPS of ~$2.16 (cons = $2.21)
During the meeting, mgmt. reiterated that weather normalized 2019 EPS at OGE utility of $1.65 should be used as the base year for OGE's LT EPS CAGR guidance of +4-6%. Assuming midstream (ENBL) EPS in 2021 is flat y/y at the midpoint of 2020 midstream EPS guidance of $0.32-0.36 and HoldCo 2021 EPS is flat y/y at breakeven, this implies 2021 consolidated EPS is roughly $2.16 +/- 3c at the high and low end. Hence, we suspect there may be more negative estimates revisions to come given 2021 consensus EPS is currently at $2.21 and OGE's long history of providing relatively conservative guidance. We expect OGE to provide 2021 guidance alongside its 4Q update in early 2021 per typical reporting cadence. Note in 3Q, OGE reduced O&M by $20mn to offset load impacts from COVID and milder summer weather. Most of this O&M reduction will carry through into 2021 providing operating leverage tailwind into next year. However, this will be partially offset by some deferred costs that that OGE pushed out, but will have to eventually incur. Bottom line, despite potential negative revisions on the margin, we continue to expect solid execution at the utility into next year as OGE notes it is seeing improvement in its service area economy in terms of load and remains disciplined on costs.

Focus is on electric: Gas LDC M&A seems unlikely
With a number of utilities looking to monetize their gas LDCs and considering OGE's balance sheet strength, it would seem OGE could be a potential acquirer as the company was previously in the gas distribution business and some of the assets for sale are adjacent to its service territory. There is also the question of whether a Gas LDC sale at CNP would be tied into a strategic action with ENBL at OGE and CNP. Recall, Bloomberg Headlines recently stated that OGE is joining CNP in putting its ENBL stake up for sale. While mgmt. emphasized that it would never say never, the company noted its focus is on the electric business and gas LDCs would not be high on their list of potential acquisition targets. Additionally, mgmt. highlighted that Gas LDCs do not screen well

from a de-carbonization standpoint – a key consideration now at OGE. We would highlight the Gas utilities continue to trade at record-wide discounts to electric utilities. Recall, CNP stated outright on the 3Q call, that it is putting the company's gas LDCs up for sale. NI has also noted it would consider portfolio optimization via the monetization of smaller Gas LDCs to replace a portion of its equity financing of the renewables.

Renewables: Favor solar over wind – 2021 IRP filing likely includes renewables
As OGE looks to build new generation while also off-setting its carbon footprint, mgmt. noted it prefers to build solar over wind. To date, the company has built four solar farms to date and is adding a fifth in 2021, including its first in Arkansas. While OGE recognizes it needs to align with de-carbonization trends, mgmt. made clear it wants to balance this with keeping its rates at the lowest vs peers across the nation. We perceive OGE's upcoming 2021 IRP likely lends its self to more renewable generation, specifically solar, providing potential incremental capex opportunities. In the past, OGE has noted it prefers solar due to higher capacity factors and the company already has a tracker for solar. We will keep our eye out for stakeholder discussions around the upcoming IRP filing.

Public Service Enterprise Group (PEG)

We remain confident on PEG's power pivot with prospects of capturing the ESG premium (admittedly not yet seen in shares) with the divestment of its non-nuclear power business by YE-2021 in addition to a shift out of coal to be finalized by July '21 with Bridgeport Harbor's closure. While investors may voice concerns on the nuclear side (particularly given recent scrutiny of nuclear subsidies in IL and OH), we see some possibility around lower ZEC pricing but overall perceive a different regulatory backdrop in NJ, along with clear necessity for supporting clean energy targets. With election-related uncertainty largely set to the side for now, mgmt will likely make an announcement on its involvement in Orsted's 1100 MW Ocean Wind project (we anticipate a 25% equity stake). It appears that NJ Senate regulators have resolved disagreements with Orsted around economic benefits to NJ communities. At the utilities, the remaining $1bn CEF (AMI, EV, ES) will be the focus with resolutions by end of Q1 (AMI may come slightly earlier of the three). Longer term, we see potential for capex at the utilities driven by infrastructure improvements to spur NJ's economy. Maintain Buy.

Power asset sales & ESG premium

Mgmt expects to start marketing its non-nuclear assets later this year with a deal targeted by YE-2021. While not seen just yet, we continue to perceive this as a re-rating opportunity from an ESG angle. The exit from coal by July 2021 should also help benefit ESG ratings. We further highlight the benefit from improvement in FFO/debt metrics from the current ~20%; mgmt has been in multiple discussions with the rating agencies and feel comfortable in their estimates. The question will be valuation; while PEG has noted meaningful investor interest in the assets, we note the historical trend of declining transaction multiples (albeit admittedly few in recent years for comparison purposes). Separately, we note the possibility of PEG considering sale of the nuclear plants, as well, if insufficient regulatory support is received for the assets.

Offshore decision to come by end of November

PEG expects to reach a decision on a potential ~25% equity stake in Orsted's Ocean Wind project by the end of the month, with the election trajectory adding more certainty around the project. Recall that NJ Senate President Steve Sweeney and two other regulators had requested that the BPU suspend approval of Ocean Wind, arguing that Orsted had not delivered sufficient benefits to state and local communities. We believe that this disagreement between Orsted and regulators has since been resolved, and Orsted has enhanced their commitment; while Orsted had planned for more assembly to take place in Europe, they are now committed to shifting more of the work to NJ.

Nuclear, subsidies, and the clean energy transition

Mgmt continued to voice confidence in the need for the state to consider FRR (Fixed Resource Requirement) election given the alternative of paying twice for capacity under a MOPR construct in the PJM market, if offshore wind enters the mix. However, we note that given the critical role of offshore wind, any FRR election would be on a longer dated timeline (with offshore wind COD ~2025). Mgmt stated they would assume any FRR would be at least for a five-year period, for planning purposes. The further question will be whether the FERC changes/adds seats under a Biden administration and consequently makes FRR considerations less necessary. Meanwhile, the NJ BPU expects to make a final decision on ZECs in April '21; we see a range of outcomes possible between $0/MWh and $10/MWh vs. the prior round which only offered a binary outcome.

Utilities: CEF and other capex opportunities

Mgmt remains focused on the remaining $1bn CEF ($600mn AMI, $300mn EV, $100mn ES) and expects resolution by end of Q1 (AMI could come sooner, however – even by year-end, albeit likely more early '21, in our view). Longer term, we see potential for capex from infrastructure improvements in order to stimulate job growth given the state's economic circumstances. Gas distribution has potential to grow further.

PNM Resources (PNM)

Our meeting focused on the anticipated AGR/PNM merger including renewable prospects and transaction risks as well as latest NM political developments such as the ballot initiative. While PNM has never owned any wind and only has some small solar projects in rate base, their ability to own future renewable generation remains a critical question and likely a key strategy for AGR. Non-PPA renewables will be a key focus in NM and TX given limited presence of AGR at present. While we see room to expand further particularly in New Mexico, the question in our view will be whether AGR will be able to successfully navigate the RFP process in the state as PNM was recently rebuffed on its efforts to pursue ratebase investments. Key considerations for the RFP process going forward will likely be reliability (likely a greater issue now following San Juan) and cost. AGR should have a cost-of-capital advantage in addition to their expertise in development with likely lower costs. We also note opportunities for export out of New Mexico, which AGR would be in a better position to do. We note a number of regulatory hurdles including NMPRC (8-14 mo), PUCT (6-8 mo), FERC (3-6 mo), Hart-Scott Rodino (1 mo), CFIUS (3 mo), FCC (1 mo), and NRC (6-8 mo). Given a cash deal, the risk is the lack of a breakup fee for PNM in the event of a shareholder vote rejection (although a breakup fee would apply in certain other circumstances).

PinnacleWest (PNW)

We continue to view PNW as facing elevated risks associated with its pending rate case. That said it has been taking efforts to minimize the impact of the outcome. The recently-filed rebuttal testimony's inclusion of an Advanced Energy Mechanism (AEM) rider addresses questions about recovery of a significant portion of 2021-22 capex, though stakeholder and staff support for inclusion remains uncertain and in our view affects prospects for a subsequent case filing. We note the bundling of multiple revenue recoveries at once (including an economic angle to soften impacts to native communities) as particularly key to gaining support of the commission. Approval of renewables rider and recovery of environmental spend is tied to economic support to these regions. When coupled with potential for further O&M (expecting flat) into '21, this could help minimize our real lag concerns heading into next year.

While the AZ commission election points to a 3-2 Republican majority, we acknowledge uncertainty about rate case outcome persists while recent amendments to Energy Rules have largely clarified the outlook from a state policy perspective. If anything emerging anew is a (concern) around retail competition. We see this as having limited traction, but perceive this could once more gain some attention to little outcome (given the colorful, and cautious history in Western US). Maintain Underperform on PNW.

Coal commitment added in concert with AEM rider mechanism

Rebuttal testimony include a proposal for the AEM, a rider which would allow for concurrent recovery of renewable energy investments while also consolidating the existing Demand Side Management Adjustment, Renewable Energy Standard, and Lost Fixed Cost Recovery mechanisms. Among the key nuances with the proposal for the rider is the expectation for the case process to proceed to a fully litigated outcome – the previous AZ Sun renewable rider serves as a template for the new proposal, however that rider was included as part of a settlement. We think that were the AEM to not be included in the final order, the timing of the *subsequent* filing could be moved up in order to speed recovery of $600m of clean generation spend included in the 2021 spending plan. PNW is framing the inclusion of a further proposal for the Four Corners Coal Community Transition as working in concert with its AEM, with $100m in commitments to support the Navajo Nation economy impacted by the scheduled retirement of the Four Corners facility. With the inclusion of financial support for the key Native American stakeholder groups in the state, mgmt. expressed confidence in garnering support for its AEM rider along with the scrubber recovery which remains a significant portion of the rate case revenue requirement ask. We note that at this stage of the rate case process it remains unclear whether staff will support additions of these mechanisms (or whether a petition outside of the case process may be needed).

Election outcome sees Republican majority intact at 3-2

The incoming Democrat commissioner Anna Tovar received the largest individual share of votes, potentially driven by name recognition having served as mayor of Tolleson. Incumbent Rep commissioner Lea Marquez Peterson recently supported an amendment to state energy rules that calls for a transition to zero carbon – this aligns with PNW's own decarbonization goals and is a key nuance relative to the other proposals which would have required a 100% renewable goal, and overall supportive of PNW's goal to include Palo Verde as an ongoing component of its generation fleet. The third elected commissioner is Republican Jim O'Connor who waged a successful write in campaign – while his specific policy leanings remain uncertain we perceive some likelihood of alignment with Commissioner Olson. While Olson's position as in line for the title of chair suggests that the topic of retail competition may receive renewed attention in the coming months with the potential for additional proposals and workshops, we note that support among the other three commissioners is unclear given lack of majority support from the current bench (and we perceive incoming Dem Tovar is not a natural ally). Mgmt additionally noted the closing of the rate tool docket as an indicator that the relationship with the commission is improving – we look to the next round of testimony submitted by staff in response to the latest PNW proposals as the next key data point.

Portland General Electric (POR)

Trends Continue to Improve after Conservative Scale Back

After introducing 2019 as a base year for their 4-6% LT EPS CAGR with 3Q results, discussions with management continued to suggest confidence around the long term trajectory of the company despite the challenging year. Commentary noted robust opportunity from both in-migration and grid upgrades, and we continue to expect the remaining delta in capex after earlier cuts as likely to re-materialize over the next several months (recall $100Mn was added back to the plan with the 3Q update after a $180Mn cut between the first couple of quarters).

While management will launch 2021 guidance with full year results, both loads and the economy have been much better than expected and we suspect an expectation to get back to more normalized levels with trends across the board coming in above management's more conservative forecasts. We see the current base capex plan as translating to the lower end of the 4-6% LT CAGR with additional spend resulting from customer growth, generation, and electrification and storage opportunities longer term as driving a growth rate elevated from the low end of the range.

Although management hasn't clarified any rate case plans, we see less concern around their current equity layer after the trading loss shifted their capital structure – and management doesn't anticipate any equity needs under the current plan.

Recall POR also recently announced that it has permanently shuttered its Boardman Generating Station in Eastern Oregon's Morrow County, fulfilling the previous agreement with stakeholders in 2010 to significantly reduce air emissions from power production in Oregon by ending operations at Boardman 20 years ahead of schedule and transitioning to cleaner energy resources. Following the closing, their partial ownership in Colstrip (non-operating) is their only remaining coal exposure and we see potential to exit before 2030 given the latest developments.

Our PO moves to $48 (from $42) as we mark-to-market our SOTP valuation with peer electric utility multiples on '23 EPS at 17.3x (from 16.2x). We also lower the discount to 1x (from 2x) as wildfire risks dampen given seasonal change.

Board Review Still Pending Resolution

Meanwhile, we await developments from the ongoing Board Special Committee review of the energy trading losses and company procedures and controls related to trading. While a subsequent investigation following any outcome internally could still be initiated by the commission, we stress constructive developments from the OR PUC with deferral dockets around both COVID and wildfire related expenses.

We reiterate our Buy rating: we see a constructive setup after a challenging year given the deep discounted valuation and positive developments.

WEC Energy (WEC)

WEC's rolled-forward update focused on continued support for robust growth of its regulated electric and gas asset base, targeting ~7% growth in rate base through 2025, along with a meaningful acceleration of the Energy Infrastructure spending planned over the coming 5 years to $2.2B. While the non-regulated infrastructure segment remains the fastest growing at the company, mgmt. reiterated that it sees an EPS contribution of ~8% by 2025 and no more than 10% over the long run. Perhaps more meaningfully, mgmt. reiterated the opportunity to rate base its infra renewables as a way to offset the Point Beach PPA which is set to roll off in the early 2030s. We continue to see WEC as offering one of the more high-quality and low-volatility earnings profiles in the space, with both factors reflected in shares' meaningful premium to the rest of the sector. Maintain Underperform on WEC.

Framing the expanded Energy Infrastructure capex plan

The $2.2B targeted spend at the infrastructure business is evenly spread through the out years of 2022-25 as those years represent mostly whitespace spend. We note that while the *initial* iteration of the previous spending plan also included largely evenly-distributed investments, projects were largely pulled-forward into 2020. While mgmt. did not comment on specific projects it intends to announce, the company has consistently discussed to expended opportunity set seen in its pipeline of attractive investment opportunities of late. While investments have thus far focused on wind, we see potential latitude for adding solar or battery storage over time as well. Geographic mix has been largely focused on the Midwest US, and while an expansion to other regions is possible we do not expect significant expansion beyond WEC's existing territory (i.e. CA less likely). Mgmt continues to flag ~3% EPS contribution in 2020 with an expectation of the segment accounting for ~8% of consolidated EPS by 2025. *Bottom line, unclear precisely to what the investments in energy infra will be tied, but stress this appears a key component of overall growth objectives. We see this as a lingering uncertain element within mgmt's historically specific EPS targets. Mgmt appears to suggest earnings growth from energy infra will remain relatively consistent, albeit see capex bias as accelerated towards initial years suggesting front-end loaded growth. We bias towards seeing largely wind investments in upper Midwest, but could well shift to solar here too.*

Gas LDC business seen as a key in Upper Midwest

WEC's updated carbon reduction goal calls for 55% cuts vs 2005 baseline levels by 2025, while reaching 70% in 2030. Importantly, the updated emissions goals *do not* contemplate an early retirement of the Power the Future (PTF) assets which earn ROEs of 12.7% with 53% and 55% authorized equity capital – mgmt. continues to see these as a key part of the portfolio and among the most efficient coal generating facilities in the US, with coal assets in particular fully scrubbed. With the Wisconsin Governor's energy task force set to announce the recommendations of its climate plan soon, WEC mgmt. is confident that its plan will align well with state-level goals. The gas LDC business remains a key component of the long-term strategy given the cold weather states that make up WEC's service territory, electrification and more marginal solutions such as heat pumps are not seen as replacements for gas distribution over the intermediate term. The company continues to evaluate inorganic growth opportunities within the context of its 3 key criteria for M&A.

Sales forecast reduced at the margin, still see +1% or better through '25

The long-term sales guidance for electric and gas was reduced in the rolled forward 2021-25 forecast to 1.0-1.3% for electric and for gas, down from 1.2-1.5% previously. Mgmt highlights ongoing development in the SE Wisconsin industrial corridor as a key component underpinning its updated forecast – with $900m in targeted investment by industrials in the area growing to $1.3B in the current year. Also of note, the load growth forecast includes announced projects only and does not account for potential halo effects of second-order projects clustered around large development zones such as Foxconn. Transmission remains an opportunity for enhanced spend as well – though WEC reflects its pro-rata portion of ATC's investment profile which is tapered through 2025 – as WEC mgmt. sees potential need for additional buildout following the significant renewable generation put in service in recent years. *On balance, despite the shift in sales forecast, numerous levers persist to avoid a rate case in 2021. We see further delays of regulatory risk ensure their relative premium.*

Xcel Energy (XEL)

XEL's rolled-forward update focused on the incremental opportunities to its five-year regulated capex program which now targets $24B in investment through 2025, with the increment representing stimulus spend targeted at wind repowering and solar generation in MN. On the policy front, we see XEL as largely aligned with state-level initiatives in its key MN, WI, and CO jurisdictions. Over the long run we expect that XEL will be among the more aggressive utilities in terms of decarbonizing its gas LDC business, though mgmt. indicates that meaningful investments are expected on a 10-15 year timeframe, notable because of the northern US service territory which makes alternatives such as heat pumps difficult to scale. Maintain Neutral on XEL.

Election impacts in MN and NM; tax credit angle for further renewables

At the state level, MN's local elections resulted in a split state government with both the state house and senate in Republican control. We view this as largely preserving status quo in the state in terms of energy policy – while stakeholders we had previously spoken with expressed some expectation of renewable portfolio standard legislation passing, this is now more of a remote prospect given the split government. XEL has been involved in the stakeholder process around the WI governor's energy task force as well, with those recommendations expected to be published soon (company sees its strategies aligned). Last week's elections had a meaningful impact on New Mexico with that state's commission moving to an appointed from an elected body – while this is a constructive development its impact on XEL should be muted given EPS exposure (sub-5%) in the state. XEL is not making assumptions about federal policy as it relates to renewable tax credits – some proposals have been floated including cash up front in exchange for credits generated by renewables – with the principal concern around potentially accelerating more coal retirements and renewable build in its MN and CO jurisdictions centered around customer bill impacts – watch the MN resource process which is expected to take 6-9 months to conclude.

MN stayout decision due soon, CO lag seen as manageable

The MN commission is expected to rule on XEL's proposal for an extension of its current rates sometime in December. The components of the request seen as key to an extension remain the continuation of the sale true up provision, nuclear decommissioning costs, and property tax deferral. *We see a further extension of rate case need as adding to de-risking backdrop to the company heading into 2021.* The Colorado electric utility last had rates approved in Dec 2019 with an approved ROE of 9.3%; given that filing's use of a historical 2018-19 test year there is a degree of lag relative to the filing that is expected to remain through the duration of the forecast period. Among the key open issues in Colorado is the wildfire rider which seeks ~$130m of incremental wildfire investment recovery through 2025 with the commission decision expected in mid 2021. We expect that XEL will be able to maintain earned ROEs *with a relatively consistent level of earnings lag relative to the 9.3% authorized (we est 8.8% in '21). We perceive an ability to stay out of rate case here is a key element of sustaining its outlook with less risk.*

Gas LDC a key part of the business mix, exploring RNG and hydrogen

XEL expects to make meaningful investments in reducing the emissions profile of its gas distribution business within the coming 10-15 years, seeing the overall opportunity as akin to the company's decision to embrace wind generation. While significant emissions reduction is not a major part of the spending plan right now the company is exploring hydrogen and RNG applications. Partnering with suppliers in addressing upstream emissions issues is a key area of focus as well. With additional gas LDC systems potentially for sale in contiguous territories, the company has not ruled out inorganic growth as well.

Holdco debt seen manageable, below 25% of total

XEL's $24B of capex through 2025 is underpinned by a financing strategy whereby holdco debt remains at 22-23% of total company debt through the forecast period (we see 2c increase in parent interest expense through '23); note the upper bound from Moody's perspective is 25%, leaving XEL latitude on its forecast.

Source: BofA Global Research

Price objective basis & risk

AES (AES)
Our price objective is $23 and is based on a sum of the parts analysis applying a blended valuation approach, the summation of 1) EV/EBITDA approach across global generation assets. We use an 8.0x group multiple for US IPPs and apply a 5.0x premium for US distributed generation for further growth expectations. Meanwhile, we value the DevCo using a 15% discount on 2.5GW of annual renewables beyond '22. In Asia, we apply various multiples based upon jurisdiction risk across the rest of the portfolio. We use mark-to-market value of publicly listed LATAM subs as well as apply a P/E methodology for US regulated utilities of 16.5x including a 1x premium multiple at IPALCO and at DPL. We also credit the company with Vietnam and its $114Mn investment in Uplight. We further apply a 5x P/Sales our '21E for AES share of Fluence.

Downside risks to our price objective are negative regulatory outcomes in the US, international currencies devaluing against the US dollar, and expensive M&A acquisitions impacting value and a reduction in emerging market power demand growth.

Ameren Corporation (AEE)
Our $88 price objective is predicated on a P/E based sum of the parts, valuing each business subsidiary relative to the 2023E ratebase weighted peer multiple of 16.6x for electric. We apply a 3.0x premium to peers at AEE Missouri to account for the improving prospects of capital spend, supplemented by a regulatory jurisdiction becoming more favorable - but lack of decoupling. We apply a 3.0x premium to peers at AEE Illinois to account for decoupling on the distribution business which aids in earnings predictability. The overall business is expected to grow at a more meaningful clip than that of peers - we see a 10% EPS CAGR at IL 2020-2024. At ATXI, we apply a 2x premium to peers to reflect the FERC ROEs. At the Parent, we assume 2.5x multiple premium reflecting average of the subs and given the healthy debt metrics with FFO/Debt at 17%+. Electric peer P/E multiple is grossed up for a year to 2020 by 5% to reflect capital appreciation across the sector. The upside (downside) risks to our price objective are the utilities earning their allowed returns or better (worse), a significant increase (decrease) in 30-year U.S. Treasury bond yields, and positive (adverse) regulatory outcomes that could impact mgmt's ability to earn its allowed return

American Water Works (AWK)
Our PO for American Water Works is $139. We apply the sector average 25.7x to American Water's 2023E earnings based on the water peer multiple and a 8.1% group EPS CAGR for '18-'23E. We think this multiple is justified as in our view AWK largely drives the peer multiple as the largest publicly traded water utility. We ascribe a 3x premium for NJ, PA, and IL, and a -3x discount to the military biz. Meanwhile, we ascribe a 12x multiple to the non-regulated Retail biz. Also a -1x P/E for Cali utility. no prem/discount for 'Other' segment with smaller state exposures.

Risks to the downside are increase in market interest rates, potential impact of tax reform on utilities, operational errors, changes in valuation levels for water utilities. Risks to the upside are accelerating muni acquisitions, multiple expansion, and constructive legislation in regulatory jurisdictions.

Avista (AVA)
Avista (AVA) Our $38 PO is based on our 2023E sum-of-the-parts (SOTP) analysis, based on the large cap electric group multiple of 17.3x and the gas regulated multiple of 15.5x. Both electric and gas peer P/E multiples are grossed to reflect the group's 5% CAGR to reflect capital appreciation across the sector. We then use a blended electric and gas multiple of 77% and 23%, respectively, for AVA's WA and ID jurisdictions given the

composition of its rate base. We apply the gas multiple to its OR jurisdiction as it is entirely comprised of natural gas distribution assets. Meanwhile, we apply an electric multiple to its Alaska subsidiary, AEL&P, as it is a vertically integrated electric utility. We apply a 12.0x multiple to AVA's Corp & Other businesses as we cannot apply a full utility multiple given it consists of investment funds with a lack of visibility in earnings relative to utilities. We stress that AVA does not have any HoldCo. debt, thus no need to net out debt. Lastly, we now apply a 2x discount to all AVA's utilities to capture increased uncertainty associated with fire risk. Risks to achieving our price objective are 1) execution risk, 2) improving regulatory relationships, 3) decrease in interest rates, 4) ability to deploy incremental capital spend, 5) constructive rate case outcomes in any of the jurisdictions.

Black Hills Corporation (BKH)
Our $64 PO is based on a SoTP valuation.Gas Utilities: We apply a 1x discount to the 14.2x peer P/E multiple on 2023E EPS. Electric Utilities: We apply a 1x discount to the 16.8 peer P/E multiple on 2023E EPS. Both electric and gas peer P/E multiples are grossed up for a year to 2020 by 5% to reflect capital appreciation across the sector. Coal Mine: We apply an 8x peer EV/EBITDA multiple, which is in line with other PRB coal producers. Based on our view of the strength/maintainability of different coal plant output contracts, we apply a discount/prem multiple to that portion of the mine. IPP Assets: We use the recent sale price and '23/EVEBITDA multiple for Pueblo Airport and Wygen I assets, respectively. Parent Expense, Debt, and Eliminations: We apply an average regulatory P/E multiple to this segments income. This captures some Interco revenues that are double counted as well as parent SG&A drag and debt.

Downside risks: operational errors, increasing interest rates, and difficult regulatory environments.
Upside risks: favorable weather, favorable regulatory outcomes, higher capex deployment

CMS Energy (CMS)
Our PO of $69 is based on a SotP relying on 2023E forward P/E multiples for the utility and banking business and a 2023E forward EV/EBITDA multiple for CMS' IPP assets. For the utility seg we apply a 5.0x prem to the avg regulated multiple P/E of 16.5x for the electric seg and of 14.7x for the gas seg, with the 10-yr capex update providing clear sight on ratebase growth and further upside, as well as cont'd favorable regulatory environment, and finally historically proven ability to consistently perform at the high end of guidance range. Both electric and gas peer P/E multiples are grossed up to 2020 by 5% to reflect capital appreciation across the sector. For CMS' merchant business we apply a 8x EV/EBITDA multiple, in line with current market value of CMS power plants (specifically DIG), moreover DIG has relatively favorable contracts for the near future which strengthen plant earnings. Finally, we apply a 15.5x P/E multiple on CMS' consumer lending subsidiary Enerbank, in line with forward P/Es other smaller regional banks with similar growth profile.

Risks are: 1) earned ROEs declining which reduce CMS utility earnings 2) execution risk on capex and cost cutting which would primarily affect the utility earnings, 3) negatives changes to market energy prices which could affect the DIG plant's ability to re-contract at the assumed prices.

Dominion Energy (D)
We use SOTP to derive our $86/sh PO. Utilities: We value VEPCO at 4x prem multiple to elec. peers of 16.6x '23 P/E and 13.9x w/ 2x prem on '23 P/E to D's portfolio of gas LDCs (East Ohio, Hope Gas (WVa), and Questar (UT)). Mults are grossed up to by 5% to reflect capital appreciation. We value Wexpro at 10x disc to gas utility peers for declining rate base/ROEs and reg. risks. We ascribe a 2x premium multiple for SCANA legacy utility assets, and a 2x disc. for the NND asset. We also net out NPV of ongoing bill credits.

Merchant: We apply an 8x FCF multiple for Millstone and separately apply a 100% wt to our NPV est of the ZCP cash flows. We include the full EBITDA from the contracted renewables with a 11x '23 EV/EBITDA multi w/ 3x prem in line with peers. Cove Point: We apply an NPV approach with to our DCF adjusted for the 50% sell-down in the facility. For remaining debt beyond that allocated to state utilities, we incl a 50% wt towards a str netting of leverage, with the remaining 50% using a P/E multiple on associated interest expense, in line with the methodology employed for more highly levered diversified utilities.

Downside risks: increase in rates, capex below assumptions, unconstructive regulatory outcomes, delays and/or cancellation of key projects vs our expectation.

Evergy, Inc (EVRG)

Our $62 price objective for EVRG shares is based on sum of the parts valuation, applying an in-line utility peer 2023E P/E of 16.6x. Electric peer P/E multiple is grossed up for a year to 2020 by 5% to reflect capital appreciation across the sector. We further apply a -1.0x turn discount across the Kansas Central subsidiary based on our perception of a slightly more punitive regulatory stance toward electric utilities ahead of further stakeholder engagement on the standalone plan.

Downside risks to our price objective are adverse regulatory outcomes in rate cases, higher interest rate environments, adverse and unexpected risks associated with operating a nuclear facility, the possibility that the strategic review committee does not result in a transaction recommendation and that a modified standalone plan disappoints in rate base and earnings growth when presented later in 2020.

Upside risks to our price objective are favorable regulatory outcomes in rate cases, lower interest rate environments, higher than anticipated O&M benefits and merger synergies, ability to recover capital tied to retired coal plant.

Fortis (YFTS / FTS)

Our PO is C$53 / US$39.85. We assign a 2023E forward base peer P/E multiple of 16.2x to the US utility business with a premium of 2.0x for UNS Energy (AZ), a 1.5x premium for ITC, and an in line multiple for Central Hudson (NY).
For Canadian utilities, we assign a base peer 2023E P/E multiple of 15.4x. Lower ratebase growth profiles and generally lower authorized equity layers/ROEs, paired with a more challenging regulatory environment, will continue to warrant a discount to US peers, in our view.
At Caribbean utilities, we apply 60% ownership share to the publicly listed subsidiaries' current market cap.
We assign an 8.0x EV/EBITDA multiple to FTS's non-regulated segment seeing the contracted nature of its non-regulated segment positively offset lower growth opportunities. We account for FX upside based on current spot prices

Upside risks are: 1) favorable weather 2) higher USD/CAD exchange rate given FTS has substantial unhedged exposure to the US 3) favorable regulatory actions

Downside risks are: 1)unfavorable weather 2) lower USD/CAD exchange rate given FTS has substantial unhedged exposure to the US 3) unfavorable regulatory actions

Idacorp (IDA)

Our $104 PO is based on a sum-of-the-part valuation (SOTP) of the utility and parent segments.

Our utility valuation is based on applying a 16.3x peer P/E multiple to our 2023 EPS estimates. Electric peer P/E multiple is grossed up for a year to 2020 by 5% to reflect capital appreciation across the sector. We apply a 3.0x premium to Idaho Power to account for acquisition premiums and ROE floor mechanism. We factor in probability-weighted opportunities for more ratebase from Hells Canyon & large-scale transmission ownership announced at EEI.

Upside risks to our PO are getting additional capital approved on expedited basis. Downsides risks are regulatory shifts or using up ADITC bank which ensures consistent ROE and earnings floor.

NiSource Inc (NI)
Our $26 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2023 forward P/E multiples of 13.9x for gas utilities and 16.6x for electric utilities with a 2.0x premium for the electric utility's strong growth rates and incremental renewable buildout with capex beginning in '22, but acknowledge industrial risk. Also, we now assign a 3x M&A premium to the VA, KY and MD gas utilities and a 0.5x premium on OH, PA and NIPSCO gas utilities to account for their embedded re-rating potential following any hypothetical sale. We note that electric / gas peer P/E multiples are grossed up by 5% to reflect capital appreciation across the sector. We subtract the value of excess holding company debt at the parent not supporting the utility opcos. We believe NI's 5-7% EPS/dividend growth outlook, attractive regulated earnings profile and constructive legislation across NI's service territories are under-estimated given its discounted multiple versus peers.

Downside risks to our PO are a sustained period of economic weakness pressuring customer growth, interest rate increases, high natural gas prices, financing plan updates, unforeseen costs associated with the MA incident, and challenging steel production economics in Indiana.

NorthWestern Corporation (NWE)
Our $57 price objective is based on a 3.0x discounted multiple to the 2023E peer multiple of 16.6x on our 2023E EPS given higher risk and slower growth. We note that electric peer P/E multiple is grossed up for a year to 2020 by 5% to reflect capital appreciation across the sector.

Downside risks to our price objective are 1) adverse regulatory outcomes, 2) inability to recover costs via the traditional mechanisms, 3) changes in the Commission constructs, and 4) further equity dilution. Upside risks are 1) improvement in regulatory environment 2) capex increases.

OGE Energy Corp (OGE)
We value OGE at $35/share based on a sum of the parts, separating the utility business from the Enable stake. For the utility business we apply the peer multiple of 16.6x on 2023E EPS. Electric peer P/E multiple is grossed up for a year to 2021 by 5% to reflect capital appreciation across the sector. Note we apply a 1x discount vs peers to be conservative accounting for risks in Oklahoma reopening the state more aggressively. For the Enable Midstream stake we rely on the current market price of ENBL multiplied by the number of the shares owned by OGE to determine the equity value. We attribute no value to the GP shares, as we don't anticipate IDRs materializing over the next three years.

Downside risks are further declines in the regulatory environment possibly resulting in lower ROEs or other hurdles hindering OGE's ability to earn its authorized return. While not as exposed due to low parent interest, we see interest rate hikes as another potential downside risk. Finally, execution risk on existing capex schedule could put further pressure on earnings growth. Declines in value of ENBL share could also provide downside to our valuation.
Upside risks are shifts towards a more favorable Oklahoma regulatory environment, which could ease OGEs ability to earn its authorized return in the jurisdiction and

possibly increase capex plan as management views prospects in the state more positively. Improvements in value of ENBL share.

Pinnacle West (PNW)
Our price objective of $76 is based on a peer utility 2023E P/E multiple of 16.1x with a -2.5x discount to account for PNW's risk around its pending rate case as well as headline risk related to disconnect policy review. Electric and gas peer P/E mult is grossed up for a year to 2020 by 5% to reflect capital appreciation across the sector. We ascribe an in-line premium despite clear renewable capex backdrop given ongoing regulatory risk associated with the company's upcoming rate filing and 2020 election risk.

Upside risks: 1) Regulatory relationships/outcomes could improve, including changes at the elected commission 2) load growth in territory above expectations 3) Riders and capital trackers could help achieve ROE 4) positive weather helps earnings 5) interest rate risk changes cost of capital - lower rates could improve 6) Consumer advocates or utility staff could become focused on issues that improve ROE

Downside risks: 1) Regulatory relationships/outcomes could decline, including changes at the elected commission 2) load growth in territory below expectations 3) Riders and capital trackers could hurt ROE 4) negative weather hurts earnings 5) interest rate risk changes cost of capital - higher rates could worsen 6) Consumer advocates or utility staff could become focused on issues that hurt ROE 7) Solar advocates in the state have engaged in public confrontations with the utility, which could change public relations in the future.

PNM Resources Inc. (PNM)
We have removed the investment opinion on the company's stock. Investors should no longer rely on our previous opinion or price objective.

Portland General Electric Company (POR)
Our $48 price objective is based on our 2023E EPS estimate discounted back to '21. We value shares based on a 2023E P/E methodology applying a 2.0x discount multiple to the 2023 regulated utility PE multiple of 17.3x. Electric peer P/E multiple is grossed up for a year to 2020 by 5% to reflect capital appreciation across the sector. Our 1.0x discount multiple is based off the near time uncertainty and lack of clarity on trajectory and negative sentiment following the Aug 2020 reported energy trading loss. While our PO is a 12-month forward projection, we use a 2023 multiple, which is reflective of a discount back to 2021.

Downside risks are 1) the ability to secure commission approval for future wind builds, 2) power market risk due to the Power Cost Adjustment Mechanism (PCAM), 3) liabilities under a negligence standard for current or future fires caused by POR equipment. Upside risks are 1) continuation of small/midcap regulated rally, 2) better than expected weather adjusted load growth, 3) further strengthening of company balance sheet, 4) power market risk due to the PCAM.

Public Service Enterprise Group (PEG)
Our $63 PO is derived from our SOTP valuation. For the utility we use a 2x premium to the 16.3x our 23E group multiple to value the regulated and parent side of the business. Electric peer P/E multiple is grossed up by 5% to reflect capital appreciation across the sector. PSE&G has meaningful growth capex planned, and while pressure on earned ROEs exists, the regulatory environment is favorable.
Downside risks to PO 1) interest rate increases, 2) unfavorable regulatory outcome, and 3) weather, all of which could lower PEG's earnings ability, 4) we caution dilutive asset sales, capacity auction uncertainty, and overall power headwinds as potential overhangs on the stock 5) BPU approvals.

WEC Energy Group Inc (WEC)
Our $87 PO is based on a 2023E SoTP analysis, based on the large cap electric group multiple of 16.8x and the gas regulated multiple of 14.2x. Both electric and gas peer P/E multiples are grossed up for a year to reflect capital appreciation across the sector.

We apply a 4.0x premium to WEC's WI electric & gas subs to compensate for surety in earnings growth for the next two years following the Commission's affirmation of the recent settlement on above average ROE's of 10%+. We apply a 1x premium to the gas utilities, incl IL's Peoples Gas and North Shore Gas with the Gas System Modernization Program (GSMP) and capex forecasts de-risked following the ICC order. We ascribe a 2x premium vs. the group at ATC to account for the steady nature of earnings growth as well as above average ROE's that are set at a federal level by FERC. We give Power the Future (PTF) a 1.0x premium multiple given the ROE is set indefinitely on historical and new investments. We ascribe an in line multiple for the parent accounting for the interest expense which finances overall utility operations. For the HoldCo adjustment to debt, we net out 50% of HoldCo debt from equity valuation and adjust to add back the parent drag on interest exp.

Upside risks are stronger than expected execution and accelerating capital oppt'y. Downside risks are inability to achieve historical track record on cost cutting and ability to cont. to scale regulated investments given growing portion from contracted renewables.

Xcel Energy Inc (XEL)
Our PO is $72. We value Xcel Energy using a sum of the parts (SOTP) approach. Given the difference in geography, earnings strength, growth opportunity and risk profile, we divide the segments by subsidiary.

We use 2023E forward P/E multiples to derive a value for the different business segments, including the parent segment. We use a peer multiple of 16.6x . Electric peer P/E multiple is then grossed up for a year to 2020 by 5% to reflect capital appreciation across the sector. We apply a 4x premium to most subsidiaries except in MN and CO where we apply a 5.0x due to additional stimulus upside. We see this multiple as appropriate as the company has growth opportunities, resolving regulatory drag and resolving uncertainty around rate cases. We stripped Mankato as a non-reg asset in our SOTP due to the sale. We also net back 50% of the parent interest expense and instead subtract out 50% of parent debt to more accurately reflect HoldCo leverage.

Downside risks are interest rate increases, regulatory risk such as lower authorized ROEs or less favorable riders/trackers for renewables and transmission, interest rate risk, execution delays, and weather anomalies.

For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

***INCOME RATINGS*, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend.** *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price charts for the securities referenced in this research report are available at https://pricecharts.baml.com, or call 1-800-MERRILL to have them mailed.
BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: AES Corp, Ameren Corp, American Water, Avista Corp, Black Hills, CMS Energy, Dominion Energy, Evergy, Fortis, Idacorp, NiSource Inc, NorthWestern Corp, OGE Energy Corp, Pinnacle West Capit, PNM Resources Inc., Portland General, Public Service, WEC Energy Group Inc, Xcel Energy.
BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: AES Corporation, Black Hills Corporat, Dominion Energy, NiSource Inc, PNM Resources, WEC Energy Group Inc, Xcel Energy Inc.
The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: AES Corporation, Ameren Corporation, American Water Works, Avista, Black Hills Corporat, CMS Energy, Dominion Energy, Evergy, Fortis, Idacorp, NiSource Inc, Northwestern Corpora, Pinnacle West Capita, PNM Resources, Portland Genl Elec, Public Service, WEC Energy Group Inc, Xcel Energy Inc.
BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: AES Corporation, Ameren Corporation, American Water Works, Avista, Black Hills Corporat, CMS Energy, Dominion Energy, Evergy, Fortis, Idacorp, NiSource Inc, Northwestern Corpora, Pinnacle West Capita, PNM Resources, Portland Genl Elec, Public Service, WEC Energy Group Inc, Xcel Energy Inc.
The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: AES Corporation, Ameren Corporation, American Water Works, Avista, Black Hills Corporat, CMS Energy, Dominion Energy, Evergy, Fortis, Idacorp, NiSource Inc, Northwestern Corpora, OGE Energy Corp, Pinnacle West Capita, PNM Resources, Portland Genl Elec, Public Service, WEC Energy Group Inc, Xcel Energy Inc.
BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: AES Corporation, Ameren Corporation, American Water Works, Avista, Black Hills Corporat, CMS Energy, Dominion Energy, Evergy, Fortis, Idacorp, NiSource Inc, Northwestern Corpora, Pinnacle West Capita, PNM Resources, Portland Genl Elec, Public Service, WEC Energy Group Inc, Xcel Energy Inc.
BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: AES Corporation, Ameren Corporation, American Water Works, Avista, CMS Energy, Dominion Energy, Evergy, Fortis, NiSource Inc, Northwestern Corpora, Pinnacle West Capita, Portland Genl Elec,

WEC Energy Group Inc, Xcel Energy Inc.
BofAS together with its affiliates beneficially owns one percent or more of the common stock of this issuer. If this report was issued on or after the 9th day of the month, it reflects the ownership position on the last day of the previous month. Reports issued before the 9th day of a month reflect the ownership position at the end of the second month preceding the date of the report: AES Corporation, American Water Works, CMS Energy, Dominion Energy, NiSource Inc, PNM Resources, WEC Energy Group Inc.
BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: AES Corp, Ameren Corp, American Water, Avista Corp, Black Hills, CMS Energy, Dominion Energy, Evergy, Fortis, Idacorp, NiSource Inc, NorthWestern Corp, OGE Energy Corp, Pinnacle West Capit, PNM Resources Inc., Portland General, Public Service, WEC Energy Group Inc, Xcel Energy.
The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: AES Corporation, Ameren Corporation, American Water Works, Avista, Black Hills Corporat, CMS Energy, Dominion Energy, Evergy, Fortis, Idacorp, NiSource Inc, Northwestern Corpora, Pinnacle West Capita, PNM Resources, Portland Genl Elec, Public Service, WEC Energy Group Inc, Xcel Energy Inc.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.
Prices are indicative and for information purposes only. Except as otherwise stated in the report, for the purpose of any recommendation in relation to: (i) an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report; or (ii) a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
BofA Global Research policies relating to conflicts of interest are described at https://rsch.baml.com/coi
"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Utilities, Power & Renewables

EEI 55th Financial Conference Takeaways

Bottom Line:
Similar to Presidential election there are still some votes to count as we finish our meetings at EEI tomorrow. **However, after two days and 18 meetings we found the conference updates from CNP, ETR and PEG to positive relative to our expectations**. And while we did not uncover any material negative surprises this year, **we believe the expectations surrounding AEP's renewable capital program and the lack of incremental clarity on AEE's own capital refresh (4Q20) and sales mix questions are likely to disappoint**. Inside we outline in more detail the broad sector themes coming out of the conference as well brief summaries of the takeaways from our meetings through today.

Key Points

We continued to be impressed by CNP's newly assembled management team in rapidly restoring investor confidence in an improving outlook. We look forward to the company's upcoming December 7th analyst day for its plans with respect to its 54% ownership in ENBL, which remains the last key piece to the re-rating of the story.

ETR continues to be one of our preferred GARP oriented names in the sector and our EEI meeting further solidified our already positive view that despite unique challenges within its service territory (Storms, Load Growth) its management team remains positioned to deliver on its 5-7% EPS growth outlook through 2023 as its cost management efforts can be tailored to near-term challenges.

We thought our meeting with PEG was one of the better meetings we had at this year's conference. The concrete steps the company has taken to resemble other premium utility companies is a result of the favorable regulatory outcomes at the BPU (recent $1 billion CEF – energy efficiency program approval) and decisive action the company has taken (planned sale of non-nuclear generation). Post asset sales, PEG may be in a position to give longer term EPS guidance that will be underpinned by 6-8% rate base growth and may result in addition improvement of its multiple.

For AEE, we had hoped to get some additional clarity on the company's 4Q20 capital refresh including the impact of the company's 2020 IRP filing. The integration of the company's 2020 IRP plan in MO added $3,000mm to its 2020-2029 pipeline of capital investments. In addition to the 700MW/$1,200mm included in its 2017 RFP, AEE sees an additional 950MW by 2024 in its preferred plan which it believes is also its least cost plan. Negotiations are ongoing as management assesses individual project attributes including cost, where they are in MISO queue, transmission interconnections, and PTC qualifications. AEE will give a full 5-year refresh to its capital expenditure program on its 4Q conference call.

Although in aggregate AEP's EEI update was largely in line with our current forecast and 6.3% EPS CAGR, after much excitement regarding its renewable spending program we think investors came away disappointed by the update and a small miss at the midpoint of its 2021 guidance. The company has included 450MW via RFP at I&M (300MW owned) to replace a portion of the capacity associated with the Rockport 2 lease. Given the net length at I&M we now do not expect the remaining capacity to be replaced but the $144mm of lease payments should provide ample headroom for future investments.

BMO Capital Markets

Key Sector Themes – 55th EEI Financial Conference

1. Incremental expansion of renewable strategies across the sector as utilities seek to improve their profiles and grow regulated earnings with lower cost supply.

2. Refinancing opportunities will be a tailwind in the near-term given the sharp move lower in rates. In addition to continuous cost saving programs and the residual flow back of unprotected ADIT, this should position utilities well in aggregate to minimize rate case activity as COVID weighs on the economy and interest rates remain a risk to allowed ROEs.

3. Sales mix outlook remains robust for most into the 1H21- strength in residential sales should be a tailwind for the next few quarters but most expect this to taper into the back half of the year.

4. Lean cost practices have become a way of life and portions of the 1H20 COVID-related cost mitigation is likely to be reversed in 4Q as managements pivot to derisking 2021 and adding to headroom.

5. M&A is in headlines again, but most managements appear to prefer their own stand-alone strategies at 1x rate base relative to time-consuming, higher risk acquisitions at 1.5-2.0x. Although some see tuck-in acquisitions of gas distribution as possible, most view it on an opportunistic basis and prefer to grow their electric franchises and carbon-friendly non-regulated businesses. CNP's upcoming divestiture should prove to be an interesting valuation marker for the subsector.

6. The future of gas distribution and its associated multiple remains a debate. Although most do not see materially adding to this exposure especially inorganically, winter-peaking utilities continue be comfortable with their gas operations given heating penetration and much of the capital spending is related to reliability and safety.

7. Green hydrogen remains all the buzz and is finding its place as a more scalable storage alternative, but most agree this is likely still at least 5-10 years from a large-scale commercial roll out.

8. Corporate tax policy remains topical post the election but still viewed as potentially 12-months away. Impacts on customer bills (including EDIT balances) and marginal impacts rate base growth are the negatives while the improvement to cash flow and an associated benefit to credit metrics are the positive offsets.

9. The consensus remains that utility investment in wind, solar and battery storage should continue to grow as renewables cost come down. Tax equity is starting to play a larger role in management's ability to make the transition to cleaner supply affordable to customers.

BMO Capital Markets

AEE – (Outperform, $89 Price Target)

- We had hoped to get some additional clarity on the company's 4Q20 capital refresh including the impact of the company's 2020 IRP filing. The integration of the company's September 2020 IRP plan in MO added $3,000mm to its 2020-2029 pipeline of capital investments. In addition to the 700MW/$1,200mm included in its 2017 RFP, AEE sees an additional 950MW by 2024 in its preferred plan which it believes is also its least cost plan. Negotiations are ongoing as management assesses individual project attributes including cost, where they are in MISO queue, transmission interconnections, and PTC qualifications. The use of tax equity is also a consideration in this evaluation as a way to manage overall cost. As previously discussed, AEE will give a full 5-year refresh to its capital expenditure program on its 4Q conference call.
- Management still feels comfortable with rate headroom under the MO cap given the ~4% cumulative reduction in rates from the change in corporate taxes (3%) and decrease in its 2020 rate case (1%) relative to the 2.8% annual cap which began in April 2017. New renewables would be able to utilize recovery through the state's PISA mechanism (85%) but not the RESRAM mechanism (15%) as that applies only to compliance expenditures under the 2008 legislation. We will be watching for future updates from the company on what the Y-O-Y rate increases will be within the current rate cap mechanism.
- Despite management's solid operating and regulatory execution this year, the company's relative sales mix in 3Q was not as robust as some of its peers and weather reduced the end of its outlook for the year. We look to its 4Q update for a formal update on its retail sales expectations including the outlook for commercial sales impact on retail sales.

AEP – (Outperform, $99 Price Target)

- Although in aggregate the company's EEI update was largely in line with our current forecast and 6.3% EPS CAGR, after much speculation around a more robust renewable spending program we think investors came away disappointed by the incremental renewable capital plan and a small miss at the midpoint of its 2021 guidance.
- A 2021 outlook was initiated at $4.51-4.71 ($4.61 midpoint). This was a bit shy of our $4.65 estimate and represents a 6.0% increase off the midpoint of its 2020 range of $4.35 and at the top end of the company long-term CAGR. Of note, 2021 guidance assumes retail Load is 5c drag reflecting the impact of a more negative mix in 2021.
- Management sees its '21-25 capital plan at $37.4bn which is up $2.5bn from its most recent 5-year forecast. The primary changes underlying this update include $700mm in regulated renewables, $500mm at generation and $600mm in transmission. Rate base is now expected to grow at 7.4% ('19-25).
- Important to the '21-25 forecast, the Pirkey Plant will be shut down in 2023 and the turn back of the Rockport 2 lease will add the need for 450MW of capacity in the intermediate-term. The company has only specifically included ~450MW of planned replacement via an RFP at I&M (300MW of owned solar and 150MW of PPA wind) in its capital plan related to the Rockport 2 capacity.
    - Given the company's net resource length at I&M we do not expect the remaining 850MW of capacity to be replaced but the $144mm of lease payments should provide ample headroom for future investments.

BMO Capital Markets

- At SWEPCO, the Pirkey and Welch retirements in 2023 and 2028 represent ~$700mm of net book value which should be replaced partially through the addition of North Central Wind, the company's IRP and incremental transmission spending.

- Management outlined a slightly higher CFO outlook 21-23 while equity timing has shifted due to the timing of the Traverse acquisition. CFO is up ~ $200mm, net due to fine tuning of working capital, D&A and fuel. Although the total equity over the three- year planning horizon is still ~$2,100mm, the weighting has shifted from $1,300mm in 2022 to $1,400mm in '23 to reflect the timing of the Traverse acquisition.

AES (Not Rated)

- Our EEI meeting with AES was positive. We see the company's narrowed America's (U.S. + Latin America and Caribbean) focused strategy combined with one of the industry's most robust renewable pipeline as an attractive potential energy transition leader. The company remains focused on furthering progress to unlock value as the company still trades at a meaningful discount to pure-play U.S. utilities despite its strength across Energy Storage, Solar and Wind in multiple countries.

- Unlocking value may get a kickstart with sale of a small minority stake (10%, AES ~ 5%) of the company's Fluence energy storage business (Co-owned with Siemens AG), likely some time before year-end. Buyer will likely be a financial player that share's AES and Siemens long-term vision to continue to grow the business which will see revenues grow 40% per annum the next several years. Proceeds from salle will be reinvested into Fluence with a longer-term eye to a potential IPO as company's growth while impressive may not translate into substantial earnings that utility focus investors tend to focus on. That said for now company likes the marriage of its various renewable development arms (sPower, AES DE, etc.) with its traditional electric distribution and conventional generation businesses and investments in new energy technologies (Uplight, 5B)

- AES has numerous opportunities to leverage its extensive experience and presence in key Central and South American and Caribbean and is positive about the potential for LNG and CCGT development in Viet Nam. That said, we came away with the impression that growth in the U.S. as well as continuing to grow its 2 U.S. T&D businesses organically remains front and center in terms of management priorities as it works to become a bigger energy transition player and helps increase confidence in 7-9% EPS growth.

- AES is clearly following a road map set out by ESG investors like Norges Bank as evidenced of its de-carbonization efforts via coal shut-downs globally. We think as a result AES could start making its way into more ESG focused baskets which could provide an additional tailwind.

CMS – (Outperform, $70 Price Target)

- Management remains confident in their 6-8% LT EPS CAGR guidance given its strong capital backlog, favorable regulatory construct, and high visibility. With commercial sales continuing to slowly improve and positive sales mix remaining persistent off early 2Q20 lows, management believes sales could be upside in their plan.

- CMS doesn't anticipate any material changes to the upcoming IRP in 2Q21. Over the next five years Consumers' reliability and efficiency-based rate base growth will be supplemented by a ramping renewables investment plan funded in part by the roll-off of the Palisades Nuclear PPA in 2022 ($90mm) and savings from the retirement of Karn Units 1 &2 ($30mm). Post 2025, the expiration of the company's contract with MCV will create incremental headroom

($50-60mm) in addition to savings from the retirement of the larger Campbell units 1 & 2 (255MW and 364MW, respectively). Management continue to evaluate the cost effectiveness of energy storage opportunities which if economic could accelerate renewable development and retirements of fossil assets. If the retirement of fossil unit benefits customer affordability and reliability, management will consider other options outside of securitizing the retired assets.

- CMS's has shown its ability to identify O&M efficiency and savings through energy waste reduction of ~2% YoY as well as identifying incremental O&M and possible fuel savings from the retirement of its older fossil fleet. Management feels comfortable and optimistic about their organic capital investment opportunities and aren't likely to pursue M&A opportunities despite the recent market noise.

CNP (Market Perform, $23 Price Target)

- Our EEI meeting with CNP was positive. We continued to be impressed by CNP's newly assembled management team in rapidly restoring investor confidence in an improving outlook. We look forward to the company's upcoming December 7th analyst day for its plans with respect to its 54% ownership in ENBL, which remains the last key piece to the re-rating of the story. We are most curious on the transaction structure CNP will pursue given the current tax basis in ENBL (-$1.8 billion).

- Starting point helps. We note that the O&M savings the company is targeting will be key to help provide the necessary headroom to help facilitate its robust rate base investment CAGR of 10%/year. However, we see a few factors that will work to CNP's advantage. Investment in renewables prior to the current Indiana IRP had not been made at the legacy Vectren business and allows for lower O&M at conventional plants that will be replaced by renewable generation. Cost structure particularly in terms of supply chain management following the close of CNP's acquisition of Vectren had never really been brought to bear and likely is low hanging fruit in our opinion. Finally, operational improvements in terms of number of trips into the field are improved along with customer service should also drive costs lower. We view these as all tangible steps unlike some other cost cutting initiatives that have been more amorphous.

- Company likes its gas LDC business, but increased investment will be geared towards the electric business. The company's recently announced $3 billion increase to its 2021-2025 capital expenditure program will be geared towards its electric utilities (2/3). Although success in the upcoming Indiana IRP process will help facilitate cost savings and a more ESG friendly story it's not an overly large part of the growing electric investment. Rather we see investment in the grid and reliability as being larger components.

- Financing focus on reducing parent leverage. With the company's very limited equity needs going forward ($75MM/year starting in 2022) as being one of the takeaways we highlighted in our 3Q recap, we see CNP management turning towards reducing its prior reliance on debt at the parent level. This along with a potential divestiture of ENBL could allow CNP to eventually to enjoy a lower FFO/debt downgrade threshold.

D – (Outperform, $88 Price Target)

- Management expects a noisier rate case in South Carolina give it's the long timeframe between cases and nearly $3bn in investment associated with the case. However, the company continues to believe the outcome will not have a major impact on its 2021 earnings guidance. Above average population and economic growth in South Carolina provides

BMO Capital Markets

Dominion with the opportunity to pursue robust investments in grid hardening and solar in region, which we'd expect to be recovered through a rate case review occurrence approximately every 1-2 years.

- Following the sale of it's GT&S assets to Berkshire, management can now narrow its focus on the execution of growing it's primarily regulated businesses and transition to an ESG leader in the sector.
- As it had already started a methane reduction program years ago for its LDC business, management thinks LDCs with relatively lower emissions will play an integral role in supporting the clean energy expansion
- With two large partnerships focusing of agriculture renewable natural gas, management believes there's opportunity for up to $2bn in RNG capital investments through 2025.
- Dominion is pursuing pilot hydrogen projects in 1Q21 at it's mock training town to test the level of hydrogen blend that could be used in it's existing systems. If the pilot is successful, Dominion plans to take the project into an actual town the following year. Management expects it can blend up to 5-10% of hydrogen in it's existing systems before having to make modifications to reach up to a 30% blend.

DTE – (Market Perform, $130 Price Target)

- Following the announcement of the spinoff of its midstream assets, DTE's focus turns to its regulated gas and electric businesses which now account for ~90% of earnings power and future growth. With a slightly elevated capex up front, the 7-8% growth guided to at DTE Electric and the ~9% growth at DTE Gas assumed in its 5-year forecast will be skewed higher the first few years, offsetting the dilution from equity converts in 2022. Management continues to believe the current capital plan and expected rate base growth positions DTE towards the high end of the guidance range.
- Following the spin transaction, management reduced its FFO/debt target to 16% from 18%. The lower threshold is more in-line with its purely regulated peers and it's been noted by credit agencies that this transaction is credit enhancing, supporting this lower threshold. In line with our pro-forma estimates, parent leverage is expected to decrease to 30% from 40% prior to the transaction announcement and we'd expect it to trend near that level.
- Management believes post spin its midstream business could trade in a range of 8-10x EV/EBITDA reflecting its conservative 4x leverage, 2x coverage, low maintenance capex, visible Haynesville growth profile and solid northeastern footprint. Coverage should provide some flexibility to grow its dividend but DTE also sees growth through low cost expansion capex as well as medium sized inorganic growth. Its Form 10 should be filed in the spring 2021 and this should provide some additional color on the company's outlook for initial DCF outlook that will incorporate the maintenance capex and interest expense cost of its external debt financing.
- Management continues to see its P&I and T&M as solid businesses in the portfolio post spin. RNG growth of around $7-8mm of net income per year is in line with the company's risk appetite. Although trading & marketing business not a core focus for DTE, it provides a risk management tool and generates ~$50mm/year in cash without the need to post material collateral given a facility in place to support the business.

ES – (Outperform, $99 Price Target)

- In February we expect ES to update its capital plan which should push growth to the top end of its 5-7% LT EPS CAGR guidance. Management continues to exclude $1bn of AMI (MA & CT) as well as solar opportunities in MA in capital plan. We'd expect incremental investment opportunity to be funded with similar equity levels as in the past ~50% equity.
- CT political rhetoric has cooled since the legislation passed
- Regarding its offshore wind program, all eyes will be on the Vineyard Wind permitting updates next week. Investors will also be watching the upcoming offshore solicitation in NY where ES and Orsted submitted a bid in the 2500MW solicitation with winners determined by the end of December.
- Management sees plenty of room over next few years to earn within sharing bands in MA (electric and gas) and CT given its multi-year rate deals. O&M will provide some help we do not expect it to be as large of a driver going forward. Returns in MA are expected to be a bit more back end loaded given their historic test years vs CT's forward test year.

ETR (Outperform, $124 Price Target)

- Our EEI meeting with ETR was positive. ETR continues to be one of our preferred GARP oriented names in the sector and our EEI meeting further solidified our already positive view that despite unique challenges within its service territory (Storms, Load Growth Slowed vs Initial Estimates) that its management team remains positioned to deliver on its 5-7% EPS growth outlook through 2023 as its cost management efforts can be tailored to near-term challenges. Given that the management only recently concluded a comprehensive Analyst Day presentation with a refreshed 5-year outlook we did not expect or see much new at EEI.
- The company remains confident with respect to its upcoming Arkansas FRP extension. ETR sees talks with the Arkansas PSC staff potentially picking up ahead of a December 4th settlement deadline, particularly given that the company just settled its last FRP filing under the current FRP regime and now the focus returns towards the potential of an extension. The company remined us that this is the first-time regulators in Arkansas have had an opportunity to evaluate an extension after the initial move to FRP process so some of the noise and fits and starts to the process were expected.
- Louisiana FRP also remains on track despite the apparent need for a run-off election for 1 of 2 LAPSC commissioners who was up for re-election. ETR indicated to us that despite the need for Commissioner Eric Skrmetta (Republican) to face a run-off against Democratic challenger Allen Borne that it's sees no impact on timing of the LAPSC to take up the FRP extension.
- FFO/Debt metric path back to 15% by mid-2022 remains on track with cadence towards reaching goal determined by when storm securitization process is finalized.

EXC (Outperform, $52 Price Target)

- Our EEI meeting with EXC was neutral. Given EXC is in the midst of its process to potentially separate its EXC Generation business (we think via spin) there was not too much we gleamed in terms of incremental financial information on what the pro-forma companies may look like, particularly with respect to credit. Having said, that we think that a separation of EXC

Generation is very likely. Company will provide update on 4Q call on where the process stands.

- Company tone on IL legislation but timing or outcome will not determine fate of EXC Gen separation in our view. EXC expects energy legislation may find a new sense of urgency for Governor Prtizker since his other key legislative initiative (progressive state income tax) was defeated. In addition, company has not closed the door on the FRR option as eventually finding more support in Illinois. That said legislation will not be taken up until the start of the next legislative session and will not feature in Veto session in November/December.

- Pending CENG Put Option will not present meaningful issue in separation evaluation. Timing on resolution of the exercise price of EDF's put of its interests in its co-owned nuclear plants with EXC in MD and NY remains outstanding but company has run scenarios with and without completion of the put option and also doesn't see it as major complicating factor in evaluating EXC gen as a viable standalone entity.

LNT – (Not Rated)

- Management continues to execute its Phase 1 Clean Energy Blueprint in Wisconsin (2019) and Iowa (2020). The focus in Phase 1 has been on an evaluation of the company's whole generation fleet and distribution system. LNT management sees their Blueprint model as an iterative strategy that can be updated as they approach future retirements and to reflect the future changes in the cost of clean supply. Phase 2 will focus on repowering, storage and transmission. Its 5-year forecast assumes no equity to fund its regulated growth which drives its outlook for a consistent 6% EPS CAGR. In WI this has resulted in the addition of 1000MW of new solar through the end of 2023 (in addition to its 500MW of owned wind), incremental battery storage and the retirement of the 414MW Edgewater Station by the end of 2022. The company field in May for recovery of the six project, 670MW tranche with a 2Q21 order expected.

- In IA, the company sees adding up to 400MW of solar by 2023 (in addition to its 1,300MW of owned wind), adding incremental battery storage, the retirement of the 275MW Lansing Station, and the conversion of its Burlington Station from coal to natural gas. LNT will utilize tax equity for its 400MW of IA solar implying 60-65% of the project cost will be reflected in rate base. Looking forward, the use of tax equity should help bring forward additional retirements given the lower impact to customer.

- Management continues to work on taking costs out of the system with nearly $60mm achieved and driving headroom in rates for future investments. In IA $30mm has be taken out through lower energy efficiency costs and other $30mm from the mitigation of COVID-19 impacts and the recent Derecho as well as its transformation process which has been using automation/technology and headcount attrition (5-10%) to lower its cost structure. Looking forward LNT expects annual O&M to decline 3-5% off a $500mm base as its technology investment and distribution enhancements return efficiencies.

NEE – (Outperform, $79.25 Price Target); NEP (Outperform, $70 Price Target)

- Although NEP didn't need the assets dropdown from NEER to drive its distribution growth, we view the dropdown and deal with KKR as a win-win for all parties, allowing NEP to recapitalize while simultaneously better positioning itself for future growth. With a mandate of clean energy assets with long term contracts with credit worthy parties, we don't expect NEP to pursue incremental pipeline assets especially given their shorter expected lifespan.

- At NEE, management remains very interested in transmission assets acquisitions given their favorable regulatory treatment and the long-term opportunity to support renewables development growth.
- With Hydrogen projects Management highlights hydrogen as the last leg to get to zero carbon emissions with the largest opportunities coming from the power generation industries push to decarbonize, followed by the transportation industry and industrial parties feeling the pressure from ESG investors.

NI – (Outperform, $27 Price Target)

- NiSource reaffirmed their 2021-'24 growth plan that drives an estimated EPS CAGR of 7-9% fueled by renewable investments replacing the retirement of fossil units.
- Management believes the compression of the LDC valuation is overdone given the support it provides to further decarbonization. Although management will continue to look at capital rotation opportunities we do not see the company actively pursuing the sale of any of its smaller LDCs at this time. If the company would undergo a strategic review of its gas distribution franchise we would look at VA, KY and MD as the most likely sale candidates.
- NiSource's current capital investment plan includes ~$1.8-2bn renewable investments which would be funded by approximately 60% equity. Timing of the dilution remains aligned with the assets in-service dates through the end of 2023. The company still expects to fund equity portion with $600-1,000mm of hybrid/mandatory convert in 2021 and the balance to be topped off with block equity sales in 2022 & 2023. Management noted that it has already received several revers inquires on the 2021 financing but has not gotten firm commitments or discussed the coupon on the product. It is expected that any structure would support at least 50% equity credit which favors a preferred host structure as well as treasury accounting to avoid dilution.

PEG (Market Perform, $61 Price Target)

- Our EEI meeting with PEG was positive. We thought our meeting with PEG was one of the better meetings we had at this year's EEI conference. The concrete steps the company has taken to resemble other premium utility companies is a result of the favorable regulatory outcomes at the BPU (recent $1 billion CEF – energy efficiency program approval) and decisive action the company has taken (planned sale of non-nuclear generation). PEG once it completes its asset sale may be in a position to give longer term EPS guidance that will be underpinned by 6-8% rate base growth and may result in addition improvement of its valuation multiple.
- Asset sale on track for close by 2H of 2021. Given the size of the portfolio, softness in gas gen sale comps and the company's receptiveness to sale of pieces of the portfolio to likely at least 2 or more buyers we had thought there could be a scenario where PEG could end up retaining some of the fossil generation assets but that is not something management is entertaining and is determined to move towards more regulated operations.
- Some noise around extension of NJ ZEC for next 3-year is possible. PEG is in the process of attempting to secure a 3-year extension of ZEC payments for its NJ nuclear plants and also advocating for an increase to the current $10/MWh payment with management keenly aware of the potential for some initial potential for blowback. However, given recent favorable outcomes and the importance for these assets to reach the state's ambitious carbon reduction goals we remain optimistic that at the least an extension is secured. The final BPU decision is

BMO Capital Markets

due in April of 2021 but we are waiting for a preliminary decision next month to see where the starting point will be for final negotiations. The transparency of the timing and the procedural schedule is in stark contrast to what we have seen in Illinois and what transpired in Ohio. While PEG echoed its previous statement that it felt like maintaining ownership of the nuclear assets as they request an extension of ZEC payments was the "right thing" to do by the state, we think that should an opportunity or need later down the road to re-think continued ownership, PEG would consider a sale.

- Offshore wind the wait continues but we think the company will ultimately proceed with Orsted on Ocean Wind and likely participate in other offshore solicitations in the mid-Atlantic. We had anticipated that one of the potential big reveals in an EEI conference year short of them would be PEG's formal announcement it is moving forward with its option to invest in Ocean Wind, Orsted's winning bid in the first NJ offshore wind solicitation. However, the company continues to exercise its full allotment of time for due diligence.

SRE – (Market Perform, $138 Price Target)

- We believe management is moving closer to a partial monetization or alternative structure around its LNG business – will "give update on 4Q call or before." The message to investors is management remains very committed to the LNG business and believe there is incremental value to shareholders in the platform
- Any transaction is about sourcing lowest cost of capital in market. Feel very good about LNG developments and strategy and looking at lowest cost of capital to grow business, strengthen balance sheet and highlight LNG value. Although credit rating agencies have noted that if SRE were to expand its LNG exposure in a meaningful way that it could be negative to credit quality, SRE believes that Cameron as example, has no commodity exposure and no volume exposure which offset pressures from other credit negative implications. This would be done with the purpose to grow its business, strengthen the balance sheet and crystalize the value of its LNG program. Any proceeds would not be used for the $2bn buyback authorization. This authorization remains a placeholder for opportunistic buybacks.
- SRE will provide more details of its 5-yr capital plan at the investor day in March. Management noted Oncor has the scope to increase CAPEX at least another $1bn above its $12.2Bn 5-year plan. With 100GWs of renewables in que in TX, there's plenty of opportunities to deploy capital. Even with its increases capital plan, Oncor is still expected to have the lowest rates in TX

WEC – (Not Rated)

- Management taking advantage of low interest rates to refinance $1,650mm of debt at holding company. $950mm of this was called early. In addition to extending the maturities, WEC reduced its coupon from 3.3% to 1.6% and left the $20mm+ of prepayment costs in 2020 EPS guidance while still expecting to be at the top end of the $3.74-3.76 range.
- Day-to-day cost savings initiative continuing to pay dividends with 2021 forecast calling for a 4% reduction off a ~$1,100mm base and in line with a similar decrease (~3.4%) off its 2019 base of $1,140mm.
- WI rate case cycle calls for spring 2021 filing with rates effective 1/1/22. Management is continuing to work on a strategy to potentially stay out of this upcoming case through unprotected ADIT, and cost savings and CAPEX-related deferrals. Rates have increased ~1% since 2019 and management expects a small increase should they file in 2021,

BMO Capital Markets

- In addition to the 1,100MW of scheduled retirement's at Oak Creek (units 5-6 2023 and units 7-8 2024), WEC sees an additional 300MW of retirements to be identified in the next year. Its 5-year ESG plan includes ~$600mm of undepreciated book balance which represents ~2% of total assets and ~5% of WI rate base.

XEL – (Market Perform, $70 Price Target)

- Management remains very comfortable with the 5-7% LT EPS CAGR range. The incremental capex from its MN R&R proposal could drive above the range but management remains mindful of its credit position and will fund any increase with the appropriate amount of equity.
- With the possibility of several LDCs hitting the market in the next year, we think it's more likely the company will focus on organic opportunities rather than M&A. Management noted they have benefited from a higher than average P/E multiple given their focusing on growing organically and the ability to build at ~1x rate base vs purchasing at 1.5-2x rate base. Management does believe scale and consolidation led by premium companies will take place, but it remains difficult due to social and regulatory issues.
- Entering 2020 XEL forecasted a modest increase in O&M which is now down YoY led by initiatives to offset COVID-19 impacts. Management believes their O&M efforts to combat COVID-19 impacts have likely brought forward their cost program and with technology they would expect it to pay dividends long-term. YoY we should expect to see a flattish O&M profile.

Gas/Power Infrastructure – Market Overweight

November 11, 2020

UTILITIES & POWER

EEI takeaways – more conviction in bullish views

- **Premium utilities remain strong and the laggards are catching up fast**
  Nearly all of our meetings at EEI were positive this year. Rate base growth keeps rising, regulation has stayed broadly constructive and earnings growth rates are seeing upward bias – NEE, NI, CNP, SO, DUK – among others have all suggested higher EPS growth. The premium ESG friendly utility stories keep getting better. And the discount value names are becoming more and more investable. Diversified utilities are de-risking their business mix (D, PEG, PPL, EXC, DTE, CNP). Project and regulatory risk companies like SO, DUK and SRE have better visibility. The CA utilities (EIX, PCG) are nearing the end of a manageable fire season. Even the gas LDCs finally got some positive datapoints with CNP's plan to sell some of theirs and positive tone from owners and potential buyers at the conference. **Utilities have been led by the high quality ESG leaders, but it feels like the pack is starting to catch up.**
- **Is the GREEN trade still good? Yes**
  The transition to renewables from coal continues unabated. We had several announcements at EEI and earnings – AEP, WEC, LNT, etc. The GREEN trade is spreading to a broader group of companies and becoming a key part of most utilities' plans. Most see a Biden Administration and Congress being supportive even with no blue wave with potential for renewables tax credit extensions at the very least. NEE sees acceleration of general business credits as N-T stimulus driver and NEE/FTS highlight transmission as another driver of more renewables. Offshore wind will also be a key growth area for ES, D, AGR and maybe PEG – even if BOEM siting somehow goes bad this week (11/13 decision), there is a Biden "put" once he takes office.
- **Business mix de-risking a bullish theme – PEG, EXC, DTE, CNP**
  DTE and EXC both announced plans to separate their non-utility businesses this earnings season. This follows D, PEG and PPL in Q2. CNP/OGE are a matter of time and SRE is considering small steps for LNG. We are bullish as we see multiple expansion as these transactions come to fruition. PEG, DTE and D all had very positive stories at EEI. EXC is a bit early but likely has the most upside and we came away more confident they will take action on the YE call. CNP has been an amazing turnaround story even before any ENBL action which we think is just a matter of time.
- **Gas LDC debate, CA utilities, FE, and NEE/EVRG**
  The tone on gas LDCs has improved. CNP plans to sell some of theirs, which many thought was not feasible a month ago. High quality utes like XEL and WEC speak constructively of theirs and XEL said willing to buy if overlapping. This is constructive for names like NI and CNP. EIX and PCG stories sounded constructive as fire season has been noisy but with limited damage – see our PCG upgrade note. To the negative, our FE meeting left us expecting more shoes to drop – see our note here. EVRG had another noisy conference with the quickly squashed NEE merger story. And investors are getting dizzy from the monthly NEE merger rumor.
- **Ideas: EXC, PEG, EIX/PCG, CNP, NI for value; D, NEE, DTE, ES for growth**
  We see EXC and PEG re-rating as they execute on their de-risking transactions in 2021. CA is nearing the end of fire season and we think it's the right time to buy EIX and PCG. CNP continues to be a great turnaround and NI is low-risk and cheap. On the quality side, we like the growth and clean energy plays at NEE/NEP, D and ES.

Please see full report for individual company takeaways

EEI – What's Hot and What's Not

What's Hot

EEI from home – got my weekend back
Becoming pure play utilities; business mix de-risking
Everyone's an ESG winner
Gas LDCs – not going away, weakness overdone
Storage and Hydrogen
IRPs and RFPs are bigger events than rate cases
Offshore wind – concerns and delays but it's not stopping anyone
EVs and electrification
Equity needs – more to come in 2021 – NI, ETR, AEP, ED, EIX, NEE, PCG, AGR

What's Not

NEE merger stories with someone
FE and Ohio
Midstream
Diversification
Big financial impacts from COVID

EEI takeaways – one line per company

AEE – Solid story, we think EPS growth of 6-8% into mid-decade, renewables upside possible
AEP – A lot of talk on renewables opportunities; but still unclear how much will be owned
AES – Management saying all of the right things; story sounds promising, watching financial discipline
AGR – Still a lot of work to do to build credibility; financing uncertainty, weak credit metrics; worried on offshore returns
AWK – Fundamental growth story with no end in sight; recent rate case execution was key
CMS – Impressive cost cutting in '20, continued cushion in hitting numbers; committed to growth in LDC biz
CNP – Story sounds awesome; new management team making a world of difference
D – Solid meeting; management understands that consistent execution is key to re-rating the stock higher
DTE – Not missing a beat post midstream spin; still targeting high-end of 5-7% EPS growth with strong B/S
DUK – Confident tone on NC legislation; several data points coming up in the next month or two
ED – Still not much to get excited about; Midstream separation seems inevitable, timing lot less clear
EIX – Bullish tone on CA, solid defense of the stock and clear messaging
ES – EPS growth of 5-7% from core biz intact; BOEM, offshore delays NT overhang but Biden tailwind
ETR – Constructive outcomes expected from the AR and LA FRP extension requests
EVRG – Messy meeting in the midst of Elliott/NEE noise; sticking with standalone plan, but investors hesitant on STP process
EXC – Constructive tone on IL legislation in '21; our sense is ExGen spin decision will be made by YE call
FE – Downbeat meeting; seem to be bracing for more shoes to drop; confident in liquidity, but no assurances on regulatory front
FTS – Lots to like with leverage to transmission buildout around renewables in Midwest; regulatory resolution in Alberta, soon in AZ
LNT – Capex sweet spot with no equity needs and 5-7% EPS growth; lots of rate-based renewables
NEE/NEP – Ideal election outcome, focused on renewables-related policy changes in Biden admin.; more bullish on NEP; little more guarded on M&A
NI – Talked down potential LDC sale; 7-9% growth on track, confident on financing, execution
OGE – Frustratingly shy on details about ENBL
PEG – Upbeat meeting, confidence in regulated growth and asset sale execution; offshore wind decision coming soon
PCG – Reasonable job so far during wildfire season; new leadership to be announced soon
PNW – A lot of things to like but still cautious on AZ regulation

POR – Board review of trading losses still pending; will there be an equity need next year?
PPL – Announcement on UK sale in 1H21 appears on track; use of proceeds remains unknown
SO – Confident on Vogtle schedule; sees 6% EPS growth once past near-term Vogtle penalties
SRE – utility growth a highlight, comfortable with LNG/Mexico strategy, LNG financing appearing more likely
WEC – Solid as always; stepping up fleet transition with big coal to renewables shift
XEL – Rate case stay-out and capex upside in MN look promising; supportive commentary of gas LDCs

Estimate and Price Target Updates

Q3 Results Takeaways; Sales Growth Update

Q3 reporting rolled right into EEI so we combine our Q3 results and sales growth data in here. Earnings for the quarter YoY ended up 3.8% better than our estimate of about flat. See Exhibit 4-5 for quarters vs. expectation and guidance changes by companies. See the actual and weather normalized sales data in Exhibits 6-7.

Exhibit 4: Wolfe Research Earnings Estimates vs. Consensus

		Q3 2020		Q3 2019A		Q3 2020		2020 Midpt	2020E		Guidance Updates

Company Summaries

AEE: Waiting on MO RFP

- **2021 guidance, 2021-25 capital plan, rate base and EPS growth expected on Feb call.** AEE's 2020-24 capital plan of $16B implies 8.7% rate base growth and drives 6-8% EPS growth. However, the utility sees over $39B of investment opportunities in 2020-29. On the YE20 call in Feb, AEE will provide 2021-25 capex. AEE's preferred option in its MO Integrated Resource Plan calls for 1.2 GW of solar/wind by YE25, but whether that would be additive to its rate base and EPS growth outlook remains to be seen. Regardless, AEE's investment opportunities suggest at least 6-8% EPS growth into mid-decade.
- **MO RFP for solar/wind.** AEE currently is conducting a RFP for its solar/wind needs, considering not only the lowest cost to customers, but also execution risks, deals with landowners, MISO interconnections and other factors. AEE expects to negotiate with the bidders and will provide an update on the YE20 call, but management suggested it may be too early by then to incorporate RFP-related investments, if any. AEE does not need to wait for PSC approval of its IRP to determine which option to pursue.
- **MO rate case in 1H21 but recent regulatory outcomes have been constructive.** AEE plans to file MO rate cases sometime in 1H21, with the 700 MW ($1.2B) of wind projects expected in-service by 2Q21. AEE's last two rate cases were settled, as were other regulatory proceedings, including CCNs for said wind projects. MO constitutes just under half of AEE's rate base and over 8% rate base growth through at least 2024.
- **IL formulaic framework has provided stability but low ROEs.** The current 30Y Treasury yield is a headwind on electric distribution ROEs (every 50bp = $0.04) under IL's formulaic framework, but management believes it can mitigate the impact. Despite the low ROEs, the framework has provided stability. AEE proposed legislation that included an extension of the framework beyond its YE22 sunset and an increase in the ROE formula by 100bp. However, comprehensive energy legislation is unlikely this year. Still, AEE expects the state to address energy legislation next year, given the priorities of policymakers. Even if the framework ends, IL electric utilities have decoupling, bad debt recovery and allowed ROEs that could be in the mid-9s vs the mid-7s implied today.

AEP: What comes after the precipice?

- **Still would be disappointed if not on the upper half of 5-7% EPS growth target.** AEP introduced 2021 guidance of $4.51-4.71 vs then-consensus of $4.65, and provided 2021-25 capex of $37B, implying 7.4% rate base growth. AEP repeated that it would be disappointed if it does not achieve the upper half of 5-7% EPS growth, despite the midpoint of 2021 guidance implying 6% growth off the expected 2020E of $4.35. North Central Wind ($2B of rate base) is expected to be completely in-service by early 2022, slightly slipping from YE21 target. We updated our 2020-23E to reflect the latest disclosures; our 2020-23E are now $4.35/4.62/5.00/5.29 vs $4.34/4.68/5.03/5.29 previously.
- **AEP expects to own majority of renewables additions to system.** CEO Nick Akins last month said AEP is on the "precipice of transformational change to renewable resources." AEP now projects 8,029 MW of wind/solar resource additions onto its system in 2021-30. AEP sees the majority of those opportunities being owned by AEP, including NCW's 1,485 MW and other identified renewables projects totaling 475 MW.
- **Leadership changes reflective of strategic execution and portfolio optimization goals.** AEP recently shuffled senior management, with Lisa Barton becoming COO (from her EVP of Utilities role), Brian Tierney becoming EVP of Strategy (from his CFO role) and Julie Sloat becoming CFO (from her SVP of Treasury & Risk role). CEO Nick Akins said he plans on being around for a while, but the changes are part of a years-long succession planning. AEP believes the new leadership roles will facilitate execution on its strategy and manage/optimize

the portfolio. We anticipate underperforming subs, such as Kentucky Power, could be used to mitigate the equity needs for NCW in late 2021, early 2022.

- **Transmission needs.** Given the fleet transition and move to renewables, more transmission will be needed. AEP's transmission business is its largest segment after growing in the double-digits since 2016, and robust growth is expected to continue.
- **AEP confident that FE issues won't have negative implications on OH regulation.** Despite the headlines out of OH this year, AEP believes it is in good shape. AEP has not seen any impact on the regulatory environment or in its ongoing rate case in OH.

AES: Saying all of the right things

- **A leader in the transition to a clean energy future.** Over the past few years, AES has aggressively ramped up its growth capabilities in renewables and through other clean energy / digitization investments. Management's messaging has been extremely effective, in our view, and we think there could be more upside if the company can continue to execute and create tangible benefits through its strategic alliance with Google, investment in Uplight, etc. The one thing we remain a little wary of is financial discipline given just how much growth AES has/is pursuing and in a relatively short period of time.
- **Fluence value marker still expected by yearend.** Fluence is in the midst of a capital raise where both AES and Siemens intend to sell down a 5% stake in the company. The idea being, to provide a value marker for investors and set Fluence on the path toward an IPO in a few years. On the latter, AES mentioned adding an independent financial investor to the Board of Fluence would be beneficial from a governance standpoint and help establish Fluence as a standalone company. We recently updated our S-O-P to include value for Fluence and ascribe $1/sh. for AES' 50% stake in the company.
- **Positioned well out of the election.** Heading into the election, AES had pitched itself as a big beneficiary in the event of a Democrat sweep. For now, that doesn't appear to be the outcome, but AES still sees a lot of potential under a Biden administration. Specifically, management thinks it is likely to see an extension of the PTC/ITC and is hopeful for an ITC on standalone storage. This could all culminate in helping accelerate the adoption of renewables where AES sees itself as a big beneficiary. AES recently bought a wind team located in the US to better position itself to take advantage of future growth opportunities in both solar and now wind.
- **In the final stages of IPL's RFP.** IPL is toward the tail-end of the RFP/IRP process in Indiana where there is the potential to add 600 MW of renewables to replace retiring coal units. AES is hopeful to do most of this through rate base and expects to have clarity by the Q4 call in February.
- **Making some progress on LNG.** AES is close to signing contracts for an additional 20% of its excess LNG capacity in the Dominican Republic (another 20% remains, with more under construction). This could be worth as much as $0.02 of EPS, which would likely contribute to earnings starting in 2023. We expect to hear more hear on the Q4 call when AES rolls forward its guidance through 2024.

AGR: Big new plan, but still lacking visibility

- **Last week's Analyst Day set new 6-8% EPS growth trajectory through 2025, but funding plan uncertain.** AGR laid this out in detail just a week ago, with new CEO Dennis Arriola highly focused on execution and setting a track record of hitting financial targets. The long-term growth plan factors in accretion from the PNM deal (3%), where there was at least some transparency on assumed financing ($3.6B equity / $700M debt). However, the lack of visibility on the long-term funding plan was odd. Mgmt. seemed to indicate there would be some level of equity issuances, but was reluctant to commit to an amount.
- **Weaker credit metrics also not comforting.** AGR is targeting 14.5%+ FFO/Debt on a pro forma basis while maintaining solid investment grade credit ratings. While the PNM merger

helps move the company toward being 85% regulated, we view that as a relatively weak balance sheet for a diversified company pursuing offshore wind in a meaningful way. Mgmt. hopeful that other ratings agencies adopt S&P approach and view AGR as core holding of Iberdrola with tethered rating.

- **Focused on improving earned ROEs.** This is a key focus area after underearning in recent years. The New York rate case settlement is expected to be approved by year-end, with rate relief a big driver of growth, and vegetation management helping to deal with storms. In Maine, CMP has been under a 100bps ROE penalty, but is currently hitting all its metrics to see this lifted in September 2021. The final NECEC permit from the Army Corps was a positive and construction is expected to start imminently.
- **Offshore wind process finally set to move forward.** Unclear if BOEM issues a timely EIS later this week (11/13) or COP next month (12/18), but believe there is wide support for 1x1 nautical mile spacing and nascent industry is set to get off the ground. We're a little worried on potential returns given delays and bid prices, however improvement in turbine technology and site synergies between Vineyard/Park City helps offset. Mgmt. pointed to targeting unlevered returns that are shy of regulated rate base ROEs, but on a levered-basis would be in the 'teens.
- **Dividend growth still on hold.** AGR has been holding its dividend flat as it remains above its payout ratio target. Mgmt. is hopeful to potentially revisit growth around after the 2022 time frame.

AWK: Fundamental growth story with no end in sight

- **More upside to go?** Despite trading near all-time highs on a relative and absolute basis, management sees even more room for upside. Underpinning their confidence is decades of investment needs that support AWK's 7-10% EPS CAGR as well as a burgeoning appetite from ESG focused investors to own the stock. This is the reason that AWK has elected to hold off on issuing the $500M of equity that isn't needed until the middle of its 5-year plan.
- **Recent rate case execution has been impressive.** Heading into 2020, this was the biggest question for AWK's stock with rate cases pending in its three largest states – NJ, PA, and MO. Over the past couple of weeks AWK has made a lot of progress on this front by getting a settlement approved in NJ and reaching a settlement in PA. Through the settlements, AWK has been able to maintain its allowed ROEs and even increase its equity ratio in NJ. This hasn't been the norm for most utilities given the low rate environment.
- **M&A preference is muni acquisitions.** With a P/E multiple a lot higher than even other water utilities, we were curious to get management's view on M&A. AWK said it looks at all options, including other IOUs, but thinks the most efficient use of capital is through its municipal tuck-in strategy. While these transactions typically take 2-5 years to close from start to finish, our sense is that the pipeline could continue to grow and potentially accelerate post COVID as a lot of struggling municipalities may find themselves in need of support.
- **Watching NY sale process.** There continues to be noise around AWK's sale of its NY subsidiary to Liberty Utilities (Algonquin). This was ratcheted further by Gov. Cuomo's proposed legislation which would require the NY PSC to do a public takeover study. AWK maintains the belief that the sale will close in 1Q21 and the recent noise shouldn't derail the process.

CMS: Cost savings and capital plan upside

- **Record level O&M savings in 2020 helps build cushion.** Set to achieve $100M in operating savings in 2020, which more than offsets any COVID-related headwinds. Sets the company up to enter reinvestment mode in Q4 and build further cushion for 2021. Leveraging the "CE Way" lean operating system that still has a long runway for future cost cutting opportunities.
- **Michigan regulatory backdrop remains constructive.** Settled gas rate case earlier this year. Electric case currently pending, though ALJ recently recommended higher ROE than recent decisions (10.0% vs. 9.9%). Like being a regular rate case filer, as it gives ability to toggle based on latest sales and O&M trends.
- **Capital plan refresh coming with year-end call.** Will refresh 5-year plan with the Q4 call. Still lots of opportunity for upside spend. Somewhat limited by customer bill. Still see no need for block equity, though possible annual issuance ticks up above the previous $150M/year projection.
- **Fleet transition continues, comfortable with gas business.** Set to add 1,100 MWs of solar by 2024 and 6 GWs by 2040. Will submit next IRP in June 2021, where there could be an opportunity to further accelerate coal shutdowns and add storage to the plan. Not concerned about future of gas LDC business in Michigan – electrification is too expensive for home heating//cooking. Could also look at using gas system and storage fields for RNG and hydrogen in the future. Actually see mix of rate base shifting further to gas (40% from 35%) over time, but seem very comfortable with this.

CNP: Christmas come early

- **The dream team.** Wow, what a difference a new management team can do for a company. We continue to be very impressed with what we hear from CEO Dave Lesar, CFO Jason Wells as well as Special Advisor Tom Webb. Lesar highlighted his background managing companies with a lot more complexity than CNP, which gives him high confidence in being able to hit the top end of the 5-7% EPS growth target year after year. We can't help but recognize some of Tom Webb's blueprint from his days at CMS, which in part facilitated an environment for continuous improvement to help harvest meaningful cost savings over time. We see CNP in a position to unlock a lot of value with this management team at the helm.
- **EPS growth target contemplates a range of potential headwinds.** One of the more impressive things out of Q3 earnings/EEI is that CNP expects to grow 7% off wherever 2020 EPS lands. Our previous thought was that EPS growth would be more muted in 2021 due to equity dilution. However, CNP noted that the opportunity set to cut O&M next year is robust after seeing what the team was able to accomplish this year. Most importantly, CNP's expectation to be at the top end of its 5-7% target annually includes the ability to absorb any corporate overhead/debt that is currently allocated to ENBL.
- **Actively working on gas LDC sale(s).** CNP noted that it had received reverse inquiries with respect to its LDC sale process. The company has engaged advisors and is targeting a sale(s) to close toward the end of 2021 or early 2022. CNP will disclose which property(s) it plans to sell on December 7th. Our sense after talking to XEL is that it would not be opposed to owning an LDC property adjacent to where it currently serves (i.e., MN gas); WEC also provided a similar view.
- **ENBL process might take time.** CNP held all the details on next steps for ENBL until the December 7th Analyst Day**.** Management did caution that the process could take time given that ENBL is a standalone public company. We interpreted this to mean that an actual transaction could likely be a little way away still.
- **Confident on renewable investments.** $1.3B of CNP's new $16B capital plan relates to renewables in Indiana. Of the $3B of capex that was added to the prior 5-yr plan, a little over $500M relates to IRP capital. Management has already had a lot of dialogue with the IURC

and is very confident in getting Commission approval. Our sense is CNP will enter into contracts later this year to kick off the CPCN process at the Commission early next year.

D: Building the foundation for consistent execution

- **Focus going forward is on execution**. Management understands that for D to trade in-line with the highest quality utilities, a consistent track record of execution is needed. CFO Jim Chapman noted that under his purview, the financial outlook includes cushion such that meeting or exceeding annual guidance should be well within reach. We were encouraged to hear that management understands the importance given that, in our view, this is the one missing item D needs to move into the mega premium group.
- **Virginia capital plan is unique.** While not new, it is worth highlighting again – D's clean energy capital program in VA is the best in the sector. The reason being is because the VA Clean Economy Act was prescriptive in what amount of the offshore wind, solar and storage would be owned by D in rate base. The $34-43B of rider eligible capex over the next 15 years has all been deemed in the public interest, meaning there shouldn't be much ambiguity when D goes in for cost recovery at the SCC.
- **Confident in outcome of triennial review.** The one knock we hear on D is some concern over the 2021 and 2024 triennial reviews in VA. On the former, D will file its review next year in March and a decision will be rendered in November. Management is confident it will file a case where no refund is warranted; recall, there is a $50M rate reduction cap in place. The 2024 triennial review won't impact numbers until 2025 and we will be watching the review next year closely for any readthroughs given that there is no rate reduction cap in place at that time. That said, D has long demonstrated an ability to manage the regulatory environment in VA effectively.
- **DESC rate case data point coming.** Intervenor testimony in DESC's rate case was due on 11/10. As of this writing, it has yet to be posted given the government holiday. D maintains that it filed a very defensible case and that once new rates are finalized in March of next year, it will be close to earning its allowed return. Longer-term, D see opportunities to implement a coal transition plan similar to what is taking place in VA right now.

DTE: Not missing a beat post midstream split

- **Still targeting 5-7% EPS growth on pro-forma basis through 2025, focused on hitting high-end.** DTE believes it can continue to grow 5-7% at the remaining pure play utility company following the midstream spin. This is off a pro forma 2020 base, which merely excludes the midstream earnings contribution, and no material expected dis-synergies. Part of this is because DTE already allocated interest and other costs to the midstream segment. This seemed to quell some investor fears. Furthermore, mgmt. pointed to its track record of historically hitting the high-end of 5-7% EPS growth and hopes to continue this going forward. 2020 would mark the 12^{th} consecutive year of exceeding original guidance.
- **Utilities are actually growing faster than 5-7%.** Sees electric operating earnings growth of 7-8% and gas growth of 9%. This exceeds earnings growth, but in the near-term is offset some by the REF roll-off and already issued equity convert ($1.3B). Capex plan largely supported by distribution and renewables investment – hoping to pull forward additional investment. May actually look at potentially accelerated remaining coal plant retirements – currently set Belle River for 2030 and Monroe for 2040.
- **Midstream spin set for mid-2021**. Believe business will be better valued on a standalone basis (as will the utility business). Didn't want to constrain midstream growth potential by trying to hold 70/30 utility/non-utility business mix. Will file Form 10 next year and then see when-issued trading, before official listing. Believe 4x leverage target screens well versus peers. Combined dividend growth of 8-10% post-spin is better than prior plan of 6%. Could do some type of Analyst Day for the RemainCo following the spin.

- **Sticking with P&I business, seeing growth in RNG/cogen**. Cogen business is all 10-15 year agreements with fixed fees and pass-through commodities exposure. Achieving higher returns compared to utilities. Renewables natural gas business is a mix of long-term offtake agreements, hedged low-carbon fuel standard/RINs (~3 years), and some open to market. Expected to achieving 3-5 year simple cash payback.
- **Balance sheet will remain strong.** At the prevailing utilities business DTE plans to maintain a strong balance sheet. Sees minimal equity needs in the 5-year plan post-2022. Currently targeting 18% FFO/Debt, but believe business mix improving to 90% regulated will allow for threshold to be relaxed to ~16%.

DUK: We just got to wait, NC

- **All eyes are on NC.** DUK is currently awaiting decisions in rate cases, a state Supreme Court ruling on coal ash, progress on its NC IRP, and reports on clean energy that could ultimately result in constructive legislation.
- **NC rate cases and coal ash.** DUK expects decisions in its DEC and DEP rate cases in early Jan and Feb, with the NCUC likely approving the settled items (e.g., 9.6% ROE) and ruling on coal ash cost recovery and accelerated D&A. The hearings went well. In a decision earlier this year, the NCUC allowed a return of coal ash spend but not a return on for Dominion. Relatedly, on 12/11 or later the NC Supreme Court is expected to issue a ruling on NCUC's 2018 decision allowing DUK a return on coal ash, which was appealed by the NC AG and NCUC Public Staff.
- **2021, equity plans intact regardless of outcome on NC coal ash.** DUK sees $0.08-0.10 of earnings if no return is allowed on coal ash. But DUK's 2021 guidance midpoint of $5.15 already reflects no return on coal ash. DUK committed to no new equity issuances beyond its plan to chase any credit downgrade, as at least one rating agency has suggested no return on coal ash would reduce its FFO/Debt metric. DUK may issue incremental ATM/DRIP (beyond the $500M/yr through 2022) depending on capital plans.
- **Confident that NC Clean Energy Plan will result in legislation.** Last year, NC Gov Cooper (D) set out clean energy plan goals, including a target of 70% greenhouse gas emissions reduction by 2030 and carbon neutrality by 2050. A two-prong Clean Energy Plan initiative (carbon policy and regulatory reform) is being conducted, with reports expected around yearend or early next. DUK is confident legislation will follow in the 2021 session, even with a divided statehouse in NC, and expects to have significant capex opportunities. Last month DUK raised its 2020-24 rate base growth to 6.5% and its 2025-29 growth to 7%, assuming any scenario under its NC IRP. On DUK's Feb call, management will provide an update on the Clean Energy Plan initiative and legislative proposals.

ED: Not much to get excited about

- **Working to own utility-scale renewables in NY.** ED is working behind the scenes to be able to rate base renewables at CECONY. Management pitched it similar to its effort on energy efficiency and EV infrastructure where initially the utility didn't have a role but is now able to earn a return. This would be a big deal for ED as the state of NY needs 2,500 MW of renewables annually to meet its 70% renewable target by 2030. ED said it has started to get some traction with stakeholders, though nothing is firm, and noted that the pace at which the renewable need to be added make the most compelling argument for ED. This would need NY PSC approval and there is no active document currently exploring the idea. ED said to watch the Reforming Energy Vision (REV) docket as that would be the most likely avenues. Ultimately, it didn't sound like this would come to a head in 2021 and the process would be a bit more long dated.
- **Midstream separation seems inevitable, but timing less clear.** ED said that both MVP and Stagecoach fall in the same category as assets that have since been sold – non-core – as the

political landscape has changed dramatically for gas infrastructure investments. ED does a review of these businesses at least annually and noted that a potential transaction doesn't necessarily need to include both assets. On MVP, ED sounds keen to wait until the project is complete to maximize the value it would receive. Since Stagecoach is a JV with Crestwood Equity Partners, they would be entitled to a right of first offer; there is no contractual limitations to exiting Stagecoach.

- **Capital recycling opportunities in renewables business.** Unlike Midstream, ED sees its renewables development business as core and will continue investing there for the long haul. In the future, ED intends to fund more projects with tax equity given the amount of non-monetized tax credits that it still has to work through. ED mentioned that it would be selling projects over the next 3-5 years to recycle capital and improve returns.
- **Watching COVID impact on NY, Gov. Cuomo legislation.** Customers in arrears greater than 60 days has amounted to a $320M increase vs normal in aged receivables. ED took steps to bolster liquidity earlier in the year and the enhanced cash drag is expected to impact equity plans in 2020 (still up to $600M of block equity by YE). The earnings drag is primarily from foregone late fees that are included in its revenue requirement. This could continue into 2021, so we will be watching this closely. Gov. Cuomo recently proposed legislation which would remove caps for fines related to storm response. A second aspect was to lay out a process for potentially revoking the utilities' franchise agreements.

EIX: Bullish tone on California

- **Stock overreaction to fires given less destruction, liability caps.** EIX sounded bullish on CA, given policy-driven investments in the grid and limited wildfire risk. EIX was surprised by the stock reaction on reports of any fire in its service area, noting that the corresponding decline in the market cap assumes the fire was started by EIX's equipment, damages would exceed insurance and the reimbursement to the Wildfire Fund would equal the decline in market cap. In other words, EIX sees AB 1054 as mitigating fire risk, and the market still doesn't understand that.
- **Bobcat and Silverado fires.** EIX suggested damages from these two fires this fall would be covered by its roughly $1B of insurance. CAL Fire and the USFS continue investigations into Silverado and Bobcat, respectively.
- **Rate base growth of 7%, storage could be modest upside.** EIX projects 6.5-7.6% rate base growth through 2023. Storage could be modest upside, as the state accelerates the onset of additional storage. EIX has some EV (Charge Ready 2) in its plan and would participate in more if available. Electrification is the long-term driver of potential investment opportunities.
- **GRC decision expected early 2021.** EIX suggested the SCE GRC was relatively predictable. The contested items include speed and amount of overhead conductors, wildfire insurance, D&A and incentive comp. EIX expects the CPUC to issue a proposed decision after the new year, with a final decision in 1Q21.
- **Dividend payout 45-55% of SCE earnings; FFO/Debt expected to be 15-17%.** EIX still sees the dividend within 45-55% of SCE earnings. EIX sees only minimal equity needs beyond its $1B related to 2017-18 fire damages. The recent approvals of some of EIX's memo accounts was good to see from a cashflow perspective. The FFO/Debt projections should be within 15-17%.

ES: Take a load off(shore)

- **ES sees 6% EPS growth from core business, Columbia should help.** ES feels good about its 5-7% EPS growth target through 2024, and has indicated growth could be 6% just from the core business. The recent Columbia Gas acquisition should improve growth within the range. There could be upside from AMI in MA and ultimately CT, though unlikely by the YE20 call in Feb, when ES provides 2021 guidance and new 5yr capital plan. ES' growth target excludes any earnings from its offshore wind venture with Ørsted; the 50/50 JV is developing offshore wind projects in New England and NY.
- **Offshore is main focus, given delays and BOEM's final EIS on Vineyard Wind this week.** We and investors asked several questions about ES/Ørsted's 1,704 MW of projects, given the one-year delay in South Fork (130 MW) to YE23 and delays in Revolution (704 MW) and Sunrise (800 MW) to at least 2024-25. Relatedly, on 11/13 the Bureau of Ocean Energy Management is expected to issue a final EIS for AGR's Vineyard Wind offshore wind project, which will include the spacing of wind projects; developers want 1x1 nautical miles, whereas fisheries want more. The USCG is supportive of the developers' proposals. BOEM will also issue a decision next month on Vineyard Wind's COP filing, which will also have implications on ES' projects.
- **Biden administration should be more constructive on offshore; ES to continue bidding**. Under a Biden Administration, ES expects are more supportive BOEM. But offshore wind is driven by state policy, and policymakers in New England and Northeast are supportive. ES said the JV bid into the NY RFP last month; but it will only proceed with projects if ROEs are in the "mid-teens."
- **CT noise has quieted down, performance-based rates fair.** There was a lot of political pushback in CT, following the a spike in customer bills and ES' response to Tropical Storm Isaias. The CT legislature passed a bill that included refunds/penalties, but it was not as bad as feared. The bill directed CT regulators (the PURA) to implement performance-based ratemaking by mid-2021. ES' next CT rate case is expected to be filed sometime in 2H21, and ES will incorporate PBR into its filing.

ETR: Après le déluge, recovery

- **History of storm cost recovery, securitzation.** With several Hurricanes hitting ETR's region this summer/fall, storm costs will top $2B, mostly in LA. ETR expects securitization and has a lot flexibility. ETR would like to roll up all the costs and go through one proceeding. No major opposition is expected, given the history of storm cost recovery. ETR noted its customer rates are the lowest in the country, and the bulk of the storm costs are in LA, which has the lowest rates among ETR's subs. Securitization probably adds less than 1% rate increase. The rating agencies appear to understand the temporary hit to FFO/Debt.
- **Settlements on FRP extensions expected.** ETR is in settlement talks in both AR and LA for extension of the formula-rate plans. ETR anticipates some puts and takes but is confident the parties ultimately settle. In AR, the parties will file an update by 12/4. In LA, an update is expected this month or next. Final decisions are expected in 1Q21.
- **Equity needs beginning in 2H21; preferreds possible**. ETR's needs are just over 10% of 2020-24 capex, with the first issuance in 2H21. Through 2024, equity needs are expected to total $2.5B. ETR said it plans to get shareholder approval in May 2021 to authorize convertible preferreds, which ultimately become equity.
- **Continuous improvement to create headroom for accelerated capex.** ETR is focused on creating headroom for incremental capex among other things. ETR previously said $2B of post 2024 capex could be accelerated into its 2020-24 plan.

EVRG: Eventful couple of days, but sticking with the standalone plan

- **Committed to standalone STP, despite recent M&A/Elliott headlines.** We met with EVRG mgmt. latter in the day Tuesday, after a number of news headlines had hit. First on Monday, Reuters reported that EVRG rejected a recent $15B bid from NextEra. This was followed up by an Elliott statement pre-market on Tuesday, indicating that as one of EVRG's largest investors, the Board must immediately reengage with NextEra to explore the possibility of a transaction. EVRG subsequently responded to this with a statement that its Board unanimously believes the STP is the best path forward, there's been no change in circumstance, and there is currently no offer or bid for the company.
  - EVRG caveated all this that it is always open to ideas that enhance shareholder value. However, in our meeting it was very clear that the current mgmt. team believes that the Sustainability Transformation Plan is the best risk-adjusted path forward. As of this writing, we've yet to see a further response from Elliott, but it seems likely that this becomes a hostile situation. Though without an active bid for the company, it's not clear what can be done.
- **CEO search still in process and expected to conclude by year-end.** Looking at both internal and external candidates. Current CEO Terry Bassham not planning to leave until a replacement is named. New CEO not expected to revisit STP strategy and don't believe Elliott presence is impacting search.
- **STP process kicking off with no official approvals needed.** There are dockets related to the STP underway in both Kansas and Missouri. While no formal approvals are needed or expected in this process, EVRG views this as a way to get feedback on its plan. Alongside this, EVRG will file IRPs in both states next year (MO on 4/1 and KS on 7/1), which will be more focused on the future generation outlook. Primary stakeholder focus likely to be on rate levels, with EVRG planning to keep below inflation at 2%. Encouraged that KCC Staff found overall capex plan is still in the lower half of utilities.
- **Legislative initiatives focused on securitization and investment deployment.** As part of its longer-term focus, EVRG is planning to transition from its sizable amount of coal in rate base to more renewables. This will require securitization, which will be proposed in early-2021. Mgmt. believes there is stakeholder buy-in, though the near-term plan isn't reliant on this and there is capital plan flexibility from a timing perspective. Moreover, EVRG is focused not just on the cash proceeds from securitization, but being able to use this to fund any future investment growth, so as to mitigate any regulatory lag or earnings shortfall.

EXC: Separation (review) anxiety

- **Update on separation review expected in Feb.** EXC has teams reviewing a potential separation. There are many considerations and it is a complex situation. EXC will have to deal with all of its stakeholders. And the decision will have meaningful implications. Still, EXC suggested a decision is likely by the YE20 call in Feb.
- **IL energy legislation expected in 2021, not a gating issue for decision on separation.** There were 25 working group meetings on clean energy this fall. Although the veto session this month and next has been canceled, EXC expects energy legislation next year. And there is a good chance that EXC's preferred FRR option will be included, given it remains the best way to factor in carbon, which stakeholders want addressed. IL Gov Pritzker (D) had originally opposed a FRR option, but his office has not proposed an alternative. Regardless of the IL legislation, EXC does not see it as a gating issue for making a decision on separation.
- **Biden still focused on climate; but FERC unlikely to change PJM MOPR any time soon**. Biden's top four priorities include climate; that could result in clean energy provisions in a stimulus bill, given the potential for infrastructure and job creation. Under Biden, FERC is still unlikely to have a Democratic majority until after Comm Chatterjee's term ends in June. And

even then, it would take time for FERC to reverse PJM's capacity market rules assuming a presumptive-Chair Glick were to pursue that.

- **Utility segment still solid.** EXC still feels good about its utility businesses, which are wires only and generally operate under reasonable regulatory environments. Multiyear rate plans are expected in MD and DC. IL is the exception for now, given the ComEd DPA. But the regulatory model is formulaic through YE22 for now.
- **IL formulaic framework has provided stability but low ROEs.** The current 30Y Treasury yield is a headwind on ComEd ROEs under IL's formulaic framework. Still, the framework has provided stability. EXC noted the positive benefits to stakeholders, including being one of the largest employers and taxpayers in IL. Even if the framework ends, IL electric utilities have forward test years, decoupling, bad debt recovery and allowed ROEs that could be in the mid-9s vs the mid-7s implied today.

FE: This sounds like it will stay messy; waiting for more shoes to drop

- **Downbeat meeting overall.** In the wake of the termination of former CEO Chuck Jones, this meeting clearly struck a negative tone. Just hours before we met with management an 8K was filed disclosing that the top 2 legal executives at the company were "separated". No color was given on the reasoning or the difference between "termination" and separation". Mgmt. committed to provide updates in the ongoing investigations (both internal and external) and regulatory proceedings, but many investor questions simply couldn't be commented on. The independent Board review will continue to look at oversight and governance. To the positive, there was some comfort given that Acting CEO Steve Strah had distance between himself and what ultimately resulted in the termination of Chuck.
- **Taking steps to maintain financial flexibility.** Pulling back on capex and opex, while holding the dividend flat. Will reevaluate after investigations conclude. Still targeting 5-7% EPS growth through 2023. Delayed 10Q filings as company works through disclosure process – hopes to have it filed by Monday.
- **Feel good about liquidity in various scenarios.** Liquidity stands at $3.4B. Confident will be able to get any necessary waiver from bank group should anti-corruption provisions on debt be triggered. Have history of working with bank groups, including through FES bankruptcy, and believe they remain supportive. If downgraded again by ratings agencies, would see 25bps step-up provision on $4B of debt, but earnings impact is very modest.
- **Numerous proceedings pending at PUCO.** Corporate separation audit will see report published on April 21 2021. Looking at November 2016 thru October 2020 period. Been through audits like this before. Also pending 2018/2019 SEET and Quadrennial review. Continue to have discussions with regulators. Current rate deal (ESP) remains in effect through May 2024 and believe it is good for customers, but could be called in at any time.
- **Ohio legislature looking at HB6 repeal and repeal/replace.** Unclear what ultimately happens here (repeal or repeal and replace) or what the timing will be. However, for FE the loss of decoupling is manageable. Don't expect any blowback from Energy Harbor impacts – bankruptcy emergence wasn't dependent on nuke subsidies and FE only has guarantees around environment liabilities and surety bonds – worth just over $200M. Move to consolidated SEET filings was done through budget bill, but seems unlikely to impact much if reversed either – never been above Safe Harbor threshold.

FTS: No change in outlook under new CEO, strong organic growth prospects

- **Managing well through pandemic year, new 5-year outlook reflects organic growth.** Capital plan fully on track and most of sales protected by regulatory mechanisms or residential (82%). Recently unveiled new 5-year capex plan (~$20B up $800M YoY) and in process of CEO transition from Barry Perry to Dave Hutchens. Remain focused on organic growth with less interest in M&A.
- **Renewables transition and Democratic FERC should be supportive of transmission.** Seeing massive amounts of renewables sitting in MISO/SPP interconnection queues that presents big opportunity for transmission buildout. Could see changes to RTO planning process and potential for advancement of large portfolios of projects (similar to MISO MVP process). Believe focus could shift more towards incentive policies. Like their strategic location of transmission business, given incumbency and where best wind resources are.
- **Expecting Arizona rate case resolution by year-end, then attention shifts to renewables transition.** Waiting on ALJ recommended order any day now. Expecting final decision at ACC open meeting in December. Delays in case have caused regulatory lag this year, but this has been more than offset by favorable weather. Over the summer, filed IRP that laid out transition out of coal (by 2032) and significant renewables buildout. Hoping to establish renewables rider similar to what PNW has proposed in its rate case to help in recovery and avoid lag, while sharing fuel/O&M savings. Overall viewed ACC election results as a good balance (3-2 Republican majority) with continued focus on energy rules, which should align with the IRP.
- **Alberta jurisdiction turning the corner.** Pleased with recent order on transmission-related rate base (saves ~$0.03/sh). Also constructive to see cost of capital proceeding pushed out until next year.

LNT: Rate based renewables buildout continues

- **New capital plan features continued fleet transition.** Refreshed its 5-year capital plan along with Q3/EEI, with more spend continuing to be directed towards renewables as coal plants are shutdown. Mgmt. excited about the new Clean Energy Blueprint in Iowa – featuring 400 MWs of solar, 275 MW coal shutdown, and up to 100 MWs of storage. Still targeting $1.2-1.4B/year in capex (~7-8% rate base growth), which supports 5-7% EPS growth without the need for equity beyond the DRIP (~$25M/year). Indicating there is still a backlog of more renewables to add beyond the Iowa plan and 1 GW of solar in Wisconsin, in addition to ample distribution-related spend.
- **Strong 2020 results despite COVID and record storm in Iowa.** Sales metrics starting to bounce back towards pre-COVID levels now, particularly in Iowa. Derecho storm in Iowa as the worst in company's history, but negligible political/regulatory backlash. Built some conservativism around COVID sales into 2021 guidance. Pursued a number of cost cutting initiatives to hit numbers in 2020 and offset headwinds.
- **Deferred Wisconsin rate case this year and planning to file in 2021.** Pushed out planned 2020 rate filing, using tax/fuel savings to offset needed rate relief for wind and gas investments. Will file in Wisconsin next year, but period of 1-3 years (forward test-year) is still to be determined. Will address recovery of solar additions, retirement of Edgewater coal plant. Have long track record of settlements. Expecting only mid-single-digit rate increase. In Iowa, have renewables rider to recover wind investment, but similar mechanism is not yet in place for solar (though both get advanced ratemaking with higher ROEs).

NEE: Ideal election outcome, strong renewables growth tailwinds; measured M&A commentary

- **Constructive federal and state election outcomes.** Fans of divided government. Biden Presidency sets up positive tailwinds for renewables business. Focused on 3 main issues with new administration: getting rid of renewables tariffs, transmission reform at FERC, renewables/hydrogen tax ideas. Believes there will be bipartisan support for much of this. At the state level, believe Republican majority at House/Senate and PSC sets up for constructive regulatory environment.
    - Addressing unutilized tax credits via general business credits is top of the list in terms of doable bipartisan change. Hydrogen support with something like a PTC is likely longer-term. Standalone battery storage credit is also possible, but more of a "nice to have". Lots of commentary on FERC transmission – NEE likes the Texas format (CREZ) in terms of ISO reform, cost allocation. ERCOT much more efficient than MISO and SPP
    - Biden winning is bad for Mountain Valley Pipeline, but still feel good that biological opinion prevails and project is ultimately built.
- **Renewables business as good as ever.** Scale, pipeline, interconnects, customers, financing – all best in class. Still see mid-teens solar and high-teens/low-20s returns for wind. Not having any construction issues during pandemic.
- **Utility rate case coming next year.** Feel good about FPL as best run utility. Will ask for performance adder. Will try to settle at some point during the process next year.
- **More bullish than ever on NEP.** Recent deal acquired good assts for NEP and allowed NEE capital recycling through KKR. Convertible equity portfolio financing at 6.75% pre-tax IRR is a cheap form of equity.
- **M&A commentary.** Love organic growth prospects and don't have to do M&A. Same rhetoric on requirements: would have to be significantly accretive, doable, and regulatory environment that is constructive or where NEE can make a difference in. Acknowledged not easy to do and will be disciplined. Also acknowledged that following DUK merger stories became more sensitive to shrinking the renewables component of its business mix given the embedded higher valuation it garners. Note: we met with mgmt. prior to the EVRG story.

NI: Ability to execute is well within reach

- **Making the case for NI post-CMA.** With the Columbia Gas MA sale now complete, management is confident in the investment case for NI moving forward. Notably, all of NI's other subsidiaries have continued to execute despite the noise in MA over the last two years. NI highlighted all the safety enhancements that have been made since, a realignment of its management team and a robust dialogue with its revamped Board to ensure that the ability to execute going forward is well within reach. The kicker now is an expansive renewable buildout program in Indiana which is expected to help drive 7-9% EPS CAGR through 2024.
- **Portfolio optimization**. If CNP is successful in selling one or two of its gas LDCs at an attractive price, we believe this will be a nice catalyst for LDCs as a whole and a potential blueprint for NI. At this point, NI doesn't appear to be committed to asset sales in lieu of issuing equity for its renewable investments, though it is open to the idea. We continue to believe asset sales make sense given the size of equity NI needs over the next few years (~25% of current market cap).
- **Flexibility in renewables financing strategy.** Management mentioned that it has received reverse inquiries from parties that are interested in supplying capital for NI's renewable program. This level of interest gives NI confidence in its financing plan. NI does not intend to issue the hybrid financing ($600M-1B) before yearend and noted that it has a lot flexibility for when it needs to actually complete the financing in 2021.

- **Renewables plan looks locked and loaded.** We expect to see CPCN filings at the IURC for NI's recent renewable announcements over the next month or two. NI reiterated that the blueprint for the renewable additions has already been laid out – the early retirement of its Schaefer and Michigan City units were already approved in NIPSCO's last rate case and the IURC has already approved CPCNs for other renewable JV projects.

OGE: Waiting for clarity on ENBL

- **Keeping thoughts on ENBL close to the vest.** Similar to the Q3 call, management refrained from entertaining too many hypotheticals on ENBL but reiterated the recognition of investor preference for pure-play utilities. In a scenario for OGE didn't have ENBL, the sense is that OGE could target FFO/D of 15-18% to maintain the same credit. In general, management does not view a stock buyback as an ideal use of capital in the event that there were to be proceeds available from a sale of ENBL units; ideally that capital would be redeployed into rate base investments.
- **Adding an LDC seems like a non-starter**. In the spirit of theoretical scenarios where OGE had sale proceeds from ENBL and additional balance sheet capacity, we were curious to get management's thoughts on M&A – specifically gas LDCs since CNP has publicly stated the intention to sell one or two properties that would make geographic sense for OGE. Management was clear that LDCs would not be high on its list given sentiment from an ESG standpoint. OGE's focus is on growing the electric business.
- **Ice storm could lead to additional capex.** The recent ice storms that came through Oklahoma were far and away the worst in OGE's history. While the expected cost of the storm hasn't been disclosed yet, OGE has the ability to defer the capital costs and recover the O&M portion through a tracker. When asked on potential capex opportunities in grid resiliency, OGE said it was possible to see some incremental work there in light of the storm; stay tuned for the Q4 refresh. Management mentioned that the political response has generally been supportive of the company.
- **Bullish on L-T load growth.** OGE sees a lot of future sales growth being driven by the industrial sector, particularly defense/aerospace and steel mills. What is also beneficial is that it has the lowest rates in the country, helping attract a variety of businesses to the Oklahoma City area. Weather adjusted load growth north of 1% on an annual basis is still the expectation once we get beyond the impacts from COVID.

PEG: Offshore wind decision soon, confidence in regulated growth and asset sale execution

- **Decision on offshore wind is extremely close.** Originally expected to make decision by now on 25% option in Ørsted's 1.1 GW Ocean Wind project, but continuing due diligence while there have been some BOEM delays. Sees project risk with returns "sufficient, not celebratory". Would only participate if part of a bigger long-term growth opportunity, which seems likely given the direction of public policy, particularly in New Jersey.
- **Regulated growth opportunities still ample.** Sees potential incremental and accelerated capex as part of economic stimulus in state. Strong support for continued gas business investment as part of GSMP program. Recently approved energy efficiency program likely to be extended and is long-term commitment by the state. Drives 7-8% rate base growth. Only limitation seems to be customer bill.
- **Constructive tone on asset sales.** Already seeing interest for the entire portfolio of fossil and solar assets, but will launch sale process in coming weeks. Offer prices have been reasonable. No specifics, but indicating that any earnings dilution from asset sales would be very modest. Once beyond the sale, planning to give long-term earnings growth rate for regulated pure play business.

- **Transmission ROE discussion in a holding pattern.** Very small gap between company and BPU and ratepayer advocate, but have been in similar position for a while now. Bid-ask spread on ROE seems to be 9.6-10.0%. If an agreement can't be reached, expect a complaint to be filed. Seems like chances of settlement have fallen on the margin.
- **ZEC process to play out in coming months.** Recently filed second application. Believe nukes need more than $10/MWh. State unlikely to let plants shutdown, but seems possible there is a negative preliminary decision from BPU Staff in December, followed by ultimately a constructive final decision next April.

PCG: New leadership to be announced soon; like risk/reward skew

- **We are upgrading our PCG rating to Outperform from Peer Perform, as we now like the risk/reward skew.** See our accompanying upgrade note.
- **Announcement on new CEO expected soon.** PCG plans to announce the new CEO by yearend, and he or she will have a say on filling in the COO (utility president) and CFO positions. We think the selection will have utility experience. PCG's Board envisions the new CEO will pursue a back to basics approach and implement more technology into operations.
- **Good job so far this wildfire season, notwithstanding Zogg.** PCG has only had its equipment implicated in one fire – Zogg. This is notable, given all the fires this year in CA and PCG emerging from bankruptcy this past summer. There is still a few weeks left in the fire season, but the weather forecast so far is cooperating.
- **Safety certificate expected soon.** The CPUC has yet to issue a decision on PCG's 2020 wildfire safety certificate. However, PCG expects to receive a decision soon, and the 2019 certificate remains in place until the CPUC issues a decision.
- **Equity needs in 2021.** PCG sees $450-750M of equity needs, with the potential for the low end if the company is successful in some noncore asset sales. PCG said its securitization proceeding is on track and expects resolution and issuance by 2Q21.

PNW: A lot to like but still worried about AZ regulation

- **ACC election results finalized.** After sorting through several hundred thousand votes post-election day, it appears that the ACC election races have been called. There were no changes from what the results showed initially – Lea Marquez Peterson (R) won re-election, Anna Tovar (D) and Jim O'Connor (R) are the newcomers. PNW believes the results were constructive as the Republicans maintain a 3/2 majority at the ACC. It is expected that Commissioner Olson will be named Chairman, which means it is likely there will be more discussion directed on retail competition; Jim O'Connor is likely to be aligned with Commissioner Olson on that topic. There is still more work needed to finalize the clean energy rules – we will be watching to see if the new Commission steps back from the renewable portfolio standard that was tentatively agreed to by the current Commission.
- **Approval of Advanced Energy Mechanism is key**. PNW filed its rebuttal testimony in APS' rate case last week and, in our view, the most important aspect was the request for a renewable rider – Advanced Energy Mechanism (AEM). It sounded like support from Staff might be a tough ask, but the Navajo Nation agreed to support the request as part of the Coal Community Transition plan for Four Corners. Surebuttal testimony will be filed on 11/20 where will be interested to see where other parties stand. Absent approval of a renewable rider, PNW would become a serial rate case filer. Related to the rate case, prospect of a settlement still seems unlikely and PNW continues to operate down a fully litigated path.
- **A lot of opportunity for investments in renewables.** PNW is still intent on meeting its 45% renewable target by 2030. This will require the addition of 300-400 MW of wind/solar annually and 350 MW of storage annually (starting in 2022). Ownership opportunities will be decided through all-source RFPs which PNW expects to conduct annually going forward. PNW's current 6-7% rate base growth forecast includes renewable additions but there could

potentially be upside down the road once fossil units retire and the fuel savings can be used to effectively pay for the investments in renewables.

- **Load growth underpinned by robust economy.** PNW continues to expect 1-2% customer growth annually which is expected to lead to weather adjusted load growth of 0.5-1.5% each year. This is a key tenant of PNW's investment proposition as the local economy in the Phoenix area continues to grow even despite COVID challenges. Any load contribution from data centers remains upside to these numbers as well.

POR: Board review of trading losses still outstanding

- **Moving on from Q3 trading losses.** POR is unsure of when the Board's review of its energy trading losses will conclude. That said, management isn't sitting on their hands as is working to get out ahead of what might be in the report – Power Operations is now overseen by CFO Jim Lobdell (Brett Sims, VP of Strategy, Regulation and Energy Supply will take over when he retires), the former Chief Risk Officer from EXC was brought on board to help lead risk management, among other things.
- **Noncommittal on potential for equity next year.** We continue to believe that POR will file a rate case in February next year along with its Q4 earnings report. In doing so, we currently assume POR will issue ~$100M of equity to repair its balance sheet after the energy trading losses to keep its 50% authorized equity layer. Management didn't confirm or deny if this was required, saying that "it's not a black and white calculation…it's a negotiation".
- **Renewable RFP coming in the 1H of 2021.** POR will issue an RFP(s) for 150 MWa of new renewables and up to 600 MW of non-emitting capacity resources. Any capex from the RFP(s) would be upside to POR's current capex program and we expect there to be some excitement around the stock when the process nears an end in early 2022.
- **Well-aligned with the OPUC.** Management touted that the company's relationship with the OPUC, pointing to their swift action in approving their deferral request for Wildfire related costs. Further, POR said it received a lot of kudos in its handling of the Wildfires suggesting that there good be some political goodwill stored with the state.

PPL: Still don't know Union Jack about UK sale but will in 1H21

- **Mum on UK bids; sale announcement expected in 1H21.** Management did not have much to say on its UK sale process but remains optimistic based on the competitiveness and quality of potential buyers. Over the next month or so, UK's CMA will issue a final ruling, the Government will issue a White Paper that could suggest more capex for WPD, and Ofgem will give final determinations in the gas/transmission RIIO-2 and sector specific methodologies for ED. These could give positive momentum to the WPD sale. PPL still expects an announcement in 1H21, with a quick closing, and sees the sale immediately creating shareholder value and setting the company up for longer term growth, with a stronger B/S.
- **Use of proceeds**. PPL's base case with the use of proceeds is a share buyback. But management remains interested in acquiring utility assets, either directly or through a swap with a WPD buyer**.** Electric utilities remain the preferred target, but electric/gas combos would also work. And renewables could fit, especially given PPL's cash taxpayer status after the WPD sale and PPL's ESG profile.
- **KY fleet transition to take time.** The biggest fleet transition opportunity for PPL is in KY; however, the timing is not imminent. The coal plants, which came online in the 70s and early 80s have useful lives of 55 years or more. One coal plant is relatively new and efficient. and PPL will file a KY rate case this month. Parties have a history of settling rate cases.

SO: Southern charm offensive

- **SO was as charming as always and told a solid story to boot.** Continuing where it left off last month on its 3Q20 call, SO talked about its 4-6% EPS growth. SO said EPS growth is 6%, excluding temporary Vogtle penalties, and that should continue beyond 2024. SO will formalize its updated LT EPS growth target in Feb. And with the $800M of excess cash flow from Vogtle once fully in rates, SO could raise the fund incremental utility growth, raise the dividend faster, paydown debt, or buyback shares. Overall, SO sounded confident in its financial outlook.
- **High degree of confidence on Vogtle completion.** SO's next and second to last major milestone is Hot Functional Testing. SO expects to start HFT on Unit 3 in January. The test will take 45 days (including ramp down). SO expects to update investors on both the start and end of HFT. SO then has many filings (i.e., ITACs) with the NRC; the regulatory agency has suggested quick turnaround, maybe a couple of weeks, on the ITACs. From there, SO can move to fuel load for Unit 3. SO is confident Unit 3 will be in-service in 3Q21.
- **GaPSC Staff likely still adversarial.** SO still expects the GaPSC Staff to be adversarial in its 11/24 testimony in the VCM 23 proceeding. Last June, the Staff said SO's meeting the Nov 21/22 regulatory deadlines for Unit 3 and 4 is "highly unlikely." The upcoming hearings should also shed light on Staff and its experts' concerns over schedule and/or cost.
- **GaPSC commissioners could remain unchanged when prudency review.** With incumbent Comm Shaw winning reelection, and incumbent Comm McDonald in a runoff on 1/5, the likelihood is high that the Vogtle prudency review after Unit 3 is online will be heard by the same currently-seated five commissioners. Recall $3.5B of Vogtle costs have already been deemed prudent. And $2.2B on top of that is presumed prudent. Costs above $5.7B will still have to be shown prudent.

SRE – Executing well, defending diversified biz; LNG financing appears increasingly likely

- **Executing across the footprint.** Management highlighted its execution on strategic initiatives over the past couple years, including the S. American utility and renewable asset sales and successful completion of Cameron 1-3. It has also beat LT guidance numbers.
- **Utility growth is a highlight.** California momentum continues under the 5-year rate deal that gives certainty on growth investment and return for along time. On the LDC side, Sempra remains upbeat on the RNG and hydrogen opportunity as well as the need for natural gas to complement renewables penetration. At Oncor, there continues to be a lot of investment opportunity in a growing service territory. On the TX 2021 rate case, while 2020 will be an unusual test year, the company believes it is in good shape and pointed to recent earnings surveillance reports showing low-9% ROEs.
- **Comfortable with diversified strategy; talking financing alternatives for growth.** While other diversified companies are in the process of divesting their nonutility operations SRE management was clear that it sees value in the LNG and Mexico businesses with natural gas playing a big role in global energy for a long time. That said management continued to suggest the potential for a financing of the LNG operations to highlight the value disconnect between what it sees as embedded in its stock price and recent private market valuations (Cove Point, CQP). Timing and specifics remain unclear.

WEC: Upping the ante on ESG

- **Deeming new capital plan as "ESG".** Focused on efficiency, sustainability, and growth. New $16.1B capex plan over 5 years is up $1.1B versus last year's iteration and supports 7% asset base growth without the need for equity. Significant shift in resource mix – 800 MWs solar, 100 MWs wind, 600 MWs storage being added plus 100 MWs RICE gas; shutting 1,400 MWs coal and 400 MW older gas. Sees storage as more economic now and will help address peak demand periods. Targeting $1B in customer savings from O&M and fuel over 20 years from the fleet transition.
- **Still seeing strong economic growth.** Economic activity has rebounded sharply out of the pandemic. Long-term sales growth outlook down modestly from last year's iteration (1.0-1.3% over 2022-2025 vs. 1.2.1-5% over 2022-2024). However, companies like Haribo are an example of strong economic growth. Also seeing continued customer growth, particularly in the gas business. Importantly, sees very little connection between sales growth outlook and what ultimately happens with Foxconn.
- **Same M&A criteria, not ruling out LDCs.** WEC has the same view on M&A: accretive in year 1, no meaningful balance sheet degradation, EPS growth rate same of better. The latter is the most gating criteria. Wouldn't rule out interest in gas LDCs, but jurisdiction would matter. On it's own LDCs, WEC sees a long runway for the business. Natural gas heating is still necessary given the climates in its states and electrification would be meaningfully more expensive.
- **Infrastructure segment opportunities, but capped at 10%.** Seeing continued potential for contracted renewables – strong cash returns and accretive to credit metrics. Won't let it grow to more than 10% of asset base. Longer-term, could potentially rate base these assets, as WEC looks toward the huge investment need to replace the carbon-free power of the Point Beach nuclear contract in 2030/2023.

XEL: Capex upside in Minnesota looks promising; supportive of gas LDCs

- **Confident in Minnesota.** Management believes it has a pretty good shot in getting another rate case stay-out in MN. Same thing for their relief & recovery proposal that could lead to $1.4B of incremental capex for wind repowerings and solar. A decision on the stay-out request and wind repowerings is expected concurrently in mid-December. A decision on the solar proposal likely won't be until 2Q21.
- **Open to adding a gas LDC**. In light of CNP's announcement to sell one or two gas LDCs, we were interested to get management's view of potentially adding another gas LDC. XEL noted that if the price is right and the ability to get it over any regulatory hurdles was feasible, then management thinks it makes sense. More broadly, XEL doesn't believe gas LDCs are going anywhere anytime soon, particularly in their service territories as it would be prohibitively expensive to electrify home heating.
- **2021 – the year of IRPs.** Two significant IRPs will be in focus next year for XEL – MN and CO. The former has already been filed and a Commission decision is expected in Q1 or Q2. The headline in MN is a full exit of coal by 2030 and a significant amount of renewable additions (3.5 GW of solar, 2.3 GW of wind) in the back half of the decade. In CO, XEL intends to file its IRP in Q1, in which a similar picture is expected to be painted – potential accelerated retirement of the remaining coal and plans for the next renewable buildout in the state.
- **Potential rate case in Colorado next year.** XEL is hopeful to be able to stay out of an electric rate case in CO next year. However, given an ALJ's recent decision to deny its Advanced Grid Rider application, a rate case might be necessary. We expect to get a final decision on the strategy here on XEL's Q4 call in February.

Analyst Certification:

The various Wolfe Research, LLC analysts who are primarily responsible for this research report certify that (i) the recommendations and opinions expressed in this research report accurately reflect the research analysts' personal views about the subject securities or issuers and (ii) no part of the research analysts' compensation was, is or will be directly or indirectly related to the specific recommendations or views contained in this report.

Other Disclosures:

Wolfe Research, LLC Fundamental Stock Ratings Key:

Outperform (OP):	The security is projected to outperform analyst's industry coverage universe over the next 12 months.
Peer Perform (PP):	The security is projected to perform approximately in line with analyst's industry coverage universe over the next 12 months.
Underperform (UP):	The security is projected to underperform analyst's industry coverage universe over the next 12 months.

Wolfe Research, LLC uses a relative rating system using terms such as Outperform, Peer Perform and Underperform (see definitions above). Please carefully read the definitions of all ratings used in Wolfe Research, LLC research. In addition, since Wolfe Research, LLC research contains more complete information concerning the analyst's views, please carefully read Wolfe Research, LLC research in its entirety and not infer the contents from the ratings alone. In all cases, ratings (or research) should not be used or relied upon as investment advice and any investment decisions should be based upon individual circumstances and other considerations.

Wolfe Research, LLC Sector Weighting System:

Market Overweight (MO):	Expect the industry to outperform the primary market index for the region (S&P 500 in the U.S.) by at least 10% over the next 12 months.
Market Weight (MW):	Expect the industry to perform approximately in line with the primary market index for the region (S&P 500 in the U.S.) over the next 12 months.
Market Underweight (MU):	Expect the industry to underperform the primary market index for the region (S&P 500 in the U.S.) by at least 10% over the next 12 months.

Wolfe Research, LLC Distribution of Fundamental Stock Ratings (As of November 10, 2020):

Outperform:	50%	3% Investment Banking Clients
Peer Perform:	38%	2% Investment Banking Clients
Underperform:	12%	0% Investment Banking Clients

Wolfe Research, LLC does not assign ratings of Buy, Hold or Sell to the stocks it covers. Outperform, Peer Perform and Underperform are not the respective equivalents of Buy, Hold and Sell but represent relative weightings as defined above. To satisfy regulatory requirements, Outperform has been designated to correspond with Buy, Peer Perform has been designated to correspond with Hold and Underperform has been designated to correspond with Sell.

Key Topics and Recent Market Dynamics

Earlier this week, we hosted virtual meetings with CNP & NI management teams and investors during the Virtual EEI Financial Conference. The investor focus was on potential divestitures of gas utilities to fund electric utility & renewable growth capex. NI also discussed potential impact on its gas utilities during the heating season as most of its residential volumes are decoupled (fixed margin) and it likely would not be able to offset potential declines in C&I volumes with higher residential volumes. That said, since the vaccine news were announced on Monday we have seen some rotation to LDCs as with the potential vaccine later this year the risk of the lower earnings due to the COVID has deteriorated. Additionally, with a potential for a GOP majority in Senate the pace of energy transition may be slower than some anticipated in the "blue wave" scenario.

Takeaways from NI Meeting

During the call with NI's management team, investors asked about the COVID impact, cost reductions and if management would consider selling a gas utility instead of previously discussed hybrid financing and equity funding. NI noted that it will evaluate all options. Management continues to monitor the COVID impact, but noted that C&I sales have been back to normal and they haven't seen any material impact on its C&I customers from any financial distress. Bad debt has increased YOY, but NI has recovery mechanisms in place if the level is above normal, but that could have near -term cash flow impact. Management spent a lot of time talking about its renewable investments, cost reductions (flat O&M going forward) and safety initiatives (also including AI).

Takeaways from CNP Meeting

During the meeting with CNP's CEO, the investor focus was on recently announced plan to sell 1-2 gas utilities to fund $3B of incremental capex without a need for an equity block offering. CNP didn't specify which LDCs they would sell but they plan to provide more colour on which LDCs they are targeting, potential tax leakage and how the post sale balance sheet would look like during the Investor Day on December 7th. Notably, management also plans to use DRIP and ATM to fund future capex. Management noted that it continues to evaluate the options with Enable, but the potential sale would not impact the announced EPS growth range. CNP emphasized strong organic growth at Houston Electric and that it continues to work on improving its relationships with Texas PUC. CNP targets 14-15% FFO/debt and it works with credit rating agencies to rebuild the credibility as it executes on its sensibly funded capital program. See changes to CNP estimates on page 2.

Updating Estimates

We are updating CNP estimates with 10Q and recent announcement of incremental $3B of capex in 2020-2025. As a result, we are increasing our estimates and price target to $24 from $23. Our price target is based on 2022 estimates and sum-of-the parts valuation.

Figure 2: Changes to Estimates

	Price Target		2020e EPS			2021e EPS			2022e EPS		
Ticker	New	Old	New	Old	% Change	New	Old	% Change	New	Old	% Change
CNP	$24	$23	$1.34	$1.37	-2%	$1.41	$1.37	3%	$1.52	$1.45	5%

Valuation Method and Risk Statement

Risks include, but are not limited to, the following: changes to the regulatory environment, ability to achieve favorable returns on investment projects, and ability to continue to reinvest in the business for growth. We use SOTP of P/E multiples for Regulated Assets and EV/EBITDA for non-regulated assets to calculate our price targets.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 11 November 2020 10:06 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	50%	31%
Neutral	FSR is between -6% and 6% of the MRA.	38%	29%
Sell	FSR is > 6% below the MRA.	12%	19%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 September 2020.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Aga Zmigrodzka, CFA, Brian Reynolds, Shneur Z. Gershuni, CFA.

Company Disclosures

Company Name	Reuters	12-month rating	Price	Price date
CenterPoint Energy Inc[4,16,20]	CNP.N	Neutral (CBE)	US$24.10	10 Nov 2020

Source: UBS. All prices as of local market close
Ratings in this table are the most current published ratings prior to this report. They may be more recent than the stock pricing date

4. Within the past 12 months, UBS AG, its affiliates or subsidiaries has received compensation for investment banking services from this company/entity or one of its affiliates.
16. UBS Securities LLC makes a market in the securities and/or ADRs of this company.
20. Because this security exhibits higher-than-average volatility, the FSR has been set at 15% above the MRA for a Buy rating, and at -15% below the MRA for a Sell rating (compared with 6/-6% under the normal rating system).

Unless otherwise indicated, please refer to the Valuation and Risk sections within the body of this report. The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor’s individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse

Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice. UBS Evidence Lab may provide services to other internal and external clients.

The disclosures contained in research documents produced by UBS AG, London Branch or UBS Europe SE shall be governed by and construed in accordance with English law.

Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliarios Ltda, UBS Asesores Mexico, S.A. de C.V., UBS Securities Japan Co., Ltd, UBS Wealth Management Israel Ltd and UBS Menkul Degerler AS are affiliates of UBS AG. UBS Financial Services Incorporated of Puerto Rico is a subsidiary of UBS Financial Services Inc. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain and does not undertake banking or investment business activities in Bahrain. Therefore, clients have no protection under local banking and investment services laws and regulations. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This research report is neither intended to be distributed to PRC investors nor to provide securities investment consultancy services within the territory of PRC. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. george.wang@citi.com

- Over the last four days we hosted interesting investor meetings with management teams from 16 utilities. In this note, we address key takeaways from days 3 and 4: we met with ED, PPL, NI, CNP, PNM, CMS, ES and ETR. For days 1 & 2 takes, see 2020 Virtual EEI Conference Day 2(Monday) Takeaways & Kicking Off EEI Meetings.

- **Sentiment Is Positive on Gas Utilities, Although Several Assets Are for Sale:** In our meetings with both electric and gas utility management teams, there was overarching theme that the bearish LDC thesis and selloff was overstated. The end LDC customers switching (to electric) timeline is very slow. The LDCs can adopt to hydrogen market via continued investment in pipe replacement. The recent selloff of the LDCs is more driven by ESG priorities than fundamentals.

- **Active M&A Market:** We came away thinking that the potential PPL deal(s) has a lot of execution risks which may be difficult to manage. As the announced PNM acquisition heads toward Feb shareholder vote, a higher bid has potential but not our base case. CenterPoint's has made process in its LDC sale process which leverages the Vectren tax position, VUHI debt, and could announce more details at analyst day for the $1.0 to $1.5B deal. The 2nd CenterPoint LDC sale is unlikely, in our view. In our view, ConEd isn't likely to sell its midstream asset anytime soon given the MVP COD isn't likely until 2022 (mgmt. guidance is 1H21) and Stagecoach partners have ROFR/ROFOs but not great balance sheets. Nisource continues to consider LDC asset sales to avoid equity capital raise, but hasn't decided yet what to do. Lastly, CenterPoint is looking to structure its midstream exit in a manner that addresses allocated corporate debt to avoid rebasing the utility EPS.

- **Election Implications:** Interestingly, the setup for offshore wind permitting is improving as Biden is likely to better staff BOEM as the E&P permitting rush slows (E&Ps rushed for permits ahead of election) – incrementally positive for Eversource and ConEd in our view. Outside of wind, PNM benefited from the ballot initiative in NM and the Biden victory. ETR remains exposed to the runoff election in Louisiana.

- **Interesting Stock Takeaways from Day 3/4:** ConEd reiterates it still plans to raise $600M of equity by YE20 despite few days left. CenterPoint's O&M plan seems credible but the $1B bonus capex (above the $3B raise) is aspirational. CMS was seeing some sign of upside to its load forecast due to indoor agriculture. Entergy may have some opportunities for PPA buyouts (why does it still have a PPA from 1968?) even though the $2B storm cost recovery was focus. NiSource's $0.05 2021 EPS COVID impact may be conservative as the new vaccine improves load outlook.

- **Stocks:** We came away marginally more positive on CNP and NI, but slightly more concerned about PPL and ED. Our meetings earlier in the week left us positive on PCG despite increased concern about the safety certificate, and more positive on DTE.

Consolidated Edison

- **Midstream Portfolio Likely to Be Monetized but Not a Near-Term Decision:** Seems more a question of when than if. The ED team highlighted that they are waiting for the right market environment to execute on a deal, at these valuations a midstream deal doesn't seem likely. We hosted a call with regulatory expert, Brandon Barnes (Senior Energy Analyst – Litigation, Bloomberg Intelligence), today about MVP and left with the view that the earliest this could be in service is 2H 2021 but was not likely to be finished until 2022 (optimistic that it would reach completion). Until MVP is in service, we doubt ConEd would sell as it would be hard to get a good price. For Stagecoach, Crestwood, backed by First Reserve, has draft along and tag along rights for that asset. Crestwood don't have the balance sheet to buy Stagecoach currently and it is not a great market to sell to another party. If MVP sale isn't likely for a couple years, ED is in no rush to sell Stagecoach (would still be a pipeline owner).

- **Offshore Wind Transmission in Long Island:** ED submitted a bid to construct underwater transmission infrastructure for Sunrise wind 1 and onshore transmission infrastructure for Sunrise 2 as part of the NYSERDA RFP in October. ConEd is taking a conservative approach to wind development. In our research note, Global Offshore Wind - Change is in the Air, we highlight that return expectations are likely come down for off shore wind developers.

- **NYS Challenging Business Environment:** Recently, the NYS Governor issued language on utility reform. In short, the proposed legislation would remove caps on utility fines and penalties, create salary caps on executive compensation and allow for municipalization of utility infrastructure. Shareholders would be compensated to the amount of invested equity capital if a utility loses its franchise.

- **COV 19 Impact:** ED continues to fund under collections from customers via commercial paper and will issue $600m of planned equity sometime this quarter. To the degree that they cannot be made whole on the ~$200m of bad debts they would likely come to market and issue incremental equity at the regulated cap structure levels ~48%, which would likely come in 2022. Current financing plan calls for $1,100m of equity over 2021/22.

- **RNG Pilot Program and Hydrogen:** Con Ed is running a pilot program with RNG in their gas LDC. When we asked about the potential to support hydrogen, they indicated it is early days and would need to replace pipes with polyethylene.

- **Electric Vehicles:** Con Ed is allowed to have the meters and hookups in place to serve charging stations, however legislation would need to pass in order for ED to own the charging infrastructure.

CenterPoint Energy

- **BREC Objectives:** High level BREC objectives include being oriented towards electric and regulated business, 1-2% O&M decline outlook, $3B of new capex, 10% rav growth, ~7% earnings growth, and steps to improve regulatory relations. It also plans to reduce the midstream exposure and narrows its footprint by selling 1-2 LDCs.

- **Selling 1-2 LDCs for $1.0-1.5B in Tax Efficient Manner:** CNP identified one asset for sale but is staying vague to attract a good amount of inbound interest and reverse inquiries for its LDC assets in the marketplace as part of its BREC process, which should introduce more price discovery for various LDCs within its portfolio. There is little concern for the regulatory approval process towards the utility LDC M&A as management thinks the selected LDC resides in a friendly M&A regulatory environment. There will be some tax leakage expected but CNP will try to address that with strategic tax planning as the legacy Vectren assets have a higher trapped tax basis which could be used to offset tax leakage. The VUHI (Vectren Utility Holdings Inc.) debt restructuring is also part of the strategy. Remember, restructuring the VUHI was been an obstacle that CNP hasn't been successful in restructuring since the VVC deal. In our view, the PG&E restructuring was much more complex and CNP should be able to address given the new financial management. Management expects to reveal more details on the sale specifics in the upcoming December analyst day.

- **More Details on O&M Cost Reduction Plan:** CNP guided 1-2% annual O&M decline with a list of discreet and long-term opportunities to lower costs. CNP is on track to achieve a 1% cost reduction objective this year. CNP has identified a targeted list this year to lower costs. For example, conversion from coal to cleaner gas and renewables could drive lower O&M. There are also technology related cost levers to pull such as installing new grid and switch technology for the Houston electric. They were new hires including a new head of supply. Overall, management feels confident on the 1-2% reduction on costs on a yoy basis.

- **$3B Incremental Capex and Related Funding:** CNP plans a $3B incremental capex plan with a $1B additional capex, which will be included if CNP runs into challenges. CNP sees $1B additional capex as an insurance plan in case it needs to put more capex into the system, for either electric or gas side. $2B is weighted towards electric with $1B towards gas capex. With a strong regulatory approval backdrop, under $2.5B capex is subject to capital recovery mechanism and only $0.5B of Indiana IRP capex requires commission approval in 2021. Half of $3B capex will be funded through regular company debt. Sub-$1B could come from selling LDCs (selling for greater than book value). CNP plans to use DRIP and ATM issuance for $300mn over 5 years. The rest will be funded through internal CF. There will be no block equity.

- **Midstream Debt Impacts to Utility EPS:** CNP is looking at a few strategies to address the two issues such as negative tax basis and absorbing legacy debt. The allocated debt to midstream would need to be addressed as it could hurt utility earnings. CNP will try to find a solution to grow and address re-baseline utility earnings growth.

- **Capital Structure:** CNP plans to continue to shore up the balance sheet and be in a better place for the capital structure. It targets 20% parent company to total debt ratio and 14-15% AFFO to debt goal.

- **Hydrogen:** Despite being in the early days, CNP has dipped toes into renewable hydrogen pilots. CNP is planning for a few hydrogen pilots in MN and MS for the next few years (though 2023). For the LDC pipe, CNP believes the system could blend in hydrogen in the low single digit percentage. CNP will be studying and monitoring the hydrogen initiative as it replaces old vintage LDC pipes.

NiSource

- **LDC Valuation Defended:** NiSource continues to consider LDC sales, although not a foregone conclusion, and is part of its financing plan. In our meeting, NI management defended LDC valuation and its defensiveness into a low carbon future. Management argued the negative sentiment and depressed valuation for LDC is overdone with valuation disconnected from fundamentals. LDCs remain ripe for additional opportunities and investment, with RNG in the medium term and hydrogen in the long term. NI still has NOLs through mid-2020s to help with cash tax leakage and sale economics.

- **Load Forecast:** 2021 EPS guidance includes 5 cents of COVID impact, due to bad debt expense, load and O&M. ~60% of the $0.05 is from the gas business and 40% from the electric business. The gas business is less exposed to load impact in the winter than the electric business in the summer.

- **Hydrogen:** NI management thinks there are unknowns on the safety concern front. Its current view is 10-20% hydrogen blending in a modernized system to ensure safety and reliability. Plastics are relatively better positioned to blend in hydrogen, but there are no current plan to build hydrogen electrolyzers. The current focus is to understand hydrogen technology, all in cost structure and economics.

- **Election Impact:** Management views NiSource is well positioned regardless of DC policies. There is room for incremental renewable and hydrogen investment. NI plans to refresh IRP for Indiana in 2021 and 2024.

- **Guidance Reiterated:** NiSource reiterated its 2020 capex guidance of $1.7-$1.8B, and its 2021 EPS guidance of $1.28-$1.36 per share (including $0.05 COVID impact). NI continues to expect its 7-9% EPS CAGR for 2021-2024 (5-7% CAGR for 2021-2023), $1.9-$2.2B of annual capex and $1.8-$2.0B of renewable investments through 2023.

PPL Corp

- **Execution Risk with WPD Divestiture and Use of Proceeds:** In our view, there is significant execution for PPL given they need to find a buy(ers) for WPD, get regulatory approval in 30-60 days so deal closes ahead of RIIO-2, and find a US regulated utility(ies) to acquire, get approvals, and close on that deal without a large timing lag as it become expensive for shareholders to be underlevered for a period of time. There are a large number of potential acquisition targets but management indicated that they would be more inclined to buy an LDC if it is associated with an electric T&D business.

- **Tax Position** – A Biden tax plan unlikely goes through before the closing of the UK business. The management team did point out that the tax basis in the asset is not high, however they will utilize their $1.5B of NOLs and a to-be-disclosed tax strategy to mitigate the tax leakage of the proposed deal.

- **WPD Sale Plan if Standalone Event:** PPL discussed the benefits of a broadly marketed sale of WPD, highlighting the creativity that financial buyers and strategics could offer as consideration. The use of proceeds will likely include buying back equity if there are no other viable alternatives. The hurdle rate of value creation, from management's perspective, is the ability to derive accretion beyond a stock buy- back. The math would ultimately determine whether or not they pursue an acquisition post close. Management opined that they would not be interested in a special dividend at this time. Additionally, PPL would have to make whole ~$1B of callable hybrid debt and $750m of other debt maturing in 2022/24 time frame.

- **Pension Funded Status:** The under-funded status of the pension overall remains unchanged from YE'2019 given the changes in interest rates and broader market dynamics. We would note that the UK pension would part from PPL with the respective UK assets once the transaction closes.

- **Growth Strategy in Kentucky:** A primary objective for the Kentucky business is to transition away from coal to alternative energy. PPL will file its 15-year IRP in Kentucky likely in Q3'2021. Additional opportunities for growth in Kentucky are AMI and grid modernization.

- **UK Regulatory Regime:** CMA decision on water was recently announced. There remains RIIO developments before year end and energy whitepaper for OFGEM. These data points will help inform the buyer universe.

- **Talen Montana Litigation:** Not much new to report. There remains a deposition in Delaware and timing of any settlement is uncertain.

PNM Resources

- **Citi's Take:** We think the value of the PNM business increased since the deal was announced (Biden, NM ballot initiative, vaccine news, etc) and there is a possibility of a new buyer stepping in to top the existing offer ahead of the February 2021 shareholder vote but it is unclear if any strategic will step up. There are a lot of potential US acquisition targets (CNP's LDC, NI assets?, AEP Kentucky, etc) so not clear if strategics involved in the PNM process earlier in 2020 would still be interested. Management continues to work toward the closing of this transaction, believes it is likely to get approval from regulators and shareholders, and selected the AGR offer on the table because it was cash, credible, and had a lower risk of closing.

- **Reason for the Sale of the Company:** We discussed in depth the rationale for the sale of the business. The company continues to point out the balance sheet weakness and its heavy dependence on the equity capital markets to fund its growth, and the advancement of ESG.

- **Why Sell to AGR?** The attractiveness of the offer on the table came down to a perceived ability of the buyer (AGR) to close on the deal. AGR has a strong balance sheet, sponsor support, track record in New Mexico and Texas which some add synergies, the buyer's management experience with Sempra, and the deal being viewed as credit positive for the business. We were concerned that it was negative signal that PNM accepted a cash offer over stock, but management discussed the buyer's preferences and the motivation of their sponsor, which led to this deal structure.

- **Regulatory Approvals Risk:** In our view, there is some risk that the deal closes with the two states, New Mexico and Texas. New Mexico is a net customer benefit state and there is history of approvals with El Paso. The recent ballot initiative and future changes at the commission, in theory, should not impact the decision making process but practically there might be some new risks. We would expect to see some noise with interveners and other parties. Also in New Mexico, there is a 600MW project owned by the buyer but that should not matter from a market power perspective. In Texas, we have more concern given PUCT history with M&A, preference for local ownership, Texas utility industry history with bankruptcies, and ring fences issues the past. This deal has unique elements but Texas isn't always the easiest market to navigate.

- **Dividends Likely to Increase:** One attribute of the deal for the sellers is that PNM could potentially raise its dividend in 2021 consistent with prior guidance despite the deal being as cash deal.

CMS Energy

- **Long-term Load Expectations:** CMS continues to guide long term load as flat to down. There are wildcards to this thesis such as electric vehicle adoption and indoor agriculture. The state of Michigan recently passed legislation allowing for commercial grow operations of marijuana. There is implication on both of these fronts for future electricity demand.
- **Political Landscape of Michigan:** Post the election, the political environment of Michigan remains largely unchanged with the same split in the legislature. The Governor has two years left in her term. Management believes it to be unlikely that we see any major infrastructure bill in 2021, as the political agenda is more focused on roads, schools and public works.
- **Rate Design in Michigan:** CMS will file its electric rate case in Q1 next year. The rate case is predicated on a forward test year, in this instance it will model rates for 2022. This a positive, given the challenging environment of 2020. Additionally CMS has decoupling on the gas side of the business for about 4 months of the year, this does not occur in the peak months of gas utilization.
- **Aviator Deal – New Customers Coming:** The Aviator Wind acquisition earlier this year was sourced with existing relationship and there is a line of sight to growth with new customers.
- **Early Days Is an Understatement for Hydrogen:** CMS views the hydrogen campaign as something 10- 20 years away. In order to implement use of 100% hydrogen gas, virtually all customers would need to convert their furnaces, hot water heaters and other home utilities. Management believes the more expeditious way to decarbonize and use less natural gas is through incentivizing 95% efficient furnaces and insulating residences with newer windows and doors.
- **Hosting Meeting with Utility Commission:** We are hosting a meeting with the Michigan Public Service Commission please reach out to your respective sales contact to attend.

Eversource

- **US Election Implications:** Ahead of the election, BOEM was busy with offshore E&P permitting as the gulf of Mexico E&P producers were accelerating permit application in fear of a Biden executive order. This was slowing down the permitting timeline for off shore wind. Now that the election is over, the E&P related workload for BOEM is likely to slow which increase capacity for BOEM to handle off shore wind project. In addition, the Biden administration is likely to improve the resourcing for BOEM, which is also positive. This dynamic is positive for Eversource in our view.

- **Solar to Be Added to Rate Base at NSTAR Electric:** Recent legislation in MA will allow for rate based solar generation at NSTAR. ES plans to add 230MW of solar which is budgeted to be ~$400-$500m investment and will take place over the next 4-5 years. We would note that the legislation has not yet been signed into law but has been approved by both the House and Senate in the Commonwealth.
- **International Oil Companies (IOCs) Enter Offshore Wind Conversation, ES Pledges Discipline:** The recent NYS RFP included bids from AGR, ES and Equinor. In our premium research report (Global Offshore Wind - Change is in the Air), we argue that the competition is likely to drive down returns for all offshore wind developers. In our meeting with ES management, they reiterated their disciplined approach and they are not going to bid for the sake of gaining market share. The Vineyard wind decision due this Friday will be a good read through for ES projects. In 2021 management is hopeful they get NOIs for Revolution and Sunrise Wind projects.
- **Supply Chain Considerations and the Jones Act:** Offshore construction will involve a combination of European construction vessels while using US barges for material deliveries from the Deepwater Port in New London. The sea floor lease is also ~70 miles from the port of New London, which is closer proximity relative to competitor leases. As for the turbine technology, the wind turbines will likely be upgraded to 11MW turbines from the originally planned 6MW.
- **MA Gas Economics** – There is good visibility for earnings power at MA Gas. As part of the transaction approval process, the regulator approved rate increases in Nov. 2021 and 2022 as well as a true-up to rate base in 2024.

Entergy

- **Company-Wide Storm Costs ~$2B YTD:** The bulk of the $2B is in LA, some is from Zeta, a small amount is in Texas and very small amount is in Arkansas and Mississippi. ETR is in the process of collecting invoices and gathering information around the damages of Hurricanes Laura and Zeta. By Q1'21 they will file for approval for recovery of these damages in hopes to securitize the costs and minimize the impact to customer bills. As it stands now, storm escrow accounts in LA have been used up and will need to be replenished. In the near term the storm escrows are being replenished with callable debt issuances, so that they may be taken out once securitization is in place. In Texas it will likely be the case that ETR seeks cost recovery through T&D riders.
- **Equity Plan – ATM Focused Future:** ETR's financing plan does not call for equity until the end of 2021. Traditionally they have issued equity in blocks but they intend to issue ATM on their next issue. They will also be soliciting shareholders via proxy to seek approval for preferred or hybrid issuances in the future.
- **Louisiana PSC Election:** The biggest impact of the Election is the in Louisiana were a runoff remains. District 1 - Incumbent Eric Skrmetta (Republican) will face off Allen Borne Jr (Democrat) in a run-off election on Dec. 5.

- **PPA Buyouts:** While it has not been talked about for ETR, peers are buying out high cost PPAs. Our view is that rate basing legacy PPAs could prove to be a viable option of growing their business while keeping customer bills low. Below we detail the legacy PPA projects. It might not drive material accretion for ETR, but we wonder why they have a PPA in service since 1968.

Figure 1. Entergy Legacy PPAs

PPA Projects - Pre 2020

Plant	Capacity (MW)	In Service
Toledo Bend (LA)	41.0	1968
Vidalia Hydro (LA)	114.0	1990
Agrilectric (biomass) (LA)	9.0	2013
Rain CII (waste heat) (LA)	27.0	2013
Montauk (biomass) (LA)	3.0	2014
Blakely Degray Hydro (AR)	160.0	2016
Stuttgart Solar (AR)	81.0	2017

Source: Citi Research, Company Filings

- **Hydrogen Is Real Commercial Opportunity for Entergy:** Given the industry user base in the USGC, it is logical that the industrial customers in ETR service territory are inclined to exposure increased consumption of hydrogen.

- **Cost Management through Challenging Load Environment:** ETR highlighted their ability to manage load decline through cost management and the various levers they can pull to achieve their earnings targets. Some of these levers they included are the continuity of remote through June of 2021 and deferrals of plant outages. Recall that on the Q1'20 earnings call the management team illustrated $100m of O&M savings for 2020. Management believes the majority of these savings to be sustainable.

- **Rating Agency Discussions:** Following the storms, ETR had discussions with the rating agencies. Moody's has opined that they do not expect ETR to hit target credit ratios until 2022, while S&P upgraded their business risk profile and lowered FFO/Debt threshold to 13% from 14%.

- **Renewal of FRP** – ETR benefits from forward test years and true-up mechanisms in ARK and LA through their annual Formula Rate Plan Filings. In Arkansas, they plan to file a settlement for new rates by Dec. 4th. There remains a run-off election for a seat on LA public service commission and that has delayed the FRP process. The commission will rule in February on the FRP, once the election has concluded.

Covered companies mentioned: (CMS.N; US$67.01; 2; 11 Nov 20; 16:00); (CNP.N; US$24.07; 2; 11 Nov 20; 16:00); (DTE.N; US$130.06; 1; 11 Nov 20; 16:00); (ED.N; US$81.72; 2; 11 Nov 20; 16:00); (ES.N; US$94.42; 2; 11 Nov 20; 16:00); (ETR.N; US$109.83; 2; 11 Nov 20; 16:00); (NI.N; US$24.64; 2; 11 Nov 20; 16:00); (PCG.N; US$10.71; 1H; 11 Nov 20; 16:00); (PNM.N; US$49.09; 1; 11 Nov 20; 16:00); (PPL.N; US$29.41; 2; 11 Nov 20; 16:00); (AEP.O; US$91.15; 2; 11 Nov 20; 16:00)

Analyst Certification

The research analysts primarily responsible for the preparation and content of this research report are either (i) designated by "AC" in the author block or (ii) listed in bold alongside content which is attributable to that analyst. If multiple AC analysts are designated in the author block, each analyst is certifying with respect to the entire research report other than (a) content attributable to another AC certifying analyst listed in bold alongside the content and (b) views expressed solely with respect to a specific issuer which are attributable to another AC certifying analyst identified in the price charts or rating history tables for that issuer shown below. Each of these analysts certify, with respect to the sections of the report for which they are responsible: (1) that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc. and its affiliates; and (2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this report.

IMPORTANT DISCLOSURES

Citigroup Global Markets Inc. or its affiliates has a net long position of 0.5% or more of any class of common equity securities of American Electric Power Co Inc, PNM Resources.

Within the past 12 months, Citigroup Global Markets Inc. or its affiliates has acted as manager or co-manager of an offering of securities of Consolidated Edison, Inc., CMS Energy Corporation, American Electric Power Co Inc, Eversource Energy, NiSource Inc, PG&E Corp, Entergy Corporation, DTE Energy Co, PPL Corp, PNM Resources.

Citigroup Global Markets Inc. owns a position of 1 million USD or more in the debt securities of CenterPoint Energy Inc, CMS Energy Corporation, American Electric Power Co Inc, Eversource Energy, NiSource Inc, PG&E Corp, DTE Energy Co.

Citigroup Global Markets Inc. or its affiliates has received compensation for investment banking services provided within the past 12 months from CenterPoint Energy Inc, Consolidated Edison, Inc., CMS Energy Corporation, American Electric Power Co Inc, Eversource Energy, NiSource Inc, PG&E Corp, Entergy Corporation, DTE Energy Co, PPL Corp, PNM Resources.

Citigroup Global Markets Inc. or its affiliates expects to receive or intends to seek, within the next three months, compensation for investment banking services from Consolidated Edison, Inc..

Citigroup Global Markets Inc. or an affiliate received compensation for products and services other than investment banking services from CenterPoint Energy Inc, Consolidated Edison, Inc., CMS Energy Corporation, American Electric Power Co Inc, Eversource Energy, NiSource Inc, PG&E Corp, Entergy Corporation, DTE Energy Co, PPL Corp, PNM Resources in the past 12 months.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as investment banking client(s): CenterPoint Energy Inc, Consolidated Edison, Inc., CMS Energy Corporation, American Electric Power Co Inc, Eversource Energy, NiSource Inc, PG&E Corp, Entergy Corporation, DTE Energy Co, PPL Corp, PNM Resources.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, securities-related: CenterPoint Energy Inc, Consolidated Edison, Inc., CMS Energy Corporation, American Electric Power Co Inc, Eversource Energy, NiSource Inc, PG&E Corp, Entergy Corporation, DTE Energy Co, PPL Corp, PNM Resources.

Citigroup Global Markets Inc. currently has, or had within the past 12 months, the following as clients, and the services provided were non-investment-banking, non-securities-related: CenterPoint Energy Inc, Consolidated Edison, Inc., CMS Energy Corporation, American Electric Power Co Inc, Eversource Energy, NiSource Inc, PG&E Corp, Entergy Corporation, DTE Energy Co, PPL Corp, PNM Resources.

Citigroup Global Markets Inc. and/or its affiliates has a significant financial interest in relation to CenterPoint Energy Inc, Consolidated Edison, Inc., CMS Energy Corporation, American Electric Power Co Inc, Eversource Energy, NiSource Inc, PG&E Corp, Entergy Corporation, DTE Energy Co, PPL Corp, PNM Resources. (For an explanation of the determination of significant financial interest, please refer to the policy for managing conflicts of interest which can be found at www.citiVelocity.com.)

Disclosure for investors in the Republic of Turkey: Under Capital Markets Law of Turkey (Law No: 6362), the investment information, comments and recommendations stated here, are not within the scope of investment advisory activity. Investment advisory service is provided in accordance with a contract of engagement on investment advisory concluded between brokerage houses, portfolio management companies, non-deposit banks and clients. Comments and recommendations stated here rely on the individual opinions of the ones providing these comments and recommendations. These opinions may not fit to your financial status, risk and return preferences. For this reason, to make an investment decision by relying solely to this information stated here may not bring about outcomes that fit your expectations. Furthermore, Citi Research is a division of Citigroup Global Markets Inc. (the "Firm"), which does and seeks to do business with companies and/or trades on securities covered in this research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report, however investors should also note that the Firm has in place organisational and administrative arrangements to manage potential conflicts of interest of this nature.

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For securities recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in the issuers' financial instruments and may act as principal in connection with such transactions. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

The Firm is a market maker in the publicly traded equity securities of CenterPoint Energy Inc, Consolidated Edison, Inc., CMS Energy Corporation, American Electric Power Co Inc, Eversource Energy, NiSource Inc, PG&E Corp, Entergy Corporation, DTE Energy Co, PPL Corp.

Unless stated otherwise neither the Research Analyst nor any member of their team has viewed the material operations of the Companies for which an investment view has been provided within the past 12 months.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 30th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Pursuant to the Market Abuse Regulation a history of all Citi Research recommendations published during the preceding 12-month period can be accessed via Citi Velocity (https://www.citivelocity.com/cv2) or your standard distribution portal. Historical disclosures (for up to the past three years) will be provided upon request.

Citi Research Equity Ratings Distribution

	12 Month Rating			*Catalyst Watch*		
Data current as of 30 Sep 2020	**Buy**	**Hold**	**Sell**	**Buy**	**Hold**	**Sell**
Citi Research Global Fundamental Coverage	55%	34%	11%	22%	68%	9%
% of companies in each rating category that are investment banking clients	65%	62%	59%	68%	62%	68%

Guide to Citi Research Fundamental Research Investment Ratings:
Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.
Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.
Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The target price is based on a 12 month time horizon. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Analysts may place covered stocks "Under Review" in response to exceptional circumstances (e.g. lack of information critical to the analyst's thesis) affecting the company and / or trading in the company's securities (e.g. trading suspension). As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. To satisfy regulatory requirements, we correspond Under Review and Neutral to Hold in our ratings distribution table for our 12-month fundamental rating system. However, we reiterate that we do not consider Under Review to be a recommendation. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At other times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations from specified ranges will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Catalyst Watch Upside/Downside calls:
Citi Research may also include a Catalyst Watch Upside or Downside call to highlight specific near-term catalysts or events impacting the company or the market that are expected to influence the share price over a specified period of 30 or 90 days. A Catalyst Watch Upside (Downside) call indicates that the analyst expects the share price to rise (fall) in absolute terms over the specified period. A Catalyst Watch Upside/Downside call will automatically expire at the end of the specified 30/90 day period; the analyst may also close a Catalyst Watch call prior to the end of the specified period in a published research note. A Catalyst Watch Upside or Downside call may be different from and does not affect a stock's fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of FINRA ratings-distribution-disclosure rules, a Catalyst Watch Upside call corresponds to a buy recommendation and a Catalyst Watch Downside call corresponds to a sell recommendation. Any stock not assigned to a Catalyst Watch Upside or Catalyst Watch Downside call is considered Catalyst Watch Non-Rated (CWNR). For purposes of FINRA ratings-distribution-disclosure rules, we correspond CWNR to Hold in our ratings distribution table for our Catalyst Watch Upside/Downside rating system. However, we reiterate that we do not consider CWNR to be a recommendation. For all Catalyst Watch Upside/Downside calls, risk exists that the catalyst(s) and associated share-price movement will not materialize as expected.

NON-US RESEARCH ANALYST DISCLOSURES
Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account. The legal entities employing the authors of this report are listed below (and their regulators are listed further herein):

Citigroup Global Markets Inc	Ryan Levine; Timm Schneider; Willard A Grainger; George G Wang

OTHER DISCLOSURES

Any price(s) of instruments mentioned in recommendations are as of the prior day's market close on the primary market for the instrument, unless otherwise stated.

The completion and first dissemination of any recommendations made within this research report are as of the Eastern date-time displayed at the top of the Product. If the Product references views of other analysts then please refer to the price chart or rating history table for the date/time of completion and first dissemination with respect to that view.

Regulations in various jurisdictions require that where a recommendation differs from any of the author's previous recommendations concerning the same financial instrument or issuer that has been published during the preceding 12-month period that the change(s) and the date of that previous recommendation are indicated. For fundamental coverage please refer to the price chart or rating change history within this disclosure appendix or the issuer disclosure summary at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Citi Research has implemented policies for identifying, considering and managing potential conflicts of interest arising as a result of publication or distribution of investment research. A description of these policies can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

The proportion of all Citi Research research recommendations that were the equivalent to "Buy","Hold","Sell" at the end of each quarter over the prior 12 months (with the % of these that had received investment firm services from Citi in the prior 12 months shown in brackets) is as follows: Q3 2020 Buy 33% (69%), Hold 43% (63%), Sell 23% (58%), RV 0.7% (87%); Q2 2020 Buy 33% (68%), Hold 43% (62%), Sell 24% (60%), RV 0.7% (88%); Q1 2020 Buy 33% (68%), Hold 43% (60%), Sell 24% (57%), RV 0.6% (85%); Q4 2019 Buy 32% (68%), Hold 44% (61%), Sell 24% (56%), RV 0.8% (90%). For the purposes of disclosing recommendations other than for equity (whose definitions can be found in the corresponding disclosure sections), "Buy" means a positive directional trade idea; "Sell" means a negative directional trade idea; and "Relative Value" means any trade idea which does not have a clear direction to the investment strategy.

European regulations require a 5 year price history when past performance of a security is referenced. CitiVelocity's Charting Tool (https://www.citivelocity.com/cv2/#go/CHARTING_3_Equities) provides the facility to create customisable price charts including a five year option. This tool can be found in the Data & Analytics section under any of the asset class menus in CitiVelocity (https://www.citivelocity.com/). For further information contact CitiVelocity support (https://www.citivelocity.com/cv2/go/CLIENT_SUPPORT). The source for all referenced prices, unless otherwise stated, is DataCentral, which sources price information from Thomson Reuters. Past performance is not a guarantee or reliable indicator of future results. Forecasts are not a guarantee or reliable indicator of future performance.

Investors should always consider the investment objectives, risks, and charges and expenses of an ETF carefully before investing. The applicable prospectus and key investor information document (as applicable) for an ETF should contain this and other information about such ETF. It is important to read carefully any such prospectus before investing. Clients may obtain prospectuses and key investor information documents for ETFs from the applicable distributor or authorized participant, the exchange upon which an ETF is listed and/or from the applicable website of the applicable ETF issuer. The value of the investments and any accruing income may fall or rise. Any past performance, prediction or forecast is not indicative of future or likely performance. Any information on ETFs contained herein is provided strictly for illustrative purposes and should not be deemed an offer to sell or a solicitation of an offer to purchase units of any ETF either explicitly or implicitly. The opinions expressed are those of the authors and do not necessarily reflect the views of ETF issuers, any of their agents or their affiliates.

Citigroup Global Markets India Private Limited and/or its affiliates may have, from time to time, actual or beneficial ownership of 1% or more in the debt securities of the subject issuer.

This communication is directed at persons who are "Eligible Clients" as such term is defined in the Israeli Regulation of Investment Advice, Investment Marketing and Investment Portfolio Management law, 1995 (the "Advisory Law"). Within Israel, this communication is not intended for retail clients and Citi will not make such products or transactions available to retail clients. The presenter is not licensed as investment advisor or marketer by the Israeli Securities Authority ("ISA") and this communication does not constitute investment or marketing advice. The information contained herein may relate to matters that are not regulated by the ISA. Any securities which are the subject of this communication may not be offered or sold to any Israeli person except pursuant to an exemption from the Israeli public offering rules, including according to the Israeli Securities Law.

Citi Research generally disseminates its research to the Firm's global institutional and retail clients via both proprietary (e.g., Citi Velocity and Citi Personal Wealth Management) and non-proprietary electronic distribution platforms. Certain research may be disseminated only via the Firm's proprietary distribution platforms; however such research will not contain changes to earnings forecasts, target price, investment or risk rating or investment thesis or be otherwise inconsistent with the author's previously published research. Certain research is made available only to institutional investors to satisfy regulatory requirements. Individual Citi Research analysts may also opt to circulate published research to one or more clients by email; such email distribution is discretionary and is done only after the research has been disseminated. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Rule 598 and ASIC Regulatory Guide 264, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and

these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Where a component of a published trade idea is subject to a restriction, the trade idea will be removed from any list of open trade ideas included in the Product. Upon the lifting of the restriction, the trade idea will either be re-instated in the open trade ideas list if the analyst continues to support it or it will be officially closed. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

Awaiting key PA rate case outcome & other renewable strategy updates

Reiterate Rating: BUY | PO: 25.00 USD | Price: 22.22 USD

PA rate case order possible this Thurs (2/4)

We are flagging that an order may be issued on NI's PA rate case (Columbia Gas of PA) at the PA PUC meeting this Thurs. (2/4) – look for Thursday's official PA PUC agenda released on Weds (2/3) after 3pm ET. If the order is *not* issued on Thurs, it will likely be announced at the Feb. 25th meeting, subsequent to NI's 4Q EPS call on Feb 17th, barring a settlement. Hence, we perceive mgmt. is likely pushing to have this case resolved ahead of the EPS call driving or a resolution sooner than later (at Thursday's meeting or via settlement). To recap the latest on the PA case: after the ALJ's recent denial of NI's rate increase request in PA, which was a essentially a broad statement against raising rates amid a pandemic, NI filed an exception letter with the PUC rebutting the ALJ's denial rec. NI's exception letter offered a softened request, including a 9.86% ROE (vs 10.95% ROE requested inclusive of 20bps mgmt. performance adder) and added the phasing in of rates in '21 (50% in Jan & 50% in July) to appease the ALJ's concerns around a rate hike all at once amid COVID. NI also included an alternative revenue program, allowing revenue bookings in line with the total revenue requirement despite the phase in of rates creating no EPS impact, but small CF impact. Bottom line, NI's revised rate request in the exception letter is roughly in line with Staff's original rec of $76mn rate increase, which Staff reinforced by also submitting its own exception letter to the commission reiterating Staff's previous rec. Critically, other utilities such as UGI and AWK have had rate increases authorized in PA in 2020 during the pandemic.

$50-60mn rate increase baked into '21 guide

We continue to estimate ~$50-60mn rate increase is baked into NI's '21 guidance (vs original $100mn requested & Staff's $76mn rec) given NI's history of receiving 50-60% of rate requests in PA rate cases. However, we acknowledge that if the commission's order aligns with the ALJ there would be clear risk to '21 EPS – a maximum of 10c of '21 EPS at risk excluding likely O&M partial offsets vs '21 EPS guidance midpoint of $1.32 (every $5mn less of revenue requirement = -1c of EPS ex offsets). This implies a risk of up to 9% negative revisions to consensus EPS estimates. Note PUC has four commissioners with two republicans and two democrats. Net net, we still believe the fact pattern favors NI in this rate case. Reiterate Buy as we believe NI shares continue to present a differentiated play on the wide relative discount in Gas LDCs with M&A optionality, and renewables upside in rate base. We still arrive at >17% total return potential in our SOTP where we apply 2x discount (vs. peers) to Columbia Gas of PA to account for ongoing rate case risk.

1st two renewable projects online & await more BOT JVs

Separately, we highlight NI's subsidiary, NIPSCO Electric announced that it's first two wind projects in IN are online – Rosewater Wind (102MW BoT JV with EDP Renewables and TE) and Jordan Creek Wind (400MW 20-yr PPA). NIPSCO now has seven remaining renewables projects to bring online as part of the renewable strategy plus those yet to be announced. Note NI has procured a total of 2,445 MW (1,930MW net to NIPSCO), and we estimate this equates to ~$1.25bn in capex net to NIPSCO out of the guided $1.8-2.0bn of renewable strategy capex implying several renewable projects (primarily BOT JVs) likely announced in the coming months (potentially some ahead of 4Q call).

Price objective basis & risk

NiSource Inc (NI)

Our $25 PO is based on a sum of the parts valuation. We value each gas and electric utility separately using 2023 forward P/E multiples of 14.3 for gas utilities and 16.2x for electric utilities with a 2.0x premium for the electric utility's strong growth rates and incremental renewable buildout with capex beginning in '22, but acknowledge industrial risk. Also, we now assign a 3x M&A premium to the VA, KY and MD gas utilities to account for their M&A premium. We apply a -2x discount to PA to account for rate case risk in the next few weeks after ALJ denied the company's request late last year. We note that electric / gas peer P/E multiples are grossed up by 5% to reflect capital appreciation across the sector. We subtract the value of excess holding company debt at the parent not supporting the utility opcos. We believe NI's 5-7% EPS/dividend growth outlook, attractive regulated earnings profile and constructive legislation across NI's service territories are under-estimated given its discounted multiple versus peers.

Downside risks to our PO are a sustained period of economic weakness pressuring customer growth, interest rate increases, high natural gas prices, financing plan updates, unforeseen costs associated with the MA incident, and challenging steel production economics in Indiana.

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2020)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	1863	56.90%	Buy	1185	63.61%
Hold	686	20.95%	Hold	426	62.10%
Sell	725	22.14%	Sell	358	49.38%

* Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

General Investment Related Disclosures:
Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.
This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering

document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

UK Readers: The protections provided by the U.K. regulatory regime, including the Financial Services Scheme, do not apply in general to business coordinated by BofA Securities entities located outside of the United Kingdom.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein.
